Subject: more water for the fish

i do not fish. love to eat them tho. but my family and i always felt the magic of seeing a trout or other fish in the Stanislaus. they were here before us and they can not speak or send emails, so i will speak for them. give them the water sufficient for them to swim in from the ocean. you have our o k to do this.

i save water from my sink , to put in a toilet, i wash less, i lecture kids and others on the power of water. it is life to us and to the fish. do the ethical vote for these gentle swimming creatures that never kill. we do the killing and the restricting of their habitate. please speak for the trout and salmon and others. show the world that we care for the creatures. sincerely a mother of three sons in their 50's, a grandson in his teens and a great grandson of 2. i urge you for our generations to come.
