**Subject:** "Comment Letter – 2016 Bay-Delta Plan Amendment & SED."

Hi:

We need to maintain at least 60% of river flows to the SF Bay to maintain salmon populations. I grew up on bay in Point Richmond spending much of my childhood on the beach there. I can tell you from first hand experience that the intertidal zones are now dominated by ocean species that have replaced brackish water species which formerly dominated the beaches. I know first hand that the bay needs more fresh water to matin its estuarine ecosystems.

Regards
