---

Dear Ms Townsend, Clerk to the Board,

Could you please include my comments/input regarding the proposed changes to the water quality requirements for the SF Bay Delta/South Delta.

I have boated in this area for many years and the situation there is not good and getting worse. Please increase water flows in the San Joaquin River and do not allow the salinity level standards to be weakened so the water becomes more salty/brackish.

Thank you.

Kyunghee Kim
