Subject: Comment letter on 2016 Bay-Delta
Plan Amendment & SED

For the ecosystem of the Bay and Delta there must be a permanent reduction of water exports to protect the Delta. The San Joaquin River must reach Chipps Island in order to restore, protect, and preserve the entire estuary.

Salinity incursions upstream are destructive to the biotic community.

Water quality standards must be protected for agriculture, drinking water, municipal discharge, fisheries, and ground water recharge.

It is important that we do this. That we get it right and not sacrifice the Bay and Delta with unsustainable water exports.

Yours truly,

Martha Breed
