Subject: Comment Letter – 2016 Bay-Delta Plan Amendment
Date: Thursday, March 16, 2017 8:45:25 PM

How can anybody think that 2 40 diameter tunnels 100 feet deep across the Delta capturing all the water from the Sacramento River and putting it in the aqueduct headed south leaving the California delta a brackish dead marsh could be a good idea !!!

What a disgrace to the Mighty Sacramento River and the California delta for what almonds and pomegranates !!!!

This plan dose not make more water or Store more water it just takes all the fresh water

Why don't they take there billions of dollars go south down the valley and dig a real big hole cover it with the biggest solar farm in the World and when it rains real hard fill it with water form the aqueduct and put it back in the aqueduct in the summer

southern CA needs more desalination

Store,desalination, conserve

Do something we can be Proud of for long term

and when there's a drought humans rivers and fresh water deltas come first not almonds are pomegranates
