Subject: Our water rights!!
Date: Friday, October 28, 2016 4:55:11 PM

Sent from Windows Mail We are tired of our water being shipped to everyone else in the state. We live in the foothills where the water comes from and e don't have enough for ourselves Wells are drying up and lakes and storage facilities are far from being full and you want to give ll the water to the Big City Money people that buy their way through the system. Make them fix their on problems by helping us build more storage areas so we can all haveve water equally.
