RE: 2016 Bay-Delta Plan Amendment & SED

Estimada Sra. Marcus,

Firmemente opongo el propuesto Plan Bay-Delta del Departamento Estatal de Recursos de Agua.

Habiendo crecido en una granja con familia trabajando en el campo, vi de primera como el abastecimiento de agua es vital para nuestra region y sin dudas valor para nuestra comunidad incluyendo la sostenibilidad, la produccion Agricola, procesamiento Agricola, todo negocio Agricola, para una base economica y la recarga de agua subterraneas y agua asequible para la comunidad.

Desafortunadamente, este propuesto no ha considerado los efectos y gran impacto que el aumento del flujo de agua le resultara a nuestra region especialmente sobre los trabajadores agricolas que dependen en nuestras raices agricolas para proveer para sus familias y la comunidad. Como fue afirmado en la audiencia en Modesto el 20 de Diciembre, "No Agua, no vegetales o frutas,....no campesinos, no cocecha, no comida....sin campesinos...ho hay comida.

No apoyare esta propuesta que pone en peligro la sostenibilidad de agua en nuestra region, y al futuro de mis hijos y mis nietos.

Atentamente,

A handwritten signature in black ink, appearing to read "Celia Aceves".

RE: 2016 Bay-Delta Plan Amendment & SED

Dear Ms. Marcus,

I am firmly opposed to the State Water Resources Control Board's Bay-Delta Plan.

As someone who was raised on a farm and with a family that worked in the fields, I saw firsthand how the water supply is vital to our region. Without a doubt, I also saw its value as an economic base, which includes sustainability, agricultural production, agricultural processing, and for any agricultural business. It's also vital for the recharge of groundwater and affordable water for the community.

Unfortunately, this proposal has not considered the effects and great impact that the water flow increase will have on our community, especially on the agricultural workers who depend on our agriculture roots to provide for our families and the community. As it was stated at the December 20 hearing in Modesto, "No water, no vegetables or fruits... no farmers, no harvest... without field workers... there's no food.

I will not support this proposal that jeopardizes the water sustainability in our region and the future of my children and grandchildren.

Sincerely,

Celia Aceves
