From:Deborah FilipelliTo:commentlettersSubject:Phase 1 Bay-Delta Water Quality Control PlanDate:Sunday, February 19, 2017 2:44:26 PM

TO: The State Water Board

The following represents my position in strong support that Phase 1 of the Bay-Delta Water Quality Control Plan must follow these points.

1) A permanent reduction of exports must happen to protect the Delta. What is the true efficacy of this update to San Joaquin flow standards if water exports from the Delta are not going to be dealt with? The San Joaquin River must reach Chipps Island in order to restore, protect, and preserve the entire estuary. If unsustainable water exports are not dealt with, we worry that water quality and quantity objectives for the Delta will never be met.

2) I do not want to see a weakening of salinity standards in the South Delta. Water quality standards must be protected for drinking water, agriculture, municipal discharge, fisheries, recreation, and ground water recharge, and to reduce the future risk of increased harmful algal blooms that are toxic to humans, dogs, fish, and wildlife in south Delta channels.

3) The State Water Board must consider environmental justice communities in terms of drinking water and domestic use. Phase 1 Recirculated Draft SED fails to consider environmental justice communities in chapters 5 and 9 (hydrology/water quality and groundwater).

4) I believe that water flows on the San Joaquin River must be adequate to restore and protect fisheries—and to protect the public trust value of the Bay-Delta estuary. A 40% restoration of flows will not accomplish this end. Science tells us that we need 60% of flows restored on the San Joaquin River for the health of the Bay-Delta.

Deborah Filipelli, PhD P.O. Box 341 The Sea Ranch, CA 95497

List of Submitters: Restore the Delta-Petition

The following people submitted the same petition or a letter of similar text. The State Water Board received a total of approximately 4,139 unique signatures and/or copies of this petition.
