So look at the mess you folks have us in. You can not take care of a dam why do you think you are correct it taking more of out water and save fish. Turn the water business over to the districts that have a hand on it. work with them in trying to solve the issue. the issue it self is in question ? Fishbio has spent a lot of time on this and your folks do not even consider the results they came up with.

Enough is enough. We will fight you every part of the way. But as usual the government likes to spend our money on lawyers instead of thing that really matter, Dam maintenance, Levy erosion that kind of stuff.
