Thank you Melissa. My review is with Susan now. I will keep you update after Joe's comments.

Hi Dania,
I queried the CalPIP webpage for the ESJWQC counties (Merced, Madera, Tuolumne, Stanislaus, Mariposa and Calaveras) and there was no reported ag use of any products containing arsenic including sodium cacodylate in 2008 or 2009.

Good morning Melissa,

Thank you for the information. Have you had a chance to look for the PUR information for "sodium cacodylate" for 2008 and 2009? This is the last piece of information that I need to complete my review.

Thank you

Dania

Subject: Definitions - Confirmation

Melissa,

Could you please confirm the definitions of "High TSS for Storm Event" and "High TSS for Irr. Event"?

High TSS for Storm Event = When the storm event is predicted to bring 0.25 inches or greater of precipitation within a 24-hour period.

High TSS for Irr. Event= After the start of the peak irrigation season during high flows in irrigation canals (June/July/August)

Thank you

Dania
