**Subject:** Upcoming Regional Water Board Sampling

Dear Coalition Managers,

I am sending this email to let you know that Central Valley Water Board staff in the Mercury TMDL Unit are working with Moss Landing Marine Laboratories staff to sample a variety of agricultural drains and ag-dominated water bodies in the periphery of the Delta, Sacramento Basin, and San Joaquin Basin during the upcoming late summer and early fall (2011). The TMDL staff plan to have the samples analyzed to determine if methylmercury is present and will share the results with you if you are interested. Water samples will be collected only at locations that are accessible to the public.

If you have questions about the sampling effort, please do not hesitate to contact Janis Cooke ([jcooke@waterboards.ca.gov](mailto:jcooke@waterboards.ca.gov), 916-464-4672).

Sincerely,  
Susan

Susan Fregien, Senior Environmental Scientist
