Subject: Re: SJR OPTMDL ESJWQC Field Exceedance Report-March 2012

Dear Mike and Rachel,

Thank you for the field exceedance report and the photos from the first quarter TMDL monitoring event of 2012.

Just a reminder, as you are probably already aware, that instead of quarterly sampling, monthly monitoring of San Joaquin River compliance sites will be required from May to August 2012. Changes in the diazinon/chlorpyrifos TMDL monitoring schedule for the 2012 calendar year monitoring were outlined in an 3/16/12 e-mail from Joe Karkoski to Parry Klassen and Joe McGahan, and a letter from the Executive Officer is in the works.

Best regards,

Jelena

Dear Jelena,

On March 15, 2012 Total Maximum Daily Load (TMDL) monitoring was conducted by ESJWQC at three compliance sites on the San Joaquin River. This was considered the first quarter monitoring event of 2012. During sampling, field parameters were measured. There were exceedances of receiving water limitations for specific conductance (SC) during this sampling event. See attached Table 1 for details with associated discharge from the CDEC website. Site pictures taken from each of the monitoring sites during this event are also attached to this email as a pdf. Scanned copies of the field sheets are available upon request.

Field parameters will be measured again at these sites during the next monitoring event in the second quarter of 2012.

Mike Johnson

Thanks,

~~~~~
