SUBJECT: Revisions of the ESJWQC database due to correction of the April 2011 APPL lab report

FILE: ESJWQC file

SUMMARY OF COMMUNICATION:

On 30 April 2012, Rachel West of the Michael L. Johnson, LLC contacted staff to ask if an update to the database resulting from a correction to an April 2011 APPL laboratory report could be submitted with the June Quarterly Data Report.

Previously one exceedance and multiple detections of azynphos methyl were reported as false positives were not screened by omission. The APPL laboratory report was recently revised due to an error and azynphos methyl results for samples from Berenda Slough along Ave 18 1/2 were revised to non-detect (ND). Staff confirmed that submission of electronic data deliverable in June would be an appropriate way to update the database.

CONCLUSIONS, ACTION TAKEN OR REQUIRED:

The update to the ESJWQC database where azynphos methyl detections and one exceedance are revised to ND will be submitted with the Quarterly Data Report in June.
