Hello Jelena,

We have received pesticide data from APPL through September 2012. There have been no exceedances or detections of chlorpyrifos in any ESJ sample so far this year.

Thank you,
Rachel

Dear Rachel,

Have you received results of the pesticide analyses on samples collected on 14 August 2012?

The exceedance report for *E. coli*, nutrients, metals and inorganics was received a couple of weeks ago, and if I remember correctly APPL reports usually lag behind the Caltest reports a bit. Not hearing about pesticide results could mean that there were no exceedances or that the results are not in yet. I'm just checking because elevated chlorpyrifos concentration was measured at a site just upstream of the TMDL compliance site SJR @ Maze Blvd in a sample collected in August by the Westside Coalition.

Please let me know,

Jelena

Subject: ESJWOC E.coli, Nutrients, Inorganics and Metals- August 2012

Dear Jelena,

As required in the Monitoring and Reporting Program (Order No. R5-2008-0005) for Coalition Groups, an Exceedance Report is being submitted to address the following issues a) the exceedances, b) the follow-up monitoring, and c) any analysis or other actions the Coalition Group may take to address the exceedance.

a.) On August 14, 2012, Normal Monitoring (NM) and Management Plan Monitoring (MPM) were conducted in the ESJWQC region. Water was collected for the analysis of physical parameters, nutrients and metals. Final data for this event were received from the laboratory on October 11, 2012. Exceedances of receiving water limitations for total dissolved solids (TDS) and ammonia occurred. Details on the sites and constituents sampled and associated exceedances are provided in an excel spreadsheet attached to this email. Raw data are available upon request. Site pictures and flow data from this event were provided by email on August 20, 2012, and are available on the MLJ-LLC sharepoint website (<http://sharepoint.mlj-llc.com/MLJ-DB/database/forms/allitems.aspx>, username: ftpuser@aqualab.mlj-llc.com, password: Aqua2011!).

b.) Sampling occurred at sites in the ESJWQC region again on September 11 and October 9, 2012.

c.) All new exceedances requiring Management Plans as well as Management Plan Monitoring results will be evaluated in the ESJWQC Annual Management Plan Update Report due April 1, 2013.

Michael Johnson

Thanks,
