Subject: napa proposed regulations

Hello Mike Napolitano,

I think the proposed regulations for the Napa River watershed are good and reasonable.

In general, I am for the strictest regulations possible regarding agrichemical/sediment runoff into the river system. I agree with others that some kind of plan monitoring needs to be in place here as well.

I do hope this proposal goes through and am glad that you feel positive about the will of Napans to make a difference.

Thanks very much.

Robin Ellison
