

**Table 7.1.1-1 Benchmark Factors**

<b>Number of Data Requirements Satisfied <sup>a</sup></b>	<b>Benchmark Factor <sup>b</sup></b>
2	16
3	14
4	14
5	12
6	10
7	8

Notes:

<sup>a</sup> U.S. EPA water quality criteria guidelines require data for at least eight taxonomic families to derive water quality criteria.

<sup>b</sup> These values apply only when both daphnid and salmonid toxicity data are available. U.S. EPA typically requires such data to register a pesticide.
