

STATE OF CALIFORNIA  
CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD  
SAN FRANCISCO BAY REGION

STAFF SUMMARY REPORT (Selina Louie)  
Meeting Date: March 8, 2006

ITEM: 5B

SUBJECT: City of American Canyon, Napa County - Rescission of Waste Discharge Requirements/NPDES Permit for the City's Stormwater Pollution Prevention Program

CHRONOLOGY: January 2000 – Stormwater Permit issued

DISCUSSION: The attached Tentative Order rescinds the stormwater permit for the City of American Canyon because the permit is no longer needed. This Order was originally adopted to allow pollution trading between the City's then new sewage treatment plant and its stormwater program. Since then, there has been no need for pollution trading because the treatment plant has met all of its limits.

American Canyon received coverage for its stormwater discharge under the State Board's on January 10, 2006. This Permit, generally called the Phase 2 Municipal Stormwater Permit, is designed for smaller cities and is appropriate for American Canyon. American Canyon has joined Napa County and the other cities in Napa County for a coordinated county wide stormwater program.

RECOMMENDATION: Adoption of Tentative Order

File No. 2139.3126

Appendix: Tentative Order
