

Table 7.1.1-1 Benchmark Factors

Number of Data Requirements Satisfied^a	Benchmark Factor^b
2	16
3	14
4	14
5	12
6	10
7	8

Notes:

^a U.S. EPA water quality criteria guidelines require data for at least eight taxonomic families to derive water quality criteria.

^b These values apply only when both daphnid and salmonid toxicity data are available. U.S. EPA typically requires such data to register a pesticide.
