

Table 7.3.1-2 Total Maximum Daily Load of Pathogens Indicators for Tomales Bay and its Tributaries

Waterbody	Indicator Parameter	TMDL (Most Probable Number (MPN) of fecal coliforms per 100 mL of water)
Tomales Bay	Fecal coliform	Median < 14 ^a 90th Percentile < 43 ^b
Major Tributaries: Walker Creek Lagunitas Creek Olema Creek	Fecal coliform	Log mean <200 ^a 90th percentile < 400 ^b
^a . Based on a minimum of five consecutive samples equally spaced over a 30-day period. ^b . No more than 10% of total samples during any 30-day period may exceed this number.
