September 16, 2013

Bruce Wolfe, Executive Officer
San Francisco Regional Water Quality Control Board
1514 Clay Street
Oakland, CA 94612

SUBJECT: Annual Report for Fiscal Year 2012-2013 for the Alameda County
Unincorporated Area.

Dear Mr. Wolfe:

Enclosed herewith is the subject for the Fiscal Year 2012-2013 (months of July 2012 through June 2013). This is being submitted in accordance with the requirements of our NPDES permit.

Chapter 13.08 Section 13.08.040 of the Alameda County Code give the responsibility for the administration of the Unincorporated Area of Alameda County's NPDES permit requirements to the director of public works. I certify under penalty of law that this document and all attachments were prepared under my direction or supervision with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Yours truly,

Daniel Woldesenbet, Ph.D., P.E.
Director of Public Works

Permittee Name: County of Alameda

Section 1 – Permittee Information

Background Information				
Permittee Name:	County of Alameda			
Population:	Approximately 140,800			
NPDES Permit No.:	CAS612008			
Order Number:	R2-2009-0074R			
Reporting Time Period (month/year):	July 2012 through June 2013			
Name of the Responsible Authority:	Daniel Woldesenbet		Title:	Director of Public Works
Mailing Address:	399 Elmhurst Street			
City:	Hayward	Zip Code:	94544	County: Alameda
Telephone Number:	510-670-5455		Fax Number:	510-670-5541
E-mail Address:	danielw@acpwa.org			
Name of the Designated Stormwater Management Program Contact (if different from above):	Sharon Gosselin		Title:	Stormwater Program Manager Associate ECS
Department:	Engineering/Clean Water Unit			
Mailing Address:	399 Elmhurst Street			
City:	Hayward	Zip Code:	94544	County: Alameda
Telephone Number:	510-670-6547		Fax Number:	510-67-5262
E-mail Address:	sharon@acpwa.org			

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary: County staff continue to participate in the CWP M&O subcommittee and attended the CWP 10/30/2012 Trash Capture Workshop. For cooperative efforts, please see Section C.2 Municipal Operations of the Countywide Program's FY 12/13 Annual Report for a summary of Program activities.

C.2.a. ► Street and Road Repair and Maintenance

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

x	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
x	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
x	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments:

C.2.b. ► Sidewalk/Plaza Maintenance and Pavement Washing

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

NA	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
NA	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs

Comments:

C.2.c. ► Bridge and Structure Maintenance and Graffiti Removal

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

x	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
x	Control of discharges from graffiti removal activities
x	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
x	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal
x	Employee training on proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.
x	Contract specifications requiring proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.

Comments:

C.2.d. ► Stormwater Pump Stations

Does your municipality own stormwater pump stations: Yes No

If your answer is **No** then skip to **C.2.e.**

Complete the following table for dry weather DO monitoring and inspection data for pump stations¹ (add more rows for additional pump stations). If a pump station is exempt from DO monitoring, explain why it is exempt.

Pump Station Name and Location	First inspection Dry Weather DO Data		Second inspection Dry Weather DO Data	
	Date	mg/L	Date	mg/L
NA				

¹ DO monitoring is exempted where all discharge from a pump station remains in a stormwater collection system or infiltrates into a dry creek immediately downstream.

Permittee Name: County of Alameda

--	--	--	--	--

Summarize corrective actions as needed for DO monitoring at or below 3 mg/L. Attach inspection records of additional DO monitoring for corrective actions:

Summary: NA

Attachments:

Complete the following table for wet weather inspection data for pump stations (add more rows for additional pump stations):

Pump Station Name and Location	Date (2x/year required)	Presence of Trash (Cubic Yards)	Presence of Odor (Yes or No)	Presence of Color (Yes or No)	Presence of Turbidity (Yes or No)	Presence of Floating Hydrocarbons (Yes or No)
NA						

C.2.e. ► Rural Public Works Construction and Maintenance	
Does your municipality own/maintain rural ² roads:	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
If your answer is No then skip to C.2.f.	
Place a Y in the boxes next to activities where applicable BMPs were implemented. If not applicable, type NA in the box and provide an explanation in the comments section below. Place an N in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.	
<input checked="" type="checkbox"/>	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas
<input checked="" type="checkbox"/>	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources
<input checked="" type="checkbox"/>	No impact to creek functions including migratory fish passage during construction of roads and culverts
<input checked="" type="checkbox"/>	Inspection of rural roads for structural integrity and prevention of impact on water quality
<input checked="" type="checkbox"/>	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion
<input checked="" type="checkbox"/>	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate
<input checked="" type="checkbox"/>	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings
Comments including listing increased maintenance in priority areas:	

² Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. ► Corporation Yard BMP Implementation			
Place an X in the boxes below that apply to your corporations yard(s):			
<input type="checkbox"/>	We do not have a corporation yard		
<input type="checkbox"/>	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit		
<input checked="" type="checkbox"/>	We have a Stormwater Pollution Prevention Plan (SWPPP) for the Corporation Yard(s)		
Place an X in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type NA in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:			
<input checked="" type="checkbox"/>	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment		
<input checked="" type="checkbox"/>	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system		
<input checked="" type="checkbox"/>	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method		
<input checked="" type="checkbox"/>	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used		
<input checked="" type="checkbox"/>	Cover and/or berm outdoor storage areas containing waste pollutants		
Comments:			
If you have a corporation yard(s) that is not an NOI facility , complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information:			
Corporation Yard Name	Inspection Date (1x/year required)	Inspection Findings/Results	Follow-up Actions
Public Works	July 18, 2012	No Violations found	NA

Section 3 - Provision C.3 Reporting New Development and Redevelopment

C.3.b.v.(2)(a) ► Green Streets Status Report

(All projects to be completed by December 1, 2014)

On an annual basis (if applicable), report on the status of any pilot green street projects within your jurisdiction. For each completed project, report the capital costs, operation and maintenance costs, legal and procedural arrangements in place to address operation and maintenance and its associated costs, and the sustainable landscape measures incorporated in the project including, if relevant, the score from the Bay-Friendly Landscape Scorecard.

Summary:

The C.3 New Development and Redevelopment section of the Countywide program's FY 12-13 Annual Report includes a description of activities conducted at the countywide or regional level. The County's Stanley Boulevard Green Streets Project is included in the report.

C.3.b.v.(2)(c) ► Summary of Green Street Projects Completed by January 1, 2013

(For FY 12-13 Annual Report only) Provide a summary of all green street projects completed by January 1, 2013.

Summary:

BASMAA has prepared a regional summary of all green street pilot projects. The Green Street Pilot Project Summary Report is being submitted by BASMAA, on behalf of the MRP permittees, in BASMAA's MRP FY 12-13 Regional Supplement – New Development and Redevelopment. The Green Streets Pilot Project Summary Report contains all of the required elements listed in Provision C.3.b.v.(2)(c) for all green street projects completed by January 1, 2013, as well as information on projects not yet completed. The County's Stanley Boulevard Green Streets Project is included in the BASMAA report.

C.3.b.v.(1) ► Regulated Projects Reporting

Fill in attached table **C.3.b.v.(1)** or attach your own table including the same information.

C.3.e.v. ▶ Alternative or In-Lieu Compliance with Provision C.3.c.			
	<input type="checkbox"/>		<input type="checkbox"/>
<i>(For FY 11-12 Annual Report and each Annual Report thereafter)</i> Is your agency choosing to require 100% LID treatment onsite for all Regulated Projects and not allow alternative compliance under Provision C.3.e.?	X	Yes	<input type="checkbox"/> No
Comments (optional):			

C.3.e.vi ▶ Special Projects Reporting			
1. Has your agency received, but not yet granted final discretionary approval of, a development permit application for a project that has been identified as a potential Special Project based on criteria listed in MRP Provision C.3.e.ii(2) for any of the three categories of Special Projects (Categories A, B or C)?	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/> No
2. Has your agency granted final discretionary approval of a project identified as a Special Project in the March 15, 2013 report? If yes, include the project in both the C.3.b.v.(1) Table, and the C.3.e.vi. Table.	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/> No
If you answered "Yes" to either question, 1) Complete Table C.3.e.vi . below. 2) Attach narrative discussion of 100% LID Feasibility or Infeasibility for each project.			

C.3.h.iv. ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

(1) Fill in attached table **C.3.h.iv.(1)** or attach your own table including the same information.

(2) On an annual basis, provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.

Summary:

As shown in Table C.3.h.iv, a total of 12 sites were inspected during this reporting period. The inspections included four (4) sites which contained a vault or underground systems and eight (8) sites with stormwater based treatment systems. Three of the 12 sites involved initial 45-day inspections. The remaining 9 sites were inspected to fulfill the annual inspection requirement of the program.

During the inspections, four (4) written warnings were served. Three (3) warnings were issued for vegetation maintenance and debris accumulation of bio-treatment units. The remaining warning was issued for maintenance of pervious asphalt. This data is consistent with problems encountered during last year's inspections for similar treatment features.

(3) On an annual basis, provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).

Summary:

The O&M inspection program has effective. The response to the enforcement program has been 100 percent positive and all corrections have been implemented in a timely manner. All newly constructed treatment systems are inspected during construction and within 45-days of being installed. Corrective measures identified are linked to County acceptance and permit closure which further strengthens the program. The program is both proactive and preventative and provides consistency in inspection findings.

Slight modifications were made to include storm drain marking, self treating and self retaining areas into the inspections. We are continually working toward improving the O&M agreements with owners and transition towards community based treatment.

(4) During the reporting year, did your agency:

Permittee Name: County of Alameda

<ul style="list-style-type: none"> Inspect all newly installed stormwater treatment systems and HM controls within 45 days of installation? 	X	Yes		No		Not applicable. No new facilities were installed.
<ul style="list-style-type: none"> Inspect at least 20 percent of the total number of installed stormwater treatment systems or HM controls?³ 	X	Yes		No		Not applicable. No treatment measures
<ul style="list-style-type: none"> Inspect at least 20 percent of the total number of installed vault-based systems? 	X	Yes		No		Not applicable. No vault systems.
<p>If you answered "No" to any of the questions above, please explain:</p>						

C.3.i. ► Required Site Design Measures for Small Projects and Detached Single Family Home Projects

On an annual basis, discuss the implementation of the requirements of Provision C.3.i, including ordinance revisions, permit conditions, development of standard specifications and/or guidance materials, and staff training.

Summary:

BASMAA prepared standard specifications in four fact sheets regarding the site design measures listed in Provision C.3.i, as a resource for Co-permittees. We are using the BASMAA site design fact sheets for C.3.i implementation. We have modified local policies/procedures and created new forms/checklists to require all applicable projects approved after December 1, 2012 to implement at least one of the site design measures listed in Provision C.3.i.

³ If there is only 1 treatment measure in the jurisdiction, the agency must inspect it every year.

C.3.b.v.(1) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location ¹⁰ , Street Address	Name of Developer	Project Phase No. ¹¹	Project Type & Description ¹²	Project Watershed ¹³	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New Impervious Surface Area (ft ²) ¹⁴	Total Replaced Impervious Surface Area (ft ²) ¹⁵	Total Pre- Project Impervious Surface Area ¹⁶ (ft ²)	Total Post- Project Impervious Surface Area ¹⁷ (ft ²)
Private Projects											
Sutter-Eden	20101 Lake Chabot Rd, Castro Valley, cross street Congress Wy.	Sutter Health Medical Group	This is the final phase and will demolish the 6- story Eden Hospital building to allow construction of the main parking lot and associated stormwater treatments/landscaping.	The total site, including the phase listed, will redevelop the former Eden Hospital Campus to construct the new Sutter Health Medical Campus. The project consists of 1) demolishing the helipad, 6-story Eden Hospital, 2-story Laural Grove Hospital, 2-story apartment complex, and four medical office buildings and 2) constructing an 8-story Acute Care Hospital, helipad, four parking lots, utility building, 4- story medical office building/clinic, new drainage system, landscaping, etc.	Chabot Creek, San Lorenzo Creek	Total hospital site, including the areas of this phase is 19.5	Total hospital site, including the areas of this phase is 19.2	0	The total site, including the phase listed, 629000	The total site, including the phase listed, 648000	The total site, including the phase listed, 629000
Tiburcio Vasquez Health Ctr.	16110 E. 14th St., San Leandro, cross street 162nd Ave.	Tiburcio Vasquez Health Center, Inc.	N/A	Construction of new health care facility	Estudillo Canal	1.28	1.28	43361	0	0	43361

¹⁰ Include cross streets

¹¹ If a project is being constructed in phases, indicate the phase number and use a separate row entry for each phase. If not, enter "NA".

¹² Project Type is the type of development (i.e., new and/or redevelopment). Example descriptions of development are: 5-story office building, residential with 160 single-family homes with five 4-story buildings to contain 200 condominiums, 100 unit 2-story shopping mall, mixed use retail and residential development (apartments), industrial warehouse.

¹³ State the watershed(s) in which the Regulated Project is located. Downstream watershed(s) may be included, but this is optional.

¹⁴ All impervious surfaces added to any area of the site that was previously existing pervious surface.

¹⁵ All impervious surfaces added to any area of the site that was previously existing impervious surface.

¹⁶ For redevelopment projects, state the pre-project impervious surface area.

¹⁷ For redevelopment projects, state the post-project impervious surface area.

C.3.b.v.(1) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location ¹⁰ , Street Address	Name of Developer	Project Phase No. ¹¹	Project Type & Description ¹²	Project Watershed ¹³	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New Impervious Surface Area (ft ²) ¹⁴	Total Replaced Impervious Surface Area (ft ²) ¹⁵	Total Pre- Project Impervious Surface Area ¹⁶ (ft ²)	Total Post- Project Impervious Surface Area ¹⁷ (ft ²)
St. Antonius Coptic Church	2500 Hansen Rd., Hayward, cross street East Ave.	St. Antonius Church	N/A	Construction of new building/gymnasium	Sulphur Creek	0.7	0.7	25000	0	0	25000
Public Projects											
Alameda County Acute Care Tower/Acute Treatment Medical Center Replacement; Highland Hospital	1411 East 31st Street, Oakland, cross street Beaumont Ave.	Alameda County General Services Agency	Phase 2	The total site, including the phase listed, demolition of existing buildings, construction of new 3- story medical office building atop 3-story underground parking structure, construction of 9-story hospital building, connecting bridge, courtyard and 2-story medical building.*	Sausal Creek	7	4.36*	7000*	100800*	189200*	107800*
Comments: *Denotes revisions made to reflect total Phase 2 impervious surface data (partial data reported in FY11/12 Annual Report is included in this total).											

C.3.b.v.(1) ► Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period (private projects)

Project Name Project No.	Application Deemed Complete Date ¹⁸	Application Final Approval Date ¹⁹	Source Control Measures ²⁰	Site Design Measures ²¹	Treatment Systems Approved ²²	Type of Operation & Maintenance Responsibility Mechanism ²³	Hydraulic Sizing Criteria ²⁴	Alternative Compliance Measures ^{25/26}	Alternative Certification ²⁷	HM Controls ^{28/29}
Private Projects										
Sutter-Eden	4/7/2008	6/9/2009	The total site, including the phase listed, Indoor mat/equipment wash racks for restaurants; Covered trash and food compactor enclosures with sanitary sewer connection for dumpster drips and designed to prevent run-on; Sanitary sewer drains for fountains; Sanitary sewer drain connections to take fire sprinkler test water; Storm drain stenciling; Landscaping that minimizes irrigation and runoff,	The total site, including the phase listed, Minimize land disturbance; Preservation of existing vegetation; Micro detention including landscape detention; Minimized impervious surface; Clustering of structures and pavement; Directed roof runoff into vegetated areas; Directed	Onsite; The total site, including the phase listed, includes 13 separate bioretention areas, 1 underground media filter, 2 vegetated swales, and 10 self treating areas.	O & M with Private Owner	The total site, including the phase listed, used 2.c and 3	Not Allowed	Not Allowed	HM not required; impervious surface area decreased from pre-project condition.

¹⁸ For private projects, state project application deemed complete date. If the project did not go through discretionary review, report the building permit issuance date.

¹⁹ For private projects, state project application final discretionary approval date. If the project did not go through discretionary review, report the building permit issuance date.

²⁰ List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.

²¹ List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.

²² List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).

²³ List the legal mechanism(s) (e.g., O&M agreement with private landowner; O&M agreement with homeowners' association; O&M by public entity, etc...) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.

²⁴ See Provision C.3.d.i. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria. Enter the corresponding provision number of the appropriate criterion (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3).

²⁵ For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.

²⁶ For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.

²⁷ Note whether a third party was used to certify the project design complies with Provision C.3.d.

²⁸ If HM control is not required, state why not.

²⁹ If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), bioretention unit(s), regional detention basin, or in-stream control).

C.3.b.v.(1) ► Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period (private projects)

Public Projects										
Alameda County Acute Care Tower/Acute Treatment Medical Center Replacement; Highland Hospital	10/5/2010	10/6/2010	The total site, including the phase listed, covered trash and food compactor enclosures with sanitary sewer connection for dumpster drips and designed to prevent run- on, Storm drain stenciling, Landscaping that minimizes irrigation and runoff, promotes surface infiltration,	The total site, including the phase listed, preservation of existing vegetation; Decreased impervious surface; Use of oversized pipes to minimize changes in volume, flow rate, timing, duration of runoff for rain events; Directed roof runoff into vegetated or tree well	Onsite; The phase listed, bioretention area, tree well filters, and detention piping.	O&M by public entity	2.c	Not Allowed	Not Allowed	HM not required; impervious surface area decreased from pre- project condition.

³⁰ For public projects, enter the plans and specifications approval date.

³¹ List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.

³² List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.

³³ List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).

³⁴ List the legal mechanism(s) (e.g., maintenance plan for O&M by public entity, etc...) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.

³⁵ See Provision C.3.d.i. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria. Enter the corresponding provision number of the appropriate criterion (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3).

³⁶ For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.

³⁷ For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.

³⁸ Note whether a third party was used to certify the project design complies with Provision C.3.d.

³⁹ If HM control is not required, state why not.

⁴⁰ If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), bioretention unit(s), regional detention basin, or in-stream control).

C.3.b.v.(1) ► Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period (public projects)

Project Name Project No.	Approval Date ³⁰	Date Construction Scheduled to Begin	Source Control Measures ³¹	Site Design Measures ³²	Treatment Systems Approved ³³	Operation & Maintenance Responsibility Mechanism ³⁴	Hydraulic Sizing Criteria ³⁵	Alternative Compliance Measures ^{36/37}	Alternative Certification ³⁸	HM Controls ^{39/40}
			minimizes the use of pesticides and fertilizers, and removes pollutants from runoff.	filter unit areas; Directed runoff from sidewalks, and walkways to vegetated areas; and Directed roof runoff into tree well filter units and bio retention areas.						

Comments:

*Denotes revisions made to reflect total Phase 2 impervious surface data (partial data reported in FY11/12 Annual Report is included in this total).

C.3.h.iv. ► Table of Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Fill in table below or attach your own table including the same information.

Name of Facility/Site Inspected	Address of Facility/Site Inspected	Newly Installed? (YES/NO) ⁴¹	Party Responsible ⁴² For Maintenance	Date of Inspection	Type of Inspection ⁴³	Type of Treatment/HM Control(s) Inspected ⁴⁴	Inspection Findings or Results ⁴⁵	Enforcement Action Taken ⁴⁶	Comments/Follow-up
Concannon Vineyard	4596 Tesla Rd., Livermore	Yes	O & M Agreement with private landowner	12/20/2012	45-day	Infiltration trench (French Drains), onsite	Proper installation	None	None
Neighborhood Church	20600 John Dr. Castro Valley	Yes	O & M Agreement with private landowner	1/16/2013	45-day	Underground vault, onsite	Proper installation	None	None
Eden Hospital Health District, medical office building	20410 Lake Chabot Road, Castro Valley	Yes	O&M agreement with private landowner	4/5/2013	45-day	Bioretention basins, onsite	Improper installation and maintenance needed; Repair pipe, remove sediment and employ vegetation maintenance plan.	Written Warning	All corrections made.
Castro Valley Library	3600 Norbridge Ave., Castro Valley	No	O&M by public entity, GSA-BMD	7/24/2012	Routine	Vegetated swales and media filter, onsite	Proper O&M	None	None
Alcorn Place	18600-16499 Alcorn Place, Castro Valley	No	Homeowner's Association/CC&R's	7/23/2012	Routine	Media filtration system (CDS filter unit), onsite	Proper O&M	None	None
3900 Forest Circle	Forest Ave, N of Castro Valley Blvd; Now 3900 Forest Circle	No	Homeowner's Association/CC&R's	8/24/2012	Routine	Vegetated swales and media filtration system, onsite	Proper O&M	None	None
Castro Village	Castro Valley Bl., at Wilbeam Av. 3382 Castro Valley Bl., Castro Valley	No	O&M agreement with private landowner, Have CC&R in file	7/20/2012	Routine	Bioretention basin, onsite	Proper O&M	None	None
Primera Iglesia Bautista, parking	588 Willow Ave., Hayward	No	O&M agreement with private	2/19/2013	Routine	Pervious concrete parking lot, onsite	Maintenance needed, Redwood tree leaves on	Written Warning	All corrections made.

⁴¹ Indicate "YES" if the facility was installed within the reporting period, or "NO" if installed during a previous fiscal year.

⁴² State the responsible operator for installed stormwater treatment systems and HM controls.

⁴³ State the type of inspection (e.g., 45-day, routine or scheduled, follow-up, etc.).

⁴⁴ State the type(s) of treatment systems inspected (e.g., bioretention facility, flow-through planter, infiltration basin, etc...) and the type(s) of HM controls inspected, and indicate whether the treatment system is an onsite, joint, or offsite system.

⁴⁵ State the inspection findings or results (e.g., proper installation, improper installation, proper O&M, immediate maintenance needed, etc.).

⁴⁶ State the enforcement action(s) taken, if any.

C.3.h.iv. ► Table of Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Fill in table below or attach your own table including the same information.

Name of Facility/Site Inspected	Address of Facility/Site Inspected	Newly Installed? (YES/NO) ⁴¹	Party Responsible ⁴² For Maintenance	Date of Inspection	Type of Inspection ⁴³	Type of Treatment/HM Control(s) Inspected ⁴⁴	Inspection Findings or Results ⁴⁵	Enforcement Action Taken ⁴⁶	Comments/Follow-up
lot			landowner				surface, excessive leaves around DI		
Bay Gospel Project	4035 Seven Hills Road, Castro Valley	No	O&M agreement with private landowner	7/20/2012	Routine	Multiple Bio-Swales (10), underground detention 36" pipe with weir, onsite	Proper O&M	None	None
Highland Trail	25329 and 25415 2nd Street (now 2562-2690 Highland Trail Ct and 2563-2655 Highland Trail Ln.), Hayward	No	Homeowner's Association/CC&R's	2/8/2013	Routine	Bio-retention Pond, onsite	Maintenance needed, Sediment build-up in conveyance pipe, mulch worn or washed away, sparse sage grass and invasive weeds	Written Warning	All corrections made.
Bockman Town homes and Retail Use Project	1333 (Now 1306-1320) Bockman Rd., San Lorenzo	No	Homeowner's Association/CC&R's	2/8/2013	Routine	Bio-swales and pervious pavement, onsite	Maintenance needed, Dead and sparse vegetation, clogged storm drain, mulch sparse in some areas	Written Warning	All corrections made.
La Costa Ave	La Costa Av., Castro Valley W. of Parsons Av. 3751 La Costa Av.	No	O&M agreement with private landowner	7/27/2012	Routine	Bioretention area, onsite	Proper O&M	None	None

C.3.e.vi.Special Projects Reporting Table

Reporting Period – January 1 – June 30, 2013

Project Name & No.	Permittee	Address	Application Submittal Date⁴⁷	Status⁴⁸	Description⁴⁹	Site Total Acreage	Density DU/Acre	Density FAR	Special Project Category⁵⁰	LID Treatment Reduction Credit Available⁵¹	List of LID Stormwater Treatment Systems⁵²	List of Non-LID Stormwater Treatment Systems⁵³
The Unincorporated County does not have any special projects to report.	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

⁴⁷ Date that a planning application for the Special Project was submitted.

⁴⁸ Indicate whether final discretionary approval is still pending or has been granted, and provide the date or version of the project plans upon which reporting is based.

⁴⁹ Type of project (commercial, mixed-use, residential), number of floors, number of units, type of parking, and other relevant information.

⁵⁰ For each applicable Special Project Category, list the specific criteria applied to determine applicability. For each non-applicable Special Project Category, indicate n/a.

⁵¹ For each applicable Special Project Category, state the maximum total LID Treatment Reduction Credit available. For Category C Special Projects also list the individual Location, Density, and Minimized Surface Parking Credits available.

⁵² List all LID stormwater treatment systems proposed. For each type, indicate the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area.

⁵³ List all non-LID stormwater treatment systems proposed. For each type of non-LID treatment system, indicate: (1) the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area, and (2) whether the treatment system either meets minimum design criteria published by a government agency or received certification issued by a government agency, and reference the applicable criteria or certification.

Section 4 – Provision C.4 Industrial and Commercial Site Controls

Program Highlights

Provide background information, highlights, trends, etc.

Alameda County CWP continued participation with countywide municipalities at bi-monthly IIDC subcommittee meetings in part to continue development of consistent approaches to comply with MRP requirements. The County representative relinquished the Chair of the IIDC subcommittee in March 2013 as the Alameda County CWP inspector transferred from this position. Facility inspections continued using CUPA staff, and facility inspection priorities were evaluated and refined. Several facilities were enforced against using administrative enforcement tools, as well as one DA referral. Annual inspector training is scheduled for November 2013. The full time CWP inspector is expected to be filled in late 2013.

C.4.b.i. ► Business Inspection Plan

Do you have a Business Inspection Plan? Yes No

If No, explain:

C.4.b.iii.(1) ► Potential Facilities List

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

SEE: Attached list of commercial and industrial facilities (i.e., Total CWP Inventory FY2013-2014)

C.4.b.iii.(2) ► Facilities Scheduled for Inspection

List below or attach your list of facilities scheduled for inspection during the current fiscal year.

SEE: Attached list of facilities scheduled for inspection during the current fiscal year (i.e., CWP FY2013-2014 Inspection list)

C.4.c.iii.(1) ► Facility Inspections

Fill out the following table or attach a summary of the following information. Indicate your violation reporting methodology below.

<input checked="" type="checkbox"/>	Permittee reports multiple discrete violations on a site as one violation.
<input type="checkbox"/>	Permittee reports the total number of discrete violations on each site.

	Number	Percent
Number of businesses inspected	94	
Total number of inspections conducted	139	
Number of violations (excluding verbal warnings)	6	
Sites inspected in violation	20	21
Violations resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner	18	90

Comments:

- “Number of violations (excluding verbal warnings)” means facilities inspected where a subsequent county CWP enforcement action followed, including Notice of Violation, Administrative Invoice or referral to other agency for further investigation or enforcement.
- “Sites inspected in violation” means facilities where evidence of an unpermitted NSW discharge was observed or reported
- “Violations resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner” means the number of facilities where unpermitted NSW were abated within acceptable time frames
- While the facilities listed in the County’s 2011-2012 facilities inspection list were inspected, the overall number of inspection is less due to loss of stormwater inspector staff. The work of the stormwater inspector has been redistributed for the short term. The County’s effort to fill the position is in progress. The 2013-2014 inspection list exceeds past years in number of inspections to be conducted.

Sites where violations not resolved w/in 10 days or longer period deemed acceptable:

Hubbard Machine, 21030 Meekland Ave., Hayward- NSW/illegal disposal case in FY 2011-2012 still pending with Alameda County District Attorney’s office

Gear Works-16446 Ashland Ave., San Lorenzo- recalcitrant site with both Clean Water Program and CUPA violations. Although some progress has been made, unable to achieve complete compliance to date. Will issue an administrative enforcement invoice.

C.4.c.iii.(2) ► Frequency and Types/Categories of Violations Observed

Fill out the following table or attach a summary of the following information.

Type/Category of Violations Observed	Number of Violations
Actual discharge (e.g. active non-stormwater discharge or clear evidence of a recent discharge)	20
Potential discharge and other	29
Comments: <ul style="list-style-type: none"> “Actual discharge” <u>means</u> facilities where evidence of an unpermitted NSW discharge was observed or reported “Potential discharge and other” <u>means</u> the number of facilities where BMP= 2 or 3 as observed in at least one area of site activity (e.g., rooftop equipment, etc.) during inspection 	

C.4.c.iii.(2) ► Frequency and Type of Enforcement Conducted

Fill out the following table or attach a summary of the following information.

	Enforcement Action (as listed in ERP) ⁴⁸	Number of Enforcement Actions Taken	% of Enforcement Actions Taken ⁴⁹
Level 1	Warning Notice (e.g., NOV)	1	17
Level 2	Administrative Action w/o Penalty or Cost Recovery	0	0
Level 3	Administrative Action w/Penalty and Cost Recovery	4	66
Level 4	Legal Action	1	17
Total		6	100

C.4.c.iii.(3) ► Types of Violations Noted by Business Category

Fill out the following table or attach a summary of the following information.

Business Category ⁵⁰	Number of Actual Discharge Violations	Number of Potential/Other Discharge Violations
Food Facility (Restaurant, Retail Food Svc.)	5	7

⁴⁸ Agencies to list specific enforcement actions as defined in their ERPs.

⁴⁹ Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

⁵⁰ List your Program’s standard business categories.

Auto Facility (Fueling, Repair/Service, Misc.)	2	8
Animal care/Boarding	1	1
Miscellaneous	5	5
Construction/Contractor	0	3
NOI	0	1
Retail/Wholesale	5	1
Parking Lots/Plazas	0	2
Waste related	0	0
Municipal	0	1
Manufacturing	2	0

C.4.c.iii.(4) ► Non-Filers

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

CALIFONIA'S GUNITE & POOL, 510 Greenville Rd. Livermore CA 94550 – SIC 1799(?) – Inspected with RWQCB. Recommended based on observed pollutant exposures and not SIC code. Facility has applied for a General Permit. RWQCB will address permit.

SANTINI FOODS INC. 16505 Worthley Dr. San Lorenzo CA 94580 – SIC 2023/2026 - Food manufacturing where equipment/activities are exposed to rainfall. Apparent NSW observed on 10/11/12 due to broken sprinkler system. Facility referred to RWQCB to request general permit.

C.4.d.iii ► Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
Stormwater Business Inspectors Workshop: Recognizing and Responding to Illicit Discharges	November 15, 2012	Recognizing Illicit Discharges PCB-Containing Equipment Identification MRP Requirements for Responding to Illicit Discharges Coordinating with the District Attorney's Office State Industrial Permit	2 (inspector and enforcement officer)	100
IIDC Subcommittee Meetings	Bi-monthly	Mobile Cleaners, Pools, Spas & Fountains Tip sheet, Fire Sprinkler Tip sheet	1 (inspector)	100

Section 5 – Provision C.5 Illicit Discharge Detection and Elimination

Program Highlights

Provide background information, highlights, trends, etc.

County staff participates in the countywide program’s I&IDC subcommittee. Through the County’s collection system screening program, staff continues to conduct evaluation surveys at 20 chosen screening check points, (both “non-inlet” points and those done in conjunction with drop in-let cleaning included) and map to show screening point locations.

See Section C.5 Illicit Discharge Detection and Elimination of the Countywide Program’s FY 12/13 Annual Report for a summary of Program activities.

C.5.c.iii ► Complaint and Spill Response Phone Number and Spill Contact List

List below or attach your complaint and spill response phone number and spill contact list.

Contact	Description	Phone Number
Alameda County Public Works Agency	Maintenance and Operations Main Number (Dispatch)	510-670-5500

C.5.d.iii ► Evaluation of Mobile Business Program

Describe implementation of minimum standards and BMPs for mobile businesses and your enforcement strategy. This may include participation in the BASMAA Mobile Surface Cleaners regional program or local activities.

Description:
 See Section C.5 Illicit Discharge Detection and Elimination of the Countywide Program’s FY 12/13 Annual Report for a summary of Program activities.

If County receives a complaint regarding mobile cleaner, it is processed as an illicit spill/discharge and a County inspector responds. Should an inspector observe a mobile business (e.g., car detailer, mobile food truck, etc.) while in the field engaged in activities absent appropriate BMP, or generate an illicit discharge, the inspector will stop to address the circumstances in real time. Other departments or agencies with shared compliance responsibility, such as the County environmental health agency in the case of food trucks, are contacted and concerns forwarded to them. Mobile businesses identified as having a primary business address in a neighboring municipality, the associated CWP in that municipality is contacted. And where circumstances suggest a mobile operator may be operating across multiple jurisdictional lines and violations have been observed, the District Attorney investigator is contacted in case they wish to conduct surveillance of the operator in pursuit of a comprehensive enforcement action.

C.5.e.iii ► Evaluation of Collection System Screening Program

Provide a summary or attach a summary of your collection screening program, a summary of problems found during collection system screening and any changes to the screening program this FY.

Description: In the first quarter of 2012-13, staff conducted evaluation surveys of the 20 selected high priority screening points (no changes made to selected high-priority sites), both "non-inlet" points and those done in conjunction with drop inlet cleaning. No problems or anything remarkable was found during system screening. In early FY 2013-14, County staff will re-evaluate the selected "high priority" screen points and compare with other areas that may be better selected as "high priority".

C.5.f.iii.(1), (2), (3) ► Spill and Discharge Complaint Tracking

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)

	Number	Percentage
Discharges reported (C.5.f.iii.(1))	12	
Discharges reaching storm drains and/or receiving waters (C.5.f.iii.(2))	5	42%
Discharges resolved in a timely manner (C.5.f.iii.(3))	17*	100%

Comments:
 Complaints/Spill/Discharge incidents are tracked by Maintenance and Operations Department using Work Order software and "Mainstar" database. Service requests are given to Construction Inspection Division for inspection and follow-up and Construction Division staff are tracked using ACCESS database. Summary report is generated by sampling Mainstar database using activity code unique to spill and illicit discharges.

*Two complaints took more than 10 days to resolve. One involved pigeon feces and coordination between the County, BART, and the County's Sheriff's office took 30 days to completely resolve and solve the source of the problem (required repair and/or replacement of pigeon netting). The other complaint from a community member reporting an abandoned container was closed after 18 days because the inspector could not locate the reported container.

C.5.f.iii.(4) ► Summary of major types of discharges and complaints

Provide a narrative or attach a table and/or graph.

See attached detailed tracking spreadsheet

Section 6 – Provision C.6 Construction Site Controls

C.6.e.iii.1.a, b, c ▶ Site/Inspection Totals		
Number of High Priority Sites (sites disturbing < 1 acre of soil requiring storm water runoff quality inspection) (C.6.e.iii.1.a)	Number of sites disturbing ≥ 1 acre of soil (C.6.e.iii.1.b)	Total number of storm water runoff quality inspections conducted (include only High Priority Site and sites disturbing 1 acre or more) (C.6.e.iii.1.c)
1	9	75
Comments: The total number of inspections equals the initial monthly inspection for sites plus any follow-up inspections that may have been required.		

C.6.e.iii.1.d ▶ Construction Activities Storm Water Violations		
BMP Category	Number of Violations⁵¹ excluding Verbal Warnings	% of Total Violations⁵²
Erosion Control	4	10
Run-on and Run-off Control	6	15
Sediment Control	14	35
Active Treatment Systems	0	0
Good Site Management	13	33
Non Stormwater Management	3	8
Total⁵³	40	100%

⁵¹ Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category. For example, if during one inspection at a site, there are 2 erosion control violations, only 1 violation would be counted for this table.

⁵² Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

⁵³ The total number of violations may count more than one violation per inspection, since some inspections may result in violations in more than one category. For example, during one inspection of a site, there may have been both an erosion control violation and a sediment control violation. For this reason, the total number of violations in this table may not match the total number of enforcement actions reported in Table C6.e.iii.1.e.

C.6.e.iii.1.e ► Construction Related Storm Water Enforcement Actions

	Enforcement Action (as listed in ERP) ⁵⁴	Number Enforcement Actions Issued	% Enforcement Actions Issued ⁵⁵
Level 1 ⁵⁶	Verbal Warning	7	28
Level 2	Written Warning	18	72
Level 3	Notice of Violation	0	0
Level 4	Stop Notice	0	0
Total		25	100%

C.6.e.iii.1.f, g ► Illicit Discharges

	Number
Number of illicit discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.f)	1
Number of sites with discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.g)	1

⁵⁴ Agencies should list the specific enforcement actions as defined in their ERPs.

⁵⁵ Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

⁵⁶ For example, Enforcement Level 1 may be Verbal Warning.

C.6.e.iii.1.h, i ► Violation Correction Times		
	Number	Percent
Violations (excluding verbal warnings) fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	36	90% ⁵⁷
Violations (excluding verbal warnings) not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	4	10% ⁵⁸
Total number of violations (excluding verbal warnings) for the reporting year⁵⁹	40	100%
<p>Comments: During this reporting period, four issues were not resolved within 30 days. All four were associated with Stanley Blvd Safety and Streetscape Improvements project (Stanley Blvd) and are described below:</p> <p>Two written warnings were related to what was thought to be a single BMP failure (sediment control-street sweeping). Heavy sedimentation was observed leading eastbound on Stanley Blvd towards the City of Livermore. Initially, the stormwater inspector believed the sediment to be caused by the Stanley Blvd project's construction staging activities located within the adjacent CEMEX aggregate plant front parking lot. The Stanley Blvd project's construction contractor argued that the sediment was not from the staging area but rather from CEMEX aggregate trucks hauling wet material out of the site. Upon further investigation, the inspector determined that aggregate trucks hauling wet material were the cause of the sediment. At this point the County contacted the Regional Water Quality Control Board (RWQCB) industrial facilities inspector about the site. Multiple County departments and the RWQCB have been working with CEMEX to correct the issue. CEMEX has increased their sweeping program and are exploring better tracking controls. All of the water draining from the eastbound lanes of Stanley Blvd leading from the CEMEX plant towards the City of Livermore drain through vegetation before discharging into material recycling/treatment ponds within the CEMEX property. The two written warnings were incorrectly issued as construction site related issues when they were truly related to the adjacent NOI industrial facility.</p> <p>The other two written warnings were also related to a single BMP failure (sediment control-jute netting). The jute netting which covered a relatively small (approximately 10'x20') and flat area was in a worn state and deemed in need of replacement. The contractor explained that he going was to landscape the area shortly after the inspection period and that runoff from the area drained through vegetation before discharging into the CEMEX material recycling/treatment ponds.</p> <p>In retrospect, the written warnings should not have been issued to the Stanley Blvd. project.</p>		

⁵⁷ Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

⁵⁸ Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

⁵⁹ The total number of violations reported in the table of Violation Correction Times equals the number of initial enforcement actions. I.e., This assumes one violation is issued for several problems during an inspection at a site. The total number of violations in the table of Violation Correction Times may not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

C.6.e.iii.(2) ► Evaluation of Inspection Data

Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).

Description:
 A total of 75 inspections were conducted at 10 different sites in the unincorporated areas and County owned property during this reporting period. The tracking data showed that the sediment control BMP category was again the largest problem area. This is most likely due to sediment controls being used as the primary protection measures at sites instead of utilizing appropriate erosion controls. This data is consistent with prior reporting years. Generally, the majority of violations for this BMP category were issued because of maintenance issues.

C.6.e.iii.(2) ► Evaluation of Inspection Program Effectiveness

Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.

Description:
 The construction inspection program was evaluated and included revisions to the stormwater construction inspection forms, revisions to the inspection scheduling practices and updates to the Enforcement Response Plan. All storm water inspection staff (4 people) attended the Countywide C6 training. An additional 7 County staff were sent to the training to educate staff about construction concerns they may be encounter in the field. Specific training sessions attended are listed below.

Measures were taken to stream-line the inspection and enforcement program. Forms and procedures were changed to increase inspection consistency and efficiency. County funded project procedures were further modified to require site supervisors /project managers are present during C6 inspections. This proactive approach will assure an immediate response to problems should they exist.

C.6.f ► Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
Construction Stormwater C.6 Training	June 11, 2013	Review of Provision C.6 Requirements, How the State Construction General Permit Relates to the MRP, Proper Use of Construction BMPs, Review of Inspection Tools and Enforcement Options	4	100%
California State University, Sacramento Stormwater Best Management – New Development & Redevelopment	January 2013	Stormwater quality planning for New Development and Redevelopment; Site and Facility Design for Water Quality	1	50%

		Protection; Source Control BMPs, Treatment Control BMPs and BMP Implementation and Evaluation		
California State University, Sacramento Stormwater Best Management – Industrial and Commercial	November 2012	Stormwater Pollution Prevention Planning for Industrial and Commercial Facilities; Source Control BMPs, Treatment Control BMPs and Monitoring Reporting and Program Evaluation	1	50%
California State University, Sacramento Stormwater Best Management – Municipal Practices	October 2012	Municipal Phase I and II permits; Stormwater Pollution Prevention Planning for Municipal Operations; Source Control BMPs, Treatment Control BMPs and BMP Implementation and Evaluation	1	50%

Permittee Name: Alameda County Unincorporated Area

Section 7 – Provision C.7. Public Information and Outreach

C.7.a ► Storm Drain Inlet Marking (existing storm drains)

(For FY 12-13 Annual Report only) Report prior years' estimated annual percentages of municipality maintained storm drain inlet markings inspected and maintained as legible with a no dumping message or equivalent. At least 80% of municipality-maintained storm drain inlet markings shall be inspected and maintained at least once per 5-year permit term.

Summary:

Although the majority of municipally maintained stormdrain inlets have been marked with a stenciled message of "No dumping, drains to Bay" for many years, they were replaced with a more durable, thermo plastic placard during this permit period (please see image) for a more lasting alternative. This replacement process is broken down below into how many of the total placards were installed each year to replace the stencils.

Approximate percentage of total placards installed each year to replace stencils:

2009-10: 24%

2010-11: 24%

2011-12: 24%

2012-13: 24%

Total municipally maintained stormdrain inlets with placards installed from 2009-2013 = 96%

To complete this program, areas containing municipally maintained roads were broken into sectors on a map. Additional maps were then created by our Survey Department for each individual sector showing the GPS locations of every storm drain inlet, and a number was assigned to each inlet. Each year, Alameda County Maintenance and Operations staff used these sector maps to staff install "No dumping, drains to Bay" placards on the inlets, until all the sectors were completed. For tracking purposes, each placard has a corresponding number to the number marked on the inlet. The installation process was completed in 2012, with 4690 inlets having placards installed out of a total of 4903 inlets on municipally maintained roads. At that time, Alameda County transitioned to the inspection and maintenance phase of this program. In this phase, each inlet is inspected on a yearly basis when they are cleaned out as part of routine maintenance, and the proper staff is notified when a placard needs to be repaired or replaced. This program will continue to be a part of the routine maintenance of the inlets.

C.7.a ► Storm Drain Inlet Marking (newly-constructed, privately-maintained streets)

(For FY 12-13 Annual Report only) Report prior years' annual number of projects accepted after inlet markings were verified. For newly-approved, privately-maintained streets, permittees shall require inlet marking by the project developer upon construction and maintenance of markings through the development maintenance entity. Markings shall be verified prior to acceptance of the project.

Summary:

Annual number of newly-constructed, privately-maintained streets for which inlets were marked:

2009-10: 1 project (Clara Lee Ln. TR7592)

2010-11: 0 projects

Permittee Name: Alameda County Unincorporated Area

2011-12: 1 project (Highland Trail TR7270)

2012-13: 0 projects

The County verifies storm drain inlet (DI) marking through a double verification process. The Building Department is the first inspection filter and verifies that DIs are marked during the building inspection process. The Clean Water Department is the second inspection filter and verifies that DIs marked during the initial and all subsequent annual C3h inspections.

C.7.b.ii.1 ▶ Advertising Campaign

Summarize advertising efforts. Include details such as messages, creative developed, and outreach media used. The detailed advertising report may be included as an attachment. If advertising is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

Summary:

See Section C.7 Public Information and Outreach of the Countywide Program's FY 12/13 Annual Report for a summary of Program activities.

The following separate report developed by BASMAA summarizes the activities of the Regional Youth Litter Campaign

- BASMAA Be the Street Campaign Report

C.7.b.iii.1 ▶ Pre-Campaign Survey

Information on the pre-campaign survey for the BASMAA Regional Youth Litter Campaign was provided in the FY 11-12 Annual Report. A copy of the pre-campaign survey for the countywide Program's outreach efforts is included in the Program's FY 12/13 Annual Report.

Place an X in the appropriate box below:

<input type="checkbox"/>	Survey report attached
<input checked="" type="checkbox"/>	Reference to regional submittal: Alameda Countywide Clean Water Program FY 12-13 Annual Report

C.7.c ▶ Media Relations

Summarize the media relations effort. Include the following details for each media pitch in the space below, AND/OR refer to a regional report that includes these details:

- Topic and content of pitch
- Medium (TV, radio, print, online)
- Date of publication/broadcast

Summary:

The following separate report developed by BASMAA summarizes media relations efforts conducted during FY 12-13:

Permittee Name: Alameda County Unincorporated Area

• BASMAA Media Relations Final Report FY 12-13

This report and any other media relations efforts conducted countywide is included within the C.7 Public Information and Outreach section of the Countywide Program's FY 12-13 Annual Report.

Local Effort

The Alameda County Unincorporated Area Program took the .30 second movie ad derived from the new stormwater pollution prevention brochure that was created through the Countywide Program, and is having it played before every movie showing in the local Castro Valley movie theater from 1/3/13 – 6/30/13.

Also, the following press releases were posted to the Castro Valley Patch and sent to the Castro Valley Forum:

- New Pest Management Regulations - 9/27/12
- IPM Advocates Release -10/30/12
- Holiday Wrapping Paper Release -12/5/12
- Ten Best Ways to Get a Green Start on the New Year - 1/7/13
- Environmentally Conscious People Still Pollute Water - 2/7/13
- Paper or Plastic? Neither Says Alameda County - 3/13/13

C.7.d ► Stormwater Point of Contact

Summary of any changes made during FY 12-13:

See Section C.7 Public Information and Outreach of the Countywide Program's FY 12/13 Annual Report for a summary of Program activities.

No Change from the previous year's report.

C.7.e ► Public Outreach Events

Describe general approach to event selection. Provide a list of outreach materials and giveaways distributed.

Use the following table for reporting and evaluating public outreach events

Event Details	Description (messages, audience)	Evaluation of Effectiveness
Provide event name, date, and location. Indicate if event is local, countywide or regional.	Identify type of event (e.g., school fair, farmers market etc.), type of audience (school children, gardeners, homeowners etc.) and outreach messages (e.g., Enviroscope presentation, pesticides, stormwater awareness)	Provide general staff feedback on the event (e.g., success at reaching a broad spectrum of the community, well attended, good opportunity to talk to gardeners etc.). Provide other details such as: <ul style="list-style-type: none"> • Estimated overall attendance at the event.

FY 2012-2013 Annual Report

C.7 – Public Information and Outreach

Permittee Name: Alameda County Unincorporated Area

		<ul style="list-style-type: none"> • Number of people that visited the booth, comparison with previous years • Number of brochures and giveaways distributed • Results of any spot surveys conducted
<p>Stormwater Exhibit at the Alameda County Fair: July 1 through July 8, 2012 and June 19 through June 30, 2013. Setting up the exhibit and producing the outreach materials are Countywide Program efforts. Staffing the exhibit is an effort conducted by individual Permittees.</p>	<p>The County Fair is attended by a wide range of residents from throughout the County. The primary message of the exhibit and outreach materials is to encourage residents to reduce their use of pesticides or when necessary use less-toxic pesticides. The exhibit also illustrates the basic watershed awareness/stormwater pollution message.</p>	<p>Several hundred thousand residents attend the fair each year. A more detailed description of the exhibit is included in Section C.7 Public Information and Outreach of the Countywide Program's FY 12/13 Annual Report.</p>
<p>Stormwater Exhibit at the Alameda County Fair – The Unincorporated Area Program Staffed the Fair Booth on 7/1/12, and 7/7/12.</p>	<p>County Fair, open to the general public. Outreach message focused on using less toxic methods to manage pests around the yard, and the negative consequences of using pesticides. This year an extra emphasis was put on how pesticides not only pollute our waterways, but can also negatively affect native bee populations, and CA agriculture.</p>	<p>This year the Fair had 391,426 attendees, a 27% decrease from 2012 (due to extreme heat and BART strike). Very good opportunity to speak to homeowners about how they can use less toxic methods to control pests in their yard and garden. A craft activity was added each Fridays for "Kids' Day", to increase the amount of children attending the booth, and to provide opportunities to speak to children and their families about our booth message. Handout materials included drought tolerant native seeds for the garden to attract bees, non-toxic pest control recipes label for water bottles, and mood pencils. The non-toxic recipe label was a great conversation piece to start the discussion on pesticides.</p>
<p>Castro Valley Fall Festival, Castro Village Shopping Center, Castro Valley – 9/8 & 9/9/12</p> <p>Our booth and display at this event is created, organized and staffed by the Unincorporated</p>	<p>Local Street Fair open to the general public. To coincide with Coastal Clean-up efforts, the focus of our booth at Fall events is reducing litter that ends up in local creeks, and eventually the San Francisco Bay.</p>	<p>A large community event with an estimated 65,000 residents in attendance, which is a 9% increase over last year, and 200 vendors. We had lots of participation in our interactive booth, which was staffed from 10am-6pm both days of the event. We had a life-size stormdrain</p>

Permittee Name: Alameda County Unincorporated Area

<p>Program.</p>		<p>on the table, where people could lift the grate and take a look at some of the trash that ends up in our creeks by going down the stormdrain. This was used as a conversation piece, to engage with the public, and talk about alternatives to some commonly used trash items (use a reusable water bottle instead of plastic ones, use Tupperware in lunches instead of plastic bags, use a reusable shopping bag, reusable coffee cup, etc.)</p> <p>We also had a colored wheel game, that was used along with our "true or rubbish questions", Families that visited our booth could also play our interactive game, where they went "fishing" in our "Bay", with the goal of pulling out a fish and not one of the disposable litter items mentioned above. If they pulled out litter, they were asked which reusable they could have used to prevent this from ending up in the Bay. Adults were encouraged to sign a pledge poster to reduce litter by making reusables part of their daily routine (we received 298 pledge signatures). We also gave away reusable chico bags with information on the bag ban beginning 1/1/13 for Alameda County, mood pencils, seed packets, fish erasers, activity guides, Detain the Rain brochures and car maintenance guides.</p>
<p>San Lorenzo Farmers Market, Hesperian Boulevard, San Lorenzo – 7/21/12, 8/25/12, 9/15/12, 10/20/12, 5/11/13, and 6/8/13</p> <p>Our booth and display at this event is created, organized and staffed by the Unincorporated Program.</p>	<p>Local Farmers market open to the public. Unincorporated Area booth materials focused on pesticides and less toxic ways to control pests around the home and yard in June and July, and focused on reducing litter in August, September and October.</p>	<p>Very successful, interactive booth with games for both children and adults to test their knowledge of general stormwater pollution prevention practices, and a more targeted message of how pesticides harm useful bugs, such as bees, ladybugs, spiders and beetles that help keep a healthy garden (in July and August 2012). Litter reducing message as mentioned above under the Castro Valley Fall Festival is featured during the fall months (September and October 2012). We transitioned our spring message in May and</p>

Permittee Name: Alameda County Unincorporated Area

		<p>June of 2013 to focus more on how water pollution affects frogs in our local creeks, and incorporated the new frog-themed materials and games produced through the Alameda Countywide Clean Water Program. Approximately 200-500 local residents attended each farmers market. Outreach materials included: non-toxic water bottle recipe labels, mood pencils, fish erasers, reusable chico and new Clean Water Program bags, and drought tolerant native plant seeds.</p>
<p>ACT (Ashland/Cherryland Together) Street Party – 10/20/12, Ashland Community Center</p> <p>Our booth and display at this event is created, organized and staffed by the Unincorporated Program.</p>	<p>Local health fair open to the public. Many Unincorporated Area families attend this event.</p>	<p>Approximately 400 local residents attended this event. Our booth featured our anti-litter message, including playing the colored wheel game with “True or Rubbish” questions. We also did a bookmark activity with the smaller children, where they could stamp out an aquatic creature, decorate it, and take it home with a “Remember, Only Rain Down the Stormdrain” message stamped on the back. We gave away 50 chico bags, Alameda County bag ban information sheets, Detain the Rain brochures, Keeping it all in Tune brochures, fish erasers, and native plant seeds. We also asked attendees to sign a pledge poster to try and reduce the amount of litter that ends up in the Bay by making reusables part of their daily routine. 93 signatures were collected.</p>
<p>ACE Station Ribbon Cutting Event, Pleasanton - 10/29/12</p>	<p>This event was a celebration of the new ACE Station bus turnaround and turnout project. Open to the public.</p>	<p>The Alameda County Unincorporated Area Program sponsored this event by donating 50 Clean Water Program reusable bags for giveaways to those that attended.</p>
<p>Lewelling Blvd. Ribbon Cutting Event, San</p>	<p>This event was a celebration of the</p>	<p>The Alameda County Unincorporated Area</p>

Permittee Name: Alameda County Unincorporated Area

<p>Lorenzo - 10/31/12</p>	<p>Lewelling Blvd. Improvement Project. Open to the public.</p>	<p>Program sponsored this event by donating 100 Clean Water Program reusable bags for giveaways to those in attendance.</p>
<p>Castro Valley Blvd. Ribbon Cutting Event, Castro Valley – 11/10/12</p> <p>Our booth and display at this event is created, organized and staffed by the Unincorporated Program.</p>	<p>This was a large public event to celebrate the Castro Valley Blvd. Improvement Project. The Boulevard was closed down for this event, and local organizations were invited to set up booths. Many local families were in attendance.</p>	<p>Approximately 1000 local residents attended this event. The Alameda County Unincorporated Area set up a Clean Water Program booth featuring a life-size stormdrain where the public could lift the grate and see how litter that goes down the drain ends up in the creek. We also played our colored wheel game with litter questions and fishing game (described in the Castro Valley Fall Festival entry). Residents were asked to sign a reusable pledge poster. The following giveaways were passed out at the event: Clean Water Program chico bags with bag ban informational postcards, native plant seeds, mood pencils, fish erasers, Detain the Rain, and Keeping it all in Tune.</p>
<p>Stanley Blvd. Ribbon Cutting Event, Livermore – 4/13/13</p>	<p>This event was a celebration of the Stanley Blvd. Improvement Project. Open to the public.</p>	<p>The celebration was held at Shadow Cliffs Park along Stanley Boulevard, and approximately 150 local community members were in attendance. The County had a booth at this event to explain the environmentally friendly aspects of the project, such as the use of</p>

Permittee Name: Alameda County Unincorporated Area

		sustainable plants along the Blvd to conserve water. Native plant seed packets, non-toxic recipe water bottle labels, and stormwater pollution prevention brochures were handed out to visitors to our booth. 150 attendees.
Take Your Son to Work Day – 4/25/13, Alameda County Public Works Office.	Workplace education for school-aged boys. The children learn about careers in stormwater pollution prevention, along with other departments within Alameda County Public Works.	Approximately 30 children attended this event. We distributed Watershed pollution prevention Activity Books, mood pencils, fish erasers, reusable bags and native plant seeds to the boys who attended the event.
Cinco de Mayo Health Fair, Ashland Community Center – 5/4/13 Our booth and display at this event is created, organized and staffed by the Unincorporated Program.	Community Health Fair. General stormwater pollution prevention message, with an emphasis on using non-toxic methods to deal with pests around the home and garden.	Approximately 400 local community members attended the event. We hosted an interactive booth with games for both children and adults to test their knowledge of general stormwater pollution prevention practices, and a more targeted message of how pesticides harm useful bugs, such as bees, ladybugs, spiders and beetles that help keep a healthy garden. Watershed diorama demonstrations were also conducted for the public. People who played our games or interacted with our staff received mood pencils, fish erasers, non-toxic water bottle recipe labels, and native plant seeds.
Watershed Science Expo at Palomares School, Castro Valley - 5/17/13. All Day Event that Serves Castro Valley and San Lorenzo schools.	This watershed education-focused day features watershed/hands-on science - focused activity stations for 3rd grade students and their teachers, held on a school day at Palomares School for schools in the watershed. Palomares students trained as "Creek Tour Guides" give continual tours of the creek restoration and stewardship projects.	All grade levels from Palomares School; and 3rd grade students from 14 classes from 3 schools from Castro Valley and San Lorenzo; 445 students, 14 teachers, 2 principals, and 90 parent helpers/chaperones attended. 35 Palomares parent/community and PTA volunteers helped out preparing for the event and the day of.

Permittee Name: Alameda County Unincorporated Area

	<p>Palomares Jr. Naturalists also assist with event-wide trash cleanup of campus by all participants.</p> <p>20 creek tours were led by Palomares Tour Guides during the Expo.</p> <p>30 Palomares Jr. Naturalists led activity stations with a creek theme</p> <p>2 assemblies with live wildlife presented by Wildlife Associates</p>	<p>14 agencies/organizations had activity stations; total of 17 stations at the Expo.</p> <p>Donations of materials came from the local sanitary district, stores, adult school, parent club, and nearby schools.</p> <p>All teacher responses were positive and cited the hands-on learning, creek education, and the fact that the activities were linked to the 3rd grade science standards.</p>

C.7.f. ► Watershed Stewardship Collaborative Efforts

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report.

Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

Summary: See Section C.7 (Public Outreach and Involvement) of the Countywide Program's FY 12/13 Annual Report for a summary of the *Bringing Back the Natives*, and the *Bay Friendly Garden* tours that are sponsored by the Program.

Local Watershed Stewardship Efforts:

The Unincorporated Area Program continues to provide support to the San Lorenzo Watershed Task Force, which examines County creek policies and practices. During the 2012/2013 fiscal year, the Task Force presented their recommendations to the Alameda County Board of Supervisors and the Community Development Agency. The County is working with the Task Force to address these recommendations to improve County creeks.

Collaboration also continues with the Friends of San Lorenzo Creek community group, to find ways to work together. 2012/2013 fiscal year collaboration efforts are described under the Citizen Involvement section below.

Permittee Name: Alameda County Unincorporated Area

C.7.g. ► Citizen Involvement Events		
List the types of events conducted (e.g., creek clean up, storm drain inlet marking, native gardening etc.). Use the following table for reporting and evaluating citizen involvement events.		
Event Details	Description	Evaluation of effectiveness
Provide event name, date, and location. Indicate if event is local, countywide or regional	Describe activity (e.g., creek clean-up, storm drain marking etc.)	Provide general staff feedback on the event. Provide other evaluation details such as: <ul style="list-style-type: none"> • Number of participants. Any change in participation from previous years. • Distance of creek or water body cleaned • Quantity of trash/recyclables collected (weight or volume). • Number of inlets marked. • Data trends
Community Stewardship Program	The Countywide Program sponsors the Community Stewardship Grants (CSG) Program. The CSG Program provides approximately \$20,000 annually in \$1,000 to \$5,000 increments to individuals and community groups to support stormwater improvement/outreach projects throughout the County.	See the Countywide Program's FY 12/13 Annual Report for a summary.
10 th Unincorporated Area Fall Clean-Up and Beautification, Ashland and Cherryland sections of San Lorenzo – 9/29/12	Large, annual clean-up organized and funded by the Unincorporated Area Program in the Ashland and Cherryland communities.	Approximately 80 volunteers participated and picked up trash at the following locations: Blossom Way, Meekland Avenue, A Street, Western Blvd, Mission Blvd., and Laurel Ave. The Unincorporated Area Program also provided 120: litter picks, pairs of gloves, and

Permittee Name: Alameda County Unincorporated Area

		<p>safety vests. 7500lbs of trash was collected. Volunteers also received native seed packets, chico bags and Clean Water Program Activity Guides.</p>
<p>Cull Canyon Reservoir Earth Day Clean-Up, Castro Valley – 4/27/13</p>	<p>The Unincorporated Area Program partnered with the East Bay Regional Park District to facilitate a native planting/clean-up site at Cull Canyon Reservoir. This site was one of the 5 public sites sponsored by the Castro Valley Sanitary District.</p>	<p>This event consisted of 22 local volunteers installing native plants and drip irrigation, weeding and picking up trash, spreading mulch and planting trees. Accomplishments of the day:</p> <ul style="list-style-type: none"> - 6 bags of weeds taken - 25 yards of hillside mulched - 15 native plants installed - 6 trees planted.
<p>Castro Valley Sanitary District Earth Day Clean-up, Throughout Castro Valley – 4/27/13</p>	<p>The Unincorporated Area Program is a major sponsor (in addition to planning and facilitating two clean-up sites for the event) of this large, annual clean-up at trash “hot spot” locations within the Castro Valley Community.</p>	<p>Approximately 600 volunteers at 13 Castro Valley schools and 5 public sites participated in the 11th annual clean-up. Volunteers cleared 65 cubic yards of plant debris and 15 cubic yards of litter from Castro Valley streets, parks, schools and creeks. As a major event sponsor, the Unincorporated Program provided:</p> <ul style="list-style-type: none"> -Participation of two additional teams of weekend work crews in the Clean-Up event on Saturday, April 27, 2013 from 9:00 a.m. - 12:00 p.m. for increased assistance. - Picked-Up of bagged organics and garbage from the Clean-Up event on Saturday, April 27, 2013 from 12:00 p.m. - 4:00 p.m., and dropped-off of organics and garbage bags at corresponding Waste Management bins at CVSan. - Provided materials for the Clean-Up, including: Two hundred and fifty plastic garbage bags, two hundred pairs of gloves, two hundred litter grabbers/picks, and ten

Permittee Name: Alameda County Unincorporated Area

		shovels.
Sunol AgPark (organic farm) Hedgerows, Sunol. Community volunteer workdays at the hedgerow for students and community volunteers - 12/6/12, 12/11/12, 1/18/13, 2/2/13, 3/2/13, 4/3/13, 6/13/13	Hedgerow planning, design and installation project with high school students for a new segment of the hedgerow. Volunteers also planted native plants, removed invasive plants and weeds in a grass filter strip and native plant hedgerow alongside the Arroyo de la Laguna which borders the farm. This is also an adopted spot of the Alameda Creek Watershed Council.	As part of service learning element of education program at farm, 50 native plants were installed along a 200' section of new hedgerow. It was designed and planted by 50 Kennedy and Castlemont students and 10 teachers/chaperones. 800' of hedgerow/filter strip was maintained, plant signage made, and beneficial insects monitored by 80 Cliff Bar volunteers on a 6/13/13 workday. A presentation and hedgerow tour was given at a workshop on 4/3/13 to 10 attendees. 3/2/13 - community workday held with 50 students and 10 teachers/chaperones.
Bay Trees Park, Castro Valley - Native Plant Trail workdays on 9/29/12, 10/27/12, 12/8/12, 12/15/12, 2/16/13, 3/23/13.	Student and community volunteers installed bender board to define pathways in a native plant trail, planted native plants, removed weeds and invasives, cleaned up trash along the creek banks in the park, and removed ivy from creekside trees. "Creek Care" information provided during creek walks, and water quality testing done by high school students.	Approximately 50' of bender board installed, repaired 300' of bender board, 35 plants installed, irrigation provided for plants, and plant caging was installed. 1 large bag (12 cu ft each) filled with trash from each workday from creekside areas and park trail. Largest event: 40 students from San Lorenzo High School worked on 12/15/13. They were transported by bus and provided by EarthTeam. Total volunteers for the year: approximately 80. Continued to receive positive feedback from park users about the project. Site maintained by project staff on 5 occasions.
Castro Valley Creek, Castro Valley - Coastal Cleanup Day on 9/15/12, and Earth Day Cleanup on 4/27/13	For Coastal Cleanup Day the creek trail was cleaned up, invasive plants removed and native riparian plants along creekside trail were	Approximately 1000 linear feet of creek bank and trail was cleaned up by 29 student and community volunteers for Coastal Cleanup

Permittee Name: Alameda County Unincorporated Area

	<p>maintained. The Earth Day event included coordination and assistance with the Friends of San Lorenzo Creek and the Castro Valley San District; pre-cleanup presentation given by Friends group on the creek restoration that had taken place. Similar activities to Coastal Cleanup Day.</p>	<p>Day (CCDay); 83 lbs of trash bagged up (16 trash bags); bulky items in addition, reported to CCDay officials. Earth Day involved a total of 30 volunteers working at this spot. Cleaned up 14 large trash bags and similar volume of bulky items (12 cu ft each bag) along 1000 ' of creek and trail.</p>
<p>Schoolwide Campus Trash Cleanup at Palomares Watershed Science Expo - 5/17/13 (Expo described above under Public Outreach Event).</p>	<p>Each activity station exhibitor was given a trash bag and was responsible for having each group of students pick up trash from the area surrounding the station on the campus during the event, with help from parent chaperones. Trash was collected at the end of the day from each station and recycled by Palomares Elementary Jr. Naturalists.</p>	<p>All students who attended the Expo participated. Trash was collected at the end of the day from each station and recycled with the help of 6 Jr. Naturalists.</p>

C.7.h. ► School-Age Children Outreach

Summarize school-age children outreach programs implemented. A detailed report may be included as an attachment. Use the following table for reporting school-age children outreach efforts.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
<p>Provide the following information: Name Grade or level (elementary/ middle/ high)</p>	<p>Brief description, messages, methods of outreach used</p>	<p>Provide number or participants</p>	<p>Provide agency staff feedback. Report any other evaluation methods used (quiz, teacher feedback etc.). Attach evaluation summary if applicable.</p>
<p>See the Section C.7 of the Countywide Program's FY 12/13 Annual Report for a summary of the Program's School-Age Outreach Program</p>	<p>See the Countywide Program's FY 12/13 Annual Report for a summary.</p>	<p>See the Countywide Program's FY 12/13 Annual Report for a summary.</p>	<p>See the Countywide Program's FY 12/13 Annual Report for a summary.</p>
<p>Palomares School Creek Lessons for 3rd Grade Classes, Castro</p>	<p>8, 3rd grade classes from 2 elementary schools in San Lorenzo (Colonial Acres</p>	<p>228 students, 8 teachers, 72</p>	<p>Teachers reported that they appreciated the opportunity to learn about the creek with</p>

FY 2012-2013 Annual Report

C.7 – Public Information and Outreach

Permittee Name: Alameda County Unincorporated Area

<p>Valley - 5/29/13, 5/31/13, 6/3/13, 6/4/13</p>	<p>and Del Rey) visited Palomares School and did creek insect search lessons, creek tours and activity stations conducted by Palomares Jr. Naturalists and teacher Sherry Johnson during the school day.</p>	<p>chaperones/ parent helpers</p>	<p>their students, and especially enjoyed the hands-on learning about life in the creek and how to protect those resources. They also learned where their own schools are downstream in the San Lorenzo Creek watershed, and how to protect the water resources.</p>
<p>Palomares School Watershed and Creek Science Lessons, Castro Valley - October 2012 through May 2013, for 1st-5thgrades.</p>	<p>Creek and watershed-based lessons taught at Palomares Creek at school campus by credentialed teacher to Palomares School students K-5th grades. Covers water quality studies, creek ecology, soil/geology, landforms in relation to creek and watershed; math, science. 5th graders participate in World Water Monitoring Day. Bi-weekly lessons for Palomares students primarily take place on campus at outdoor classroom at the creek. Curriculum is tied to state standards for each grade level and is science based. Hands-on stewardship activities are carried out by students, including playground area erosion control practices and creek bank invasive plant removal with 4th graders.</p>	<p>94 lessons (5 Palomares classes, grades 1-5; bi-weekly lessons during school year (24-32 students per class).</p>	<p>Teachers consider creek lessons to be a part of their regular science instruction; creek lessons meet state standards. Time allowed for the lessons during the school day. Science testing reflects what students learn. Numerous visits to creek for hands-on lessons to reinforce classroom learning. Creek lessons featured at annual presentation to Castro Valley School Board and for Palomares Open House. This program was featured in the school's application for the CA Distinguished Schools Award Program. Many parents have their children attend this school because of the creek studies program.</p>
<p>Palomares School Jr. Naturalists After- School Program for 1st-5thgrades and Creek Tour Guides (3rd-5th). Program term April -June 2013.</p>	<p>After-school Jr. Naturalist program conducted at Palomares Creek on school campus to Palomares School students 1st-5thgrades. Hands-on activities cover water quality studies, creek ecology, conservation activities and stewardship; learn material for use at activity stations they run at Expo. Tour Guides learn content and methods for leading creek tours at annual Watershed Expo. After school</p>	<p>Junior Naturalists (80 students) and Creek Tour Guides (30 students) April -June 2013. Two Palomares teachers lead the two afterschool programs. 3-5 parent volunteers</p>	<p>Students in these programs lead creek tours for other students from other schools and their teachers and chaperones at the annual Watershed Expo; in leading the tours students demonstrate the material they have learned. Every tour is fully booked at the Expo because the teachers want to expose their students to their peers (the student Tour Guides), and the information they share.</p>

	programs open to Palomares School and other schools in watershed	assist.	
--	------------------------------------------------------------------	---------	--

C.7.i. ► Outreach to Municipal Officials

(For FY 12-13 Annual Report only) Summarize outreach conducted to increase the overall awareness of stormwater and/or watershed messages among municipal officials.

Summary:
 Regular updates on both the Unincorporated Area and Flood Control District Clean Water Programs were provided at Alameda County Board of Supervisor meetings and County management meetings throughout the fiscal year.

Section 8 - Provision C.8 Water Quality Monitoring

C.8 ► Water Quality Monitoring

State below if information is reported in a separate regional report. Municipalities can also describe below any Water Quality Monitoring activities in which they participate directly, e.g. participation in RMP workgroups, fieldwork within their jurisdictions, etc.

Summary

During FY 12-13, we contributed through the countywide Program to the BASMAA Regional Monitoring Coalition (RMC). In addition, we contributed financially to the Regional Monitoring Program for Water Quality in the San Francisco Estuary (RMP) and were represented at RMP committees and work groups. Monitoring efforts and results are documented in a separate report submitted March 15 of each year, as required in Provision C.8. For additional information on monitoring activities conducted by the Program, BASMAA RMC and the RMP, see the C.8 Water Quality Monitoring section of the Program's FY 12-13 Annual Report.

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.b ► Implement IPM Policy or Ordinance

Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphates, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.

Trends in Quantities and Types of Pesticides Used⁶⁰

Pesticide Category and Specific Pesticide Used	Amount ⁶¹				
	FY 09-10	FY 10-11	FY 11-12	FY 12-13	FY 13-14
Organophosphates					
Product or Pesticide Type A				0	
Product or Pesticide Type B				0	
Pyrethroids					
Product or Pesticide Type X				2.4 fl. oz.	
Product or Pesticide Type Y				0	
Carbaryl				0	
Fipronil				3.6 fl. oz.	

C.9.c ► Train Municipal Employees

Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	15
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within the last 3 years.	15
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within the last three years.	100%

⁶⁰ Includes all municipal structural and landscape pesticide usage by employees and contractors.

⁶¹ Weight or volume of the product or preferably its active ingredient, using same units for the product each year. The active ingredients in any pesticide are listed on the label. The list of active ingredients that need to be reported in the pyrethroids class includes: allethrin, bifenthrin, beta-cyfluthrin, bioallethrin, cyfluthrin, cypermethrin, cyphenothrin, deltamethrin, esfenvalerate, etofenprox, fenpropathrin, gamma-cyhalothrin, imiprothrin, lambda-cyhalothrin, metofluthrin, permethrin, phenothrin, prallethrin, resmethrin, sumithrin (d-phenothrin), tau-fluvalinate, tefluthrin, tetramethrin, tralomethrin, cis-permethrin, and zeta-cypermethrin.

Permittee Name: County of Alameda

C.9.d ▶ Require Contractors to Implement IPM			
Did your municipality contract with any pesticide service provider in the reporting year?		<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
If yes, attach one of the following:			
<input type="checkbox"/>	Contract specifications that require adherence to your IPM policy and standard operating procedures, OR		
<input checked="" type="checkbox"/>	Copy(ies) of the contractors' IPM certification(s) or equivalent, OR		
<input type="checkbox"/>	Equivalent documentation.		
If Not attached , explain:			

C.9.e ▶ Track and Participate in Relevant Regulatory Processes	
Summarize participation efforts, information submitted, and how regulatory actions were affected OR reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.	
Summary: During FY 12-13, we participated in regulatory processes related to pesticides through contributions to the countywide Program, BASMAA and CASQA. For additional information, see the Regional Pollutants of Concern Report submitted by BASMAA on behalf of all MRP Permittees.	

C.9.f ▶ Interface with County Agricultural Commissioners			
Did your municipal staff observe any improper pesticide usage or evidence of improper usage (e.g., pesticides in storm drain systems, along street curbs, or in receiving waters) during this fiscal year?		<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
If yes, provide a summary of improper pesticide usage reported to the County Agricultural Commissioner and follow-up actions taken to correct any violations. A separate report can be attached as your summary.			

C.9.g. ► Evaluate Implementation of Source Control Actions Relating to pesticides

(For FY 12-13 Annual Report only) Submit a report that evaluates; 1) the effectiveness of control measures implemented, and 2) attainment of pesticide concentration and toxicity targets for water and sediment from monitoring data (Provision C.8.). If needed, the report should include the following:

- Improvements to existing control measures and/or additional control measures required.
- A plan to implement improved and/or new control measures.

Summary:

An Effectiveness Evaluation is included in Section C.9 Pesticides Toxicity Control of the Countywide Program's FY 12-13 Annual Report.

C.9.h.ii ► Public Outreach: Point of Purchase

Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); **OR** reference a report of a regional effort for public outreach in which your agency participates.

Summary:

See the C.9 Pesticides Toxicity Control section of Program's FY 12-13 Annual Report for information on point of purchase public outreach conducted countywide and regionally.

C.9.h.iv ► Pest Control Contracting Outreach

(For FY 12-13 Annual Report only) Document effectiveness of outreach to residents who use or contract for structural or landscape pest control **OR** reference a regional that summarizes these actions.

Summary:

See the C.9 Pesticides Toxicity Control section of the Program's FY 12-13 Annual Report for a report that evaluates outreach to residents.

C.9.h.vi ► Public Outreach: Pest Control Operators

Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); **OR** reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.

Summary:

See the C.9 Pesticides Toxicity Control section of Program's FY 12-13 Annual Report for a summary of our participation in and contributions towards

Permittee Name: County of Alameda

countywide and regional public outreach to pest control operators and landscapers to reduce pesticide use.

**Response to Water Board Staff Comments on Section 9, Provision
C.9, of FY 11-12 Annual Report**

NA

Section 10 - Provision C.10 Trash Load Reduction

C.10.a.iii ► Minimum Full Trash Capture (Summary of Actions)

Provide the following:

- 1) Descriptions of actions/tasks initiated, conducted or completed in implementing Minimum Full Trash Capture Devices (due July 1, 2014), including numbers of devices, device types and total land area treated to-date by full capture devices;
- 2) Descriptions of planned actions/tasks and time schedules for completion;
- 3) A map that includes locations of all full capture devices installed (private and public) to-date and associated treatment areas, trash generation rates/areas, creek/shoreline trash hot spots, and trash management areas defined to-date.
- 4) A summary of maintenance activities implemented for each device or groups of devices, including descriptions of typical maintenance frequencies and issues associated with maintaining these devices.

Descriptions of Actions/Tasks (Conducted or Planned):

The County intends to rely primarily on larger, inline full capture devices (as opposed to drop inlet devices) to meet compliance requirements and plans to install approximately eight large, in-line, full trash capture devices throughout the County unincorporated area (Storm Flo Screen or GSRD from Roscoe Moss). Staff is working to assess and prioritize the eight drainage area identified in the attached Large Full Capture Device Sites and Drainage Areas map. Total drainage area is approximately xxx acres and each drainage area is detailed below.

The County's 70% Trash Reduction Strategy (due to the RWQCB 2/1/2014) will detail more specifically the installation priority and timeline of all planned in-line full trash capture devices. At least two trash full-capture treatment devices will be installed in the Alameda County Unincorporated Area prior to July 1, 2014 to help meet the County's 40% trash reduction permit requirement. The County plans to use smaller, inlet full capture devices to augment efforts in high and medium areas outside of the larger unit's drainage areas. These will also be identified and detailed in the County's 70% Trash Reduction Strategy.

Descriptions of Maintenance Activities:

The County will inspect installed units to determine maintenance frequency for large, inline devices. In the first year after installation, units will be inspected quarterly. We anticipate that units will need to be serviced 1-2 per year. More detail will be provided in the 70% Trash Reduction Strategy.

Permittee Name: County of Alameda

C.10.a.iii ► Minimum Full Trash Capture (List of Devices)

Provide a list of trash full capture devices installed to-date or planned for installation by July 1, 2014 and the land area treated by each device or group of devices.

** The County intends to rely primarily on larger, inline full capture devices (as opposed to drop inlet devices) to meet compliance requirements and plans to install approximately eight large, in-line, full trash capture devices throughout the County unincorporated area. The County's 70% Trash Reduction Strategy (due to the RWQCB 2/1/2014) will detail more specifically the installation priority and timeline of all planned in-line full trash capture devices. At least two trash full-capture treatment devices will be installed in the Alameda County Unincorporated Area prior to July 1, 2014 to help meet the County's 40% trash reduction permit requirement.

Applicable Trash Management Area (Preliminary Map ID)	Device Type	Planned or Installed	Maintenance Frequency	Total Number Installed	Total Area Treated (acres)

C.10.c ► Long-Term Trash Load Reduction Plan	
Provide descriptions of the progress made to-date on the development of Long-term Trash Load Reduction Plans due to the Water Board by February 1, 2014.	
Long-Term Plan Task	Summary of Progress
1. Identifying and mapping trash generating areas	See attached Trash Generation Rate Area map. County staff used Google Earth and site visits to “ground truth” and verify assigned priority (high, medium, low)
2. Identifying trash sources (as necessary or feasible) to assist in selecting trash management actions	Consideration was given to the types and costs of various trash management options and decided that although initial costs of the larger inline devices was greater, in the long-term they will prove to be most cost effective.
3. Prioritizing trash generating areas and associated types of trash problems	Working with M&O ground crew, storm drain vacuum truck operator, flood control watershed and design engineers, land- use and trash generation maps, County staff selected eight locations for the installation of large, in-line full capture devices. The County's 70% Trash Reduction Strategy (due to the RWQCB 2/1/2014) will detail more specifically the installation priority and timeline of all planned in-line full trash capture devices. At least two trash full-capture treatment devices will be installed in the Alameda County Unincorporated Area prior to July 1, 2014 to help meet the County's 40% trash reduction permit requirement.
4. Identifying and selecting trash management actions for specific management areas	See #3 above.
5. Defining the type of assessment(s) that will be used to demonstrate progress towards goals	The County will inspect installed units to determine maintenance frequency for large, inline devices. In the first year after installation, units will be inspected quarterly. We anticipate that units will need to be serviced 1-2 per year. More detail will be provided in the 70% Trash Reduction Strategy.

Permittee Name: County of Alameda

C.10.d ► Summary of Trash Reduction Actions

For each trash reduction action (i.e., control measures and best management practices) implemented by your municipality during the reporting period include a full description of the action. Describe actions initiated prior to and continued after the MRP effective date (December 2009), actions initiated after the MRP effective date, and actions planned for future implementation. If a planned action, also include the planned date of implementation. Add rows for actions not listed below as needed. Also identify the dominant source of trash and dominant types of trash removed for each action. To the extent possible, identify the applicable management areas identified on the map created under reporting section C.10.a.iii.

Action	Description	Trash Management Area(s) (Preliminary Map ID)	Dominant Sources	Dominant Types
Trash Management Area Specific Actions				
Full-Capture Treatment Devices	Continued Pre-MRP Actions: No full trash capture devices in the County of Alameda's Unincorporated Area.	Throughout County unincorporated area	Pedestrian litter; vehicles; landscape contractors;	Food and drink containers

Permittee Name: County of Alameda

C.10.d Summary of Trash Reduction Actions

For each trash reduction action (i.e., control measures and best management practices) implemented by your municipality during the reporting period include a full description of the action. Describe actions initiated prior to and continued after the MRP effective date (December 2009), actions initiated after the MRP effective date, and actions planned for future implementation. If a planned action, also include the planned date of implementation. Add rows for actions not listed below as needed. Also identify the dominant source of trash and dominant types of trash removed for each action. To the extent possible, identify the applicable management areas identified on the map created under reporting section C.10.a.iii.

Action	Description	Trash Management Area(s) (Preliminary Map ID)	Dominant Sources	Dominant Types
	<p>New/Enhanced Post-MRP Actions Initiated/Planned: The placement of the larger "in-line full capture device detailed in the short term plan was determined to be infeasible.</p> <p>The County plans to install several large, in-line, full trash capture devices throughout the County unincorporated area (Storm Flo Screen or GSRD from Roscoe Moss). Staff is working to assess and prioritize the eight drainage area identified in the attached Large Full Capture Device Sites and Drainage Areas map. C.10.d Summary of Trash Reduction Actions

For each trash reduction action (i.e., control measures and best management practices) implemented by your municipality during the reporting period include a full description of the action. Describe actions initiated prior to and continued after the MRP effective date (December 2009), actions initiated after the MRP effective date, and actions planned for future implementation. If a planned action, also include the planned date of implementation. Add rows for actions not listed below as needed. Also identify the dominant source of trash and dominant types of trash removed for each action. To the extent possible, identify the applicable management areas identified on the map created under reporting section C.10.a.iii.

Action	Description	Trash Management Area(s) (Preliminary Map ID)	Dominant Sources	Dominant Types
Street Sweeping	Continued Pre-MRP Actions: The County of Alameda's street sweeping program included sweeping most streets within the communities of Castro Valley, San Lorenzo, Ashland, Cherryland, Fairview, and Dougherty once per month. The community of Ashland is swept 2-4/month. Posting of parking enforcement signs for street sweeping occurs throughout the community of Ashland and about one quarter of the community of San Lorenzo. No other communities have parking enforcement signs for street sweeping.	All unincorporated roadways.	Pedestrian litter; vehicles; landscape contractors; ineffective trash containers; illegal dumping.	Food and drink containers and waste; yard waste; various paper products; and plastic.
	New/Enhanced Post-MRP Actions Initiated/Planned: Commercial/retail corridors – Hesperian Blvd, San Lorenzo, Castro Valley Blvd, Castro Valley, & Redwood Rd, Castro Valley are now swept weekly and Sweeping is done in the late night/early morning hours while cars are not parked on these streets and there is little road use.	Hesperian Blvd, San Lorenzo, Castro Valley Blvd, Castro Valley, & Redwood Rd, Castro Valley		
On-land Trash Cleanups	Continued Pre-MRP Actions: Community cleanup events, Adopt-A-Spot/Creek programs, Work Furlough Program, illegal dumping response, etc. take place throughout the year as one-day events or ongoing programs to beautify and remove trash from neighborhoods and watersheds. These events and programs are primarily Permittee led with some as collaborative events.	Mainly the unincorporated areas of Ashland, Cherryland, Castro Valley and San Lorenzo.	Households, businesses, contractors; pedestrian litter, illegal dumping.	General household refuse including furniture and

C.12.i ▶ Development of a Risk Reduction Program Implemented Throughout the Region

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary

A summary of countywide Program and regional accomplishments for these sub-provisions are included within the C.12 PCB Controls section of Program's FY 12-13 Annual Report and/or the BASMAA Regional POC Report.

Section 13 - Provision C.13 Copper Controls

C.13.a.iii.(2) ▶ Training, Permitting and Enforcement Activities

(FY 11-12 Annual Report and each Annual Report thereafter) Provide summaries of activities implemented to manage waste generated from cleaning and treating of copper architectural features, including copper roofs, during construction and post-construction including. :

- Development of BMPs on how to manage the water during and post construction
- Requiring the use of appropriate BMPs when issuing building permits
- Educating installers and operators on appropriate BMPs
- Enforcement actions taken again noncompliance

Last reporting year, the Countywide Program developed a Copper Control BMP fact sheet and County staff received training at subcommittee meeting. Fact sheets describing the required BMP are distributed at the planning counter through the permitting procedure. In FY2012-13, the County has not received one application that included any copper architectural features.

C.13.a.iii.(3) ▶ Evaluation of Effectiveness

(FY 12-13 Annual Report) Evaluate the effectiveness of measures the agency has undertaken to prevent discharge of wastewater to storm drains during the installation, cleaning, treating, and washing of the surface of copper architectural features. The discussion of the effectiveness of these measures should include BMP implementation and may propose additional measures to address this source of pollutants.

Fact sheets describing the required BMP are distributed at the planning counter through the permitting procedure. The County has not received one application that included any copper architectural features for at least the last two years.

C.13.c ▶ Vehicle Brake Pads

Reported in a separate regional report.

A summary of the countywide Program's participation with the Brake Pad Partnership (BPP) is included within the C.13 Copper Controls section of Program's FY 12-13 Annual Report and/or the BASMAA Regional POC Report.

C.13.c.iii ▶ Water Quality Issues Associated with Automobile Brake Pads

Permittee Name: County of Alameda

(FY 12-13 Annual Report Only) – Assess status of copper water quality issues associated with automobile brake pads and recommend brake-pad related actions for inclusion in subsequent permits if needed.

An assessment of copper water quality issues associated with automobile brake pads and recommend brake-pad related actions for inclusion in subsequent permits is included within the C.13 Copper Controls section of Program's FY 12-13 Annual Report and/or the BASMAA Regional POC Report.

C.13.d.iii ► Industrial Sources Copper Reduction Results

Based upon inspection activities conducted under Provision C.4, highlight copper reduction results achieved among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed.

Summary

Any businesses identified during industrial/commercial CWP inspections as potential sources of copper are presented with information describing ways to reduce copper exposure risks. In the unincorporated County, automotive repair facilities and carwashes appear to represent the most likely potential sources of copper in the form of brake dust and additional BMP are often requested (i.e., drain inlet filters) to supplement existing BMP that may appear underperforming. No industries considered to be big copper sources are present in unincorporated County, such as metal platers, semi-conductor manufacturers, smelters, foundries, boat yards, scrap yards, etc.

C.13.e ► Studies to Reduce Copper Pollutant Impact Uncertainties

Report on progress of studies being conducted countywide or regionally to reduce copper pollutant impact uncertainties. State below if information is reported in a separate regional report.

Summary

A summary of the countywide Program and/or regional efforts to develop regional studies to reduce copper pollutant impact uncertainties is included within the C.13 Copper Controls section of Program's FY 12-13 Annual Report and/or BASMAA Regional POC Report.

Section 14 - Provision C.14 PBDE, Legacy Pesticides and Selenium Controls

C.14.a ► Control Programs for PBDEs, Legacy Pesticides and Selenium Controls

Report on progress of studies being conducted countywide or regionally to characterize the distribution and pathways of PBDEs, legacy pesticides, and selenium. State below if information is reported in a separate regional report.

Summary

A summary of the countywide Program and regional efforts related to the Control Program for PBDEs, Legacy Pesticides and Selenium is included within the C.14 PBDE, Legacy Pesticides and Selenium section of Program's FY 12-13 Annual Report and/or BASMAA Regional POC Report.

C.14.a.v. ► Control Programs for PBDEs, Legacy Pesticides and Selenium Controls – Load Computation

(For FY 12-13 Annual Report only) Submit a report with information required to compute loading estimates of PBDEs, legacy pesticides and selenium from urban runoff to the Bay.

Summary

Information required to compute loading estimates of PBDEs, legacy pesticides and selenium from urban runoff to the Bay is included within the C.14 PBDE, Legacy Pesticides and Selenium section of Program's FY 12-13 Annual Report and/or BASMAA Regional POC Report.

C.14.a.vi. ► Control Programs for PBDEs, Legacy Pesticides and Selenium Controls – Control Measures

(For FY 12-13 Annual Report only) Submit a report identifying control measures and/or management practices to reduce impacts from discharges of PBDEs, legacy pesticides or selenium in urban runoff.

Summary

A report identifying control measures and/or management practices to reduce impacts from discharges of PBDEs, legacy pesticides or selenium in urban runoff is included within the C.14 PBDE, Legacy Pesticides and Selenium section of Program's FY 12-13 Annual Report and/or BASMAA Regional POC Report.

Section 15 - Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.iii.(1), C.15.b.iii.(2) ► Planned and Unplanned Discharges of Potable Water

Is your agency a water purveyor?	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
If No , skip to C.15.b.vi.(2):				
If Yes , Complete the attached reporting tables or attach your own table with the same information. Provide any clarifying comments below.				
Comments:				

C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

<p>Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:</p> <ul style="list-style-type: none"> • Promote conservation programs • Promote outreach for less toxic pest control and landscape management • Promote use of drought tolerant and native vegetation • Promote outreach messages to encourage appropriate watering/irrigation practices • Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.
<p>Summary:</p> <p>A summary of the Countywide Program's effort to promote the use of less-toxic pest management and the use of drought tolerant and native vegetation is included within the C.7 Public Information and Outreach section of the Countywide Program's FY 12-13 Annual Report.</p> <p>Local outreach efforts include messaging with a less toxic pest control and use of native plants focus, as describe in section C.7 of this report.</p>

C.15.b.iii.(1) ► Planned Discharges of the Potable Water System										
Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Duration of Discharge (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L)	pH (standard units)	Discharge Turbidity ⁶² (NTU)	Implemented BMPs & Corrective Actions
None										

⁶² Monitor the receiving water for turbidity if necessary and feasible. Include data in this column if available.

Complaint/Spill/Discharge Tracking Spreadsheet

[Enter Agency Name]

MRP

Requirement: The MRP's Provision C.5.f requires the following: "All incidents or discharges reported to the complaint/spill system that might pose a threat to water quality shall be logged to track follow-up and response through problem resolution. The data collected shall be sufficient to demonstrate escalating responses for repeat problems, and inter/intra-agency coordination, where appropriate."

Purpose: The purpose of this spreadsheet is to provide an example "water quality spill and discharge complaint and follow up" tracking method for the ACCWP agencies to adapt for their use starting April 1, 2010.

Complaint Information													Investigation Information										Follow Up Information																	
Date and Time of Complaint Receipt		Source of Complaint Enter "1" for source of complaint			Threat to Water Quality		Type of Pollutant(s) Enter "1" for each type reported								Date Investigation Started	Time Investigation Started	Type of Pollutant(s) Enter "1" for each type found										Type of Enforcement Enter "1" for each type				Response Times Enter number of days		Enter "1" if Resolved in Timely Manner

C.7.1 Alameda County Resource Conservation District FY12/13 Final Report

Date: 8/8/13

To: Sharon Gosselin, ACFC&WCD; Cynthia Butler, ACRC

From: Amy Evans, Alameda County RCD

RE: Final Report FY 2012/13- ACRC contract C- 5013

The Alameda County RCD contract with the Alameda County Flood Control and Water Conservation District for FY2012/13 includes a number of tasks; some of these with activities have been organized into the following three sections: public outreach events, citizen involvement events and school age children outreach. Following these sections is a list of contract tasks with additional information that was not classified into these categories.

Please note that the activities listed in the report below are in the same order as on the Consultant Annual Report Form

Public Outreach Events

Watershed Science Expo at Palomares School (Task 2)

The Watershed Science Expo was held at Palomares School, Castro Valley, on Friday 5/17/13, from 8:30-2:30 PM. Local schools in the San Lorenzo Creek watershed attended, along with many parent volunteers. The Expo exhibitors came from all over the county, although fewer were available this year than in past years due to staffing shortages.

The watershed education-focused day featured watershed/hands-on science -focused activity stations for 3rd grade students. Palomares students, trained as "Creek Tour Guides" during an afterschool program, give continual tours of the creek during the day to all participants. A presentation featuring live, local wildlife was given by trained naturalists for groups of students during the day.

3rd grade students came from 14 classes from 3 schools from Castro Valley and San Lorenzo. Over 445 students, 2 principals, 14 teachers and 90 parent helpers attended. 35 parent/community and PTA volunteers helped out with myriad tasks. This year 14 natural resource and science education agencies and organizations had activity stations at the Expo; there were a total of 17 stations.

This year, RCD staff hosted two activity stations. The first, conducted alongside the creek was a "creek critters" station at which students could practice identifying aquatic insects that are typically found in Palomares Creek and learn about watersheds and water quality protection by interacting with a watershed diorama. The second station was situated in the school garden, and focused on alternative methods of pest control in order to reduce impact on creek life and native pollinators. Students learned about how insects are impacted by pesticides, specifically native bees and honey bees. A "bee search" was done in the school garden by the students.

The number of classes that could attend the Expo was reduced this year due to difficulty with scheduling and funding shortages at the schools. Some classes were able to attend later in May and June as visiting schools which are described below under School-Age

Children outreach.

Extensive donations of materials came from the local sanitary district, stores, small businesses, adult school, and nearby schools. The Palomares Parent Club provided many adult volunteers who organized and presented a lunch for the exhibitors.

Evaluation: all teacher responses (8 received) were positive; teachers appreciated the opportunity to learn about their watershed in hands-on activities conducted at a natural creek setting.

For the 3rd year, students participated in a trash cleanup at each station during the course of the Expo. This effort is described below under Citizen Involvement.

Earth Day Event , Moreau High School, Hayward (Task 1)

ACRCD Hands-On Conservation was represented at the event, and staffed a table on 4/25/13 with "Creek Care" photo display materials and met informally with students for 1.5 hours during the event to invite students to the upcoming Earth Day creek cleanup volunteer workday at Castro Valley Creek. Met and talked with approximately 24 high schools students, 3 other organization tablers, and 2 staff members. The school student body attended the event during lunch periods. Twenty handouts on the 4/27/13 Castro Valley Earth Day event were given out to students, with many freshmen being enthusiastic about coming to the event as they have extensive environment-focused community service requirements for that year of school.

(Flood Control District)

Community Service and Volunteer Faire, Logan High School, Union City (Task 1)

ACRCD staffed a table at the Faire on 3/28/13 with a photo display of local Hands-On Conservation projects and talked informally with students for 1.5 hours during the Fair on the topics of "Creek Care" and Earth Day volunteer opportunities at the nearby Union City Civic Center Park in Union City as part of the Hands-On Conservation Program. Approximately 35 high schools students, 6 other tabling organizations and 6 staff members. Most of the school's students that are on campus at the lunch hour attended the fair; estimated student attendance at the fair is 100-150 students visiting 15 tables. Twenty-five handouts on protecting and participating in creek cleanup activities, including the 4/21/13 workday, were taken by students, teachers and other exhibitors and visitors. A great way to publicize the close-by stewardship opportunities available to students and to inform teachers of the program.

(Flood Control District)

Alameda Creek Watershed Council events and activities (Task 6)

RCD staff planned and conducted two Alameda Creek Watershed Council events during 2012/13 for watershed stakeholders, including Council members, members of the public and watershed organizations, college students, teachers and students.

RCD staff facilitated the Annual Alameda Creek Watershed Council Conference, held

October 25th 2012 at the Dublin Library, which highlighted current research and restoration activities in the watershed, and encouraged networking and communication between the 55 stakeholders who attended. A tour of the new Alamo Canal bike lane was held during the lunch hour, hosted by Friends of the Arroyos and the City of Dublin.

A full day workshop on water quality assessments was conducted in conjunction with the Bay Area Watershed Network in Oakland on 5/20/13, with 70 participants. A matrix of what assessment methods are being used by which organizations or agencies was generated as a product of the workshop, with assistance from RCD staff.

Council planning workgroup meetings were held on 8/29/12 and 3/20/13. The group discussed a new website, potential meeting speakers, and a potential name change and update to the focus of the Council. A new website was sketched out in May and will be developed and implemented in the next fiscal year. RCD staff facilitated Council meetings and the planning workgroup sessions. Work done under Task 6 was used at match for the RCD's an EPA grant that funds water quality improvement BMPs at properties in several sub watersheds in the Alameda Creek Watershed.

Kathy Kramer's Bringing Back the Natives Garden Tour (Task 3)

This project is a subcontract in the ACRCO County Outreach contract. The tour was held on 5/5/13.

Citizen Involvement Events

Community Stewardship Grants Program (Task 9)

This ACCWP program, which distributes grant funds to various groups for watershed protection projects, is administered through the RCD. Five projects were funded through the \$20,000 in grant funds in the FY12/13 grant cycle; details are in the ACCWP report. RCD tasks included developing the updated RFP and flyer, publicizing the grant, preparing grant summaries and materials for the workgroup, developing the agreements, making payments, providing reports to the PIP committee and answering grantee questions. All of the projects from the 2011/12 cycle were completed as well, and final funds were paid out in October 2012. In March 2013 work began on the 2013/14 grant cycle.

Youth Stewardship - Hands-On Conservation (Task 1)

Creek Cleanups/Planting Native Vegetation

The Hands-On Conservation Program provides opportunities for outdoor stewardship activities for young adults of middle school through college age to increase knowledge of natural resources and protection of watersheds through hands-on activities that include water quality improvement activities at local creeks, stewardship education and creek side habitat restoration. Activities include age appropriate elements of watershed education and career development. Activities during FY2012/13 included these events:

Union City Civic Center Park, Union City

This is an adopted spot through the ACFC&WCD Adopt A Creek/Spot program. The park features a flood control channel with an adjacent paved walking trail that extends beyond the park 1/8 mile to Alameda Creek. The site is very close to Logan High School, which is the primary source of volunteers for the Hands-On Conservation workdays.

Workdays included Earth Day (4/21/13) and World Water Monitoring Day (9/22/12). A "Creek Care" workday in which the creek side plantings were maintained was held on 11/10/12. Workdays included trash removal from creek banks, planting and maintaining irrigation for native plants in a creek side trail area, invasive plant removal and educational walks along the creek as trash is picked up. Water quality monitoring was done in September and results reported to the World Water Monitoring Day website. Students from the Logan High School (Union City) Ecology class, Sustainability Club and Interact Club and other student and community volunteers participated. Ecology teachers participated at events and co-led water quality testing training event; a higher number of students turned out for this event because they received extra credit from teachers and community service hours as well.

Workdays averaged 15-20 people, primarily high school students and local residents, several teachers and group leaders. Trash cleaned up during the workdays included approximately 2 large (12 cu ft) trash bags filled for each event. Trash was sorted and recycled. Approximately 1200' linear feet of creek banks cleaned (3 times =3600'). The park trail that winds along the creek and around a pond was cleaned up throughout the park during the 3 events.

Coordination was maintained with Union City Parks staff to maintain tools in the shed at the site and to provide wildflower seed for planting at the site. Previous plantings were maintained with weeding, mulching and irrigation replacement, and several new shrubs were planted. Coordination was maintained with Logan High School teachers and the school volunteer/career center to notify students of volunteer opportunities and to confirm student volunteer credits.

Logan High School Bay Friendly Garden installation, Union City

A 250 square foot Bay Friendly garden was planned and installed by Logan students, Sustainability Club members, and their biology teacher, with assistance provided by the Hands-On Conservation program. Two planting events were held, on 1/21/13, MLK National Day of Service, and on 2/18/13 Washington's birthday holiday. 15-20 students participated at each event; the site was prepared for planting, plants and trails laid out and 30 plants installed with irrigation. Students had prepared planting plans and selected plants that would require little water but which had wildlife benefits. An area of lawn on campus was replaced by the garden. Plant signage was fabricated and installed at the workdays. The student Garden Club will help maintain it.

Hands-On Conservation workday at Dig Deep Farm, San Leandro

30 Students from the environmental club and their teacher/advisor from San Lorenzo High School planted native grasses on Saturday 2/23/13 to control erosion and help infiltrate rain water at the farm edge, and assisted with care of crops at the non-profit farm in the San

Leandro hills. Watershed lessons were led by the Earth Team organization, and bus transport was also provided by that organization for the event. The farm site is in the upper watershed (headwaters) of Estudillo Canal, which is also the watershed that the high school is in, and that connection was made with the students. Staff from Dig Deep led a farm tour and talked about land management for farming with the students. The Hands-On Conservation program initiated and facilitated the event, and provided the native grass plants and provided tools and equipment for the project, as well as providing informal education to the students on land stewardship and related careers. A 100' x 10' row of crops was weeded by the students and 100 plugs of native grass planted. Students worked side by side with disadvantaged community members who work for Dig Deep, and the farm manager and assistants. All parties involved in the project were very enthusiastic about the day's activities and want to repeat it at their downtown farm near San Lorenzo next year. The high school students had wanted a local project in their watershed with which they could have a long term involvement, and this project instigated that connection.

(Unincorporated area)

Sunol Agpark Hedgerows, Sunol

Stewardship workdays were held in Sunol at the Sunol AgPark, an organic farm located along the edge of the Arroyo de la Laguna. Students and community volunteers planted native and drought tolerant flowering plants in the hedgerows, wildflowers in the grass filter strip, removed invasive plants and weeds in the grass filter strip and native plant hedgerow. The hedgerows provide habitat for pollinators and beneficial insects. The grass filter strip prevents sediment from the farm fields from entering the creek corridor.

A Sunol community workday was held with 10 volunteers at the hedgerow on 3/2/13 during which native flowering plants and grasses were planted. A much larger group of 80 volunteers from Clif Bar came on 6/13/13 to mulch and weed the 800' hedgerow, monitor beneficial insects, create and install plant signage, and organize educational materials. An AgPark hedgerow tour and talk was given by RCD staff Amy Evans to approximately 20 people as part of a 4/3/13 workshop on hedgerows that was given by SAGE.

RCD staff assisted with a hedgerow planning, design and installation project with approximately 50 Kennedy High School (Fremont) and Castlemont High School (Oakland) students and 10 teachers/chaperones for a new 200' segment of the hedgerow. SAGE (Sustainable Agriculture Education) led the project, with educational focus being the role of hedgerows in supporting beneficial insects and pollinators which are needed for the farm's organic program. RCD staff assisted with two creek tours and two planting sessions at the Agpark (12/6/13, 12/11/13, 1/18/13, 2/2/13).

(Unincorporated and Flood Control District)

Bay Trees Park, Native Plant Trail, Castro Valley, Hands-On Conservation

Work continued at the native plant trail in Bay Trees Park. It is an adopted spot from ACFC&WCD that is adjacent to the intersection of Crow and Cull Creeks. Planting workdays with a range of 6-12 volunteers each were held on 9/29/12, 10/27/12, 12/8/12, 12/15/12, 2/16/13 and 3/23/13. On 12/15/13 a group of 40 students and teachers from the

environmental clubs at San Lorenzo High School planted a large number of plants, working in conjunction with the Earth Team organization, which provided the bus for the students and environmental lessons and activities, including creek water testing, creek cleanup and ivy removal from native trees.

The workdays had a "Creek Care" theme and stewardship activities reflected the actions that residents can take to protect creeks and enhance wildlife habitat along them. At the workdays student and community volunteers installed and repaired bender board to define pathways in a native plant trail, planted native plants, removed weeds, cleaned up trash along the creek banks in the park, and removed ivy from creek side trees. Approximately 50' of bender board was installed and 300' repaired, 35 plants installed with irrigation, mulch and plant caging. Overall, approximately 4 large bags (12 cu ft each) were filled with trash from creek side areas and the park trail. Continued to receive direct positive feedback from park users about the project. Hope to attract more students from Castro Valley High School next year, as they are launching a community service hours requirement.

Castro Valley Creek, Castro Valley- Coastal Cleanup Day and Earth Day Cleanup with Hands-On Conservation

Two cleanup events were held at Castro Valley Creek along the creek trail that extends from the Castro Valley Library to Castro Valley Blvd. These events were conducted in cooperation with the ACFC&WCD which provided access to the creek and pickup of the large volume of trash collected. For the 9/15/12 Coastal Cleanup Day the creek trail was cleaned up, invasive plants removed and native riparian plants along creek side trail were maintained. Coastal Cleanup Day required a written trash tally by volunteers and reporting of trash collected. Approximately 1000 linear feet of creek bank and trail was cleaned up by 29 student and community volunteers for Coastal Cleanup Day; 83 lbs of trash bagged up (16 trash bags); bulky items in addition, reported to CCDay officials. Being able to publicize the event on the official Coastal Cleanup website helped bring in volunteers for this effort, as it is widely publicized by many media sources.

The 4/27/13 Earth Day event was primarily a project of other involved agencies, especially Nate Miley's office and CVSan and the local group, Friends of San Lorenzo Creek; a pre-cleanup presentation was given by Friends group on the creek restoration that had taken place. Scott Seery from AC Environmental health provided excellent small group leadership for the creek cleanup due to his familiarity with the site. The Hands-On conservation program provided tools and equipment and leadership of small groups of volunteers. Similar activities were done at both events, except that Earth Day included spreading mulch on plantings along the trail, with a total of 30 volunteers working at this spot. They cleaned up a similarly large volume of trash: 14 large trash bags and similar volume of bulky items (12 cu ft each bag); other garbage along 1000' of creek and trail. The Earth Day cleanup at this spot is the Friends of San Lorenzo Creek's primary annual service project, and they expressed appreciation for the help from the Hands-On Conservation program.

These are excellent stewardship projects because of the relatively large turnout of local

volunteers, and because of the real need for cleanup of this highly visible and widely used creek trail and restoration spot.

Earth Day Cleanup at Palomares Creek and School, Castro Valley (Task 2)

A school campus, creek and trail maintenance day was held as part of the Castro Valley Earth Day event on 4/27/13. 43 Parent volunteers and community members worked at the school to clean up the campus, to clear debris and provide erosion control along the trail, remove invasive plants and poison oak in preparation for the Expo. Approx. 400-500 linear feet of creek area/ trail was improved.

Earth Day- Alameda Creek, Niles with Hands-On Conservation (Task 1)

The Saturday 4/20/13 creek cleanup was initiated by the Hands-On Conservation program and publicized and conducted in collaboration with the Alameda Creek Alliance at their newly adopted spot along Alameda Creek in Niles. ¼ mile of creek bank was cleaned up by 16 community volunteers. 5 large trash bags were filled (bag size 12 cu ft), with bulky materials collected in addition. ACA staff Ralph Boniello talked with the group about Alameda Creek and its fisheries that they have been working hard to restore with the cooperation of local agencies. The EBRPD Niles Staging Area is an excellent spot for staging a cleanup, as it has the necessary facilities and good access to both the Alameda Creek flood control channel and the natural creek upstream. Bo

(Flood Control District)

School wide Trash Cleanup at Palomares School Watershed Science Expo (Task 2)

A school wide Campus Trash Cleanup was held during the Palomares Watershed Science Expo on 5/17/13 (Expo described above under Public Outreach Event). The trash pickup activity was done by groups of students, exhibitors, teachers and volunteers at each of 17 stations during the day. Each activity station was given a trash bag and asked to have each group of students pick up trash from the area surrounding the station on the campus. Trash was collected at the end of the day from each station and recycled by a team of 6 Jr. Naturalists- primarily Palomares Elementary students. The campus and creek area was left clean at the end of the Expo. A storm drain is situated in the schoolyard, which leads directly via a short pipeline to Palomares Creek, so cleanup is critical.

School-Age Children Outreach

Palomares School Watershed Education- Castro Valley (Task 2)

(Unincorporated and Flood Control District)

Visiting Schools at Palomares School

Because two of the schools that typically attend the May Watershed Expo, Colonial Acres and Del Rey in San Lorenzo could not come that day (May 17th) they instead came two classes at a time on four days in May and June (5/29, 5/31, 6/3 and 6/4/13). Each class had hands-on creek lessons at the outdoor classroom at the school, and creek tours led by

the Palomares Tour Guides, and other student-led activities. A total of 228 students, 8 teachers, and 72 chaperones attended over the course of the four days.

Bi-Weekly watershed and creek science lessons during the school day at Palomares School

Creek and watershed lessons were conducted between October and May in the 2012/13 school year for Palomares students in K-5th grades. 94 watershed-based lessons were taught to classes of 24-32 students at the school campus by the credentialed teacher and watershed educator Sherry Johnson. Topics cover water quality studies, creek ecology, soil/geology, wildlife and plants, and bird life in relation to the creek and larger San Lorenzo creek watershed; these are tied to math and science exercises and part of the schools science program. Lessons for Palomares students primarily take place on campus at outdoor classroom at the creek. Curriculum is tied to state standards for each grade level and is science based.

Hands-on erosion control and invasive plant removal continued to be done at the Palomares campus by students during the school year, and a bioswale project continued to be fine tuned. A native plant garden and native grass area were established by the students this year. These stewardship activities are done by students with their teacher as part of creek protection lessons.

Palomares principal and teachers consider creek lessons to be a part of their regular science instruction, since creek lessons meet state standards. Therefore they allow time for the lessons during the school day. Science testing reflects what students learn.

Palomares School after-school programs

A Junior Naturalists after school program for 80 1st-5th grades and a Creek Tour Guides for 30 3rd-5th graders was held between April and June 2013. The number of students in the Junior Naturalists jumped from 60 to 80 this year. It is open to Palomares School students and other schools in the watershed. The program is conducted at Palomares Creek on the school campus at the end of the school day and features hands-on activities that cover water quality studies, creek ecology, conservation activities and stewardship. Tour Guides learn content and methods for leading creek tours at the annual Watershed Expo. Two Palomares teachers lead the two afterschool programs, and 3-5 parent volunteers assist them. Students in these programs lead creek tours for other students from other schools and their teachers and chaperones at the annual Watershed Expo; in leading the tours students demonstrate the material they have learned.

The Jr. naturalist and Tour Guides programs were highlighted in a presentation to the Castro Valley School Board and at the Palomares Elementary Open House event in May.

Additional information and background on contract tasks 1-10 for Final Report:

Task 1 Youth Stewardship - Hands-On Conservation And Youth Outreach Events

The Hands-On Conservation Program provides opportunities for outdoor stewardship activities for young adults of middle school through college age to increase knowledge of natural resources and protection of watersheds through hands-on activities that include water quality improvement activities at local creeks, stewardship education and creek side habitat restoration. Activities include age appropriate elements of watershed education and career development.

See the above sections for information on HOC activities. RCD staff carried out stewardship workdays with students and community volunteers at the adopted spots and also engaged in site planning and maintenance activities in addition to the community workdays. Staff also maintains the HOC website where volunteers can register for workdays. Staff continued to develop and maintain partnerships and co-host events with other groups such as Earth Team, the Friends of San Lorenzo Creek, the Alameda Creek Alliance, Sustainable Agriculture Education, agency landowners and others. Adopt-A-Spot agreements were renewed for two sites, Bay Trees Park and the flood control channel in the Union City Civic Center Park. Two RCD interns helped at some of the workdays which had larger numbers of volunteers. Signups for workdays are made through the handsonconservation.org website.

Two outreach events at local high schools included tabling and interacting with high school students at environmental/community service fairs in order to educate students in creek and watershed protection and to sign up students for creek habitat restoration workdays and creek cleanups as part of the RCD's Hands on Conservation Program, and to encourage other watershed protection actions. The two schools visited this year were Moreau high School in Hayward and Logan High School in Fremont.

Task 2 Palomares Watershed Education

Through this program, hands-on, site- specific creek and watershed lessons are taught to Palomares students and to classes from schools in the San Lorenzo Creek watershed. Palomares Creek, which flows along the edge of the school campus, was restored by the Alameda County Flood Control District and other partners in 2000-2001. A creek side trail and outdoor classroom area was also developed at that time. A curriculum was developed for the program which meets state standards and is directed and taught by Sherry Johnson, a credentialed teacher and ACRCDD staff member. After school programs include Junior Naturalists and Palomares Creek Tour Guides. This program has been ongoing since 2001.

The many facets of the program are described above.

Task 3 Bringing Back the Natives 2013 Garden Tour- Kathy Kramer Consulting

This project is a subcontract through ACRCDD. The annual native plant garden tour for the public was held on 5/5/13. Gardens featuring drought tolerant and wildlife-friendly plants were showcased. Kathy provided an annual report to Cynthia Butler with details of the tour and results.

Task 6 Alameda Creek Watershed Coordination Tasks

Tasks include coordination, education, outreach, and facilitation in order to improve Alameda Creek Watershed conditions.

Meetings are described above under public outreach events. RCD staff Amy Evans and Crystal Simons coordinated meetings, and facilitated the Council planning workgroup. Amy assisted the Adopt a Creek Spot effort in the east Alameda Creek watershed area which began as part of the Council's stewardship projects in early 2012. The ACWC webpage: www.acrcd.org/WatershedCouncil.aspx

Task 7 Alameda County Watershed Forum (ACRCD subcontract)

The task was discontinued in FY12/13, and funds were redirected.

Task 9 Community Stewardship Grants Program (CSGP)

Alameda County RCD administers the Alameda Countywide Clean Water Program's Community Stewardship Grant program. Five grants were awarded in FY12/13 which offered a total of \$20,000 in grant funding to watershed groups and others for water quality and conservation improvement activities. The FY11/12 program was successfully completed, and work began in March 2013 on the FY 13/14 program.

Task 10 Storm water Information and Outreach Assistance

Cynthia Butler, RCD staff, works in conjunction with Sharon Gosselin as the Alameda County Clean Water Program Outreach and Public Information Coordinator.

Cynthia's activities are reported separately to Sharon, but include coordination activities with the PIP subcommittee, coordination of outreach events and materials, local media and communications activities and event planning, and coordination of a regional program for BASMA. Cynthia is responsible for reporting on Public outreach and Education for the MRP; her activities are covered in those reports. Cynthia collaborates with various RCD staff in implementing her projects.

Task 12

Cynthia began work in May 2013 developing plans for Task 12 which includes the development of an interactive watershed map based on Google Earth, with a subcontract to the consultant, Fugro. Cynthia is overseeing other RCD staff that are developing the creek information for the map.
