Mr. Bruce H. Wolfe
Executive Officer
San Francisco Bay Regional Water Quality Control Board
1515 Clay Street, Suite 1400
Oakland, CA 94612

Subject: **City of South San Francisco**
FY 2015/16 Annual Report

Dear Mr. Wolfe:

This letter and Annual Report with attachments is submitted by the City of South San Francisco pursuant to Permit Provision C.17.a of the Municipal Regional Stormwater NPDES Permit (MRP), Order R2-2015-0049, NPDES Permit No CAS612008 issued by the San Francisco Bay Regional Water Quality Control Board. The Annual Report provides documentation of compliance activities conducted during FY 2015/16 and related accomplishments.

Please contact Andrew Wemmer at 650-829-3840 regarding any questions or concerns.

Very truly yours,

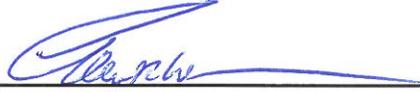

Andrew Wemmer
Environmental Compliance Supervisor

**City of South San Francisco
FY 2015/16 ANNUAL REPORT**

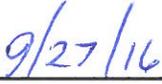

Certification Statement

"I certify, under penalty of law, that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted, is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Signature of Duly Authorized Representative:

Andrew Wemmer
Environmental Compliance Supervisor

Background Information					
Permittee Name:	City of South San Francisco				
Population:	66,174				
NPDES Permit No.:	CAS612008				
Order Number:	R2-2015-0049				
Reporting Time Period (month/year):	July 2015 through June 2016				
Name of the Responsible Authority:	Mike Futrell	Title:	City Manager		
Mailing Address:	400 Grand Avenue				
City:	South San Francisco	Zip Code:	94080	County:	San Mateo
Telephone Number:	(650) 877-8500	Fax Number:	(650) 839-6609		
E-mail Address:	Mike.Futrell@ssf.net				
Name of the Designated Stormwater Management Program Contact (if different from above):	Andrew Wemmer	Title:	Environmental Compliance Supervisor		
Department:	Public Works/WQCP				
Mailing Address:	195 Belle Air Road				
City:	South San Francisco	Zip Code:	94080	County:	San Mateo
Telephone Number:	(650) 829-3840	Fax Number:	(650) 829-3855		
E-mail Address:	Andrew.Wemmer@ssf.net				

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary:

The City of South San Francisco has developed and utilizes an electronic data management system for full trash capture device O&M inspection/maintenance.

The City of South San Francisco participated in the Program's

- 1) Municipal Maintenance Subcommittee in Fiscal Year 15-16;
- 2) Trash Full Capture Device (GSRD) site tour in Millbrae on June 3, 2016; and
- 3) Development of a trash full capture device O&M inspection/maintenance data management system.

Refer to the C.2 Municipal Operations section of the Program's FY 15-16 Annual Report for a description of activities implemented at the countywide and/or regional level.

C.2.a. ► Street and Road Repair and Maintenance

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

Y	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
Y	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
Y	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments:

C.2.b. ► Sidewalk/Plaza Maintenance and Pavement Washing

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

Y	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
----------	---

Y	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs
----------	--

Comments:

C.2.c. ► Bridge and Structure Maintenance and Graffiti Removal

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

NA	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
-----------	--

Y	Control of discharges from graffiti removal activities
----------	--

Y	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
----------	--

Y	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal
----------	---

Y	Employee training on proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.
----------	---

Y	Contract specifications requiring proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.
----------	--

Comments:
Bridges located in South San Francisco's service area are owned and operated by either San Mateo County or Caltrans.

C.2.e. ► Rural Public Works Construction and Maintenance					
Does your municipality own/maintain rural ¹ roads:		<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
If your answer is No then skip to C.2.f.					
Place a Y in the boxes next to activities where applicable BMPs were implemented. If not applicable, type NA in the box and provide an explanation in the comments section below. Place an N in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.					
<input type="checkbox"/>	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas				
<input type="checkbox"/>	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources				
<input type="checkbox"/>	No impact to creek functions including migratory fish passage during construction of roads and culverts				
<input type="checkbox"/>	Inspection of rural roads for structural integrity and prevention of impact on water quality				
<input type="checkbox"/>	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion				
<input type="checkbox"/>	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate				
<input type="checkbox"/>	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings				
Comments including listing increased maintenance in priority areas:					

¹Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. ► Corporation Yard BMP Implementation

Place an X in the boxes below that apply to your corporations yard(s):

<input type="checkbox"/>	We do not have a corporation yard
<input type="checkbox"/>	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit
<input checked="" type="checkbox"/>	We have a Stormwater Pollution Prevention Plan (SWPPP) for the Corporation Yard(s)

Place an X in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

<input checked="" type="checkbox"/>	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment
<input checked="" type="checkbox"/>	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system
<input checked="" type="checkbox"/>	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method
<input checked="" type="checkbox"/>	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used
<input checked="" type="checkbox"/>	Cover and/or berm outdoor storage areas containing waste pollutants

Comments:
All areas of the Corporation Yard utilized acceptable BMPs.

If you have a corporation yard(s) that is not an NOI facility, complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information:

Corporation Yard Name	Inspection Date (1x/year required)	Inspection Findings/Results	Follow-up Actions
City of South San Francisco Corporation Yard	9/22/15	All areas of the Corporation Yard utilized acceptable BMPs.	No follow-up actions required

Section 3 - Provision C.3 Reporting New Development and Redevelopment

**C.3.a. ► New Development and Redevelopment Performance
Standard Implementation Summary Report**

(For FY 15-16 Annual Report only) Provide a brief summary of the methods of implementation of Provisions C.3.a.i.(1)-(8).

Summary:

(1) Municipality’s legal authority to implement C.3; The City of South San Francisco has legal authority to implement C.3 under Municipal Code Chapter 14.04 Stormwater Management and Discharge Control.

(2) Municipality’s development review and permitting procedures, including use of conditions of approval or other enforceable mechanisms;

During development review of regulated projects applicants will submit project to the Planning Department. During this phase the WQCP will give a list of conditions of approval that are required to be met for the project. The City uses language from the model COA’s that the countywide program provided. The Building and Planning Divisions of the City of South San Francisco route all plans to the Water Quality Control Plant (WQCP) that have the potential to affect stormwater during construction and that require treatment after construction. Those departments also forward plans to the WQCP that propose any changes to indoor plumbing. These plans are reviewed and requirements for site controls and source control measures are described. Additionally, after review appropriate worksheets such as the C.3/C.6 checklists are required to be completed and returned to the WQCP. Permit issuance is dependent upon approval of the WQCP. If approval is not sought then the WQCP has the authority to stop work on an active site.

(3) How water quality effects and mitigation measures are addressed in environmental reviews (e.g., CEQA); If a proposed activity has the potential to cause a significant adverse environmental impact, an Environmental Impact Report (EIR) must be prepared and its adequacy certified before action may be taken on the proposed project. The Planning Division oversees the completion of the EIR and CEQA.

(4) C.3 training for appropriate departments (Program will report on training at the countywide level); Training is completed via the San Mateo Countywide Program and staff attends Countywide Low Impact Development and Green Infrastructure sub-committee meetings.

(5) Outreach/education efforts to staff, developers, contractors, construction site operators and owner/builders;

Applicable materials are provided along with plan check requirements including NPDES Checklists, O & M forms, and information on various stormwater treatment devices. The City directs developers and project managers to the Countywide Program’s website which makes many outreach guidance documents available. If paper copies are requested they are given as requested. A Countywide C3 flyer/fact sheet is available at the Building and Planning Department kiosk.

(6) How your municipality encourages site design measures at unregulated projects subject to Planning/Building Department review; Projects that are reviewed by the WQCP staff are encouraged to implement site design measures where appropriate and the SMCWPPP Small Projects Checklist and C.3 and C.6 Development Review Checklists are used during this review phase as applicable. Unregulated projects are encouraged to use landscape, if the project area is small, and the use of pervious pavement is also recommended.

(7) How your municipality encourages source control measures at unregulated projects subject to Planning/Building Department review; Source control measures are part of the Building and Planning comments that are issued during the Building Department review phase. The SMCWPPP Small Projects Checklist and C.3 and C.6 Development Review Checklists are used during this review phase. Source control requirements that are applicable to the project are implemented. Other source control methods are employed for unregulated projects as they proceed through the Building Department plan check phase, such as connections of garbage areas to the sanitary sewer and connecting sprinkler test drainage to

the sanitary sewer if feasible.
(8) General Plan revisions (if needed) to integrate water quality/watershed protection with water supply, flood protection, habitat protection, groundwater recharge, and other sustainable development principles and policies. Include dates of General Plan revisions.
 The General Plan was adopted in 1999. The General Plan includes a chapter on Open Space and Conservation Development which includes policies on Habitat and Biological Resources Conservation and Water Quality. This section was last updated in February of 2014.

C.3.b.iv.(2) ► Regulated Projects Reporting

Fill in attached table C.3.b.iv.(2) or attach your own table including the same information.

See attached C.3.b.iv.(2) tables one and two

C.3.c.ii ► Design Specifications for Pervious Pavement Systems

(For FY 2015-16 Annual Report only). Submit design specifications for pervious pavement systems that have been developed and adopted on a regional or countywide basis. If design specifications have been adopted and are contained in a Countywide stormwater handbook, include a reference to the handbook.

Summary: **The City of South San Francisco is following the design specifications included in the SMCWPPP C.3 Stormwater Technical Guidance, revised draft June 2016.**

C.3.e.iv. ► Alternative or In-Lieu Compliance with Provision C.3.c.

Is your agency choosing to require 100% LID treatment onsite for all Regulated Projects and not allow alternative compliance under Provision C.3.e.?

<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
--------------------------	-----	-------------------------------------	----

Comments (optional):

C.3.e.v ► Special Projects Reporting

1. In FY 2015-16, has your agency received, but not yet granted final discretionary approval of, a development permit application for a project that has been identified as a potential Special Project based on criteria listed in MRP Provision C.3.e.ii(2) for any of the three categories of Special Projects (Categories A, B or C)?	X	Yes		No
2. In FY 2015-16, has your agency granted final discretionary approval to a Special Project? If yes, include the project in both the C.3.b.iv.(2) Table, and the C.3.e.v. Table.	X	Yes		No
If you answered “Yes” to either question, 1) Complete Table C.3.e.v. 2) Attach narrative discussion of 100% LID Feasibility or Infeasibility for each project.				

C.3.h.v.(2) ► Reporting Newly Installed Stormwater Treatment Systems and HM Controls (Optional)

On an annual basis, before the wet season, provide a list of newly installed (installed within the reporting year) stormwater treatment systems and HM controls to the local mosquito and vector control agency and the Water Board. The list shall include the facility locations and a description of the stormwater treatment measures and HM controls installed.
See attached Table C.3.h.v.(2) for list of newly installed Stormwater Treatment Systems/HM Controls.

C.3.h.v.(3)(a) –(c) and (f) ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Option 1 – Reporting Site Inspections	Number/Percentage
Total number of Regulated Projects (including offsite projects, and Regional Projects) in your agency’s database or tabular format at the end of the previous fiscal year (FY14-15)	88

Total number of Regulated Projects (including offsite projects, and Regional Projects) in your agency's database or tabular format at the end of the reporting period (FY 15-16)	91
Total number of Regulated Projects (including offsite projects, and Regional Projects) for which O&M verification inspections were conducted during the reporting period (FY 15-16)	21
Percentage of the total number of Regulated Projects (including offsite projects, and Regional Projects) inspected during the reporting period (FY 15-16)	22% ²
Option 2 – Reporting Stormwater Treatment System Inspections	N/A
Total number of stormwater treatment and HM systems in your agency's database or tabular format at the end of the previous fiscal year (FY 14-15)	N/A
Total number of stormwater treatment systems in your agency's database or tabular format at the end of the reporting period (FY 15-16)	N/A
Total number of stormwater treatment and HM systems inspected in the reporting period (FY 15-16)	N/A
Percentage of stormwater treatment and HM systems inspected in the reporting period (FY 15-16)	N/A % ³

C.3.h.v.(3)(d)-(e) ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.

Summary:

The City of South San Francisco performed 21 facility O & M inspections in 2015/2016. Of the 21 inspections performed, 4 devices required maintenance. Two devices that required maintenance this FY were vault-based systems, one filter insert based system required maintenance. One vegetation-based system required maintenance. All other systems were all in good working order. In FY 14/15, there were 4 treatment systems requiring maintenance. Overall the trend is showing that a majority of the sites are keeping up with maintenance. Overall, the majority of treatment systems are kept in good working order.

² Based on the number of Regulated Projects in the database or tabular format at the end of the previous fiscal year (FY 14-15), per MRP Provision C.3.h.ii.(6)(b).

³ Based on the number of stormwater treatment and HM systems database or tabular format at the end of the previous fiscal year (FY 14-15), per MRP Provision C.3.h.ii.(6)(b).

Provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).

Summary:

The City has developed a spreadsheet listing all facilities and the treatment systems associated with those facilities. At this time, the City of South San Francisco has approximately 88 locations with treatment systems installed. The inspectors do occasionally locate additional treatment systems that are not on the spreadsheet when performing other stormwater inspections. These systems are added to the spreadsheet when they are located. Environmental Compliance Inspectors perform O&M inspections at minimum of the required rate as established by the MRP. The facility list is reviewed and updated as new systems are installed and additional systems are located.

C.3.i. ► Required Site Design Measures for Small Projects and Detached Single Family Home Projects

On an annual basis, discuss the implementation of the requirements of Provision C.3.i, including ordinance revisions, permit conditions, development of standard specifications and/or guidance materials, and staff training.

Summary:

- BASMAA prepared standard specifications in four fact sheets regarding the site design measures listed in Provision C.3.i, as a resource for Permittees. We have modified local ordinances/policies/procedures and forms/checklists to require all applicable projects approved after December 1, 2012 to implement at least one of the site design measures listed in Provision C.3.i.
- BASMAA's site design fact sheets
- The countywide program's checklist [SMCWPPP Stormwater Checklist for Small Projects]
- C.3.i guidance provided by the countywide program [SMCWPPP C.3. Technical Guidance manual/Appendix L]

C.3.j.i.v.(d) ► Green Infrastructure Outreach

On an annual basis, provide a summary of your agency's outreach and education efforts pertaining to Green Infrastructure planning and implementation.

Summary:

In February 2016, the City of SSF convened a Green Infrastructure Planning Study and Group. The group consisted of representatives from Environmental Compliance, Engineering, Planning and an outside consultant that will be developing the City's long-term GI strategy. During the study, various City staff members were educated on the GI requirements present in the MRP.

Please refer to the SMCWPPP FY 15-16 Annual Report for a summary of outreach efforts implemented by the Program.

C.3.j.ii.(2) ► Early Implementation of Green Infrastructure Projects

On an annual basis, submit a list of green infrastructure projects, public and private, that are already planned for implementation during the permit term and infrastructure projects planned for implementation during the permit term that have potential for green infrastructure measures. Include the following information:

- A summary of planning or implementation status for each public and private green infrastructure project that is not also a Regulated Project as defined in Provision C.3.b.ii. (see C.3.j.ii.(2) Table B - Planned Green Infrastructure Projects).
- A summary of how each public infrastructure project with green infrastructure potential will include green infrastructure measures to the maximum extent practicable during the permit term. For any public infrastructure project where implementation of green infrastructure measures is not practicable, submit a brief description of the project and the reasons green infrastructure measures were impracticable to implement (see C.3.j.ii.(2) Table A - Public Projects Reviewed for Green Infrastructure).

Background Information:

Describe how this provision is being implemented by your agency, including the process used by your agency to identify projects with potential for green infrastructure, if applicable.

City staff attended the SMCWPPP C.3 New Development Workshop on June 14, 2016, where early GI identification and implementation was presented, based in part on BASMAA's "Guidance for Identifying Green Infrastructure Potential in Municipal Capital Improvement Program Projects."

In February 2016, the City of SSF convened a Green Infrastructure Planning Study and Group. The group consisted of representatives from Environmental Compliance, Engineering, Planning and an outside consultant that will be developing the City's long-term GI strategy. This group will continue to work to identify potential GI projects through the Plan Review and Building Plan Review process.

Larry Walker and Associates is currently developing a regional GI framework for the San Mateo Countywide Pollution Prevention Program and is contracted to assist municipalities in making them city-specific. Once this template framework is available (estimated June 2017), the City of SSF will incorporate this into a specific City Green Infrastructure Plan, including project identification procedures.

Summary of Planning or Implementation Status of Identified Projects:

See attached Table C.3.j.ii.(2)-A for Public Projects Reviewed for Green Infrastructure within the City of SSF.

C.3.j.iii.(2) ► Participate in Processes to Promote Green Infrastructure

On an annual basis, report on the goals and outcomes during the reporting year of work undertaken to participate in processes to promote green infrastructure.

Please refer to the SMCWPPP FY 15-16 Annual Report for a summary of efforts conducted to help regional, State, and federal agencies plan, design and fund incorporation of green infrastructure measures into local infrastructure projects, including transportation projects.

C.3.j.iv.(2) ► Tracking and Reporting Progress

On an annual basis, report progress on development and implementation of methods to track and report implementation of green infrastructure measures and provide reasonable assurance that waste load allocations for TMDLs are being met.

Please refer to the SMCWPPP FY 15-16 Annual Report for a summary of methods being developed to track and report implementation of green infrastructure measures.

C.3.b.iv.(2) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location ¹⁰ , Street Address	Name of Developer	Project Phase No. ¹¹	Project Type & Description ¹²	Project Watershed ¹³	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New Impervious Surface Area (ft ²) ¹⁴	Total Replaced Impervious Surface Area (ft ²) ¹⁵	Total Pre- Project Impervious Surface Area ¹⁶ (ft ²)	Total Post- Project Impervious Surface Area ¹⁷ (ft ²)

¹⁸For private projects, state project application deemed complete date. If the project did not go through discretionary review, report the building permit issuance date.

¹⁹For private projects, state project application final discretionary approval date. If the project did not go through discretionary review, report the building permit issuance date.

²⁰List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.

²¹List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.

²²List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).

²³List the legal mechanism(s) (e.g., O&M agreement with private landowner; O&M agreement with homeowners' association; O&M by public entity, etc...) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.

²⁴See Provision C.3.d.i. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria. Enter the corresponding provision number of the appropriate criterion (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3).

²⁵For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.

²⁶For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.

²⁷Note whether a third party was used to certify the project design complies with Provision C.3.d.

²⁸If HM control is not required, state why not.

²⁹If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), Bioretention unit(s), regional detention basin, or in-stream control).

³¹List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.

³²List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.

³³List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).

³⁴List the legal mechanism(s) (e.g., maintenance plan for O&M by public entity, etc...) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.

³⁵See Provision C.3.d.i. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria. Enter the corresponding provision number of the appropriate criterion (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3).

³⁶For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.

³⁷For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.

³⁸Note whether a third party was used to certify the project design complies with Provision C.3.d.

³⁹If HM control is not required, state why not.

⁴⁰If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), Bioretention unit(s), regional detention basin, or in-stream control).

C.3.h.v.(2). ► Table of Newly Installed⁴¹ Stormwater Treatment Systems and Hydromodification Management (HM) Controls (Optional)

Fill in table below or attach your own table including the same information.

Name of Facility	Address of Facility	Party Responsible ⁴² For Maintenance	Type of Treatment/HM Control(s)
101 Oyster Point Blvd.	101 Oyster Point Blvd. South San Francisco Ca. 94080	HCP life Sciences	Bio-retention areas
3573 Callan Blvd.	3573 Callan Blvd. South San Francisco Ca. 94080	Seafood City, Inc.	Bio-retention area
Genentech, Inc.	1475 Grandview Dr. South San Francisco Ca. 94080	Genentech, Inc.	Bio-retention area

⁴¹ "Newly Installed" includes those facilities for which the final installation inspection was performed during this reporting year.

⁴² State the responsible operator for installed stormwater treatment systems and HM controls.

C.3.e.v. Special Projects Reporting Table												
Reporting Period – July 1 2015 – June 30, 2016												
Project Name & No.	Permittee	Address	Application Submittal Date ⁴³	Status ⁴⁴	Description ⁴⁵	Site Total Acreage	Gross Density DU/Acre	Density FAR	Special Project Category ⁴⁶	LID Treatment Reduction Credit Available ⁴⁷	List of LID Stormwater Treatment Systems ⁴⁸	List of Non-LID Stormwater Treatment Systems ⁴⁹
South City Central #TBD	City of South San Francisco	Miller Ave. & Airport Rd	Approved by planning commission 7/16/15	Building plans not yet submitted	260 apartment units and 12 townhomes	2.14	>100 DU/ac	>6:1	Category C: Transit-Oriented Development; Non-auto related use Location: At least 50% of project is within 0.25 miles of a transit hub Density: >100 DU/ac Parking: No surface parking	Category C: 100% allowable credit Location: 50% Density: 30% Parking: 20%	None	Media Filter 100% Media filter will meet the specifications of the Western Washington Technical Assessment Protocol-Ecology (TAPE) program
Miller Ave. Senior Housing #TBD	City of South San Francisco	Miller Ave. & Linden Ave.	Approved by Planning Commission on 8/20/15	Building plans not yet submitted	Mixed Use Facility office, community room and parking garage on	0.56 Acres	>30 Du/Acre	2:1	Category C: Transit-Oriented Development; Non-auto	Category C: 55% allowable credit Location:	Flow-through planter 73%	Media Filter 27% Media filter will meet the

⁴³Date that a planning application for the Special Project was submitted.

⁴⁴ Indicate whether final discretionary approval is still pending or has been granted, and provide the date or version of the project plans upon which reporting is based.

⁴⁵Type of project (commercial, mixed-use, residential), number of floors, number of units, type of parking, and other relevant information.

⁴⁶ For each applicable Special Project Category, list the specific criteria applied to determine applicability. For each non-applicable Special Project Category, indicate n/a.

⁴⁷For each applicable Special Project Category, state the maximum total LID Treatment Reduction Credit available. For Category C Special Projects also list the individual Location, Density, and Minimized Surface Parking Credits available.

⁴⁸: List all LID stormwater treatment systems proposed. For each type, indicate the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area.

⁴⁹List all non-LID stormwater treatment systems proposed. For each type of non-LID treatment system, indicate: (1) the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area, and (2) whether the treatment system either meets minimum design criteria published by a government agency or received certification issued by a government agency, and reference the applicable criteria or certification.

C.3 – New Development and Redevelopment

Special Projects Narrative

South City Central

Miller Ave & Airport Blvd.

Project has been approved by the Planning Commission in July 2015, the project will be a lot line to lot line complex.

The project will be within ¼ mile of a transit hub, there will be a Density of >100 DU/ac.

There will be no surface parking.

This project will have a media filter Media filter will meet the specifications of the Western Washington Technical Assessment Protocol-Ecology (TAPE) program and Municipal regional permit requirements for NON-LID measures.

This project has not been submitted to the building department for review, it is still in the final design phase.

488 Linden

Linden Ave. & Tamarack Ln.

Project has been approved by the Planning Commission in December 2015; this project will be a lot line to lot line complex.

The project will be within ½ mile of a transit hub; there will be 38 apartments on a 14,000 sq. foot lot.

There will be no surface parking.

This project will have a media filter Media filter will meet the specifications of the Western Washington Technical Assessment Protocol-Ecology (TAPE) program and Municipal regional permit requirements for NON-LID measures.

This project is still in the early design phase, though entitlements have been granted.

255 Cypress

Cypress Ave & 3rd Ln.

Project has been approved by the Planning Commission in December 2015; the project will be a lot line to lot line complex.

The project will be within ¼ mile of a transit hub, there will be 46 apartments and 6,000 sq. feet of commercial space on a 20,198 sq. foot lot.

There will be no surface parking.

This project will have a media filter Media filter will meet the specifications of the Western Washington Technical Assessment Protocol-Ecology (TAPE) program and Municipal regional permit requirements for NON-LID measures.

This project is still in the early design phase, though entitlements have been granted.

Miller Avenue Senior Housing

Miller Ave & Maple Ave.

1. Feasibility/Infeasibility of Onsite Infiltration, Evapotranspiration, and Harvesting/Use

The Countywide Program's infiltration/harvesting and use feasibility screening worksheet was completed for the project. The results of this analysis showed that it was infeasible to treat the C.3.d amount of runoff with infiltration and/or harvesting and use.

2. Feasibility/Infeasibility of Onsite LID Treatment

The project site was reviewed with regard to the feasibility and infeasibility of onsite LID treatment. The results of this review showed that it was infeasible to treat 100% percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

- a. **On-site Drainage Conditions.** The building occupies the entire site, so the site is divided into drainage management areas based on the roof areas that are tributary to each rainwater leader. A majority of the roof drains to flow-through planters located on podium, with the remaining roof and podium draining to a non-LID media filter in the garage.
- b. **Self-treating and Self-Retaining Areas and LID Treatment Measures.**
There are regular planters (self-treating) and flow-through planters (LID features) located in the podium courtyard.
- c. **Maximizing Flow to LID Features and Facilities.** The routing of drainage has been optimized to route as much as possible to flow-through planters located on podium. There is approximately 750 square feet of flow-through planters on podium that receive 18,000 square feet of roof runoff. The remaining roof and the impervious pavement on podium are discharged to a non-LID facility.
- d. **Constraints to Providing On-site LID.** The drainage management areas that are proposed to drain to vault-based media filters include no areas that are not covered by buildings. The entire site is covered by buildings. The media filter will be located above-ground in the garage and the discharge from the media filter box will discharge to the face of curb on Miller Avenue, since there is no storm drain system fronting the project.

3. Feasibility/Infeasibility of Off-Site LID Treatment. The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

- i. The project proponent does not own or otherwise control land within the same watershed of the project that can accommodate in perpetuity off-site bioretention facilities adequately sized to treat the runoff volume of the primary project.
- ii. There is no regional LID stormwater mitigation program available to the project for in-lieu C.3 compliance.

889 McIllelan Road (McIllelan Rd. & Mission Rd.)

1. Feasibility/Infeasibility of Onsite Infiltration, Evapotranspiration, and Harvesting/Use

The Countywide Program's infiltration/harvesting and use feasibility screening worksheet was completed for the project. The results of this analysis showed that it was infeasible to treat the C.3.d amount of runoff with infiltration and/or harvesting and use.

2. Feasibility/Infeasibility of Onsite LID Treatment

The project site was reviewed with regard to the feasibility and infeasibility of onsite LID treatment. The results of this review showed that it was infeasible to treat 100% percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

a. On-site Drainage Conditions. The building occupies the entire site, so the site is divided into drainage management areas based on the roof areas that are tributary to each rainwater leader. A majority of the roof drains to flow-through planters located on podium, with the remaining roof and podium draining to a non-LID media filter in an landscaped area on the east side of the site..

b. Self-treating and Self-Retaining Areas and LID Treatment Measures.

There are small planters (self-treating) in different areas of the site and a flow-through planter (LID features) located on the west side of the site.

c. Maximizing Flow to LID Features and Facilities. The routing of drainage has been optimized to route as much as possible to flow-through planter located on the west side. There is approximately 160 square feet of flow-through planter that receives 3,911 square feet of roof runoff. The remaining roof and the impervious pavement on podium are discharged to a non-LID facility.

d. Constraints to Providing On-site LID. The drainage management areas that are proposed to drain to vault-based media filters include no areas that are not covered by buildings or roof. The entire site is covered by buildings or roof. This is a lot line to lot line project The media filter will be located in-ground under landscaping .Discharge from the media filter box will discharge to the storm drain system in the street.

3. Feasibility/Infeasibility of Off-Site LID Treatment. The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

i. The project proponent does not own or otherwise control land within the same watershed of the project that can accommodate in perpetuity off-site bioretention facilities adequately sized to treat the runoff volume of the primary project.

ii. There is no regional LID stormwater mitigation program available to the project for in-lieu C.3 compliance.

Pinefino

211 Airport (Airport Rd & Baden Ave)

1. Feasibility/Infeasibility of Onsite Infiltration, Evapotranspiration, and Harvesting/Use

The Countywide Program's infiltration/harvesting and use feasibility screening worksheet was completed for the project. The results of this analysis showed that it was infeasible to treat the C.3.d amount of runoff with infiltration and/or harvesting and use.

2. Feasibility/Infeasibility of Onsite LID Treatment

The project site was reviewed with regard to the feasibility and infeasibility of onsite LID treatment. The results of this review showed that it was infeasible to treat 100% percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

a. On-site Drainage Conditions. The building occupies the entire site. The site is divided into two drainage management areas based on the roof areas. A majority of the roof drains to a non-LID media filter in a landscaped area on the east side of the site. A small minority of the roof drains to a bioretention area on the north side of the site.

b .Self-treating and Self-Retaining Areas and LID Treatment Measures.

There are small landscaped spots (self-treating) in different areas of the site and a bioretention area, located on the north side of the site.

c. Maximizing Flow to LID Features and Facilities There is approximately 100 square feet of bioretention area that receives 1,397 square feet of roof runoff on the north side. The remaining roof area is discharged to a non-LID treatment device.

Constraints to Providing On-site LID: The drainage management areas that are proposed to drain to vault-based media filters include areas that are covered by buildings or roof. The entire site is covered by a roof. The media filter will be located in-ground under landscaping. Discharge from the media filter will discharge to the storm drain system in the street.

3. Feasibility/Infeasibility of Off-Site LID Treatment. The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

- i. The project proponent does not own or otherwise control land within the same watershed of the project that can accommodate in perpetuity off-site bioretention facilities adequately sized to treat the runoff volume of the primary project.
- ii. There is no regional LID stormwater mitigation program available to the project for in-lieu C.3 compliance.

C.3.j.ii.(2) ► Table A - Public Projects Reviewed for Green Infrastructure				
Project Name and Location⁴⁴	Project Description	Status⁴⁵	GI Included?⁴⁶	Description of GI Measures Considered and/or Proposed or Why GI is Impracticable to Implement⁴⁷
Sewer Replacement Project (Throughout SSF)	Sewer Rehabilitation	4-year project, ongoing	TBD	Engineering Dept to consider applicable GI measures when/if street modifications are incorporated.
Underground Electrical Replacement Project (Spruce Ave b/w Parkway Ave and Railroad Ave)	Moving electrical services underground	Beginning planning and design phase	TBD	Engineering Dept to consider applicable GI measures when/if street modifications are incorporated.
SSF Caltrain Station and Plaza (Grand Ave and Airport Blvd)	Move existing Caltrain station closer to SSF downtown area and incorporate plaza	Beginning planning and design phase	TBD	Specific details on GI not yet available, as project is in very early planning stage.
SSF City Services Facility (El Camino Real and Chestnut Ave)	New facility/campus featuring Police Station, Parks & Rec HQ and Library	Beginning planning and design phase	TBD	Specific details on GI not yet available, as project is in very early planning stage.
Grand Avenue Improvement Project (Grand Ave b/w Linden Ave and Airport Blvd)	Green street improvements along Grand Ave and Linden in main downtown commercial area	Design concept generated (through SMCWPPP regional consultant)	Yes	Curb extensions proposed as primary stormwater treatment approach.
Orange Memorial Park Stormwater Capture Project (Regional)	Installation of two subsurface infiltration chambers for capture/treatment of large portion of upper Colma Creek watershed.	Design concept generated (through SMCWPPP regional consultant)	Yes	Infiltration chambers and hydrodynamic separator. Potential LID incorporated within adjacent parking lots. Project may also provide beneficial flood alleviation and groundwater recharge.
Linden Avenue Complete Streets (Linden Ave from California St to Aspen St)	Pedestrian and Bike Lane improvements	Beginning planning and design phase	TBD	Potential LID incorporated into design

⁴⁴ List each public project that is going through your agency's process for identifying projects with green infrastructure potential.

⁴⁵ Indicate status of project, such as: beginning design, under design (or X% design), projected completion date, completed final design date, etc.

⁴⁶ Enter "Yes" if project will include GI measures, "No" if GI measures are impracticable to implement, or "TBD" if this has not yet been determined.

⁴⁷ Provide a summary of how each public infrastructure project with green infrastructure potential will include green infrastructure measures to the maximum extent practicable during the permit term. If review of the project indicates that implementation of green infrastructure measures is not practicable, provide the reasons why green infrastructure measures are impracticable to implement.

C.3.j.ii.(2) ► Table B - Planned Green Infrastructure Projects			
Project Name and Location ⁴⁸	Project Description	Planning or Implementation Status	Green Infrastructure Measures Included
N/A	N/A	N/A	N/A

⁴⁸ List each planned (and expected to be funded) public and private green infrastructure project that is not also a Regulated Project as defined in Provision C.3.b.ii. Note that funding for green infrastructure components may be anticipated but is not guaranteed to be available or sufficient.

Section 4 – Provision C.4 Industrial and Commercial Site Controls

Program Highlights and Evaluation
Highlight/summarize activities for reporting year:

Summary:
Each year, the business inspection plan and enforcement response plan (ERP) are reviewed to make sure that they continue to meet the needs of the industrial and commercial inspection program. The business inspection plan was updated June 13, 2016 and the ERP was updated April 27, 2016.

The facilities list is reviewed to determine the inspection frequencies and priorities for the coming fiscal year. The facility spreadsheet is updated as needed. A list of facilities to be inspected for the next fiscal year is generated between June and August. Inspectors work from this spreadsheet and businesses are lined out as they are inspected. A master inspection spreadsheet is also updated after each inspection or at the end of each day. The findings of each inspection are summarized on the spreadsheet. More details are included on the inspection forms. Follow-up inspections are performed as needed.

Environmental Compliance Supervisor Andrew Wemmer and Inspector Daniel Garza participated in the CII Subcommittee in FY 15-16.

Inspectors attend trainings as they are offered on a countywide/regional basis. Three (3) Environmental Compliance Inspectors attended SMCWPPP's Industrial Commercial Inspector Training on June 1, 2016.

Refer to the C.4. Industrial and Commercial Site Controls section of the SMCWPPP FY 15-16 Annual Report for a description of Program activities.

C.4.b.iii ► Potential Facilities List

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

Please see Attachment A for a list of industrial and commercial facilities in the City of South San Francisco's Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

C.4.d.iii.(1)(a) ► Facility Inspections

Fill out the following table or attach a summary of the following information. Indicate your violation reporting methodology below.

<input checked="" type="checkbox"/>	Permittee reports multiple discrete violations on a site as one violation.
<input type="checkbox"/>	Permittee reports the total number of discrete violations on each site.

	Number	Percent
Number of businesses inspected	191	
Total number of inspections conducted	253	
Number of violations (excluding verbal warnings)	8	
Sites inspected in violation	8	4.2%
Violations resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner	8	100%

Comments:
Sites inspected found in violation are reported as one violation per site, even if multiple discrete violations are documented. The number of inspections exceeds the number of businesses inspected because of follow-up inspections that were performed to verify that maintenance or enforcement actions have been completed or resolved. Any violation not resolved at the time of a follow-up inspection is considered to be part of the original violation, so is not counted separately. All violations were resolved within 10 days or otherwise deemed resolved in a longer but still timely manner.

There were 65 verbal warnings, these are not considered violations. There were 8 Notices of Violation (NOVs), 1 of which also including Administrative Citations. These are considered violations.

C.4.d.iii.(1)(b) ► Frequency and Types/Categories of Violations Observed

Fill out the following table or attach a summary of the following information.

Type/Category of Violations Observed	Number of Violations
Actual discharge (e.g. active non-stormwater discharge or clear evidence of a recent discharge)	6
Potential discharge and other	2

Comments:
Discharge streams are counted as one discharge per inspection per site.

C.4.d.iii.(1)(b) ▶ Frequency and Type of Enforcement Conducted

Fill out the following table or attach a summary of the following information.

	Enforcement Action (as listed in ERP) ⁴⁹	Number of Enforcement Actions Taken	% of Enforcement Actions Taken ⁵⁰
Level 1	Verbal Warnings/Warning Letters/NOVs	73	98.6%
Level 2	Administrative Citation	1	1.4%
Level 3	Compliance Meeting/Cease & Desist Order/Notice to Abate/Stop Work Order	0	0%
Level 4	Criminal Penalties/Civil Injunctions	0	0%
Total		74	100%

C.4.d.iii.(1)(c) ▶ Types of Violations Noted by Business Category

Fill out the following table or attach a summary of the following information.

Business Category ⁵¹	Number of Actual Discharge Violations	Number of Potential/Other Discharge Violations
Restaurants/Food Service Facilities	4	0
Hotels	0	0
Auto Repair	1	1
All Others	1	1

C.4.d.iii.(1)(d) ▶ Non-Filers

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

No industries were identified as non-filers during scheduled inspections during fiscal year 2015-2016.

⁴⁹Agencies to list specific enforcement actions as defined in their ERPs.

⁵⁰Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

⁵¹List your Program's standard business categories.

C.4.e.iii ▶ Staff Training Summary						
Training Name	Training Dates	Topics Covered	No. of Industrial/Commercial Site Inspectors in Attendance	Percent of Industrial/Commercial Site Inspectors in Attendance	No. of IDDE Inspectors in Attendance	Percent of IDDE Inspectors in Attendance
National Stormwater Center – Certified Stormwater Inspector California Training	10/13-10/16/16	Industrial/Commercial Inspections, IDDE, Construction Inspections, Post Construction (LID)	3	75%	3	75%
SMWCWPPP Industrial/Commercial Inspector Training	6/1/16	Review of new MRP, Illicit Discharge Inspection Basics, Industrial/Commercial Inspections and common BMPs, Inspection scenarios.	3	75%	3	75%
Comments: The City of South San Francisco employs 4 Inspectors, all of which perform the duties of both Industrial/Commercial Site Inspections and IDDE Inspections.						

Section 5 – Provision C.5 Illicit Discharge Detection and Elimination

Program Highlights and Evaluation
Highlight/summarize activities for reporting year:
Provide background information, highlights, trends, etc.
<p>Summary:</p> <ol style="list-style-type: none"> 1) The City of South San Francisco has an ongoing program for reporting illicit discharges within the City. When the street crew observes an illicit discharge or a suspected illicit discharge in the course of performing regularly scheduled maintenance, they call on the Environmental Compliance Inspectors to investigate. Additionally, Inspectors participate in a quarterly creek walk along Colma Creek with County of San Mateo staff, enabling Inspectors to identify problem areas containing evidence of past discharges. Residents of South San Francisco also call the Street Department or the WQCP to report illicit discharges/potential discharges. Additionally, the Public Works Department offers the SeeClickFix mobile application, allowing residents and citizens to report various issues in the service area, including illicit stormwater discharges. Responses and communication are tracked electronically. The WQCP maintains a stormwater hotline for residents to report suspected illicit discharges. The hotline is publicized on the City’s website, and is printed on outreach materials such as brochures, reusable shopping bags, sponges, pencils, erasers and more. The Inspectors receive and follow up on these reports as well. Illicit Discharge Inspections and Responses are tracked via tracking table. The Enforcement Response Plan (ERP) was updated on April 27, 2016. 2) Environmental Compliance Supervisor Andrew Wemmer and Environmental Compliance Inspector Daniel Garza participated in the CII Subcommittee in FY 15-16. 3) Refer to the C.5 Illicit Discharge Detection and Elimination section of the SMCWPPP FY 15-16 Annual Report for description of activities at the countywide or regional level.

C.5.c.iii ► Complaint and Spill Response Phone Number
List below or attach your complaint and spill response phone number
(650) 829-3848 and/or (650) 877-8555
Provide your complaint and spill response web address, if used
<p>Web address for phone number: http://www.ssf.net/1201/SpillDumping-Response-Contact-List .</p> <p>The City of South San Francisco also offers a website and application to residents for reporting issues including spills (Engage SSF/SeeClickFix), located at http://www.ssf.net/2021/Engage-SSF.</p>
Is a screen shot of your website showing the central contact point attached? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
If No, explain:

Provide a discussion of how the central contact point (complaint and spill response phone number and, if used, web address) is being publicized to your staff and the public. **The central point of contact is publicized through the City's website and several of the City's outreach materials including brochures, reusable shopping bags, sponges, pencils, erasers and more. Please see Attachment B for the screenshot of the City's website displaying the central contact spill and response information.**

C.5.d.iii.(1), (2), (3) ► Spill and Discharge Complaint Tracking

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)		
	Number	Percentage
Discharges reported (C.5.d.iii.(1))	30	
Discharges reaching storm drains and/or receiving waters (C.5.d.iii.(2))	21	70%
Discharges resolved in a timely manner (C.5.d.iii.(3))	30	100%

Comments:
 Illicit discharges are discovered in the course of routine surveillance, in response to calls to the stormwater hotline, reports from the Public Works Department Street Crew and citizen reports via the SeeClickFix application (app). All tabulated discharges were reported on illicit discharge forms completed by WQCP staff. In some cases, a discharge may have reached the storm drain system, but was recovered by the street crew. Such discharges were not included in the number of discharges reaching storm drains and/or receiving water. If multiple types of discharges are observed at a location on the same report form they are counted as one discharge for the purpose of reporting in the tracking table above. However each type of discharge is counted separately in the chart below "Summary of Major Types of Discharges and Complaints". The City had 30 separate discharge complaints with 30 different types of pollutants in those complaints. 27 Notices of Violation (NOVs) and 11 Administrative Citations were issued in response to the Illicit Discharges reported above.

All reported discharges were resolved in a timely manner.

If the City receives a complaint on either the hotline or through other channels, inspectors will go into the field and verify the claim of a discharge. All reported discharges were substantiated in the field. 70% of the discharges reached the storm drain. For the remaining 30% of the discharges there was no clear evidence that the discharge reached the storm drain.

C.5.f.iii ► MS4 Map Availability

Discuss how you make your MS4 map available to the public and how you publicize the availability of the MS4 map.

The City of South San Francisco MS4 map is available to the public on the Oakland Museum Creek Mapping Project website (<http://explore.museumca.org/creeks/crkmap.html>). These maps include municipal storm drains that measure 24 inches or greater in diameter. Additionally, the City's MS4 map is made available and advertised to the public on the City's website at <http://www.ssf.net/1200/Stormwater>.

Section 6 – Provision C.6 Construction Site Controls

C.6.e.iii.(1) ► Hillside Development Criteria		
What criteria is your agency using to determine hillside development areas?	<input checked="" type="checkbox"/>	Local criteria such as maps of hillside development areas or other written criteria
<div style="border: 1px solid black; padding: 5px;"> <p>The permit definition of projects on sites with ≥ 15% slope</p> </div>		
<p>Attach a copy of hillside development area maps or provide your written criteria below, if applicable.</p> <div style="border: 1px solid black; padding: 10px;"> <p>Description:</p> <p>Per SSFMC Section 20.160 HILLSIDE (HS) OVERLAY DISTRICT:</p> <p>The Hillside (HS) Overlay District is intended to protect the health, safety, and welfare of residents of the City by establishing regulations for managing the development of hillside areas. The specific purposes of the HS Overlay District are to:</p> <ul style="list-style-type: none"> A. Encourage the orderly development of hillside areas by relating the number and distribution of dwelling units and other buildings to the topography to reduce the need for grading and cut and fill operations that would disfigure or scar the natural terrain or remove existing vegetation. B. Minimize the risks of personal injury and property damage and prevent the degradation of water quality from wildfires, stormwater runoff, landslides, earth creep, soil erosion, seepage and other hazards common to hillside development. C. Provide a mechanism for flexible design of residential projects in hillside areas so that development may be concentrated in those areas with the greatest environmental carrying capacity while areas with low environmental carrying capacity are developed at very low density or reserved as permanent open space. D. Encourage design of street systems and driveways that conform to natural contours and minimize extensive grading. E. Minimize interference with existing views while allowing reasonable and appropriate development of hillside properties. <p>Per 20.160.002 Applicability: The provisions of this chapter shall apply to all lots and sites that have an average slope of 15 percent or more. Please see Attachment C, containing the City of South San Francisco’s slope map, also included in the City’s General Plan.</p> </div>		

C.6.e.iii.2.a, b, c ▶ Site/Inspection Totals		
Number of High Priority Sites (sites disturbing < 1 acre of soil requiring storm water runoff quality inspection) (C.6.e.iii.1.a)	Number of sites disturbing ≥ 1 acre of soil (C.6.e.iii.1.b)	Total number of storm water runoff quality inspections conducted (include only High Priority Site and sites disturbing 1 acre or more) (C.6.e.iii.1.c)
2	6	64

Comments:

A total of 64 construction site inspections were conducted at total of 8 sites within these categories during Fiscal Year 2015-2016. Of the sites that were greater than 1 acre, four sites were new projects while the other two sites were projects from the previous year. Three additional sites that did not meet the above criteria were inspected as-needed during Fiscal Year 2015-2016 as part of the Program's construction site inspection program. These sites were inspected due to housekeeping and/or track-out issues reported/noticed during normal field inspections and were brought back into compliance.

C.6.e.iii.2.d ▶ Construction Activities Storm Water Violations		
BMP Category	Number of Violations ⁵² excluding Verbal Warnings	% of Total Violations ⁵³
Erosion Control	0	0%
Run-on and Run-off Control	0	0%
Sediment Control	4	40%
Active Treatment Systems	0	0%
Good Site Management	2	20%
Non Stormwater Management	4	40%
Total⁵⁴	10	100%

⁵²Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category. For example, if during one inspection at a site, there are 2 erosion control violations, only 1 violation would be counted for this table.

⁵³Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

⁵⁴The total number of violations may count more than one violation per inspection, since some inspections may result in violations in more than one category. For example, during one inspection of a site, there may have been both an erosion control violation and a sediment control violation. For this reason, the total number of violations in this table may not match the total number of enforcement actions reported in Table C6.e.iii.1.e.

C.6.e.iii.2.e ► Construction Related Storm Water Enforcement Actions

	Enforcement Action (as listed in ERP) ⁵⁵	Number Enforcement Actions Issued	% Enforcement Actions Issued ⁵⁶
Level 1 ⁵⁷	Verbal Warning/Notice of Violation	43	88%
Level 2	Administrative Citation	4	8%
Level 3	Compliance Meeting/Stop Work Order/Cease & Desist Order/Notice to Abate a Public Nuisance	2	4%
Level 4	Criminal Penalties/Civil Injunctions	0	0%
Total		49	100%

C.6.e.iii.2.f, g ► Illicit Discharges

	Number
Number of illicit discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.f)	3
Number of sites with discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.g)	2

⁵⁵Agencies should list the specific enforcement actions as defined in their ERPs.

⁵⁶Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

⁵⁷For example, Enforcement Level 1 may be Verbal Warning.

C.6.e.iii.2.h, i ► Violation Correction Times		
	Number	Percent
Violations (excluding verbal warnings) fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	5	100% ⁵⁸
Violations (excluding verbal warnings) not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	0	0% ⁵⁹
Total number of violations (excluding verbal warnings) for the reporting year⁶⁰	5	100%
Comments: None at this time.		

C.6.e.iii.(4) ► Evaluation of Inspection Data
Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).
<p>Description:</p> <p>Overall there were no major problems with the construction sites in 2015/2016. The most common issues for 2015/2016 were for sediment control (track out and potential runoff), non-stormwater management and general site maintenance. There were more regulated projects in progress in 2015/2016 than in 2014/2015 and therefore more inspections were conducted. Based on information through the City’s Planning Committee and Building Department, it is expected that rates of new development and redevelopment will continue to increase in the coming years as the economy continues to recover. The City will attempt to maintain a high level of scrutiny as the number of sites increases.</p>

⁵⁸Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

⁵⁹Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

⁶⁰The total number of violations reported in the table of Violation Correction Times equals the number of initial enforcement actions, i.e., this assumes one violation is issued for several problems during an inspection at a site. The total number of violations in the table of Violation Correction Times may not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

C.6.e.iii.(4) ► Evaluation of Inspection Program Effectiveness

Describe what appear to be your program’s strengths and weaknesses, and identify needed improvements, including education and outreach.

Description:

The City of South San Francisco’s program is strong, with frequent inspections performed at each construction site especially during the wet weather season. Inspectors inspect each construction site before the beginning of the wet weather season, prior to qualifying rain events and several times during an extended or severe storm. Inspectors follow up at each site after the storm to determine if any repairs are necessary. Most sites are very quick to respond and repair or replace their BMPs. Occasionally there are sites that require numerous inspections to illicit a response and repair their site BMPs. Inspectors try to work with these sites to bring them back into compliance. While it may occasionally take more than 10 business days, this leeway is only given when discharge from the site is not observed.

Inspectors participate in erosion control training at least once every 2 years.

Inspection and enforcement data is tabulated in a construction tracking spreadsheet, which underwent minor revision in 2015-2016. The program uses inspection forms that were updated in February 2011.

The City of South San Francisco participates in the SMCWPPP New Development Subcommittee and attended meetings during FY 15-16.

Refer to the C.6 Construction Site Control section of countywide program’s FY 15-16 Annual Report for a description of activities at the countywide or regional level.

C.6.f ► Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	
National Stormwater Center – Certified Stormwater Inspector California Training	10/13-10/16/16	Stormwater Construction Inspections, Post Construction (LID), Industrial/Commercial Inspections, IDDE.	3	

Section 7 – Provision C.7. Public Information and Outreach

C.7.b.i.1 ► Outreach Campaign

Summarize outreach campaign. Include details such as messages, creative developed, and outreach media used. The detailed outreach campaign report may be included as an attachment. If outreach campaign is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

See Section 7 and Section 9 of the SMCWPPP FY 15-16 Annual Report for a description of activities conducted at Countywide level.

The City of South San Francisco’s ongoing outreach campaign includes providing informational materials and items (including reusable shopping bags) displaying the City’s Pollution Prevention messages, “Pollution Prevention is Everyone’s Job” and/or “Keep South San Francisco Beautiful.” The majority of this campaign utilizes printed media, which is disseminated at local and regional events such as Farmers’ Markets, City events, Creek Cleanups and at the library during Pollution Prevention Week.

In addition, in June 2015, the City of South San Francisco contracted with NCM to advertise an anti-Cigarette Butt Littering message to residents in the service area at the Tanforan Movie Theatre in San Bruno, CA. The audio/video advertisement is 15 seconds long and plays on each screen prior to the coming attractions. The video advertisement has also been posted on the City’s website at <http://www.ssf.net/2119/Outreach-Activities>. The advertisement was screened June 26, 2015 through June 30, 2016. The City is renewing the contract and the advertisement is scheduled to play again during FY 16-17 (August 26, 2016 through August 17, 2017).

C.7.c. Stormwater Pollution Prevention Education

(For FY 15-16 Annual Report only, unless changes made) Provide details of website or phone number used as the point of contact for information on stormwater issues. Report on how the point of contact is publicized and maintained. Certify that your agency maintains a website (or refers to a regional website) to provide information on stormwater issues, watershed characteristics, and stormwater pollution prevention alternatives.

Local stormwater phone number(s)	(650) 829-3848 and (650) 877-8555
Local/Regional stormwater website(s)	http://www.ssf.net/1200/Stormwater , http://www.ssf.net/507/Pollution-Prevention and http://flowstobay.org/

The central point of contact is publicized through the City’s website and several of the City’s outreach materials including brochures, reusable shopping bags, sponges, pencils, recycled rulers, erasers and more.
 See The C.7 Public Information and Outreach section of SMCWPPP 15-16 Annual Report.

C.7.d ► Public Outreach and Citizen Involvement Events

Describe general approach to event selection. Provide a list of outreach materials and giveaways distributed.
 Use the following table for reporting and evaluating public outreach events

See the C.7 Public Outreach and Citizen Involvement Events section of SMCWPPP FY 15-16 Annual Report for a summary of activities.

Event Details	Description (messages, audience)	Evaluation of Effectiveness
Provide event name, date, and location. Indicate if event is local, countywide or regional.	Identify type of event (e.g., school fair, creek clean-up, storm drain stenciling, farmers market etc.), type of audience (school children, gardeners, homeowners etc.) and outreach messages (e.g., Enviroscape presentation, pesticides, stormwater awareness)	Provide general staff feedback on the event (e.g., success at reaching a broad spectrum of the community, well attended, good opportunity to talk to gardeners etc.). Provide other details such as: <ul style="list-style-type: none"> • Success at reaching a broad spectrum of the community • Number of participants compared to previous years. • Post-event effectiveness assessment/evaluation results • Quantity/volume of materials cleaned up, and comparisons to previous efforts
City of SSF Environmental Summer Camp (local) Terrabay Center SSF 7/10/15	Event: Environmental Summer offered by SSF Parks and Recreation Audience: School-aged children (5-12) Message: Pollution Prevention (Stormwater, Household Haz Waste, Fats, Oils and Grease, Car Washing)	Environmental Compliance Staff members presented a short program to the 50 campers regarding wastewater treatment and stormwater pollution prevention. The event was deemed successful based on the campers' reactions/questions/enthusiasm – as well as being able to reach young minds with our message that they may then take home to their parents as well. Along with the presentation, 50 kits with items bearing the City's Stormwater Pollution Prevention message were distributed, including stickers, erasers, magnets and activity books.

<p>Multi-Chambers Business Expo (regional) SSF Event Center 8/6/15</p>	<p>Event: Chamber of Commerce Multi-Chamber Business Expo Audience: business leaders, employees and local residents Message: Message: Pollution Prevention (Stormwater, Household Haz Waste, Fats, Oils and Grease)</p>	<p>Environmental Compliance Program provided Pollution Prevention outreach materials for the Expo. Approximately 50 reusable shopping bags and additional materials bearing the City's pollution prevention message were distributed. The event was deemed successful, as the City was able to reach many business leaders and prospective businesses/employees that are not normally targeted through standard outreach events.</p>
<p>City of SSF Farmers' Market (Local event) Orange Park South San Francisco, CA 9/12/15</p>	<p>Event: Farmers' Market Audience: Local residents, homeowners, children Message: Pollution Prevention (Stormwater, Household Haz Waste, Fats, Oils and Grease, Car Washing)</p>	<p>Environmental Compliance Staff members staffed a Pollution Prevention Outreach Booth, interacting with an estimated 125 local residents regarding the City's Pollution Prevention efforts. This is a decrease in the number of interactions from the previous Fiscal Year, due to staffing issues. As in previous years, this event was successful in that a broad spectrum of local residents and business owners attend the market and staff is able to interact with them. Approximately 150 Reusable Shopping Bags and 75 other items bearing the City's Stormwater Pollution Prevention message were distributed.</p>
<p>Pollution Prevention Week (Local Event) South San Francisco Public Library 9/23/15-9/24/15</p>	<p>Event: local City Library event Audience: Local residents and schoolchildren. Message: Pollution Prevention (Stormwater, Household Haz Waste, Fats, Oils and Grease, Car Washing)</p>	<p>Environmental Compliance Staff members interacted with approximately 125 local residents and students. Stormwater Pollution Prevention information and items were provided. Approximately 125 Reusable Shopping Bags, 214 items bearing the City's Stormwater Pollution Prevention message and 34 various pamphlets were distributed. As in previous years, this event was a success, as we are able to interact with a broad spectrum of the City's residents and employees – including high school and elementary school students using the public library after school.</p>
<p>FY 15-16 Coordination of California Coastal Clean-up Day in San Mateo County</p>	<p>Coastal clean-up event – Colma Creek hot spot clean-up.</p>	<p>Over 30 volunteers in South San Francisco participated in cleaning up 2400+ feet along</p>

<p>9/19/15 (Local event in South San Francisco)</p>	<p>Pollution prevention/anti-littering outreach materials and information to general public and volunteers.</p>	<p>Colma Creek and collected approximately 525 gallons of trash and debris. This number was slightly up from the 500 gallons of trash picked up in FY 2014-2015. The event was deemed successful as a broad spectrum of the community was reached and volunteers could tangibly connect littering's effect on the storm drain system and creek/Bay.</p>
<p>FY 15-16 Coordination of California Coastal Clean-up Day in San Mateo County 9/19/15 – Countywide event</p>	<p>Coastal clean-up event Stormwater pollution prevention outreach information was provided at the cleanup site to general public and volunteers. City of SSF staff participated in cleanup event and logistics with San Mateo County personnel. Advertised event through City displays and outreach tables.</p>	<p>See the C.7 Public Information and Outreach section of SMCWPPP's FY 15-16 Annual Report for more details on the county-wide data from this event.</p> <ul style="list-style-type: none"> ➤ Over 30 volunteers in South San Francisco participated in cleaning up 2400+ feet along Colma Creek and collected 525 gallons of trash and debris.
<p>City of SSF Citizen's Academy (local) SSF WQCP 9/29/15</p>	<p>Event: Citizen involvement event Audience: Local citizens Message: Wastewater treatment, stormwater pollution prevention</p>	<p>City Public Works provided education and outreach materials bearing the City's stormwater pollution prevention message to 42 local citizens, including reusable bags, bookmarks and reusable cups. The event was deemed a success, as the group was made up of a variety of citizens interested in City operations, who are highly involved in community issues. Therefore, the pollution prevention message would be carried exponentially after the attendees left the Academy.</p>
<p>Amgen Earth Day Fair (Local Event) 1150 Veterans Blvd, SSF, CA 94080 4/20/16</p>	<p>Local Corporate Fair Audience: Local businesses, residents and employees of Amgen. Message: Message: Pollution Prevention (Stormwater, Household Haz Waste, Fats, Oils and Grease, Car Washing).</p>	<p>The Environmental Compliance Program staffed a booth at the Amgen Earth Day Fair, which included various organizations and companies interested in presenting Pollution Prevention-themed ideas and information. Approximately 100 people visited the South San Francisco Environmental Compliance table. Approximately 90 Reusable Shopping Bags and 78 additional items bearing the City's Stormwater Pollution Prevention message were distributed. As in previous years, this event was deemed</p>

		successful, as we were able to interact with several different members of the community as well as a portion of Amgen's 500 employees working in our service area.
SSF CPTF On-land Trash Cleanup Local Event SSF downtown business district 10/16/15	Community Clean-up event Coordinated with City employees and Community Preservation Task Force (CPTF). Audience: local community members Message: Pollution prevention, keeping trash from the stormwater system/Bay.	Approximately 5 Volunteers removed trash and debris from the downtown business district. Approximately 130 gallons of trash was removed. The event was deemed successful as it serviced a heavily-littered and trafficked area.
SSF CPTF Bayfront Cleanup Local Event SSF, CA near Bay Trail 11/14/15	Bayfront Trash Clean-up event Coordinated with City employees and Community Preservation Task Force (CPTF). Audience: local community members Message: Pollution prevention, keeping trash from the stormwater system/Bay.	Approximately 21 Volunteers removed trash and debris from SSF's Bayfront trail area near the end of Oyster Point Blvd. Approximately 78 gallons of trash was removed. The event was deemed a success as it brought together community volunteers of various ages and provided tangible evidence of litter's effect on the Bay and ecosystem.
SSF Estuary Cleanup Local Event Colma Creek estuary in SSF, CA near WQCP 2/12/16	Estuary Trash Clean-up event by City employees and community members. Audience: local community members Message: Pollution prevention, keeping trash from the stormwater system/Bay.	Approximately 3 Volunteers removed trash and debris from the estuary area of Colma Creek near the WQCP. Approximately 150 gallons of trash was removed. The event was deemed successful, as this area is difficult to access, however collects a large amount of litter from the creek and storm drains prior to entering the Bay.
Earth Day Colma Creek Cleanup Local Event Colma Creek in SSF, CA near Bay Trail 4/23/16	Creek Clean-up event with San Mateo County Environmental Health Audience: Community members Message: Pollution prevention (keeping litter/trash from storm drains and creek/Bay).	Approximately 19 Volunteers removed trash and debris from both sides of an approximate 1200-foot stretch of Colma Creek near the WQCP and Bay Trail pedestrian bridge. Approximately 240 gallons of trash was removed. This event was deemed successful as a broad spectrum of the community was reached and volunteers could tangibly connect littering's effect on the storm drain system and creek/Bay.
SSF Take Your Son/Daughter to Work Day Local Event SSF, CA 4/28/16	Local citizen involvement event Audience: sons/daughters of City employees Message: Stormwater pollution prevention	Environmental Compliance staff provided outreach materials containing the City's stormwater pollution prevention message to the 30 children who attended the event. Materials

		<p>included reusable shopping bags, pencils, rulers and stickers. The event was deemed successful, as our message reached children of various ages, many of whom may not have previously been exposed to it.</p>
<p>SSF Sewer Science Local Event South San Francisco High School 5/2/16-5/6/16</p>	<p>School-age Children Outreach Event Audience: High School science students Message: Stormwater pollution prevention (litter/trash), path of stormwater to Bay/ocean.</p>	<p>SSF Environmental Compliance staff administered the Sewer Science Program to approximately 75 students. The program was deemed effective based on teacher and student feedback. Also, the City was able to reach a key demographic targeted for litter reduction and stormwater pollution prevention. More students were reached this year compared to FY 14-15, as staffing issues prevented the program's coordination during FY 14-15.</p>
<p>National Rivers Day Colma Creek Cleanup Local Event Colma Creek at Utah Ave Bridge, SSF, CA 5/14/16</p>	<p>Creek Clean-up event Coordinated with City employees and San Mateo County Environmental Health Audience: community members Message: Pollution prevention (keeping litter/trash from storm drains and creek/Bay).</p>	<p>Approximately 8 Volunteers removed trash and debris from an approximate 1200-foot stretch of Colma Creek near the Utah Avenue bridge. Approximately 210 gallons trash was removed. This event was deemed successful as various community members could tangibly connect littering's effect on the storm drain system and creek/Bay.</p>

C.7.e. ► Watershed Stewardship Collaborative Efforts

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report.

Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

Summary:

See the C.7 Watershed Stewardship Collaborative Efforts section of SMCWPPP FY 15-16 Annual Report for a summary of activities.

C.7.f. ► School-Age Children Outreach

Summarize school-age children outreach programs implemented. A detailed report may be included as an attachment.

Use the following table for reporting school-age children outreach efforts.

See the C.7 School-Age Children Outreach section of SMCWPPP FY 15-16 Annual Report for a summary of activities.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
Provide the following information: Name Grade or level (elementary/ middle/ high)	Brief description, messages, methods of outreach used	Provide number or participants	Provide agency staff feedback. Report any other evaluation methods used (quiz, teacher feedback etc.). Attach evaluation summary if applicable.
City of SSF Environmental Summer Camp 7/10/15 Elementary school-aged children (5-12)	Description: Environmental Summer Environmental Camp offered by SSF Parks and Recreation. SSF Environmental Compliance Program conducted a demonstration to two sets of campers concerning wastewater treatment and	50 Campers 3 Teachers/Counselors	The event was evaluated as successful based on the campers' reactions/questions and enthusiasm. Being able to reach young minds with our pollution prevention and water quality messages was invaluable, as they may then take that knowledge home to their parents as well.

	<p>stormwater pollution prevention. Message: Pollution Prevention (Stormwater, Household Haz Waste, Fats, Oils and Grease, Car Washing) Methods: Interactive Pollution Prevention/Wastewater Treatment Presentation. Along with the presentation, 50 kits with items bearing the City's Stormwater Pollution Prevention message were distributed, including stickers, erasers, magnets and activity books.</p>		
--	--	--	--

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.a. ► Implement IPM Policy or Ordinance								
Is your municipality implementing its IPM Policy/Ordinance and Standard Operating Procedures?					<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/>	No
If no, explain:								
Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphates, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.								
Trends in Quantities and Types of Pesticides Used⁶¹								
Pesticide Category and Specific Pesticide Used	Amount ⁶²							
	FY 15-16	FY 16-17	FY 17-18	FY 18-19	FY 19-20	FY 20-21		
Organophosphates								
Product or Pesticide Type A	None							
Product or Pesticide Type B	None							
Pyrethroids								
Product or Pesticide Type X	None							
Product or Pesticide Type Y	None							
Carbamates								
Product or Pesticide Type X	None							
Product or Pesticide Type Y	None							
Fipronil								
Product or Pesticide Type X	None							
Product or Pesticide Type Y	None							
Indoxacarb	Reporting not required							

⁶¹Includes all municipal structural and landscape pesticide usage by employees and contractors.
⁶²Weight or volume of the product or preferably its active ingredient, using same units for the product each year. Please specify units used. The active ingredients in any pesticide are listed on the label. The list of active ingredients that need to be reported in the pyrethroids class includes: metofluthrin, bifenthrin, cyfluthrin, beta-cyfluthrin, cypermethrin, deltamethrin, esfenvalerate, lambdacyhalothrin, and permethrin.

	in FY 15-16					
Diuron	Reporting not required in FY 15-16					
Diamides	Reporting not required in FY 15-16					
<p>IPM Tactics and Strategies used:</p> <p>The City of SSF implemented IPM tactics and strategies during FY 15-16 including:</p> <ul style="list-style-type: none"> • Use of non-chemical strategies such as monitoring, mowing weeds, mulching. • Replacing invasive plants with natives. 						

C.9.b ▶ Train Municipal Employees	
Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	21
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within this reporting year.	21
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within this reporting year.	100%
<p>Type of Training:</p> <p>City of SSF Parks and Rec staff attended the following training FY 15-16:</p> <ul style="list-style-type: none"> -Bay-Friendly Training & Qualification for Maintaining Sustainable Landscapes (2016) -SMCWPPP Landscape IPM Training (3/9/16) 	

C.9.c ▶ Require Contractors to Implement IPM			
Did your municipality contract with any pesticide service provider in the reporting year?	<input checked="" type="checkbox"/>	Yes	
<p style="text-align: right;">No</p> <p>If yes, briefly describe how contractor compliance with IPM Policy/Ordinance and SOPs was monitored</p> <p>The City of South San Francisco verifies IPM contractor performance by hiring professionals that certify they are properly trained and use IPM.</p> <p>Frank & Grossman Landscape Contractors, Inc. (signed City of SSF Written Order/contract specifications attached) Gary Cooper, General Operations Manager 1400 Egbert Avenue San Francisco, CA 94124 415 822 1900</p> <p>Terminix International (Green Pro Certified) 32980 Alvarado-Niles #826 Union City, CA 94587 510 489 8689</p> <p>Green Pro Certification (attached) is different from Quality Pro Green (Regional Board cited Quality Pro Green certification). The Green Pro Certification ensures technicians are trained and 'only make traditional pesticide applications after discussing the options with you and getting your consent'.</p> <p>The City of South San Francisco has contract specifications that require adherence to IPM.</p>			

C.9.d ▶ Interface with County Agricultural Commissioners			
Did your municipality communicate with the County Agricultural Commissioner to: (a) get input and assistance on urban pest management practices and use of pesticides or (b) inform them of water quality issues related to pesticides,		Yes	
<p style="text-align: right;">No</p> <p style="text-align: center;"><input checked="" type="checkbox"/></p>			

<p>If yes, summarize the communication. If no, explain. See Section 9 of the SMCWPPP FY 15-16 Annual Report for summary of communication with the San Mateo County Agricultural Commissioner.</p>				
<p>Did your municipality report any observed or citizen-reported violations of pesticide regulations (e.g., illegal handling and applications of pesticides) associated with stormwater management, particularly the California Department of Pesticide Regulation (DPR) surface water protection regulations for outdoor, nonagricultural use of pyrethroid pesticides by any person performing pest control for hire.</p>	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
<p>If yes, provide a summary of improper pesticide usage reported to the County Agricultural Commissioner and follow-up actions taken to correct any violations. A separate report can be attached as your summary.</p>				

C.9.e.ii (1) ► Public Outreach: Point of Purchase

<p>Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); OR reference a report of a regional effort for public outreach in which your agency participates.</p>
<p>Summary: See the C.9 Pesticides Toxicity Control section of the SMCWPPP FY 15-16 Annual Report for information on point of purchase public outreach conducted countywide and regionally.</p>

C.9.e.ii (2) ► Public Outreach: Pest Control Contracting Outreach

<p>Provide a summary of outreach to residents who use or contract for structural pest control and landscape professionals); AND/OR reference a report of a regional effort for outreach to residents who hire pest control and landscape professionals in which your agency participates.</p>
<p>Summary: See the C.9 Pesticides Toxicity Control section of the SMCWPPP FY 15-16 Annual Report for a summary of our participation in and contributions towards countywide and regional public outreach to pest control operators and landscapers to reduce pesticide use.</p>

C.9.e.ii.(3) ► Public Outreach: Pest Control Operators

<p>Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); AND/OR reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.</p>
<p>Summary: See the C.9 Pesticides Toxicity Control section of SMCWPPP FY 15-16 Annual Report for a summary of outreach to pest control operators and landscapers to reduce pesticide use.</p>

C.9.f ▶ Track and Participate in Relevant Regulatory Processes

Summarize participation efforts, information submitted, and how regulatory actions were affected; **AND/OR** reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.

Summary:

During FY 15-16, we participated in regulatory processes related to pesticides through contributions to SMCWPPP, BASMAA and CASQA. For additional information, see the Regional Report submitted by BASMAA on behalf of all MRP Permittees.

Section 10 - Provision C.10 Trash Load Reduction

C.10.a.i ► Trash Load Reduction Summary	
For population-based Permittees, provide the overall trash reduction percentage achieved to-date within the jurisdictional area of your municipality that generates problematic trash levels (i.e., Very High, High or Moderate trash generation). Base the reduction percentage on the information presented in C.10.b i-iv and C.10.e.i-ii. Provide a discussion of the calculation used to produce the reduction percentage, including whether the 60% trash reduction performance guideline was attained. If not attained, include a discussion of next steps (e.g., development of a detailed plan or report of non-compliance).	
Trash Load Reductions	
Percent Trash Reduction in All Trash Management Areas (TMAs) due to Trash Full Capture Systems (as reported C.10.b.i)	5.2%
Percent Trash Reduction in all TMAs due to Control Measures Other than Trash Full Capture Systems (as reported in C.10.b.ii) ⁶³	26.8%
Percent Trash Reduction due to Jurisdictional-wide Source Control Actions (as reported in C.10.b.iv) ¹	10.0%
SubTotal for Above Actions	42.0%
Trash Offsets (Optional)	
Offset Associated with Additional Creek and Shoreline Cleanups (as reported in C.10.e.i)	NA
Offset Associated with Direct Trash Discharges (as reported in C.10.e.ii)	NA
Total (Jurisdictional-wide) % Trash Load Reduction in FY 15-16	42.0%

⁶³ See Appendix 10-1 for changes between 2009 and FY 15-16 in trash generation by TMA as a result of Full Capture Systems and Other Measures.

Discussion of Trash Load Reduction Calculation:

The City attained and reported a 44% trash load reduction in its FY 14-15 Annual Report, exceeding the trash load reduction target of 40% by 2014. The reissued MRP contains a revised calculation methodology that eliminates or caps past trash load reduction offsets or credits. Based on the new calculation methodology, as of July 1, 2016, the City has attained a 42% trash load reduction (including trash offsets). The reissued MRP also added a non-mandatory performance guideline of attaining 60% trash reduction by July 1, 2016. Based on the new calculation methodology and the information provided in this Annual Report, the City has not achieved the 60% performance guideline.

The City did not have sufficient time to adjust existing trash control implementation plan to achieve the new non-mandatory target, but expects to exceed the mandatory 70% trash load reduction requirement by June 30, 2017. The City has prepared a Trash Action Plan (Attachment D)⁶⁴ to document the description and schedule of additional trash load reduction control actions that will be implemented to attain and exceed the required 70% percent reduction by July 1, 2017.

⁶⁴ See Trash Action Plan in Appendix 10-3.

C.10.a.iii ► Mandatory Trash Full Capture Systems		
Provide the following:		
1) Total number and types of full capture systems (publicly and privately-owned) installed prior to FY 15-16, during FY 15-16, and to-date, including inlet-based and large flow-through or end-of-pipe systems, and qualifying low impact development (LID) required by permit provision C.3. 2) Total land area (acres) treated by full capture systems for population-based Permittees and total number of systems for non-population based Permittees compared to the total required by the permit.		
Type of System	# of Systems	Areas Treated (Acres)*
Installed Prior to FY 15-16		
Connector Pipe Screen	76	460.9
Drains to Sanitary Sewer	-	4.4
Installed in FY 15-16		
Low Impact Development	1	9.7
Total for all Systems Installed To-date	76	475.1
Treatment Acreage Required by Permit (Population-based Permittees)		58
Total # of Systems Required by Permit (Non-population-based Permittees)		NA

*Areas treated includes jurisdictional and non-jurisdictional lands (e.g., public K-12 schools and colleges, and freeways)

C.10.b.i ► Trash Reduction - Full Capture Systems

Provide the following:

- 1) Jurisdiction-wide trash reduction in FY 15-16 attributable to trash full capture systems implemented in each TMA;
- 2) The total number of full capture systems installed to-date in your jurisdiction;
- 3) Since the effective date of MRP 2.0 (January 1, 2016), the percentage of systems that exhibited significant plugged/blinded screens or were >50% full when inspected or maintained;
- 4) A narrative summary of any maintenance issues and the corrective actions taken to avoid future full capture system performance issues; and
- 5) A certification that each full capture system is operated and maintained to meet the full capture system requirements in the permit.

TMA	Jurisdiction-wide Reduction (%)	Total # of Full Capture Systems	% of Systems Exhibiting Plugged/Blinded Screens or >50% full	Summary of Maintenance Issues and Corrective Actions
1	0.6%	76	0%	<p>These Full Trash Capture devices are inspected/maintained on an average frequency of three times per year - before, during and after storm events. The main issue with the devices is the potential to plug up during storms causing flooding, therefore frequent maintenance is required. Upon installation of the devices, the City had expected to only clean/maintain the devices before and after each storm. However, based on this flooding concern, it has been found that the devices required cleaning/maintenance during storms as well. Another issue with the devices is that the contractor is unavailable to help troubleshoot, as they have gone out of business. Maintenance records are on the Computerized Maintenance Management System (CMMS) located on the City server – CityWorks (maintenance records and reports) and are therefore easily accessed for audit purposes. The areas of treatment for each trash capture device are included in the City of South San Francisco’s Long-term Trash Load Reduction Plan submitted on February 1, 2014.</p> <p>During FY 2015-2016 , none of the installed devices were found to be > 25% full, and none of the systems exhibited plugged or blinded screens – attributed to the aggressive maintenance schedule noted above.</p>
2	0.4%			
3	1.1%			
4	1.4%			
5	1.5%			
6	0.0%			
7	0.1%			
8	0.0%			
9	0.1%			
Total	5.2%			

Certification Statement:
 The City of South San Francisco certifies that a full capture system maintenance and operation program is currently being implemented to maintain all applicable systems in manner that meets the full capture system requirements included in the Permit.

C.10.b.ii ► Trash Reduction – Other Trash Management Actions (PART A)	
Provide a summary of trash control actions other than full capture systems or jurisdictional source controls that were implemented within each TMA, including the types of actions, levels and areal extent of implementation, and whether actions are new, including initiation date.	
TMA	Summary of Trash Control Actions Other than Full Capture Systems
1	On-land Cleanup: On 10/16/15, the City’s Community Preservation Task Force (CPTF) hosted an on-land cleanup with community volunteers in the downtown area. Approximately 130 gallons of trash and debris were removed.
2	Improved Trash Bin/Container Management: City staff has been conducting Stormwater inspections throughout the jurisdiction. If during the inspection the site has trash stored improperly, has dumpster lids uncovered, damaged, missing or the facility is otherwise unkempt the City requires them to clean up their facility of trash, litter and keep their dumpster lids closed. If compliance is not achieved enforcement actions are taken as necessary. This is to minimize wind-blown litter and trash accumulation. The City has been focusing on businesses to move their trash bins off the street and place them inside or out of sight since FY 13-14. The focus was to prevent unlawful outdoor storage, ensure a tight fitting lid on the container and minimize wind-blown litter and trash accumulation.
3	Improved Trash Bin/Container Management: In 2015, the City began working with SSF Scavenger through SMCWPPP’s Litter Workgroup, and has targeted an area in this TMA and begun an initial Pilot Study into potential collaborative litter reduction efforts.
3	Improved Trash Bin/Container Management: City staff has been conducting Stormwater inspections throughout the jurisdiction. If during the inspection the site has trash stored improperly, has dumpster lids uncovered, damaged, missing or the facility is otherwise unkempt the City requires them to clean up their facility of trash, litter and keep their dumpster lids closed. If compliance is not achieved enforcement actions are taken as necessary. This is to minimize wind-blown litter and trash accumulation. The City has been focusing on businesses to move their trash bins off the street and place them inside or out of sight since FY 13-14. The focus was to prevent unlawful outdoor storage, ensure a tight fitting lid on containers and minimize wind-blown litter and trash accumulation.
3	Partial Trash Capture: A large shopping center making up approximately 50% of TMA 3 that had previously contributed very heavily to the original trash load was demolished and redeveloped in 2013-2014. The redeveloped commercial shopping center incorporates several BMPs and private trash capture/ stormwater treatment devices on site, reducing the level of trash making it into the MS4 from this TMA.
5	On-land Cleanup: On 11/14/15, the City’s Community Preservation Task Force (CPTF) hosted an on-land cleanup with community volunteers near the Bay Trail. Approximately 90 gallons of trash and debris were removed.
5	Improved Trash Bin/Container Management: City staff has been conducting Stormwater inspections throughout the jurisdiction. If during the inspection the site has trash stored improperly, has dumpster lids uncovered, damaged, missing or the facility is otherwise unkempt the City requires them to clean up their facility of trash, litter and keep their dumpster lids closed. If compliance is not achieved enforcement actions are taken as necessary. This is to minimize wind-blown litter and trash accumulation. The City has been focusing on businesses to move their trash bins off the street and place them inside or out of sight since FY 13-14. The focus was to prevent unlawful outdoor storage, ensure a tight fitting lid on containers and minimize wind-blown litter and trash accumulation. Illegal Dumping Controls: Barriers were installed in two locations in FY 13-14 per the Long-term Trash Plan.
7	Container Management: Parks Division purchased 30 additional polyethylene trash can domes to limit litter blowing away in windy, high trash areas and developed areas. Additionally, the City revised the new construction trash can standard to include partial covers on cans to minimize litter escape. Twenty four new permanent trash cans with partial covers were installed at 5 new sites.

C.10.b.ii ► Trash Reduction – Other Trash Management Actions (PART B)

Provide the following:

- 1) A summary of the on-land visual assessments in each TMA (or control measure area), including the street miles available for assessment (i.e., those associated with VH, H, or M trash generation areas not treated by full capture systems), the street miles assessed, the % of available street miles assessed, and the average number of assessments conducted per site within the TMA; and
- 2) Percent jurisdictional-wide trash reduction in FY 15-16 attributable to trash management actions other than full capture systems implemented in each TMA.

TMA ID or (as applicable) Control Measure Area	Total Street Miles Available for Assessment	Summary of On-land Visual Assessments			Jurisdictional-wide Reduction (%)
		Street Miles Assessed	% of Applicable Street Miles Assessed	Avg. # of Assessments Conducted at Each Site*	
1	13.33	0	0%	0	0%
2	4.02	0.75	18.6%	5.5	9.2%
3	0.93	0.41	43.7%	5.5	3.6%
4	4.65	0	0%	0	0%
5	11.68	2.35	20.2%	4.9	13.6%
6	1.01	0	0%	0	0%
7	2.08	0.54	26.0%	4.3	0.4%
8	1.53	0	0%	0	0%
9	1.73	0	0%	0	0%
Total		4.05	-	-	26.8%

*Each on-land visual assessment site is approximately 1,000 feet (on average) in length. Average number of assessments represent those conducted in FYs 14-15 and 15-16.

C.10.b.iv ► Trash Reduction – Source Controls					
Provide a description of each jurisdictional-wide trash source control action implemented to-date. For each control action, identify the trash reduction evaluation method(s) used to demonstrate on-going reductions, summarize the results of the evaluation(s), and provide the associated reduction of trash within your jurisdictional area. Also include the total % reduction credit for all source controls up to the maximum 10% allowed by MRP 2.0.					
Source Control Action	Summary Description & Dominant Trash Sources and Types Targeted	Evaluation/Enforcement Method(s)	Summary of Evaluation/Enforcement Results To-date	% Reduction	Total Reduction Credit (%)
Single Use Bag Ordinance	The City adopted an Ordinance on April 22, 2013 banning the distribution of single-use plastic carryout bags. The Ordinance went into effect 30 days later http://qcode.us/codes/southsanfrancisco/ (Title 8 chapter 8.64 Reusable Bags). The focus of the Ordinance was to minimize pedestrian and wind-blown litter consisting of single-use plastic bags. The San Mateo County Environmental Health Division has been authorized and directed to enforce this Ordinance	<p>On behalf of all SMCWPPP Permittees, the County of San Mateo conducted assessments evaluating the effectiveness of the single use plastic bag ban in municipalities within San Mateo County. Assessments conducted by the County included audits of businesses and surveys of customer bag usage at many businesses in San Mateo County. Additionally, the number of complaints by customers was also tracked by the County. The results of assessments conducted by these cities are gauged to be representative of all SMCWPPP Permittees, given the consistency between the scope, implementation, and enforcement of the ordinances among the municipalities.</p> <p>The City of South San Francisco developed its % trash reduced estimate using the following norms:</p> <ol style="list-style-type: none"> 1.) Single use plastic bags comprise 8% of the trash discharged from stormwater conveyances, based on the Regional Trash Generation Study conducted by BASMAA; 2) 95% of single use plastic bags distributed in the City of South San Francisco are affected by the implementation of the ordinance, based on the County of San Mateo's Environmental Impact Report; and 	Results of assessments conducted by the County of San Mateo on behalf of all municipalities in San Mateo County indicate that the City of South San Francisco's ordinance is effective in reducing the number of single use plastic bags in stormwater discharges. This preliminary conclusion is based on the very small number of complaints received from customers about businesses in San Mateo County that are continuing to use single use plastic bags after ordinances were adopted. Typically, single use bags are 8% of the trash observed in stormwater	7%	10% (Maximum)

C.10.b.iv ► Trash Reduction – Source Controls					
Provide a description of each jurisdictional-wide trash source control action implemented to-date. For each control action, identify the trash reduction evaluation method(s) used to demonstrate on-going reductions, summarize the results of the evaluation(s), and provide the associated reduction of trash within your jurisdictional area. Also include the total % reduction credit for all source controls up to the maximum 10% allowed by MRP 2.0.					
		3) Of the bags affected by the ordinance, there are now 90% less bags being distributed, based on customer complaints received by the County of San Mateo's Department of Environmental Health Services. This is conservative estimate given that in FY 13-14 Environmental Services only received complaints about 4, of the over 1900 businesses in San Mateo County that are affected by the single-use plastic bag ordinances.	discharges, the City of South San Francisco concludes that there has been a 7% (i.e., 8% x 86% effectiveness in reducing bags) reduction in trash in stormwater discharges as a result of the City of South San Francisco's ordinance.		
Expanded Polystyrene Food Service Ware Ordinance	The City adopted the polystyrene food ware packaging ban on October 8, 2008, which prohibits food vendors from distributing food to customers in polystyrene packaging. The focus of the ban was to minimize pedestrian and wind-blown litter consisting of polystyrene food service ware. City Code Enforcement Staff enforces the ban within the city.	Although the City of South San Francisco has adopted and implemented an ordinance prohibiting the distribution of EPS food ware by food vendors, evaluations of the effectiveness of the ordinance have not yet been conducted. For the purpose of estimating trash reductions in stormwater discharges associated with the ordinance, the results of assessments conducted by the cities of Los Altos and Palo Alto were used to denote the reduction of trash associated with	Results of assessments that are representative of the City of South San Francisco, but were conducted by the cities of Los Altos and Palo Alto, indicate that South San Francisco's ordinance is effective	5%	

C.10.b.iv ► Trash Reduction – Source Controls					
Provide a description of each jurisdictional-wide trash source control action implemented to-date. For each control action, identify the trash reduction evaluation method(s) used to demonstrate on-going reductions, summarize the results of the evaluation(s), and provide the associated reduction of trash within your jurisdictional area. Also include the total % reduction credit for all source controls up to the maximum 10% allowed by MRP 2.0.					
	http://qcode.us/codes/southsanfrancisco/ (Title 8 chapter 8.60 Green Food Packaging).	<p>the City of South San Francisco’s ordinance. Assessments conducted by the cities of Los Altos and Palo Alto were used to gauge the reduction of trash associated with the City of South San Francisco’s ordinance. Assessments conducted by these cities were conducted prior to and following the effective date of their ordinances, and include audits of businesses and/or assessments of EPS food ware observed on streets, storm drains and local creeks. The results of assessments conducted by these cities are expected to be representative of the effectiveness of the City of South San Francisco’s ordinance because the implementation (including enforcement) of the City of South San Francisco’s ordinance is similar to the City of Los Altos’ and Palo Alto’s. The City of south San Francisco developed its % trash reduced estimate using the following assumptions:</p> <ol style="list-style-type: none"> 1.) EPS food ware comprises 6% of the trash discharged from stormwater conveyances, based on the Regional Trash Generation Study 2) 80% of EPS food ware distributed by food vendors or sold via stores in the City of South San Francisco is affected by the implementation of the ordinance; and 3) There is now 95% less EPS food ware being distributed, sold and/or observed in the environment, based on assessments conducted by the City of Palo Alto and City of Los Altos. 	<p>in reducing EPS food ware in stormwater discharges. This conclusion is based on the following valuation - an average of 95% of businesses affected by the ordinance are no longer distributing EPS food ware post-ordinance. Based on these results, the estimated average reduction of EPS food ware in stormwater discharges is 90%. Supposing EPS food ware is 6% of the trash observed in stormwater discharges, the City of South San Francisco concludes that there has been a 5% (i.e., 6% x 90%) reduction in trash in stormwater discharges as a result of the ordinance.</p>		

C.10.c ► Trash Hot Spot Cleanups

Provide the FY 15-16 cleanup date and volume of trash removed during each MRP-required Trash Hot Spot cleanup during each fiscal year listed. Indicate whether the site was a new site in FY 15-16.

Trash Hot Spot	New Site in FY 15-16 (Y/N)	FY 15-16 Cleanup Date(s)	Volume of Trash Removed (cubic yards)				
			FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16
SSF01	N	9/19/2015	1.0	12.7	2.8	1.3	5.2
SSF02	N		1.5				

Note: SSF01 and SSF02 data were combined in FY 2012-13, FY 2013-14, FY 2014-2015 and FY 2015-2016.

C.10.d ► Long-Term Trash Load Reduction Plan	
Provide descriptions of significant revisions made to your Long-term Trash Load Reduction Plan submitted to the Water Board in February 2014. Describe significant changes made to primary or secondary trash management areas (TMA), trash generation maps, control measures, or time schedules identified in your plan. Indicate whether your trash generation map was revised and is attached to your Annual Report.	
Description of Significant Revision	Associated TMA
In FY 15-16, consistent with all MRP Permittees, all public K-12 schools, college and university parcels were made non-jurisdictional on the City's baseline trash generation maps. Under California Government Code Sections 4450 through 4461, the construction, modification, or alternation of facilities and/or structures on these parcels are under the jurisdiction of the California Division of State Architect and not the City. The public right-of-way (e.g., streets and sidewalks) surrounding these parcels remain as jurisdictional on the City's baseline trash generation maps. The City's revised baseline trash generation map is included as Appendix 10-2.	All applicable
In FY 15-16, TMA 8 in the baseline trash generation map was changed from medium to low trash generation based on field observations and information regarding the TMA, and confirmed via visual assessment. TMA 8 consists of the Genentech campus, which employs a large maintenance team that cleans the area at least daily. Please see Attachment E for the revised SSF baseline trash generation map.	8
South SF Scavenger agreed in January 2014, to do an audit of a certain section of MFD properties in TMA 1 during 2014 that would entail ensuring businesses are receiving the proper level of service and assessing any container issues and housekeeping issues that may be contributing to litter reaching the environment and storm drain system. Due to various circumstances, this audit was postponed and will now occur during FY 2016-2017 (tentatively planned to begin September 2016). Subsequent audits are possible depending on the results of this initial one.	1
The City of SSF had originally planned to install a new stormwater pump station in FY 14-15 at South Airport Blvd and Mitchell Avenue to replace an existing pumping system. The new station was scheduled to include a full trash capture device. Although this pump station was retro-fitted in FY 2014-2015, the planned trash capture device was not installed at that time, pending further study and receipt of the City's Storm Drain Master Plan, which was finalized during FY 2015-2016. This location is still a potential option for a full trash capture device per the recently completed SSF Trash Reduction Plan.	5
The City of SSF had originally planned to install a large full trash capture device in FY 14-15 in this TMA at an existing stormwater pump station. However, the planned trash capture device was not installed during this time, pending further study and receipt of the City's Storm Drain Master Plan, which was finalized during FY 2015-2016. This location is still a potential option for a full trash capture device per the recently completed SSF Trash Reduction Plan.	4

C.10.e. ► Trash Reduction Offsets (Optional)			
Provide a summary description of each offset program implemented, the volume of trash removed, and the offset claimed in FY 15-16. Also, for additional creek and shoreline cleanups, describe the number and frequency of cleanups conducted, and the locations and cleanup dates. For direct discharge control programs approved <u>by the Water Board Executive Officer</u> , also describe the results of the assessments conducted in receiving waters to demonstrate the effectiveness of the control program. Include an Appendix that provides the calculations and data used to determine the trash reduction offset.			
Offset Program	Summary Description of Actions and Assessment Results	Volume of Trash (CY) Removed/Controlled in FY 15-16	Offset (Jurisdiction-wide Reduction %)
Additional Creek and Shoreline Cleanups (Max 10% Offset)	Not Applicable		
Direct Trash Discharge Controls (Max 15% Offset)	Not Applicable		

Appendix XX. Baseline trash generation and areas addressed by full capture systems and other control measures in Fiscal Year 15-16.

TMA	2009 Baseline Trash Generation (Acres)					Trash Generation (Acres) in FY 15-16 After Accounting for Full Capture Systems					Jurisdiction-wide Reduction via <u>Full Capture Systems</u> (%)	Trash Generation (Acres) in FY 15-16 After Accounting for Full Capture Systems and Other Control Measures					Jurisdiction-wide Reduction via <u>Other Control Measures</u> (%)	Jurisdiction-wide Reduction via Full Capture <u>AND</u> Other Control Measures (%)

Addressed by Full Capture Systems
(See Attachment E)

Section 11 - Provision C.11 Mercury Controls

- C.11.a ▶ Implement Control Measures to Achieve Mercury Load Reductions**
- C.11.b ▶ Assess Mercury Load Reductions from Stormwater**
- C.11.c ▶ Plan and Implement Green Infrastructure to Reduce Mercury Loads**
- C.11.d ▶ Prepare Implementation Plan and Schedule to Achieve TMDL Allocations**
- C.11.e ▶ Implement a Risk Reduction Program**

Summary:

A summary of accomplishments for these sub-provisions are included within the C.11 Mercury Controls section of SMCWPPP's FY 15-16 Annual Report.

Section 12 - Provision C.12 PCBs Controls

- C.12.a ▶ Implement Control Measures to Achieve PCBs Load Reductions**
- C.12.b ▶ Assess PCBs Load Reductions from Stormwater**
- C.12.c ▶ Plan and Implement Green Infrastructure to Reduce PCBs Loads**
- C.12.d ▶ Prepare Implementation Plan and Schedule to Achieve TMDL Allocations**
- C.12.e ▶ Evaluate PCBs Presence in Caulks/Sealants Used in Storm Drain or Roadway Infrastructure in Public Rights-of-Way**
- C.12.f ▶ Manage PCB-Containing Materials and Wastes During Building Demolition Activities So That PCBs Do Not Enter Municipal Storm Drains**
- C.12.g ▶ Fate and Transport Study of PCBs: Urban Runoff Impact on San Francisco Bay Margins**
- C.12.h ▶ Implement a Risk Reduction Program**

Summary:

A summary of accomplishments for these sub-provisions are included within the C.12 PCBs Controls section of SMCWPPP's FY 15-16 Annual Report.

Section 13 - Provision C.13 Copper Controls

C.13.a.iii ► Manage Waste Generated from Cleaning and Treating of Copper Architectural Features					
(For FY 15-16 Annual Report only) Do you have adequate legal authority to prohibit the discharge of wastewater to storm drains generated from the installation, cleaning, treating, and washing of copper architectural features, including copper roofs?		<input checked="" type="checkbox"/> X	Yes	<input type="checkbox"/>	No
(For FY 15-16 Annual Report only) Provide a summary of how copper architectural features are addressed through the issuance of building permits.					
<p>Summary:</p> <p>The City revised their Municipal Code to include a prohibition of discharge from copper architectural features. The revision was approved by City Council in January 2013. The specific language incorporated into the Municipal Code was included in section C.13.a.iii.(2) of the FY 12-13 Annual Stormwater Report. Contractors are informed about this Ordinance during the building permit review process as applicable. Beginning in FY 16-17, the Building Department will also include this information on the Roofing Plan Check handout and the Requirements for Plan Review handout.</p> <p>The Countywide Program collaborated with BASMAA to develop BMPs to manage waste generated from cleaning and treating of copper architectural features, including copper roofs, during construction and post construction. These BMPs are distributed during the building permit review process as needed/applicable.</p> <p>The Countywide Program updated its Stormwater Requirements Checklist to include the architectural copper BMPs in the list of source control measures that may apply to projects. Staff uses the revised Stormwater Requirements Checklist which includes source control for architectural copper features. Staff continues to make copper outreach materials available at the building department and will include them if relevant in materials distributed with plan check comments.</p>					
(FY 15-16 Annual Report and each Annual Report thereafter) Provide summaries of permitting and enforcement activities to manage waste generated from cleaning and treating of copper architectural features, including copper roofs, during construction and post-construction.					
<p>Summary:</p> <p>During construction, City of SSF Environmental Compliance and Building Inspectors are responsible for identifying copper architectural features, and if appropriate, BMPs are implemented. Any issues noted are documented and enforcement actions are recorded in the Provision C.6 erosion control inspection tracking sheet.</p> <p>Post-construction, City of SSF Environmental Compliance Inspectors are responsible for responding to, investigating and identifying illegal discharge of wash water from washing copper architectural features. Any enforcement actions or reported discharges are recorded in the Provision C.5 Illicit Discharge inspection records and tracking sheet.</p> <p>The SMCWPPP "Requirements for Architectural Copper" Fact Sheet is made available to the public, construction inspectors and illicit discharge inspectors on the SMCWPPP website (www.flowstobay.org/files/newdevelopment/flyersfactsheets/ArchitecturalcopperBMPs.pdf). Inspectors are made aware of the concerns with copper architectural features at SMCWPPP Training Workshops and internal municipal trainings.</p>					

C.13.b.iii ► Manage Discharges from Pools, Spas, and Fountains that Contain Copper-Based Chemicals

<i>(For FY 15-16 Annual Report only)</i> Do you have adequate legal authority to prohibit the discharge to storm drains of water containing copper-based chemicals from pools, spas, and fountains?	<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/>	No
---	-------------------------------------	-----	--------------------------	----

(For FY 15-16 Annual Report only) Provide a summary of how copper-containing discharges from pools, spas, and fountains are addressed to accomplish the prohibition of the discharge.

Summary:

City staff distributes the OWOW “Maintenance Tips for Pools, Spas, and Fountains” Fact Sheet, available on the SMCWPPP website <http://www.ourwaterourworld.org/Portals/0/documents/pdf/Maintenance%20Tips%20for%20Pools%20%20Spas%20and%20Fountains.pdf> to educate the public and in response to inquiries regarding applicable discharges.

City Environmental Compliance staff also responds to discharges from pools through the illicit discharge detection and elimination program.

City of SSF Environmental Compliance staff requires submittal of SMCWPPP’s C.3 and C.6 Development Review Checklist for all regulated projects. Section II.C (source controls) requires information regarding potential pools, spas, and fountain water discharge and connecting this discharge to the sanitary sewer. City staff reviews this checklist during plan review and requires that applicable regulated projects connect these discharges to the sanitary sewer.

(FY 15-16 Annual Report and each Annual Report thereafter) Provide summaries of any enforcement activities related to copper-containing discharges from pools, spas, and fountains.

Summary:

Upon review of our Provision C.5 illicit discharge inspection data we found no enforcement activities related to copper-containing discharges from pools, spas, and fountains.

C.13.c.iii ► Industrial Sources Copper Reduction Results

Based upon inspection activities conducted under Provision C.4, highlight copper reduction results achieved among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed.

Summary:

The City of South San Francisco has one plating facility that is inspected twice a year. This facility ceased operations on 10/21/15 and has vacated the premises. No stormwater issues have historically occurred at this site. City Environmental Compliance staff reviews Business License Applications for all new businesses entering the service area in order to determine potential copper users or sources of copper – which are followed up with inspections if applicable.

Section 15 -Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:

- Promote conservation programs
- Promote outreach for less toxic pest control and landscape management
- Promote use of drought tolerant and native vegetation
- Promote outreach messages to encourage appropriate watering/irrigation practices
- Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.

Summary:

See Section C.9.e.ii of SMCWPPP's FY 15-16 Annual Report for a description of SMCWPPP's activities related to point-of-purchase outreach which promotes less toxic pest control and landscape management. See Section C.7 of SMCWPPP's FY 15-16 Annual Report for a description of outreach conducted to promote water conservation programs, such as promoting rain barrel use. Information on water conservation, less-toxic pest control and appropriate watering/irrigation practices is also posted on SMCWPPP's website (www.flowstobay.org).

City of SSF Environmental Compliance staff makes these Countywide outreach materials available and distributes them as applicable during local outreach events (ex. Farmers' Markets, Pollution Prevention Week). Additionally, City of SSF Environmental Compliance staff distributes these Countywide materials through the Illicit Discharge program as applicable.

Spill/Dumping Response Contact List

All streets and storm drains in the City of South San Francisco flow directly to Colma Creek and the Bay and are regulated under the State of California's Municipal Regional Stormwater Permit – which requires each municipality to post a central point of contact to report spills, illicit discharges, dumping and complaints. For the safety and welfare of our citizens and ecosystem, please contact us at these numbers if you witness any non-stormwater discharges into the City of South San Francisco's storm drain system.

For Spill/Dumping reporting to the Municipal Storm Drain System within the City of South San Francisco during normal business hours:

- Stormwater Hotline - (650) 829-3848
- WQCP - Water Quality Control Plant - (650) 877-8555
- Andy Wemmer, Environmental Compliance Supervisor - SSF - (650) 829-3840
- Rob Lecel, Senior Environmental Compliance Inspector - SSF - (650) 829-3882

For Spill/Dumping reporting to the Municipal Storm Drain System within the City of South San Francisco outside of normal business hours:

- WQCP - Water Quality Control Plant - (650) 877-8556
- WQCP Operations - (650) 823-1992
- South San Francisco Police Dept - (650) 877-8900

Citywide Trash Capture Feasibility Study

for

City of South San Francisco, California

August 2016

This submittal has been prepared under the direct supervision of the undersigned, who hereby certifies that she is a Registered Professional Engineer in the State of California

Schaaf & Wheeler
CONSULTING CIVIL ENGINEERS

Table of Contents

1. Introduction 1

2. Trash Generation and Existing Management Activities 3

 2.1 Trash Generation..... 3

 2.2 Trash Management Areas..... 4

 2.3 Current Trash Management Actions and Reduction Benefit 6

 2.3.1 Current Trash Management 6

 2.3.2 Existing Full Capture Devices..... 7

2.3.3 Tech Campuses and New Development 7

3. Trash Capture Plan..... 11

 3.1 Capital Improvement Projects..... 11

 3.1.1 Device Locations 11

 3.1.2 Existing Inlet Filter Devices..... 14

 3.1.3 System Hydraulics..... 14

 3.1.4 Device Sizing Calculations 14

 3.2 Cost Estimates 15

 3.3 Full Capture Scenario Matrix. 16

4. Conclusion 17

Appendix A: Treatment Tables..... A-1

Appendix B: Detailed Cost Estimate B-1

Appendix C: Full Scale Trash Capture Plan..... C-1

1. Introduction

This report provides a multi-year plan to reduce trash entering creeks and the San Francisco Bay from the City of South San Francisco municipal separate stormwater system (MS4), with the goal of meeting the July 1, 2017 70% and July 1, 2022 100% trash reduction requirements as outlined in the Regional Water Quality Control Board (RWQCB, 2015) NPDES Municipal Permit section C.10.

The NPDES permit includes the following deadlines for trash reduction milestones:

- Progress report detailing whether baseline trash load and trash load reduction tracking method are being determined individually or collaboratively due by February 1, 2011. Compliance obtained via BASMAA letter entitled *Progress Report: Trash Baseline Loads and Load Reduction Tracking*.
- Short-term trash reduction load plan due by February 1, 2012. Compliance obtained by City of South San Francisco *Baseline Trash Load and Short-Term Trash Load Reduction Plan*.
- Establish baseline trash load and trash load reduction tracking method by February 1, 2012. Compliance obtained by BASMAA reports: *Trash Load Reduction Tracking Method Technical Report (version 1.0); Preliminary and Final San Francisco Bay Area Stormwater Trash Generation Rates Technical Reports; and SCVURPPP Pilot Trash Assessment Strategy*.
- Installation of full trash capture devices (meeting NPDES criteria for mesh screen and capacity) treating 460 acres runoff area by July 1, 2014. Compliance achieved through the installation of 76 devices in high trash generation areas (Source: *City of South San Francisco Long-Term Trash Load Reduction Plan and Assessment Strategy, January 28, 2014*).
- Long-Term Trash Load Reduction Plan due by February 1, 2014. Compliance obtained by the City of South San Francisco *Long-Term Trash Load Reduction Plan and Assessment Strategy*.
- 40% reduction in baseline trash load by July 1, 2014. Short term trash reduction compliance has been obtained as described in the *City's Fiscal Year 2013/14 Annual Report*.
- Reduce trash discharges from 2009 levels to receiving water bodies in accordance with the following schedule:
 - Non-Mandatory 60% reduction in 2009 baseline trash discharges by July 1, 2016.
 - 70% by July 1, 2017
 - 80% by July 1, 2019
 - 100% by July 1, 2022

The Municipal Permit was reissued to the City and other Permittees on November 19, 2015. Based on the information available in the newly issued permit, the City is required to demonstrate a 60% reduction in the trash load discharged via their MS4 by July 1, 2016, 70% by July 1, 2017 and 80% by July 1, 2019. Additionally, it is anticipated that the City (and other Permittees) will be responsible for demonstrating that it has reduced trash to a level of "no adverse impacts" to receiving water bodies by July 1, 2022.

This Citywide Trash Capture Feasibility Study is designed to guide compliance with the forthcoming 70% trash reduction goal by analyzing installing trash capture at 27 locations. The Study includes a schedule for implementation, a description of proposed control measures and proposed best management practices (BMPs). This Study supplements the *Long-Term Trash*

Load Reduction Plan and Assessment Strategy developed by the City and Chapter 7 of City's Storm Drain Master Plan (2016) that discusses trash capture devices. This Citywide Trash Capture Feasibility Study is intended to provide detailed guidance on how the reduction goals will be obtained through the installation of full trash capture devices, and provides an analysis of costs and benefits associated with different full capture treatment scenarios. The Study provides the City with a 'road map' to follow between now and roughly 2022 to meet the ultimate goal of 100% reduction by 2022 set forth in the 2015 Municipal Permit 2.0.

All trash reduction benefits and costs are based on the best information available at the time the Study was conducted. Additionally, trash reduction estimates are consistent with the City's current understanding of the trash load reduction accounting method acceptable to Water Board staff. If the trash accounting method should be modified in the future, the assumptions used in the Study to determine the estimated trash reduction percentages for each control measure should be revisited and revised accordingly.

2. Trash Generation and Existing Management Activities

2.1 Trash Generation

The City of South San Francisco, with assistance from the Bay Area Stormwater Management Agencies Association (BASMAA) and the San Mateo Countywide Water Pollution Prevention Program (SMCWPPP), developed estimates of trash generation for all land within the City limits. Trash generation for land areas within the City are illustrated on the City’s trash generation map, which is included in its *Long-Term Trash Load Reduction Plan and Assessment Strategy*. The process used to develop trash generation rates and maps is explained in detail in the City’s *Long-Term Trash Load Reduction Plan and Assessment Strategy*, and summarized herein.

Trash generation rates for Bay Area cities and counties were developed as part of a regional trash generation study managed by BASMAA. The final technical report that includes the results and methods used to develop the rates are described in the *San Francisco Bay Area Stormwater Trash Generation Rates* technical report (May 2014). Rates developed by BASMAA are summarized in Table 1 and based on a combination of land use and income, which were shown to correlate with trash generation levels.

Table 1: San Francisco Bay Area Stormwater Trash Generation Rates by Land Use

Land Use	Rate (gallons/acre/year)
Commercial & Services	6.2
Industrial	8.4
Residential	0.5-87.1 ^a
Retail	1.8-150.0 ^a
K-12 Schools	6.2
Urban Parks	5.0

^a Provided as a range, which takes into account the correlation between rates and income.

Trash generation rates were grouped into four categories (very high, high, moderate and low). MRP 2.0 moved away from assigning a volume to each trash category, and instead uses ‘weighted acres’, where Low trash generating areas are effectively zero weighted acres, a Moderate rate is assigned a value of one, High is four times this amount, and Very High is twelve times this amount (Table 2).

Table 2: Trash Generation Categories, Rates and Associated Map Colors

Trash Generation Category	Rate (weighted acres/acre/year)	Map Color
Very High	12	Pink
High	4	Red
Moderate	1	Yellow
Low	0	Green

With the assistance of SMCWPPP, each land area within the City limits was assigned to a trash generation category (very high, high, moderate or low) based on trash generation rates developed by BASMAA. Trash generation categories assigned were then verified by City staff based on visual assessments of trash levels in public right-of-ways. The result was a trash generation map (Figure 1) depicting the levels of trash for land areas within the City.

2.2 Trash Management Areas

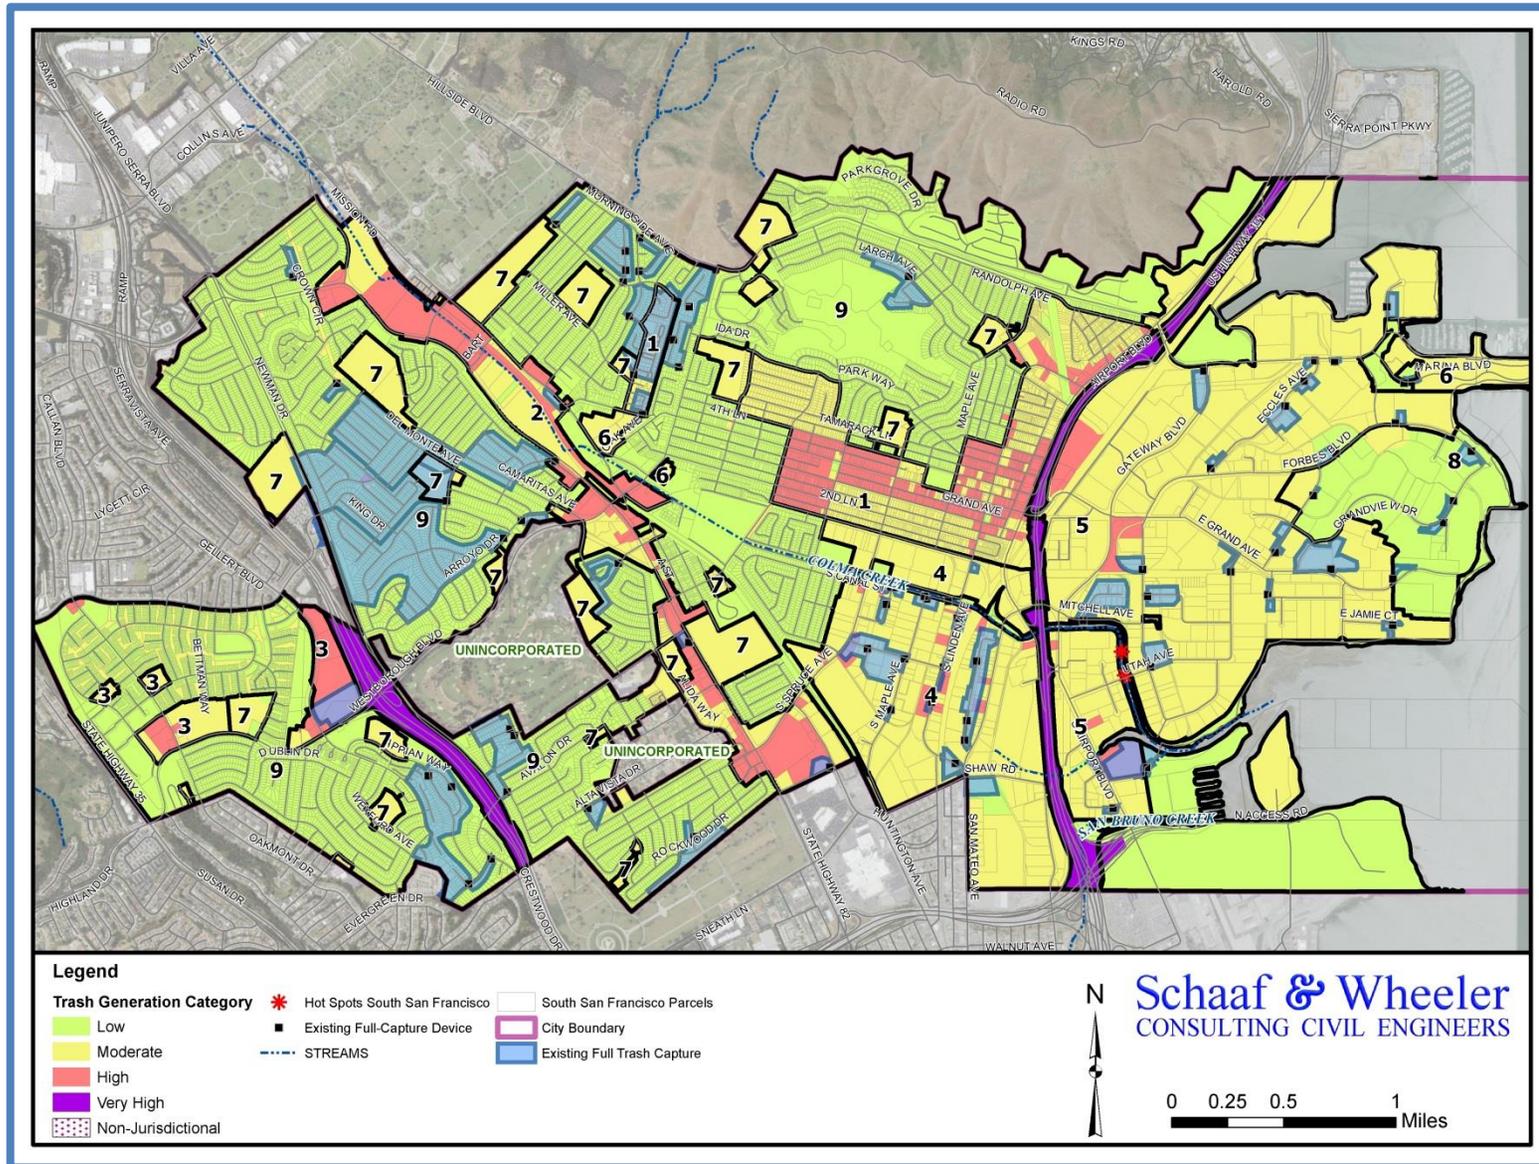

To divide the city into manageable units for tracking progress on trash reductions, the City delineated and prioritized trash management areas (TMAs) based on the geographical distribution of trash generating areas, types of trash sources, and current or planned control measure locations. The City used a hybrid approach to delineating TMAs that was based on drainage areas as well as land uses. The City’s TMAs are included in Figure 1. The land area (acres), associated trash condition categories, and estimated the percent of trash generated in each TMA are included in Table 3.

Table 3: City of South San Francisco Trash Management Areas (TMAs) by Trash Generation Category

Trash Management Area	Jurisdictional Land Area (Acres)	TMA Land Area by Category			
		Low	Moderate	High	Very High
1	345	3%	63%	34%	0%
2	235	1%	46%	53%	0%
3	73	0%	41%	59%	0%
4	440	3%	94%	4%	0%
5	1,037	1%	96%	3%	0%
6	47	5%	95%	0%	0%
7	254	1%	99%	0%	0%
8	199	1%	100%	0%	0%
9	2,753	98%	2%	0%	0%
Total	5,383	51%	43%	6%	0%

Figure 1: City of South San Francisco Trash Generation Area Map

2.3 Current Trash Management Actions and Reduction Benefit

The City is tasked with removing trash before it can make its way to creeks and ultimately to the San Francisco Bay from the City's MS4. The trash management actions currently implemented and planned by the City along with the methods used by the City to assess progress towards trash reduction goals outlined in the Municipal Permit is described in their *Long-Term Trash Load Reduction Plan and Assessment Strategy*. Additionally, trash load reductions observed to-date are described in the City's *Fiscal Year 2014-2015 Annual Stormwater Compliance Report*.

2.3.1 Current Trash Management

The City has implemented a number of new and enhanced trash management actions towards achieving trash load reductions. These actions include the adoption of ordinances that prohibit the distribution of commonly littered items (i.e., single-use plastic bags), the installation and maintenance of trash full capture inlet filter devices that intercept trash in the MS4, and the implementation of other enhanced trash controls. Estimated trash reduction percentages for actions reported in the City's *Fiscal Year 2014-15 Annual Municipal Stormwater Compliance Report* are listed in Table 4, along with current trash reduction percentages based changes arising from MRP2.0 (2015). Single-use plastic bag and polystyrene foam food ware ordinances were estimated to reduce trash by roughly 6% and 4%, respectively. The estimated load reduction attributable to ordinances is based on studies conducted in the City of San Jose and Palo Alto which are applicable to the City of South San Francisco.

In addition to ordinances, 76 inlet filter full capture device were installed by the City that captured trash from 460 acres. These inlet filter devices are estimated to remove an additional 5.5% of trash generated in the City as calculated by SMCWPPP (EOA, Inc.). This calculated trash load reduction is based on weighted acres in Table 2 and delineations of treatment/catchment areas for each trash capture devices. Figure 1 illustrates the land areas treated by existing devices.

The City has also implemented a number of other types of enhanced actions to control trash, including anti-littering and illegal dumping improved trash bin/container management actions, enhanced on-land trash cleanups, enhanced street sweeping, enforcement actions, enhanced inspections of businesses, and public education and outreach programs. Trash reduction benefits associated with these actions were observed via on-land visual trash assessments (VTAs) conducted by SMCWPPP on behalf of the City. These actions have resulted in an estimated 25% reduction in trash. As areas are treated with full capture, there is no longer a need to verify trash reductions via visual trash assessments (VTAs). However, the City will then lose the *partial* trash reduction credits from Other Management Actions in these areas in favor of the *full* trash reduction credits in the full capture treatment area. Therefore, the 25% reduction from Other Management Actions will be significantly reduced if the large full capture devices identified in this Study are installed.

Lastly, the City conducted creek/shoreline clean-ups above and beyond cleanups required by the Municipal Permit in collaboration with local schools. An estimated 1% reduction in trash was claimed by the City for these efforts. The reductions from these clean-ups follow a new formula

specified in MRP 2.0, and the City may take up to 10% credit per year depending on the quantity of trash cleaned up each year.

Table 4: Implemented Enhanced Trash Control Measures

Trash Control Measure	Fiscal Year 2014-2015 Reported Estimated % Reduction	Current Estimated % Reduction
Single-Use Carryout Plastic Bag Ordinance	7%	6%
Polystyrene Foam Food Service Ware ban	5%	4%
Public Education and Outreach	1%	1%
Full-Capture Treatment Systems	5%	5%
Other Management Actions ¹	25%	25%
Creek/Channel/Shoreline Cleanups ²	1%	1%
Total	44%	42%

1. This will vary each depending on the results on the on-land visual trash assessments, and will decrease as new full capture devices are installed

2. This reduction will vary every year depending on the quantity of trash cleaned up.

Based on the information included in the City’s Fiscal FY 14-15 Annual Stormwater Compliance Report updated by current estimated reduction, the City must reduce an additional 28% of the trash illustrated in their trash generation map in order to reach the 70% reduction goal by July 1, 2017, and 58% to reach the long-term goal of 100% reduction.

2.3.2 Existing Full Capture Devices

Trash full capture devices installed by the City to-date are included in Table 5 totaling 5% trash capture. The estimate trash capture percentages are based on the generation rates developed by the City for each parcel as depicted in the City’s trash generation map (Figure 1). These devices are listed in Table 5.

In addition to the devices listed in Table 5, the City also inspects devices located on private property. These devices have been installed on private property as part of redevelopment requirements associated with stormwater management (i.e., provision C.3). In order to claim credits for these private devices, the City will need to delineate catchments to the devices and review the device to ensure it meets the new permit requirements for full trash capture (1-year, 1-hour storm event and 5 mm screening). In general, most of these devices are only treating on-site runoff from an individual parcel. A list of these devices is included in Appendix F.

2.3.3 Tech Campuses and New Development

The City requires private developments to install water quality treatment measures to meet section C.3 of the MRP. These devices also may meet the definition of full trash capture devices. These devices include bio-retention facilities and other low impact development (LID) controls.

The Genetech Campus and other new developments such as the Cove Campus are required to meet to meet the requirements of the MRP section C.3. It is the responsibility of the City to determine whether C.3 treatment devices meet the requirement of full trash capture. In 2016, EOA updated the City’s trash generation map to show the Genetec campus in Green, or low

generating area. Due to this change in generation for a newer development, proposed devices studied in this report that treat these campuses are given a lower priority.

Table 5: Existing Trash Full Capture Devices on Public Property

3. Trash Capture Plan

3.1 Capital Improvement Projects

In order to achieve the 70% trash reduction goal by July 1, 2017, the City is considering the installation of additional trash full capture devices. Twenty-seven device locations were analyzed based on their proximity to stormwater outfalls to Colma Creek and San Francisco Bay, see Table 6.

There are a variety of devices available to meet the full capture trash reduction goal, including:

- Catch basin inlet filters/screens
- End-of-pipe netting or structures before the pump station serving the entire drainage network
- Netting or structures on a storm drain trunk line

When selecting a device it is important to consider the drainage area, hydraulic losses across the system when full, permitting requirements in open channels, device maintenance and access, property rights and utility clearance. All of these factors should be weighed against the device, installation and maintenance costs to ensure maximum capture volume per dollar spent.

It is important to recognize that some of the City of South San Francisco drains directly to Colma Creek and San Francisco Bay, without first entering the MS4. This includes mainly the properties along the creek corridor with private outfalls and industrial properties along the Bay that directly discharge into the Bay. These areas are not included in the City's SDMP and without detailed information regarding the private onsite drainage systems of these properties; it is not possible to quantify this area.

3.1.1 Device Locations

In order to meet the 70% reduction goal, this study analyzed the installation of large scale devices to intercept trash from the relatively high trash generation areas draining to outfalls. Large scale devices were proposed over small inlet devices as they provide a centralized location for construction, maintenance and cleaning. Hydrodynamic devices located upstream of the system outfalls were focused on as they require only a vacuum truck for maintenance and avoid most environmental permitting concerns.

Table 6 provides the details of the potential large scale devices which were studied. These devices will capture the trash flowing through the existing pipe network from the dense commercial, industrial and retail areas before it is conveyed to Colma Creek or San Francisco Bay. See Figure 2 for a map of the potential large scale device capture areas. It should be noted that El Camino Real and Highway 101 corridors are not within the jurisdiction of the City. At this time, it is recommended that the City wait until Caltrans decides how they will treat the El Camino Real and Highway 101 right of way so that duplicate devices are not installed.

The options include installing one or more large devices at up to twenty-seven locations. Of these locations, four are located at pump stations that need improvements (Linden, San Mateo, Shaw, and Beijing). For these locations, it is recommended that trash capture device installation is included with the pump station improvements.

Table 6: Potential Large Trash Full Capture Devices and Estimated Trash Reduction

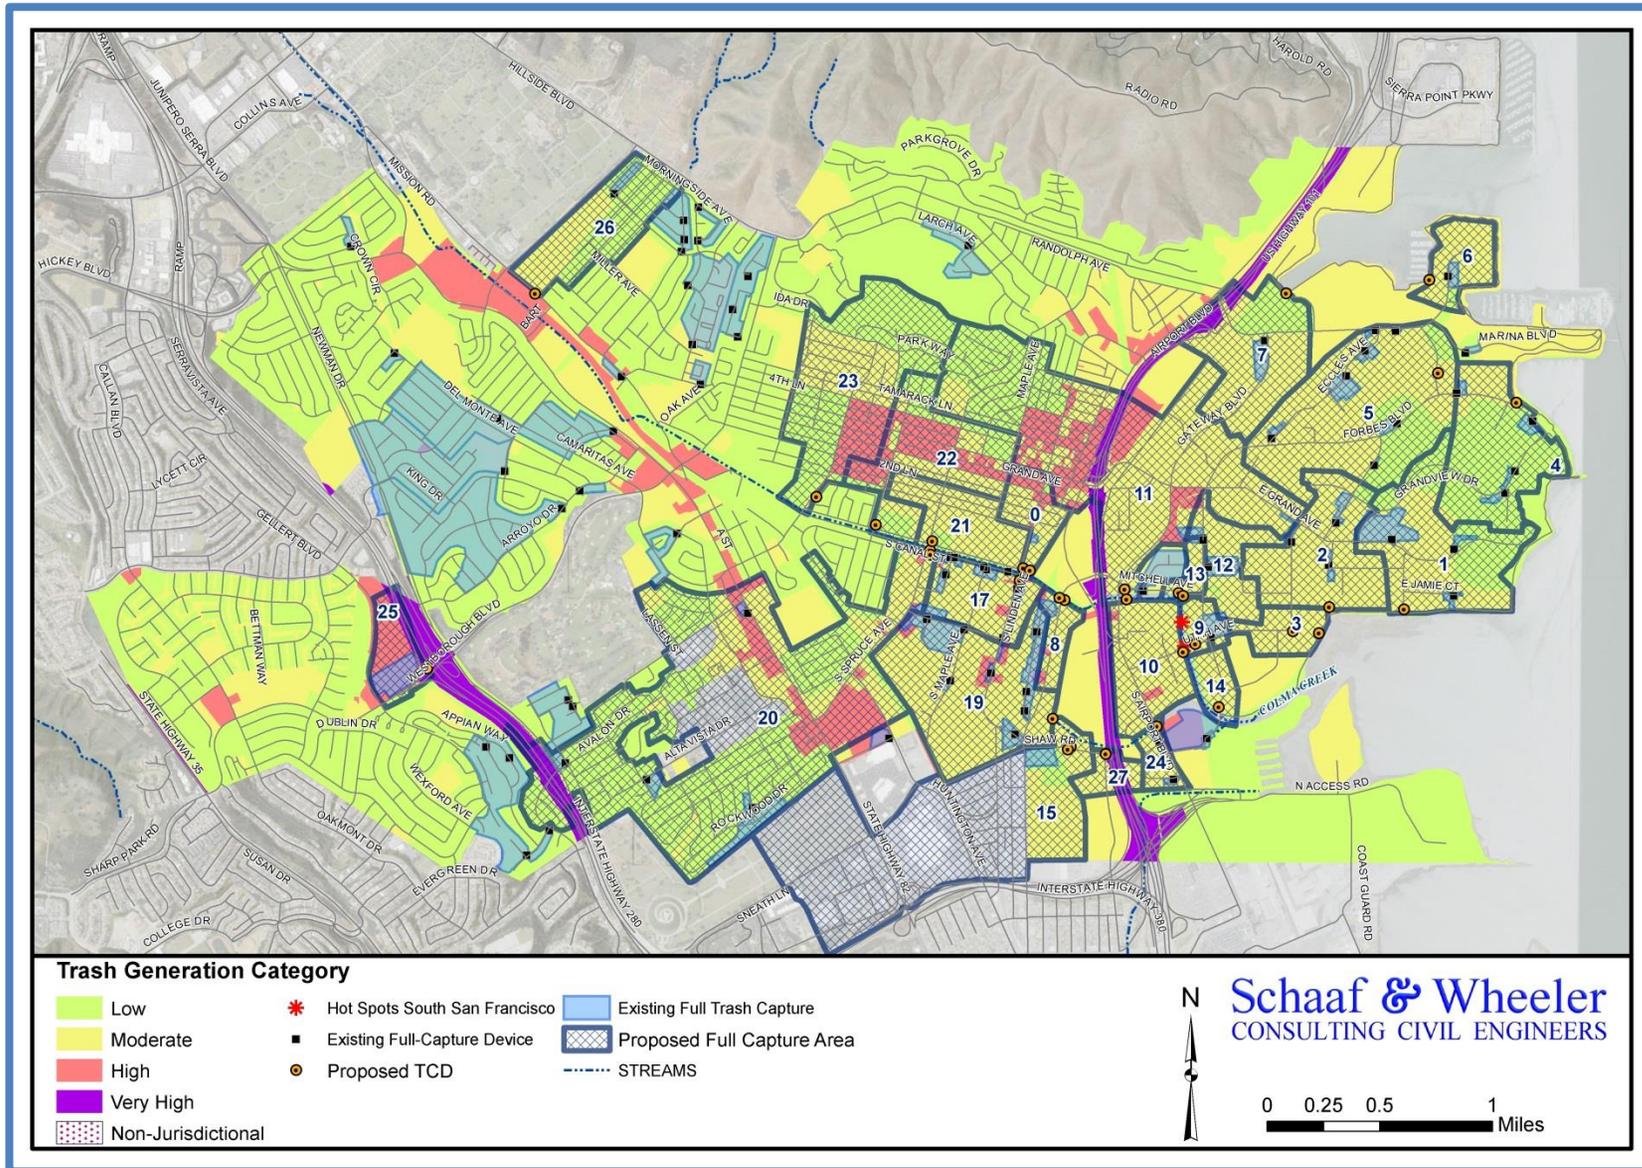

Proposed Large Full Capture Device ID	Name	Drainage Area Treated within City Jurisdiction (acres) ¹	% of Area Comprised of High or Moderate Generation Rates	% Trash Load Reduction	Existing Inlet Filters within Treatment Area	% Existing Capture ²

¹ Notes, as full captures areas are installed and overlap visual assessment sites, then those assessment sites are removed from the calculations and the "Reductions from other Control Measures" value decreases

²This is percentage of trash reduction that is currently provided by existing inlet filters

Figure 2: Potential Large Full Capture Device Treatment Areas

3.1.2 Existing Inlet Filter Devices

The City currently has 76 known public inlet filters that treat 460 acres, of which 18 acres are within the high trash generation land category. These inlets are depicted on Figure 2 as Existing Full-Capture Devices. Approximately 45 of these inlet filters treat areas overlapping with the proposed large scale devices. It is recommended that the City remove inlet filters when large-scale devices are installed and move those devices to areas that cannot be treated by large-scale devices.

3.1.3 System Hydraulics

Due to potential flooding as indicated in the City's Storm Drain Master Plan (SDMP), it is imperative that the installation of the new trash capture devices consider the potential loss in head across the structure when full or partially full with trash. It may be necessary to install the large scale devices off-line from the main trunk with a diversion structure to re-direct the treatment flow rate. This also has the advantage of optimizing the treatment devices since they will not need to have the overflow capacity equal to the capacity of the existing storm drain line. However, due to space requirements, there is the potential for utility conflicts with an offline installation. It is important to understand the existing utilities and right-of-way restrictions when deciding on a device installation location. Known utilities are depicted in Appendix D based on drawings provided by the City. These utilities should be field verified prior to design.

Catch basin inlet filters capture trash before it enters the City system thereby not significantly impacting the hydraulics of the system as a whole. However, localized ponding can occur at individual inlets during rain events if the inserts are not routinely maintained and the device does not have an adequate overflow. All capture devices must be cleaned and maintained at least two times a year based on manufacturer's recommendations and frequency of storm events.

3.1.4 Device Sizing Calculations

The Regional Water Quality Control Board has produced a list of approved full trash capture devices (updated May 2014, included as appendix E) which may be used to comply with the NPDES permit. Full trash capture devices must trap all particles retained by a 5 mm mesh screen and have a design treatment capacity of not less than the peak flow rate resulting from a one-year, one-hour storm event per the MRP Section C.10.a.iii. The Regional Water Quality Control Board has been utilizing a storm intensity of 0.5 inches per hour for smaller drainage basins and 0.2 inches per hour for larger basins where there are tailwater and flooding constraints to determine the treatment rate. A storm intensity of 0.2 inches per hour will be utilized in this study as approved by the Regional Water Quality Control Board for devices treating large drainage areas (approximately greater than 50 acres). For smaller drainage basins, the 1-year 1-hour storm event was used for treatment device sizing based on the National Oceanic and Atmospheric Administration (NOAA) estimate of 0.44 in/hr.

Rational method runoff calculations were based off the Alameda County Drainage Manual to be consistent with the City's SDMP. Catchments were delineated to each of the proposed treatment device locations based on the storm drain pipe network provided by the City in GIS. It should

be noted that the catchments to the treatment devices do not always match those delineated in the SDMP because the scale that was used for catchment delineation in the SDMP was larger and followed different criteria.

3.2 Cost Estimates

The following assumptions were made in determining construction costs for each proposed device:

- For large scale full capture devices, the device cost would be approximately \$2,500 for each cubic feet per second treated for hydrodynamic separators (HDS) or nutrient separating baffle boxes (NSBB) based on an average of device-only costs for large devices (treatment rates greater than 20 cfs) provided by KriStar (Old Castle), BioClean Environmental and Contech;
- Installation costs for full-scale devices are assumed to be 2 times the cost of the device plus any diversion structures;
- The devices are located in areas which do not require major utility relocation, property or easement acquisition or environmental permitting;
- The 50% contingency includes 20% design costs and administration and 30% construction contingencies;
- Large scale devices were assumed to have a lifetime of 50-years;
- Estimates include an inflation rate of 2.54% and a discount rate of 6.25%;
- Total Base Cost is presented in the construction year dollars and includes installation, diversion structure and the device. It does not include maintenance or device replacement.

For cleaning, replacement and maintenance, the following assumptions were made:

- Large scale HDS or NSBB devices are cleaned twice a year, requiring 4 hours of a team of two staff members at \$73/hour, a vacuum truck at \$250/hour, a utility truck at \$16/hour and a small pump costing \$44/hour;
- Inlet filters are cleaned four times a year, requiring 30 minutes of a team of two maintenance workers at \$73/hour and vacuum truck at \$250/hour;

Costs have been included in the selection matrix in Section 3.3. For more detailed costs estimates refer to Appendix B.

3.3 Full Capture Scenario Matrix.

¹Based on Recommended Improvements upstream of proposed Trash Capture Device

²Private drainage needs as-builts and should be coordinated with pump station improvements

³Pump station improvements may change drainage and trash capture should be incorporated into pump station improvement

4. Conclusion

4.1 Prioritization

Proposed devices were prioritized based on the cost per trash reduction, property acquisition, overall trash reduction and other factors such as anticipated pump station improvements and capital projects. Some devices were found to treat large areas such as the Spruce South (TCD 6), but have upcoming capital improvement projects (CIPs) that should be designed to incorporate trash capture. Proposed devices such as TCD 6 were moved further down in the schedule to ensure that they are not designed prior to the CIP in that area.

The City may elect to change the prioritization based on additional information, needs, costs, etc. Ultimately, an additional 28% of trash capture should be achieved by 2017 to meet the requirements of MRP 2.0.

4.2 Trash Capture Plan

We recommend that the following devices in Table 7 be considered for installation based on the information contained within this study, site visits, and meetings with City staff. The first five devices would enable the City to reach the 70% goal by 2017, the next two devices will allow the City to reach the 80% goal by 2019 and the following twelve will achieve the 100% goal by 2022. There are eight devices that are not recommended due to the low percentage reduction and/or high cost per percent reduction. However, these devices may be considered as alternatives if the top recommended devices are deemed infeasible during design.

Detailed cost estimates are contained in Appendix B and conceptual site layouts have been provided in Appendix D to accompany each device.

Table 7: Prioritized Devices

Priority	Large Full Capture Off-Line HDS Device	Drainage Area Treated within City Jurisdiction (acres)	Estimated % New Trash Reduction ¹	Cost per % Trash Reduced (millions)	Total Capital Cost with 50% Contingency
1	TCD11 So. Airport	328.7	11.31%	\$5.5	\$812,070

Overall Total		2,223	59%	\$17.2	\$8.4M

4.2 Next Steps

The City has reduced an estimated 42% of their trash available to their MS4 by installing and maintaining trash full capture devices and implementing other control measures. An additional 28% of the trash illustrated in their trash generation map must be reduced to reach the 70% reduction goal and 58% to meet the 100% reduction goal. An estimated additional 58.6% may be managed using the treatment devices prescribed in Table 7; this exceeds the 70% reduction mandate set for July 1, 2017, as well as the 80% reduction goal set for July 1, 2019 (2015 MRP) and the July 1, 2022 100% reduction mandate.

In order to meet the 2017 deadline, the City needs to identify a source of funding for the design and construction of these large scale devices. Table 7 indicates about \$2.6 million is required in capital costs to meet the 2017 deadline. It is estimated that design and construction can take about ten months for each device assuming no environmental permitting or property acquisition is required.

Appendix E: RWQCB Approved Device List

Trash Capture Devices approved by San Francisco Bay Regional Water Quality Control Board staff

May 2014

Devices on this list – catch basin inserts (connector pipe screens and media filters) and high-flow capacity devices (hydrodynamic separators and trash nets) have been approved by Water Board staff as providing full trash capture in compliance with the Municipal Regional Stormwater NPDES Permit. Curb inlet screens may be used in combination with full capture devices, but alone they are not considered full-capture.

CATCH BASIN INSERTS (Full Capture)	
Vendor	Device Name
Advanced Solutions	Stormtek ST3
Advanced Solutions	Stormtek ST3-G
Best Management Products, Inc.	SNOUT Oil-Debris Separator (with Trash Screen)
Bio Clean Environmental Services, Inc.	Grate Inlet Skimmer Box (square design)
Bio Clean Environmental Services, Inc.	High Capacity Round Grate Inlet Skimmer Box
Bio Clean Environmental Services, Inc.	Round Connector Pipe Screen
Ecology Control Industries	Debris Dam
G2 Construction, Inc.	Collector Pipe Screen
G2 Construction, Inc.	Collector Pipe Screen Removable
Gentile Family Industries	Wavy Grate Trash Catcher
KriStar Enterprises, Inc.	Flo Gard Plus Catch Basin Filter Insert, combination inlet style – C3 (stainless steel)
KriStar Enterprises, Inc.	Flo Gard Plus Catch Basin Filter Inserts, flat grated inlet style, rectangular or round – C3 (stainless steel)
KriStar Enterprises, Inc.	FloGard Catch Basin Outlet Screen Insert
Revel Environmental Manufacturing, Inc. (REM)	Triton Bioflex Drop Inlet Trash Guard
United Stormwater, Inc.	Connector Pipe Screen
United Stormwater, Inc.	DrainPac – Drop Inlet
Xeripave, LLC	Storm Grate Baskets with screened 10” sidewall

**CURB INLET SCREENS – FOR USE IN COMBINATION WITH INSERTS
(Partial Capture)**

Vendor	Device Name
Ecology Control Industries	Surfgate
G2 Construction, Inc.	CamLock Debris Gate
G2 Construction, Inc.	FS 10
G2 Construction, Inc.	CamLock 2012 Automatic Retractable Screen
Gentile Family Industries	ARS – automatic retractable screen
KriStar Enterprises, Inc.	Trash and Debris Guard
United Stormwater, Inc.	Clean Screen III -ARS
United Stormwater, Inc.	Manual Retractable Screen -MRS
United Stormwater, Inc.	DrainPac – Curb Inlet
Bio Clean Environmental Services, Inc.	Curb Guard
Storm Water Systems	Vanguard Automatic Retractable Screen

HIGH FLOW CAPACITY DEVICES (Full Capture)

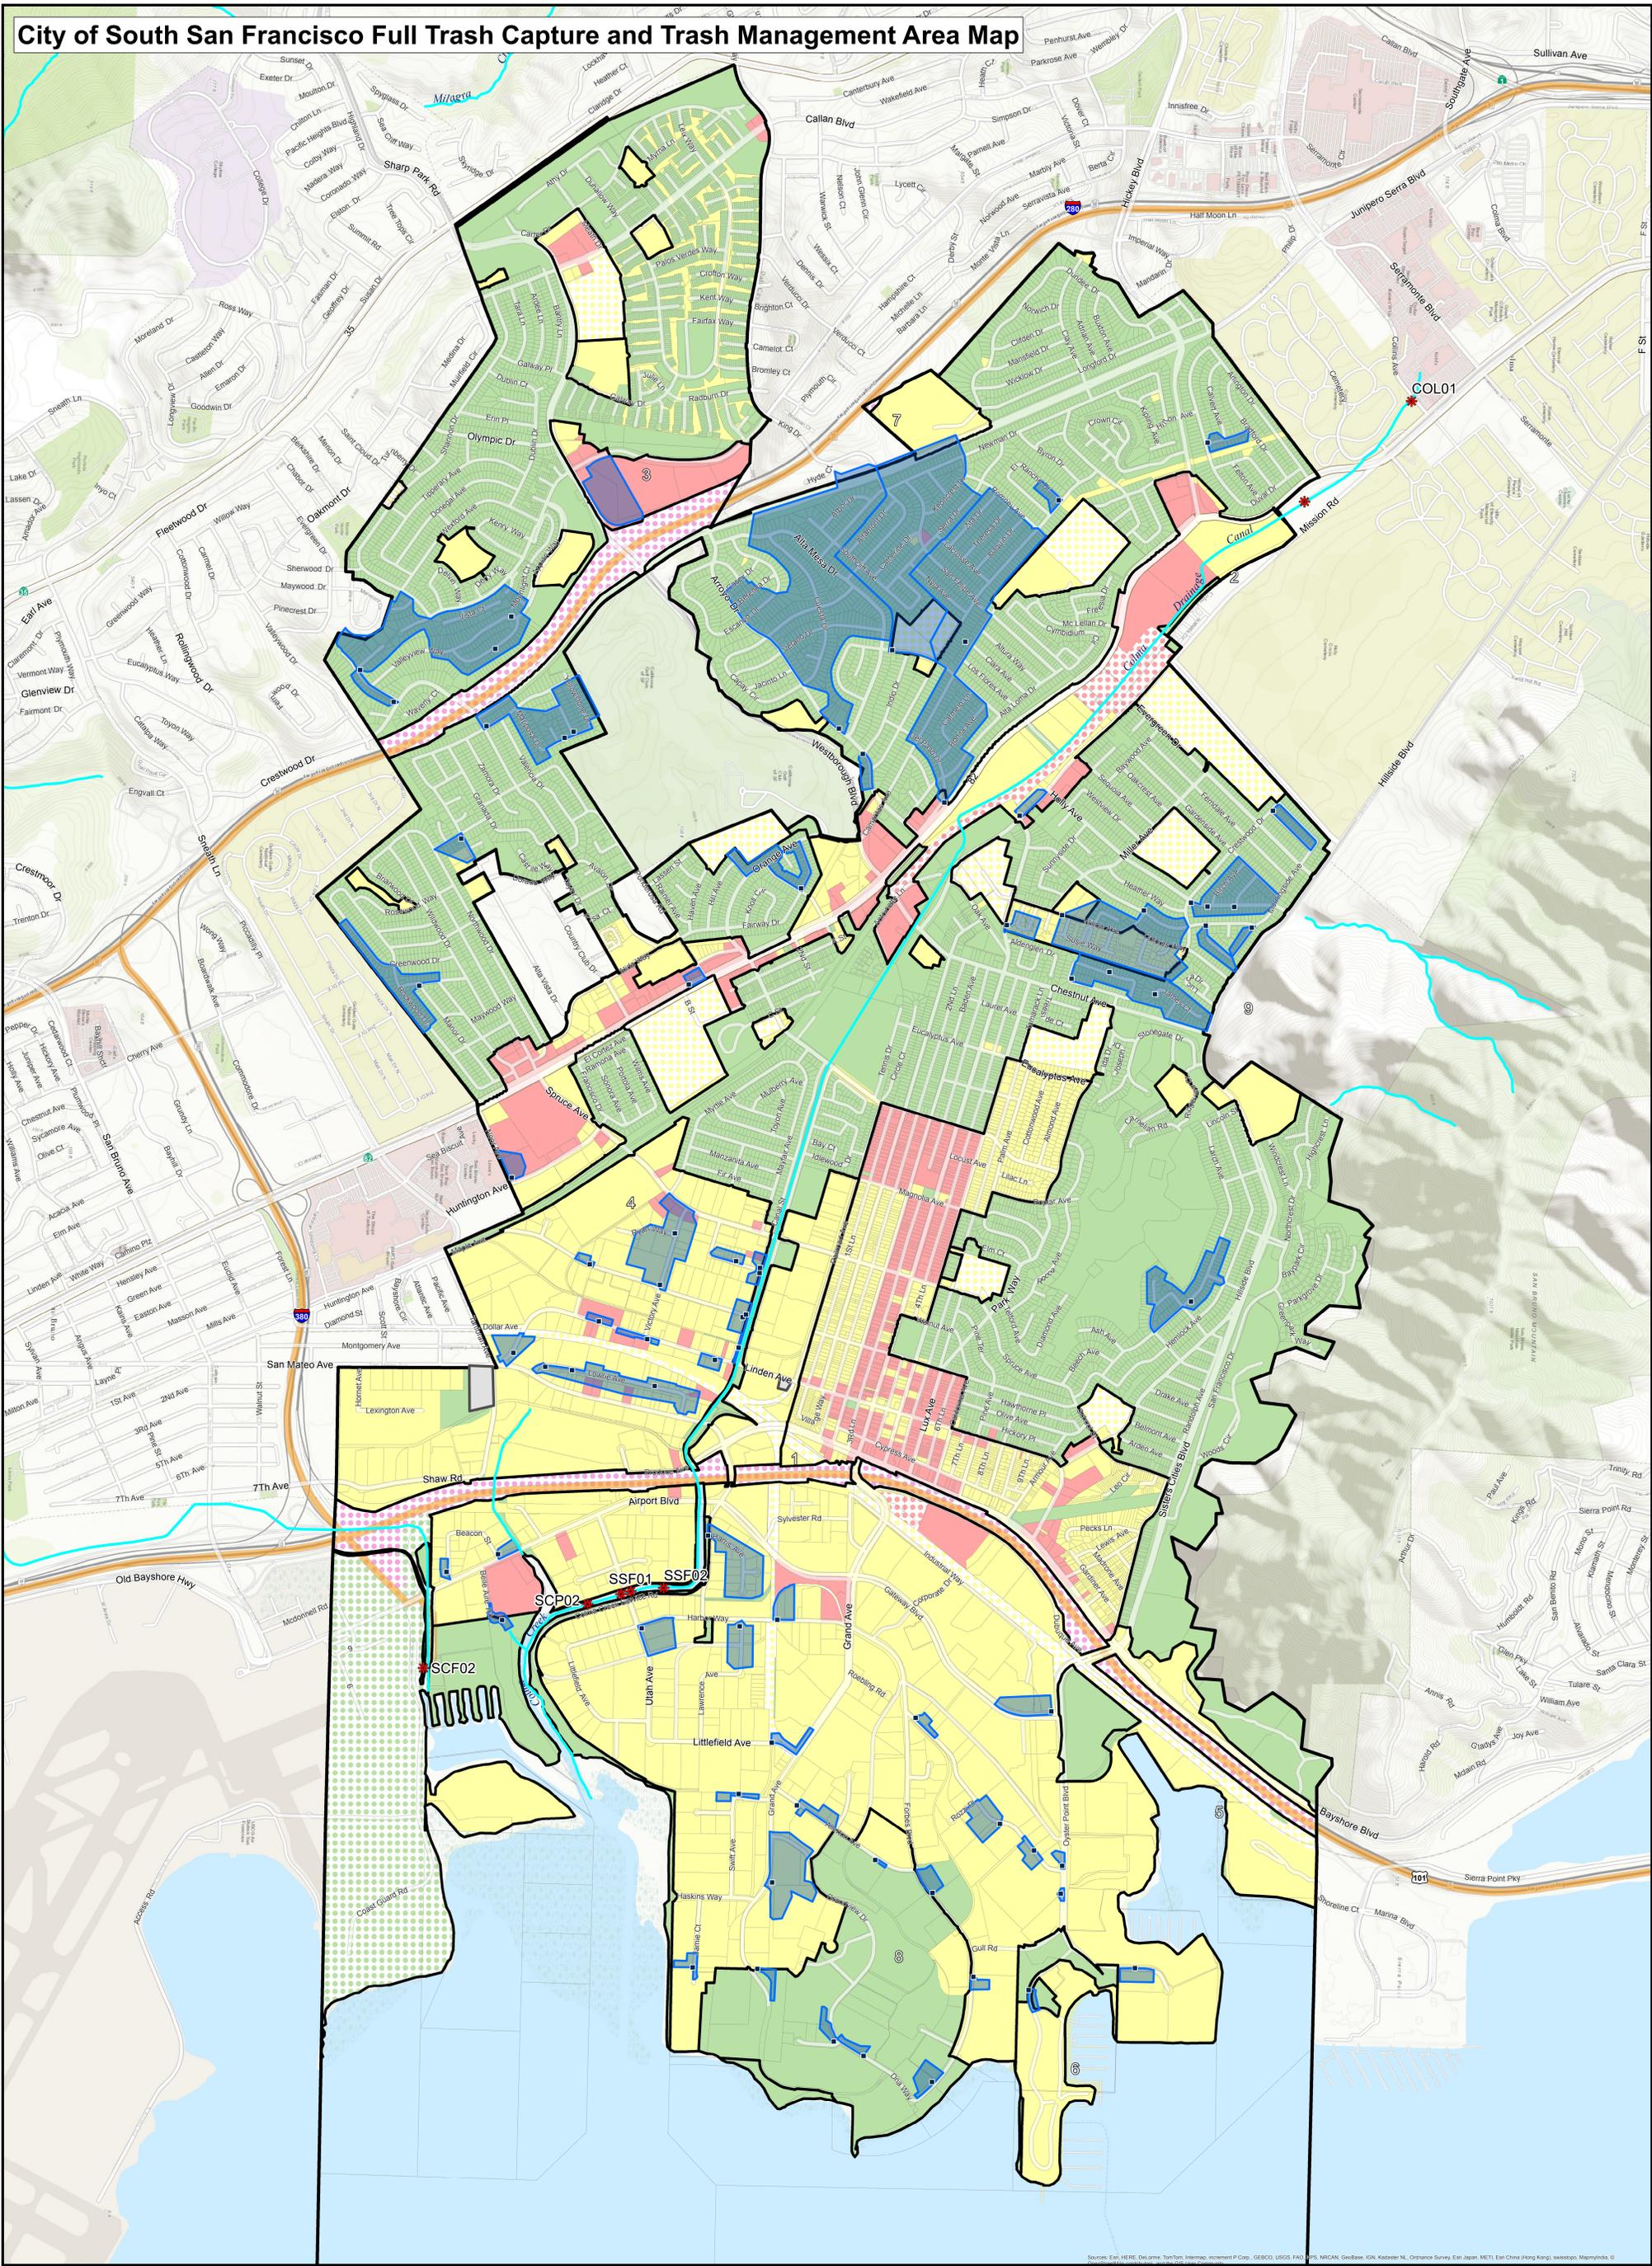

Vendor	Device Name
Bio Clean Environmental Services, Inc.	Nutrient Separating Baffle Box
Contech Construction Products	Continuous Deflective Separator (CDS)
Fresh Creek Technologies, Inc.	Inline Netting Trash Trap
Fresh Creek Technologies, Inc.	End of Pipe Netting Trash Trap
Fresh Creek Technologies, Inc.	Pump Guard
KriStar Enterprises, Inc.	CleansAll
KriStar Enterprises, Inc.	Downstream Defender
KriStar Enterprises, Inc.	FloGard Dual-Vortex Hydrodynamic Separator
KriStar Enterprises, Inc.	FloGard Perk Filter
KriStar Enterprises, Inc.	FloGard Swirl-Flo Screen Separator
KriStar Enterprises, Inc.	Nettech Gross Pollutant Trap - In Line
KriStar Enterprises, Inc.	Nettech Gross Pollutant Trap- End of Line
Roscoe Moss Company	Storm Flo Screen
Coanda Inc.	Coanda Screen and Debris Fence
