

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL COAST REGION
1102-A Laurel Lane
San Luis Obispo, California 93401

ORDER NO. 82-33

WASTE DISCHARGE REQUIREMENTS
FOR
NIPOMO COMMUNITY SERVICES DISTRICT
MONTECITO VERDE II
SAN LUIS OBISPO COUNTY

The California Regional Water Quality Control Board, Central Coast Region, (hereafter Board) finds that:

1. Nipomo Community Services District, (hereafter Discharger) submitted a Report of Waste Discharge dated January 8, 1982 on behalf of the Montecito Verde II subdivision (Tract 607 and 968), in Nipomo.
2. Montecito Verde II will consist of 32 single family homes in Section 20, T11M, R34N, SB B&M as shown on Attachment "A" included with this Order.
3. Domestic wastewater is to be collected in sewers, treated in septic tanks, and discharged to several dual leachfields as shown on Attachment "B" included with this Order. Each leachfield system is designed for waste-flows of between 1680 gallons per day (gpd) and 3780 gpd. The total maximum daily flow is 13,440 gpd (51 m³/day).
4. Depth to usable groundwater in the area is approximately 200 feet. The nearest well is approximately 100 feet south of Tract 607, but is inactive.
5. The Board adopted a Water Quality Control Plan for the Central Coastal Basin (Basin Plan), On March 14, 1975.
6. Present and anticipated beneficial uses of groundwaters recharged by the discharge include:
 - a. Domestic Supply, and
 - b. Agricultural Supply.
7. Water quality management principals established in the Board's Basin Plan state, in part, that the number of waste sources and independent treatment facilities shall be minimized.
8. The Nipomo Community Services District (hereafter District or discharger), will be responsible for the operation and maintenance of the wastewater collection, treatment and disposal system. The District also provides potable water to this area.

Item No. 24, Attachment 1
February 6, 2004 Meeting
Montecito Verde II

9. On November 21, 1979, the District adopted an interim policy (Resolution No. 161) for the maintenance of septic tanks until a final sewerage plan is adopted.
10. This discharge was previously subject to Waste Discharge Requirements issued to the Nipomo Community Services District, Tract 607 Subdivision, San Luis Obispo County, adopted April 11, 1980.
11. This Board notified the Discharger and interested agencies of its intent to prescribe waste discharge requirements for the discharge. The Board has provided them with an opportunity for a public hearing and an opportunity to submit their written views and recommendations.
12. The Board, in a public meeting on January 15, 1982, heard and considered all comments pertaining to the discharge.

IT IS HEREBY ORDERED, that the Nipomo Community Services District, its agents, successors, and assigns, shall comply with the following at Tract 607 Subdivision:

A. Discharge Prohibitions

1. Overflow or bypass of wastewater to surface waters or drainageways is prohibited.

B. Discharge Specifications

1. Maximum daily wastewater volume discharged shall not exceed 13,440 gallons (51 m³).
2. Discharge shall be confined underground within the designated leachfield disposal areas without overflow or bypass to adjacent properties or drainageways.
3. Solids accumulation in the septic tanks shall not exceed seventy-five (75) percent of the usable solids storage volume of the septic tanks.
4. Disposal areas shall be located at least 100 feet from any water well and 50 feet from the southern property boundary.
5. The public shall not have contact with wastewater after discharge to this septic system.
6. Stormwater shall not be permitted to pond within the designated discharge area.

7. Collected screening, sludges, and other solids removed from liquid wastes shall be disposed of in an approved septage disposal area or as approved by the Executive Officer.
8. Neither the treatment nor the discharge shall cause a nuisance as defined in Section 13050(m) of the California Water Code.
9. The discharge shall not cause a pollution as defined in Section 13050(1) of the California Water Code.

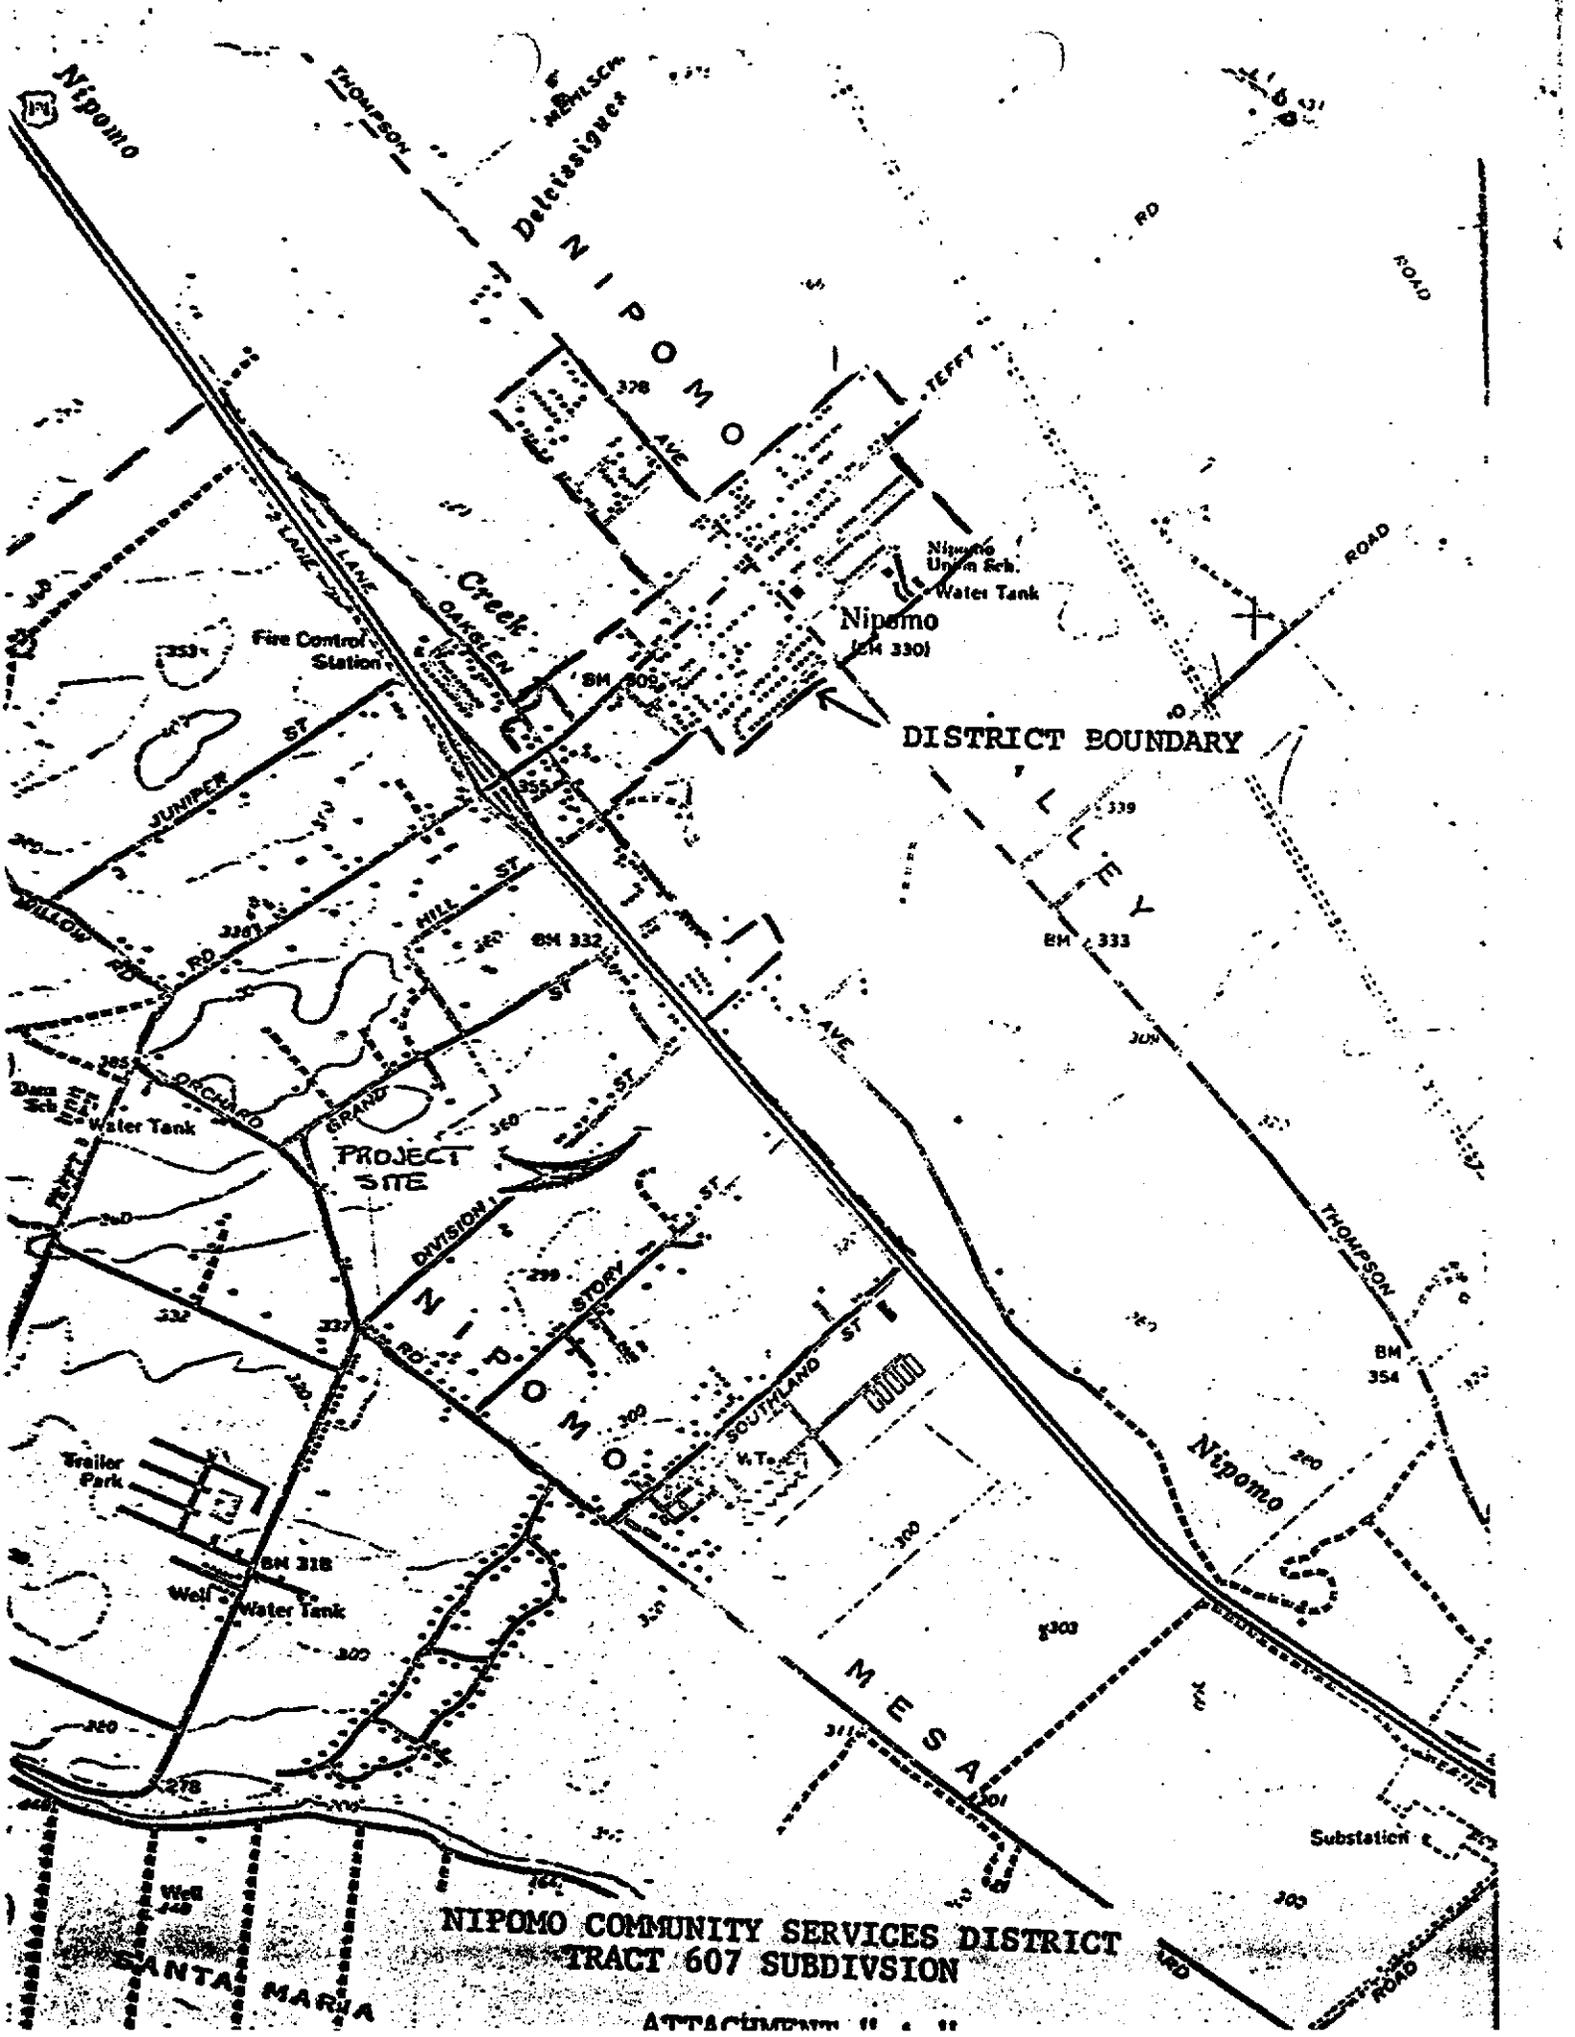

C. Provisions

1. The proposed collection, treatment and disposal system must be designed and constructed as a permanent system.
2. A determination of whether this discharge shall be prohibited when community-wide treatment and disposal facilities are made available shall be made at such time as the District system is constructed and water quality monitoring data can be reviewed for this project.
3. As built plans of Montecito Verde II Tract 607 and 968) and its immediate environs showing the disposal area(s), drainageways and wells shall be submitted to the Board prior to discharge.
4. The discharger shall comply with the "Monitoring and Reporting Program" specified by the Executive Officer.
5. The discharger shall comply with Items A.1. through A.9., B.1. through B.10., B.14. and B.15. of the attached "Standard Provisions".
6. All facilities used for the transport or treatment of waste shall be protected against overflow or flooding or washout occurring as a result of a 100-year frequency storm.
7. Dual leachfield systems, each capable of independently disposing of design flows, shall be maintained within land dedicated to wastewater disposal.
8. This Order does not alleviate the responsibility to obtain other necessary local, state, and federal permits to construct facilities necessary for compliance with this Order, nor does this Order prevent imposition of additional standards, requirements, or conditions by any other regulatory agency.

9. This Order supercedes and replaces Order No. 80-15, Waste Discharge Requirements for Nipomo Community Services District, Tract 607, San Luis Obispo, adopted by the Regional Board on April 11, 1980.

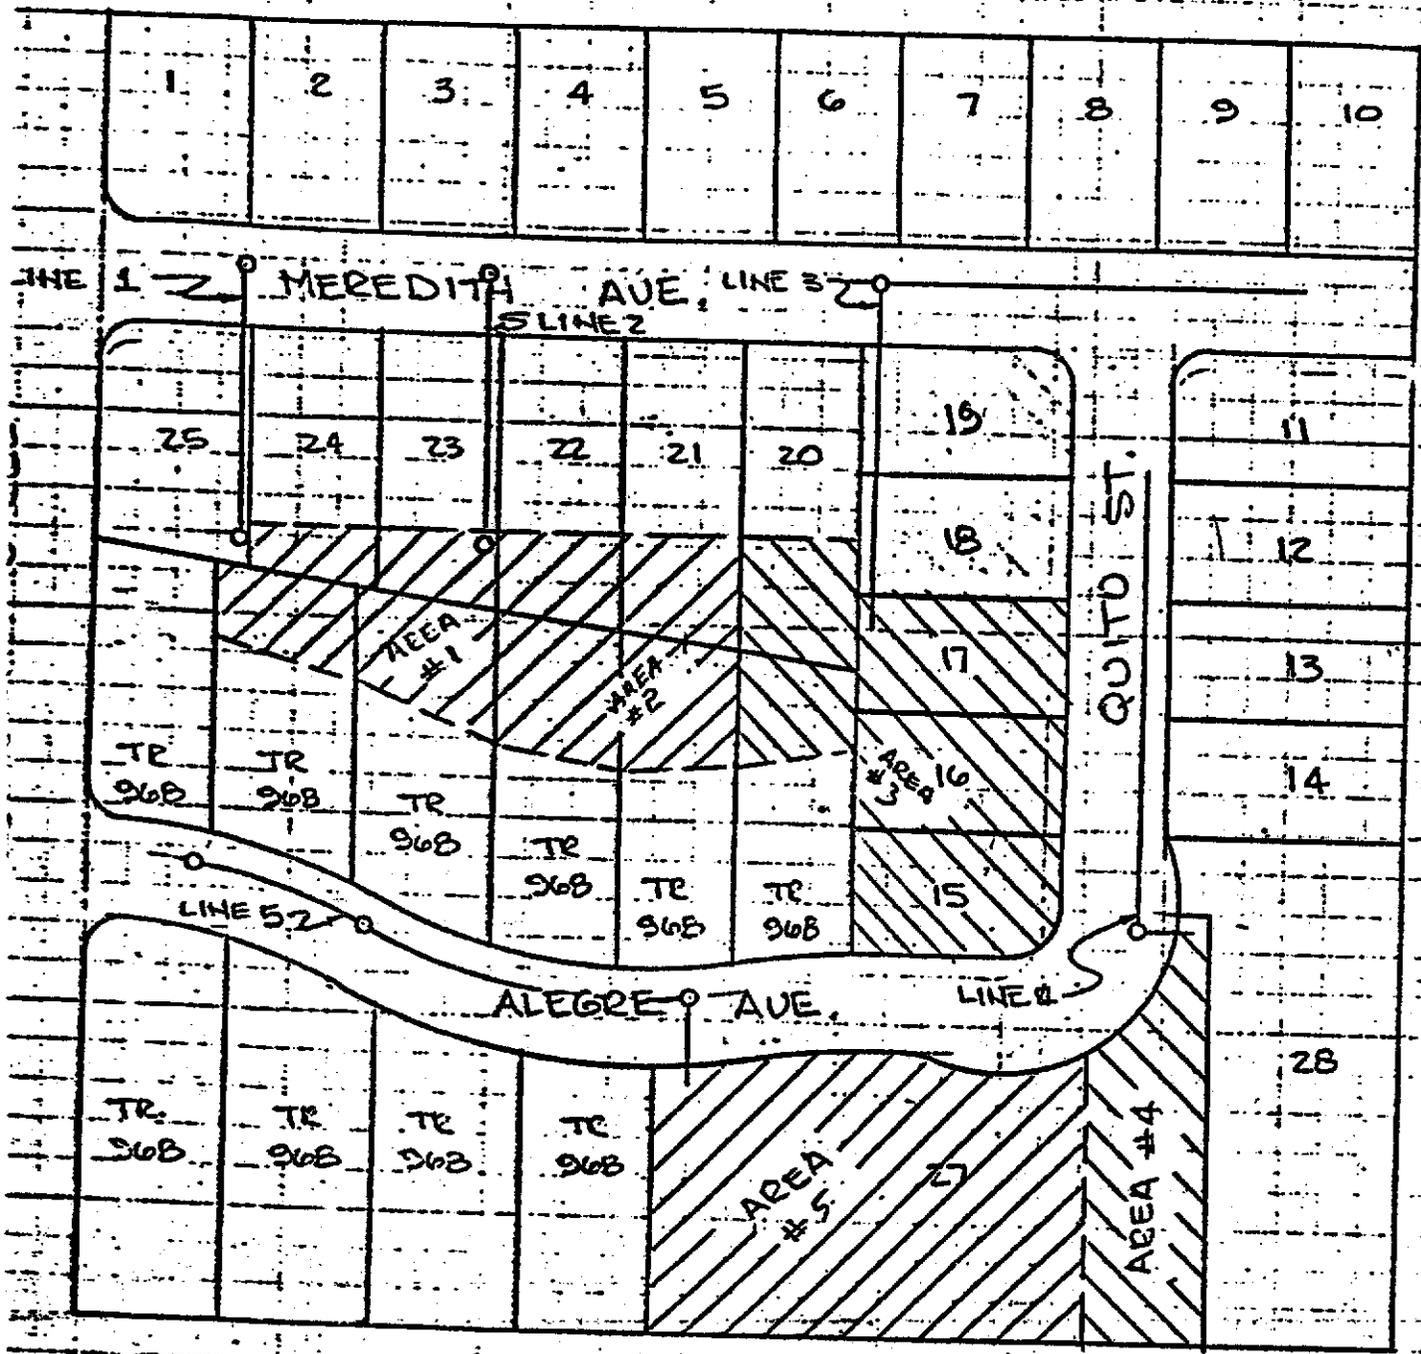

I, KENNETH R. JONES, Executive Officer, certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Central Coast Region, on January 15, 1982.

FIG. 9

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL COAST REGION

MONITORING AND REPORTING PROGRAM NO. 82-33
FOR
NIPOMO COMMUNITY SERVICES DISTRICT
MONTECITO VERDE II
SAN LUIS OBISPO COUNTY

Effluent Monitoring

Representative samples of septic tank effluent shall be collected and analyzed for the following constituents:

<u>Constituent</u>	<u>Units</u>	<u>Type of Sample</u>	<u>Sampling Frequency</u>
Flow	Gallons/day		Estimated Weekly
pH	units	Grab	March and September
Total Dissolved Solids	mg/l	Composite of all wastewater systems.	March and September

Septic System Monitoring

The following shall constitute the septic system monitoring program:

<u>Constituent</u>	<u>Units</u>	<u>Type of Measurement</u>	<u>Minimum Sampling and Analyzing Frequency</u>
Sludge Depth in Septic Tanks	Feet	Staff Gauge	March and September
Total Volume of Sludge, A	FT ³	Calculated	March and September
Total Usable Sludge Storage Volume in Septic System, B	FT ³	Calculated	-----
Percent Full (A/B)	%	Calculated	March and September

Disposal Area Inspections

To insure compliance with this Order, particularly Discharge Prohibition A.1., the discharger shall make inspection of the disposal area every two weeks. Notes shall be kept of observations made during inspections, and of all problems, maintenance, and repairs. These records shall be summarized in monitoring reports submitted to the Board.

Reporting

Semi-annual monitoring reports shall be submitted to the Board by the 15th day of April and October. These reports shall include Effluent Monitoring, Septic System Monitoring, and Disposal Area Inspections made during the previous monitoring period.

ORDERED BY

Executive Officer

January 15, 1982

Date

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL COAST REGION

DECEMBER 9, 1977

STANDARD PROVISIONS

A. General:

1. The discharger shall file with the Board a report of waste discharge at least 120 days before making any material change or proposed change in the character, location or volume of the discharge.
2. This Order does not authorize any act causing injury to the property of another, nor protect the discharger from his liability under federal, state, or local laws.
3. The discharger shall permit the Regional Board:
 - a. Entry upon premises where an effluent source is located;
 - b. Access to copy any records required to be kept under terms and conditions of this Order;
 - c. Inspection of monitoring equipment or records; and
 - d. Sampling of any discharge.
4. The discharger shall maintain the wastewater collection, treatment and disposal system in good working order and operate it as efficiently as possible.
5. The public shall not have contact with wastewater as a result of collection, treatment, or disposal operations.
6. Wastewater disposal areas shall be posted to warn the public.
7. The discharger shall provide safeguards to assure compliance with waste discharge requirements during electrical power failure.
8. The discharger's wastewater treatment plant shall be supervised and operated by persons possessing certificates of appropriate grade pursuant to Chapter 3, Subchapter 14, Title 23, California Administrative Code. By January 30th of each year, the discharger shall attest to compliance with this provision and provide a list of current operating personnel and their grade of certification.
9. In the event of any change in control or ownership of land or waste discharge facilities, the discharger shall notify the succeeding owner or operator of the existence of this Order by letter, a copy of which shall be forwarded to this Board.

11. By January 30th of each year, the discharger shall submit an annual report to the Board containing both tabular and graphical summaries of the monitoring data obtained during the previous year. If violations occurred during the previous year, the discharger shall discuss the compliance record and corrective actions taken or planned to bring the discharge into full compliance with the waste discharge requirements.
12. By January 30th of each year, the discharger shall submit a written report to the Board evaluating the effectiveness of the discharger's source control program.
13. The discharger shall file a written report with the Board within ninety (90) days after the waste flow for any month exceeds 75 percent of the design capacity of waste treatment and/or disposal facilities. The report shall include:
 - a. Average daily flow for the month, the date on which the instantaneous peak flow occurred, the rate of that peak flow, and the total flow for the day.
 - b. The discharger's best estimate of when the average daily dry-weather flow rate will equal or exceed the design capacity of his facilities.
 - c. The discharger's intended schedule for studies, design, and other steps needed to provide additional capacity for his waste treatment and/or disposal facilities before the waste flow rate equals the capacity of present units. (Reference: Sections 13260, 13267(b) and 13268, California Water Code.)

The letter transmitting the report shall include certification that the policy making body has been informed of the above facts.

14. All monitoring reports shall be signed by:
 - a. In the case of corporations, by a principal executive officer at least of the level of vice president or his duly authorized representative, if such representative is responsible for the overall operation of the facility from which the discharge originates;
 - b. In the case of a partnership, by a general partner;
 - c. In the case of a sole proprietorship, by the proprietor; and
 - d. In the case of a municipal, state or other public facility, by either a principal executive officer, ranking elected official, or other duly authorized employee.
15. The discharger shall mail a copy of each report required by this Order to:
