**NOTICE OF PUBLIC HEARING**  
concerning

**RENEWAL OF WASTE DISCHARGE REQUIREMENTS  
(NPDES PERMIT NO. CA0079731)  
FOR  
CITY OF REDDING  
CLEAR CREEK WASTEWATER TREATMENT FACILITY  
SHASTA COUNTY**

The City of Redding (Discharger) owns and operates Clear Creek Wastewater Treatment Plant, a publically owned treatment works in Anderson, Shasta County. The treatment system consists of screening for removal of large solids, grit removal, primary clarification, activated sludge treatment with secondary clarification, filtration, chlorination/dechlorination, flow equalization, and emergency storage. Primary sludge is treated by anaerobic digestion followed by dewatering using a plate and frame filter press and then disposed at a sanitary landfill. Waste activated sludge is stabilized in facultative sludge lagoons and air dried to generate Class B biosolids. Biosolids from the secondary treatment process are land applied on property owned by the Discharger. Approximately 8.8 million gallons per day (dry weather flow) of treated waste is discharged through an outfall line and diffuser to the Sacramento River, a water of the United States.

The Central Valley Regional Water Quality Control Board (Central Valley Water Board) will consider renewal of the Discharger's existing NPDES permit (referred to as Waste Discharge Requirements or WDRs). The Discharger is expected to be able to immediately comply with the renewed NPDES permit.

A public hearing concerning this matter will be held during the Regional Water Board meeting that is scheduled for:
