NOTICE OF APPLICABILITY (NOA); LOW THREAT GENERAL WASTE DISCHARGE REQUIREMENTS ORDER NO. R5-2008-0081; CALIFORNIA WATER SERVICE COMPANY, WELL AT STOCKTON DISTRICT STATION 18-01 PROJECT; SAN JOAQUIN COUNTY

Our office received a Notice of Intent (NOI) on 17 June 2010 from California Water Service Company (Discharger) for the Well at Stockton District Station 18-01 Project. Based on the information in the NOI, Central Valley Regional Water Quality Control Board (Central Valley Water Board) staff has determined that the project meets the required conditions for approval under the General Order for Dewatering and Other Low Threat Discharges to Surface Waters (Low Threat General Order). This project is hereby assigned Low Threat General Order No. R5-2008-0081-072 and National Pollutant Discharge Elimination System (NPDES) Permit No. CAG995001. Please reference the unique Order No. R5-2008-0081-072 in all future correspondence and documents.

The Low Threat General Order has been provided to you through enclosure with the 9 July 2010 NOA for the Stockton District Station 66-01 Project, and may also be viewed at the following web address: http://www.waterboards.ca.gov/centralvalley/board_decisions/adopted_orders/general_orders/r5-2008-0081.pdf. You are urged to familiarize yourself with the contents of the entire document. The Low Threat General Order prescribes mandatory discharge monitoring requirements. The project activities shall be operated in accordance with the requirements contained in this NOA, the Low Threat General Order, and with the information submitted by the Discharger.

CALIFORNIA TOXIC RULE / STATE IMPLEMENTATION POLICY MONITORING

The Low Threat General Order incorporates the requirements of the California Toxic Rule (CTR) and the State Water Resources Control Board's (State Water Board), *Policy for Implementation of Toxic Standards for Inland Surface Waters, Enclosed Bays, and Estuaries of California*, 2005, also known as the State Implementation Policy (SIP).

Section 5.3 of the SIP allows "exceptions from meeting the Priority Pollutant criteria/objectives if determined to be necessary to implement control measures..." The Discharger qualified for the SIP exception in Section 5.3 and is not required to conduct Priority Pollutant (CTR constituent) sampling. Dischargers authorized to discharge under this Low Threat General

California Environmental Protection Agency

Order who have been granted an exception to the priority pollutant criteria and objectives in the SIP, must provide certification by a qualified biologist that the beneficial uses of the receiving water have been restored upon completion of the discharge.

PROJECT DESCRIPTION

The Discharger proposes to discharge groundwater from a potable water production well known as the Stockton District Station 18-01. The Discharger is proposing to test and verify that groundwater, from their treatment system for the extraction of iron and manganese, meets drinking water standards prior to pumping the treated groundwater into their potable water system. The flow rate is expected to be 0.216 million gallons per day for a duration of six days.

The groundwater will be discharged into the local storm drain system, in the City of Stockton near the location at 79 Atlee Street. The groundwater will then directly enter into Yosemite Lake tributary of the San Joaquin River.

MONITORING AND REPORTING

All Dischargers must notify Central Valley Water Board staff 24 hours before the start of each new discharge, as soon as noncompliance is anticipated, and when the discharge ceases.

The Discharger is required to comply with all the monitoring and reporting requirements contained in Attachment E of the Low Threat General Order.

Effluent and receiving water analytical monitoring shall be conducted and the results submitted to the Central Valley Water Board on a quarterly basis unless specified otherwise. The Discharger must submit quarterly reports, as described in Attachment E, Section X, even if there is no discharge or receiving water flow during the reporting quarter, until the Discharger formally requests that coverage under this Order be terminated.

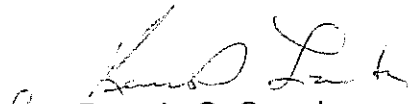

GENERAL INFORMATION AND REQUIREMENTS

The required annual fee (as specified in the annual billing you will receive from the State Water Resources Control Board) shall be submitted until the discharge is terminated. The Discharger must notify the Central Valley Water Board in writing if the discharge regulated by this Low Threat General Order is no longer necessary, so we may terminate applicability of this Low Threat General Order and avoid additional and unnecessary billing.

ENFORCEMENT

Failure to comply with the Low Threat General Order may result in enforcement actions, which could include civil liability. Effluent limitation violations are subject to a Mandatory Minimum Penalty (MMP) of \$3,000 per violation. Late reports are subject to an MMP of \$3,000 per each period of 30 days late. If you have no discharge during a quarterly monitoring period, you must still submit a report indicating that no discharge occurred, or you may be subject to civil liability.

All monitoring report submittals, notification of the beginning and end of discharge, and questions regarding compliance and enforcement shall be directed to Spencer Joplin at (916) 464-4660 or sjoplin@waterboards.ca.gov. Questions regarding the permitting aspects of this Low Threat General Order, and requests for termination of coverage under this Order, may be directed to Mike Negrete at (916) 464-4662 or mnegrete@waterboards.ca.gov.

for Pamela C. Creedon
Executive Officer

Enclosure: General Order No. R5-2008-0081 (Discharger only)
