

ITEM: 26

SUBJECT: Rescinding Various Waste Discharge Requirements

REPORT: Following is a proposed order rescinding 1 set of waste discharge requirements that are no longer needed.

RECOMMENDATION: Adopt the proposed Order.

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD  
CENTRAL VALLEY REGION

ORDER NO. R5-2006-

RESCINDING VARIOUS WASTE DISCHARGE REQUIREMENTS

The California Regional Water Quality Control Board, Central Valley Region, finds that the Board adopted the following Order, which is no longer applicable for the reasons shown:

Resolution No. 68-262, adopted 21 June 1968, prescribes requirements for the discharge of crude oil production wastewater to sumps for Tesoro Petroleum Corp. at the 26Z Lease in the NE ¼ of Section 26, T30S, R22E, MDB&M, Asphalto Oil Field, Kern County. Occidental of Elk Hills, Inc. currently owns and operates the lease. An inspection confirmed that discharge to the sump has been discontinued; the sump permanently removed from service, and is considered closed. Production wastewater is directed to lease injection wells for disposal under permit by the California Division of Oil, Gas, and Geothermal Resources. (CDH)

IT IS HEREBY ORDERED that the above waste discharge requirement orders is rescinded.

I, PAMELA C. CREEDON, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Central Valley Region, on 22 September 2006.
