PUBLIC HEARING

concerning

**RENEWAL OF WASTE DISCHARGE REQUIREMENTS
(NPDES NO. CA0004758)**

for

**SACRAMENTO MUNICIPAL UTILITY DISTRICT
RANCHO SECO NUCLEAR GENERATING STATION, UNIT 1
AND RANCHO SECO PARK
SACRAMENTO COUNTY**

The Sacramento Municipal Utility District (Discharger) owns and operates the Rancho Seco Nuclear Generating Station, Unit 1, which is a decommissioning nuclear facility nearing completion of the dismantlement phase of decommissioning. Wastewater consisting of stormwater, fire pump testing water, irrigation runoff, treated liquid radioactive wastewater, and treated municipal wastewater is combined and diluted with water from the Folsom South Canal and discharged to an unnamed tributary of Clay Creek, a water of the United States and a tributary to the Cosumnes River.

The proposed Order also regulates a 1-acre wastewater treatment pond located at Rancho Seco Park, adjacent to the Rancho Seco Nuclear Generating Station, Unit 1. The unlined, aerated pond treats an annual average flow of approximately 2,000 gallons per day of domestic wastewater from the park. There is no surface water discharge from the Rancho Seco Park wastewater treatment pond.

The proposed Order includes new effluent limitations for copper, aluminum, and electrical conductivity. The Discharger may be unable to immediately comply with the new effluent limitations for aluminum and copper. Therefore, compliance time schedules are established in the Order.

A public hearing concerning this matter will be held during the Regional Water Board meeting which is scheduled for:
