Subject: Disapproved of excessive and expensive permit mandates.

Dear Kathleen Cole Harder:

The water board must STOP the over and unnecessary regulating. Please do not regulate on opinion. Regulations should be based on science, facts and common sense. The water board's attempt to protect the waters of the State will pollute the air and the land with even more highly concentrated waste products generated by these new regulations. There is not a technology that will simply make our waste disappear; and, if waste isn't returned to the environment then it is often managed by storing it in landfills, ponds, tanks, containers, and dumps which may leave a nasty hazard for the future.

This new regulation will cost the rate payers of the region over 2 billion dollars and probably twice as much in debt service over the next several decades. To clarify: everyone's monthly bill will increase from \$20 per month to over \$60 per month at a time when unemployment and economic hardships are occurring in Sacramento and the rest of the country. Very concerned and disgusted rate payer,

Sincerely,
Frank Valls
