Subject: Secondary treatment for Bear Valley

June 15, 2011

Mr. Jim Marshall
CVRWQCB

Dear Mr. Marshall:

We own a cabin in Bear Valley and want to express our support for the NPDES permit draft requiring secondary treatment. Building an expensive tertiary treatment plant would be a waste of resources since, as we understand it, Bear Valley only discharges to surface waters in very unusual years and there has been no discharge in over ten years.

Sincerely,

Thomas & Candace Simonen
