

**LATE REVISIONS  
CLEAR CREEK COMMUNITY SERVICES DISTRICT  
CLEAR CREEK COMMUNITY SERVICES DISTRICT WATER TREATMENT  
PLANT  
SHASTA COUNTY  
NPDES Permit Renewal (NPDES No. CA0083828)  
Regional Water Quality Control Board, Central Valley Region  
Board Meeting – 30 March 2012  
ITEM # 7**

**Changes to Proposed NPDES Permit Renewal**

1. **NPDES Permit, Monitoring Program.** Section IV.A.2. Page E-6.  
Modify as shown in underline/strikeout format below:

If the discharge is intermittent rather than continuous, then on the first day of each such intermittent discharge, the Discharger shall monitor and record data for all of the constituents listed above, ~~except for priority pollutants,~~ whose monitoring frequency is 2/month or more frequent after which the frequencies of analysis given in the schedule shall apply for the duration of each such intermittent discharge. In no event shall the Discharger be required to monitor and record data more often than twice the frequencies listed in the schedule.

2. **NPDES Permit, Monitoring Program.** Table E-4. Page E-10.  
Modify the footnotes to Table E-4 as follows:

- <sup>3</sup> Monitoring required at Monitoring Location RSW-001, only. Samples shall be collected on the same date as the effluent metals and priority pollutant samples.
- <sup>4</sup> Aluminum, bis (2-ethylhexyl) phthalate, and copper shall be monitored at Monitoring Location RSW-001 only for 3 years as part of the special studies described in Section VI.C.2.b and VI.C.2.c of this Order. Samples shall be collected on the same date as effluent sampling for these parameters.
- <sup>8</sup> Priority pollutants shall be sampled semi-annually during the third or fourth year following the date of permit adoption at Monitoring Location RSW-001 only and shall be conducted concurrently with effluent monitoring for priority pollutants. See Attachment I for more detailed requirements related to performing priority pollutant monitoring.
