

INFORMATION SHEET

ORDER R5-2015-XXXX
NORTHERN RECYCLING, LLC
NORTHERN RECYCLING COMPOST, ZAMORA FACILITY
YOLO COUNTY

NORTHERN RECYCLING, LLC; NORTHERN RECYCLING COMPOST - ZAMORA; Yolo County

Northern Recycling, LLC (Discharger) submitted a Report of Waste Discharge for new waste discharge requirements (WDRs) for the expansion of an existing composting facility and to accept food waste for composting at the facility located one mile south of Zamora in Yolo County. The plans for the expansion of the composting facility have been withdrawn; however, the Discharger plans to continue to compost green waste from residential and commercial sources. The current composting operations consist of screening/processing, active windrow composting, and storing the final compost product. The compost operations will be conducted on compacted soil pads with hydraulic conductivity of 1×10^{-5} centimeters per second or less. The proposed Order requires the Discharger to construct a composite-lined retention pond and a composite-lined detention basin for leachate and contact water drainage from the pad areas, and one composite-lined overflow pond for additional storage capacity when needed. The required pad and pond liners are necessary to protect groundwater quality.
