NOTICE OF PUBLIC HEARING

concerning

**GENERAL WASTE DISCHARGE REQUIREMENTS
FOR
MAINTENANCE DREDGING OPERATIONS**

Discharger and Tentative Order Information

The Central Valley Regional Water Quality Control Board is proposing a new General Waste Discharge Requirements Order for maintenance dredging projects to allow maintenance dredging, placement of dredge sediment to dredge material placement sites, reuse of dewatered dredge sediment, and the discharge of return water to surface waters and infiltration to groundwater. Dredging of accumulated sediment in surface waters is necessary to maintain storage or flow capacity, safe navigation and passage, flood control, water conveyance, public access and recreation. Sediments deposited by rivers and waterways must be periodically removed to maintain these uses.

Discharges from facilities that are eligible for coverage under the proposed General Order are new discharges seeking regulatory coverage that would otherwise be required to pursue an individual waste discharge requirements order.
