Subject: Town of Apple Valley LAMP Figure 2-1

Good afternoon Mike:

Attached is the first draft of the revised Figure 2-1. Still missing are the location of wells that can be used in the WQAP, and the high risk areas.

The map more clearly identifies those areas in the Town that are on sewer. It also separates the rest of the Town that may develop with OWTS based on land use density.

I have still not heard back from either Adelanto or Hesperia. I will continue to remind them so that I can get you their draft copies.
