Project Name:

Federal Highway Administration - CA PRA JOTR 11(5) Pinto Basin Flood Repair project

Receiving Water:

Pinkham Wash and other unnamed tributaries

Location:

City or area: Joshua Tree National Park, Riverside County, California
Longitude/Latitude: Start: 33 44' 57.36"N, 115 49' 07.16"W; End: Township/Range: 33 42'
43.75"N, 115 48' 20.67"W

Project Description:

The proposed activity involves repair and stabilization of low water crossings damaged by a 25 year flood event along the ephemeral drainages which crisscross the cottonwood canyon roadway at the Southern entrance to Joshua Tree National Park. Stabilization and repair of the low water crossings within the project area ensures that safe and reliable access to the Joshua Tree National Park is maintained through the southern cottonwood canyon entrance.

Action:

Pending
