**RE: ORDER FOR TECHNICALLY-CONDITIONED CLEAN WATER ACT SECTION 401
WATER QUALITY CERTIFICATION FOR DISCHARGE OF DREDGED AND/OR
FILL MATERIALS**

PROJECT: Indian Canyon Drive Widening Project

APPLICANT: City of Palm Springs

- ACTION:**
1. Order for Standard Certification
 2. Order for Technically-Conditioned Certification
 3. Order for Denial of Certification

STANDARD CONDITIONS:

The following standard conditions apply to all certification actions, except as noted above under Action 3 for denials.

1. This certification action is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to section 13330 of the California Water Code and section 3867 of Title 23 of the California Code of Regulations (23 CCR).
2. This certification action is not intended and shall not be construed to apply to any discharge from any activity involving a hydroelectric facility requiring a Federal Energy Regulatory Commission (FERC) license or an amendment to a FERC license unless the pertinent certification application was filed pursuant to 23 CCR section 3855(b) and the application specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.
3. The validity of any non-denial certification action (Actions 1 and 2) shall be conditioned upon total payment of the full fee required under 23 CCR section 3833, unless otherwise stated in writing by the certifying agency.

California Environmental Protection Agency

4. In the event of any violation or threatened violation of the conditions of this certification, the violation or threatened violation shall be subject to any remedies, penalties, process, or sanctions as provided for under State law. For purposes of Clean Water Act (CWA) section 401(d), the applicability of any State law authorizing remedies, penalties, process, or sanctions for the violation or threatened violation constitutes a limitation necessary to assure compliance with the water quality standards and other pertinent requirements incorporated into this Water Quality Certification (WQC).
 - a. In response to a suspected violation of any condition of this WQC, the Regional Water Quality Control Board (Regional Water Board) may require the holder of any permit or license subject to this certification to furnish, under penalty of perjury, any technical or monitoring reports the Regional Water Board deems appropriate, provided that the burden, including cost of the reports, shall be in reasonable relationship to the need for the reports and the benefits to be obtained from the reports.
 - b. In response to any violation of the conditions of this WQC, the Regional Water Board may add to or modify the conditions of this certification as appropriate to ensure compliance.

ADDITIONAL CONDITIONS:

The following additional conditions apply to this certification:

1. This WQC applies towards the proposed project as described in the 401 application received by the Regional Water Board on January 28, 2010. The Applicant shall provide the Regional Water Board and other interested agencies with written notification of any significant modifications made to the project prior to implementation of the modifications.
2. This WQC does not convey any property rights of any sort or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of federal, state, or local laws or regulations.
3. This WQC does not authorize the Applicant or any associated party to trespass on any land or property unless the applicant has obtained written authorization or acquired a special use authorization permit from the land or property owner.
4. A copy of this WQC shall be provided to the appropriate onsite Supervisor for the Project. All personnel performing work on the proposed project shall be familiar with the content of this WQC. Copies of the WQC shall be readily available at the project site at all times during periods of active work and shall be presented to regulatory agency representatives upon request.
5. The Applicant shall grant Regional Water Board staff, or an authorized representative, upon presentation of credentials and other documents as may be required by law, to enter the project site at reasonable times, to ensure compliance with the terms and conditions

of this WQC and/or to determine the impacts the project may have on waters of the United States.

6. The proposed projects shall not be enlarged or extend beyond the proposed project impact area. The Applicant shall delineate the project boundaries and staging areas with stakes, flags and/or temporary construction fencing.
7. The area of vegetation and soil disturbance shall be restricted to the smallest extent possible.
8. Projects shall not discharge substances in concentrations toxic to human, plant, animal, or aquatic life or that produce detrimental physiological responses.
9. Projects shall not discharge waste classified as "hazardous" as defined in Title 22 CCR section 66261 and the California Water Code section 13173.
10. No oil, petroleum products, or rubbish shall be allowed to enter into or be placed where it may be washed by rainfall or runoff into waters of the United States.
11. No equipment maintenance will be done within or near any stream channel where petroleum products or other pollutants from the equipment may enter waters of the United States.
12. Equipment refueling shall not occur within waters of the United States.
13. Any oil or grease leaks shall be immediately cleaned up.
14. The Applicant shall ensure that all contaminated material and/or contaminated soil removed or excavated from the Project site is properly loaded, transported, and disposed of in accordance with Federal, State, and local regulations.
15. Staging/storage areas for equipment and materials shall be located outside of waters of the United States.
16. The Applicant shall ensure that all disturbed and filled areas are adequately stabilized and protected from erosion and siltation by implementing appropriate soil stabilization, sedimentation and silt control measures.
17. Any flow diversion used during construction shall be designed in a manner to prevent pollution, minimize siltation, and shall provide flows to downstream reaches. Flows shall be maintained to support existing aquatic life and riparian wetlands and habitat that may be located upstream and downstream from any temporary diversion.
18. The Applicant shall restore drainages, to the greatest extent possible, to the original bank configuration, stream bottom width, and channel gradient.

19. All temporary facilities and impacts shall be removed and restored to the preexisting conditions and contours to the extent practicable.
20. Construction related materials and wastes shall be removed from the project site upon completion of the project.
21. The Applicant shall submit Notice to the Regional Water Board within 60-days of completion of the Project. The Notice shall include: 1) a detailed summary of the mitigation and restoration activities implemented during the project and 2) provide photographic documentation that supports the information summarized in the Notice.
22. The Regional Water Board reserves the right to suspend, cancel, or modify and reissue this WQC, after providing notice to the Applicant and/or responsible Site-Supervisor, if the Regional Water Board determines that the project fails to comply with any of the terms or conditions of this WQC.
23. The Applicant shall orally notify the Regional Water Board of any noncompliance that may impact the beneficial uses of waters of the United States, as soon as notification is possible and notification can be provided without substantially impeding measures necessary to address the noncompliance.

REGIONAL WATER QUALITY CONTROL BOARD CONTACT PERSON:

If you have any questions, please contact Jay Mirpour, Water Resources Control Engineer, at (760) 776-8981 or jmirpour@waterboards.ca.gov.

WATER QUALITY CERTIFICATION:

I hereby issue an order certifying that any discharge from the referenced project will comply with the applicable provisions of sections 301 (Effluent Limitations), 302 (Water Quality Related Effluent Limitations), 303 (Water Quality Standards and Implementation Plans), 306 (National Standards of Performance), and 307 (Toxic and Pretreatment Effluent Standards) of the Clean Water Act, and with other applicable requirements of State law.

Except insofar as may be modified by any preceding conditions, all certification actions are contingent on (a) the discharge being limited and all proposed mitigation being completed in strict compliance with the applicants' project description and the attached Project Information Sheet, and (b) compliance with all applicable requirements of the Regional Water Quality Control Board's Water Quality Control Plan (Basin Plan).

PROJECT INFORMATION

Application Date:

Received on January 28, 2010

Applicant:

City of Palm Springs - Marcus Fuller (760) 323-8253 ext. 8744

Applicant Representative:

Dokken Engineering - Namat Hosseinion (916) 858-0642

Project Name:

City of Palm Springs - Indian Canyon Drive Widening Project

Project Start and Completion:

June 1, 2010 through August 1, 2013

Project Description (purpose/goal):

The purpose of the project is to improve current and future traffic circulation and roadway level of service. Indian Canyon Drive, a north-south at-grade roadway currently has one traffic lane in each direction within the project area. The project will add two additional travel lanes, one in each direction for a total of four lanes. The project proposes to widen the road equally on both sides of the existing Indian Canyon Drive for a total width of 48 feet. It allows the construction of four 12 foot lanes, a 4 foot striped median, and 8 foot paved shoulders with a minimum of impact to existing traffic during construction and no impact to Southern California Edison or Desert Water Agency facilities.

Project Location:

Palm Springs, Riverside County, Longitude/Latitude: 116° 32' 43.65" W / 33° 52' 00.25" N,
Township/Range: 3S / 4E

Receiving Water(s):

Whitewater River, which is a tributary to the Salton Sea

Fill/Excavation Area (acres):

A total of 0.42 acre of Waters of the U.S. will be involved in the Indian Canyon Drive Widening Project. Of this, there will be .35 acre permanent and .07 acre temporary impacts to Waters of the U.S. and State. Mitigation will be paid to an In-Lieu Fee Mitigation bank at a 2:1 ratio at a cost set by the Army Corps of Engineers.

Dredge Volume (cy):

N/A

Mitigation:

Actions/BMPs that will be implemented to Avoid and/or Minimize impacts to Waters of the U.S. include: preservations of habitats, erosion control measures, and project scheduling.

Pollutants of concern during construction include sediments, trash, oil and grease fuels from equipment, and materials used for concrete and asphalt installation. Each of these pollutants on its own or in combination with other pollutants can have a detrimental effect on water quality and aquatic habitats. Road widening will occur in the beds and banks and a 250 foot cut-off wall will be constructed in the Whitewater River; therefore, there is a potential for pollutants to enter the Whitewater River from construction work. Construction will require special consideration to prevent adverse direct impacts to the waters. These actions/BMPs specifically include measures to block pollutants from entering the beds and banks and to prevent soil erosion that would result from construction activities.

Federal Permit(s):

U.S. Army Corps of Engineers section 404 Permit Nationwide Permit Numbers 14 – Linear Transportation Projects (pending).

Status of CEQA:

A Negative Declaration was prepared for this project pursuant to the provisions of CEQA. Lead Agency: City of Palm Springs, State Clearinghouse Number: 2009071045

Reference No.: 401 Certification for the City of Palm Springs - Indian Canyon Drive Widening Project, WDID No. 7A333095001
