Subject: **RE: Comments on R7-2013-0070 - ICFB Pesticide TMDL**

Hello Ms. Dale:

Thank you for reviewing and commenting on the proposed Resolution Certifying the Revised Imperial County Farm Bureau Sediment Total Maximum Daily Load Compliance Program as Adequate to Correct Impairments of Chlorpyrifos and Diazinon in the Alamo and New Rivers. As I mentioned to you over the phone when we spoke on September 10, 2013, and in response to your comments, the Draft Resolution will be revised as indicated in the attached Errata Sheet. Please contact me at (760) 776-8942 if you have any concerns regarding these responses.

Thank you.

Nadim Shukry-Zeywar

ERRATA SHEET

ITEM NO. 9 – Resolution R7-2013-0070 Certifying the Revised Imperial County Farm Bureau Sediment Total Maximum Daily Load Program as Adequate to Correct Impairments of Chlorpyrifos and Diazinon in the Alamo and New Rivers, Imperial County, California

Beginning on page 2, renumber Findings #14 through #19 to #16 through #21.

On page 2, insert new Findings #14 and #15 to read as follows:

14. Chlorpyrifos annual use in Imperial County, that includes the watersheds of the Alamo and New Rivers, was 56,254 pounds in 2007 as compared to 71,023 pounds in 2011.
15. Diazinon annual use in Imperial County was 24,730 pounds in 2007 as compared to 2,293 pounds in 2011.

On page 3, insert new Findings #22 through #24 to read as follows:

22. To address diazinon impairments, ICFB proposed to focus its efforts (eg. MPs and technical assistances) to only areas where diazinon uses occur.
23. Regional Water Board staff is developing an agricultural waiver for the Imperial Valley (Ag Waiver) that is expected to be scheduled for consideration of approval by the Regional Water Board in 2014. As envisioned by Regional Water Board staff, and consistent with the Policy for Implementation and Enforcement of the Nonpoint Source Pollution Control Program, the Ag Waiver would require dischargers in Imperial Valley to monitor for all agricultural water quality constituents of concern.

24. Regional Water Board staff has funding to monitor the levels of chlorpyrifos and diazinon until June 2014. Monitoring results will be used to assess the effectiveness of the ICFB TMDL Program and the implemented MPs on addressing chlorpyrifos and diazinon impairments.
