**CLEAN WATER ACT SECTION 401 WATER QUALITY STANDARDS
CERTIFICATION FOR GILMAN SPRINGS ROAD CURVE REALIGNMENT,
UNINCORPORATED RIVERSIDE COUNTY (USACOE CORPS FILE NO. NOT
AVAILABLE) (SARWQCB PROJECT NO. 332015-20)**

Dear Mr. Williams:

On September 15, 2015, we received from POWER Engineers, Inc. on behalf of Riverside County Transportation Department (Applicant), an application requesting Clean Water Act Section 401 Water Quality Standards Certification ("Certification") for a project to perform safety improvements to Gilman Springs Road (Project). The Applicant submitted a check for \$1,200.00 with the Certification application materials, which satisfies the fee requirement for consideration of a 401 Certification. This fee amount was determined using the Dredge and Fill Fee Calculator on the State Water Resources Control Board (SWRCB) web site, which is based on the most current iteration of California Code of Regulations, Division 3, Chapter 9, Article 1, Section 2200 (a) (3).

This letter responds to your request for Certification that the proposed Project, as described in your application and summarized below, will comply with State water quality standards outlined in the Water Quality Control Plan for the Santa Ana River Basin (1995) (Basin Plan) and subsequent Basin Plan amendments:

Project Description: Riverside County Transportation Department (RCTD) proposes to construct 0.6 miles of safety improvements on Gilman Springs Road. The improvements include shoulder widening, installation of rumble strips on the road centerline and along the edges of the travel way, and the realignment of horizontal and vertical curves. The safety improvements will require the replacement of an existing 36 inch culvert

with a 48 inch reinforced concrete pipe with rock slope protection at both the inlet and outlet of the culvert.

The work will take place within Section 15 of Township 4 South, Range 1 West, of the U.S. Geological Survey *San Jacinto* 7.5 minute topographic quadrangle map (33° 49' 38.67" N/ -116° 58' 44.94" W).

Receiving water: Unnamed tributary to the San Jacinto River, Reach 5, which has beneficial uses (existing or potential) that include: agricultural supply (AGR), groundwater recharge (GWR), contact recreation (REC1), non-contact recreation (REC2), warm freshwater habitat (WARM), and wildlife habitat (WILD).

Fill area:

Permanent Impacts to Streambed	0.014 acres	25 linear feet
--------------------------------	-------------	----------------

Dredge/Fill volume: Not Applicable

Federal permit: U.S. Army Corps of Engineers (USACE) Permit Nationwide No. 14 – Linear Transportation Projects

You have proposed to mitigate water quality impacts as described in your Certification application. The proposed mitigation is summarized below:

Onsite Water Quality Standards Mitigation Proposed:

- Standard water quality related best management practices (BMPs) will be employed during construction activities.

Offsite Water Quality Standards Mitigation Proposed:

- The Project Applicant will mitigate 0.014 acres of permanent impacts at a 10:1 ratio through the purchase of 0.01 acres of mitigation credit in the Riverside-Corona Resource Conservation District (RCRCD) In-Lieu-Fee Program.

Should the proposed Project impact State- or federally-listed endangered species or their habitat, implementation of measures identified in consultation with U.S. Fish and Wildlife Service and the California Department of Fish and Wildlife will ensure those impacts are mitigated to an acceptable level.

Appropriate BMPs will be implemented to reduce construction-related impacts to waters

of the State in accordance with the requirements of Order No. R8-2010-0033 (NPDES Permit No. CAS618033), commonly known as the Riverside County Municipal Storm Water Permit, and subsequent iterations thereof. Order No. R8-2010-0033 requires that the Applicant substantially comply with the requirements of State Water Resources Control Board General NPDES Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities, Order Number 2012-0006-DWQ.

Pursuant to the California Environmental Quality Act (CEQA), the RCTD filed a CEQA Guidelines Section 15301 "Class 1" Categorical Exemption with the Riverside County Clerk on August 4, 2015. The "Class 1" Exemption declares the proposed Project involves the alteration of an existing public structure for the purpose of public safety, involving negligible or no expansion of an existing use beyond that existing at the time of the Department's determination. The Regional Board has independently considered the CEQA Categorical Exemption in the issuance of this Certification and finds that no changes or alterations to the proposed Project are necessary to avoid or mitigate impacts to water quality to a less than significant level.

This 401 Certification is contingent upon the execution of the following conditions:

- 1) This Order for Water Quality Certification will remain valid until the USACE 2012 Nationwide permits expire on March 18, 2017, or through an extended period beyond the expiration date that is authorized in writing by the USACE.
- 2) The Applicant must comply with the requirements of the applicable Clean Water Act Section 404 permit.
- 3) Applicant shall ensure that all fees associated with this Project shall be paid to each respective agency prior to conducting any on-site construction activities.
- 4) A copy of this 401 Certification and any subsequent amendments must be maintained on-site for the duration of work as a denoted element of any project Storm Water Pollution Prevention Plan (SWPPP).
- 5) Proposed mitigation shall be implemented in a timely manner. A copy of the receipt from the transfer of funds to the Riverside Corona Resource Conservation District shall be provided to the Regional Board prior to the discharge of fill to, or the dredging or excavation of material from, waters of the State of California.
- 6) Prior to construction activities, the Applicant shall delineate the work area with brightly colored fencing or other methods to ensure both temporary and permanent impacts to waters of the United States and waters of the State of California do not exceed the limits authorized in this Certification.

- 7) All materials generated from construction activities associated with this Project shall be managed appropriately. This shall include identifying all potential pollution sources within the scope of work of this Project, and incorporating all necessary pollution prevention BMPs as they relate to each potential pollution source identified. Additionally, no materials may be stored within waters of the United States or waters of the State of California.
- 8) The Project proponent shall utilize BMPs during Project construction to minimize the controllable discharges of sediment and other wastes to drainage systems or other waters of the State and of the United States.
- 9) Substances resulting from Project-related activities that could be harmful to aquatic life, including, but not limited to, petroleum lubricants and fuels, cured and uncured cements, epoxies, paints and other protective coating materials, portland cement concrete or asphalt concrete, and washings and cuttings thereof, shall not be discharged to soils or waters of the State. All waste concrete shall be removed from the Project site.
- 10) Motorized equipment shall not be maintained or parked within or near any stream crossing, channel or lake margin in such manner that petroleum products or other pollutants from the equipment might enter these areas under any flow conditions. Vehicles shall not be driven or equipment operated in waters of the State on-site, except as necessary to complete the proposed Project. No equipment shall be operated in areas of flowing water.
- 11) This 401 Water Quality Certification is subject to the acquisition of all local, regional, State, and federal permits and approvals as required by law. Failure to meet any condition contained herein, or any conditions contained in any other permit or approval issued by the State of California or any subdivision thereof, may result in appropriate enforcement action, including the revocation of this Certification and imposition of administrative civil or criminal liability.
- 12) Construction de-watering discharges, including temporary stream diversions necessary to carry out the Project, are subject to regulation by Regional Board Order No. R8-2015-0004, General Waste Discharge Requirements for Discharges to Surface Waters that Pose an Insignificant (De Minimus) Threat to Water Quality. For more information, please review Order No. R8-2015-0004 at www.waterboards.ca.gov/santaana/.

Under California Water Code, Section 1058, and Pursuant to 23 CCR §3860, the following shall be included as conditions of all water quality certification actions:

- (a) Every certification action is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to Section §13330 of the Water Code and Article 6 (commencing with Section 3867) of this Chapter.

(b) Certification is not intended and shall not be construed to apply to any activity involving a hydroelectric facility and requiring a FERC license or an amendment to a FERC license unless the pertinent certification application was filed pursuant to Subsection §3855(b) of this Chapter and that application specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.

(c) Certification is conditioned upon total payment of any fee required under this Chapter and owed by the Applicant.

If the above-stated conditions are changed, any of the criteria or conditions as previously described are not met, or new information becomes available that indicates a water quality problem, the Regional Board may require that the Applicant submit a Report of Waste Discharge and obtain Waste Discharge Requirements.

In the event of any violation or threatened violation of the conditions of this 401 Water Quality Certification, the holder of any permit or license subject to this Certification shall be subject to any remedies, penalties, process or sanctions as provided for under State law. For purposes of Section 401(d) of the Clean Water Act, the applicability of any State law authorizing remedies, penalties, process or sanctions for the violation or threatened violation constitutes a limitation necessary to assure compliance with the water quality standards and other pertinent requirements incorporated into this Certification. Violations of the conditions of this Certification may subject the Applicant to civil liability pursuant to Water Code Section 13350 and/or 13385.

This letter constitutes a Water Quality Standards Certification issued pursuant to Clean Water Act Section 401. I hereby certify that any discharge from the referenced Project will comply with the applicable provisions of Sections 301 (Effluent Limitations), 302 (Water Quality Related Effluent Limitations), 303 (Water Quality Standards and Implementation Plans), 306 (National Standards of Performance), and 307 (Toxic and Pretreatment Effluent Standards) of the Clean Water Act, and with other applicable requirements of State law.

This discharge is also regulated under State Water Resources Control Board Order No. 2003-0017-DWQ (Order No. 2003-0017-DWQ), "General Waste Discharge Requirements for Dredge and Fill Discharges That Have Received Water Quality Certification" which requires compliance with all conditions of this Water Quality Standards Certification. Order No. 2003-0017-DWQ is available at:
www.waterboards.ca.gov/board_decisions/adopted_orders/water_quality/2003/wqo/wqo_2003-0017.pdf
