Good party-line neighbors are considerate party-line users. Remember these golden rules:

- Make certain, if you are using a dial telephone, that the line is clear before you dial.
- Space your calls instead of making several without a break.
- Talk only as long as necessary on each call.
- When you finish talking replace the receiver properly.
- Ask your youngsters to be considerate, too.

Notification for Underground Storage Tanks

FORM APPROVED OMB NO. 2050-0068 APPROVAL EXPIRES 1-31-88

FOR TANKS IN	RETURN COMPLETED FORM TO

STATE USE ONLY

I.D Number

Date Received

GENERAL INFORMATION

Notification is required by Federal law for all underground tanks that have been used to store regulated substances since January 1, 1974, that are in the ground as of May 8, 1986, or that are brought into use after May 8, 1986. The information requested is required by Section 9002 of the Resource Conservation and Recovery Act, (RCRA), as amended.

The primary purpose of this notification program is to locate and evaluate underground tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or, in the absence of such records, your knowledge, belief, or recollection.

Who Must Notify? Section 9002 of RCRA, as amended, requires that, unless exempted, owners of underground tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. Owner means –

(a) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances, and

(b) in the case of any underground storage tank in use before November 8, 1984, but no longer in use on that date, any person who owned such tank immediately before the discontinuation of its use.

What Tanks Are Included? Underground storage tank is defined as any one or combination of tanks that (1) is used to contain an accumulation of "regulated substances," and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Some examples are underground tanks storing 1. gasoline, used oil, or diesel fuel, and 2. industrial solvents, pesticides, herbicides or fumigants.

What Tanks Are Excluded? Tanks removed from the ground are not subject to notification. Other tanks excluded from notification are:

1. farm or residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes,
2. tanks used for storing heating oil for consumptive use on the premises where stored,
3. septic tanks,
4. pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
5. surface impoundments, pits, ponds, or lagoons;
6. storm water or waste water collection systems;
7. flow-through process tanks;
8. liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
9. storage tanks situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situated upon or above the surface of the floor.

What Substances Are Covered? The notification requirements apply to underground storage tanks that contain regulated substances. This includes any substance defined as hazardous in section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA. It also includes petroleum, e.g., crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

Where To Notify? Completed notification forms should be sent to the address given at the top of this page.

When To Notify? 1. Owners of underground storage tanks in use or that have been taken out of operation after January 1, 1974, but still in the ground, must notify by May 8, 1986. 2. Owners who bring underground storage tanks into use after May 8, 1986, must notify within 30 days of bringing the tanks into use.

Penalties: Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed $10,000 for each tank for which notification is not given or for which false information is submitted.

INSTRUCTIONS

Please type or print in ink all items except "signature" in Section V. This form must be completed for each location containing underground storage tanks. If more than 5 tanks are owned at this location, photocopy the reverse side, and staple continuation sheets to this form.

Indicate number of continuation sheets attached: ☐

#3K to file

RECEIVED
DEC 28 1988
OFFICE OF LOANS & GRANTS

December 21, 1988

Ed Anton
California Water Resources Control Board
P.O. Box 100
Sacramento, CA 95801

Dear Mr. Anton:

Explosives Technologies International(ETI) purchased King Explosives in 1988 and believe that an underground storage tank may not have been reported in the required manner. This UST is located in San Bernardino CA and has been registered with the county Environmental Health Services Dept.(see attached Permit) This tank is reported on the attached form.

If you need more information please contact:

J. D. Puller
Environmental Manager(US)
ETI

San Bernardino City Hall
Environmental Health Services Dpt.
300 N. D Street
San Bernardino, CA 92418

Dear Sir or Madam:

Per our conversation with Salley on September 24, 1990, here is our old and new name for our Hazardous Material Handler and Underground Storage Tank Permits.

OLD NAME AND ADDRESS:

KTI KING EXPLOSIVES, INC.

PO BOX 697
FONTANA, CA 92334

2900 N TAMARIND AVE.
RIALTO, CA 92376

NEW NAME AND ADDRESS:

EXPLOSIVES TECHNOLOGIES INTERNATIONAL OF CALIFORNIA, INC.

PO BOX 697
FONTANA, CA 92334

2900 N TAMARIND AVE.
RIALTO, CA 92376

If a new permit is to be issued, please send it to the P.O. Box address. Thank you for your help.

Sincerely,

Bobby R. Wolfe

hlh/BRW

HAZARDOUS CHEMICAL REPORTING
PER SARA TITLE III

Attached are Material Safety Data Sheets (MSDS) and Tier II Forms for the below listed materials handled at this site during 1993. These are submitted to comply with the Title III of the Superfund Amendments and Reauthorization Act of 1986.

LIST OF MATERIALS

ANFO (Ammonium Nitrate-Fuel Oil Mixture)
Ammonium Nitrate Fertilizer (Oxidizer)
Emulsion Blend products (Blasting Agents)
Emulsion products (Oxidizer)
Water Gel products (High Explosives)
Water Gel products (Blasting Agents)
Electric Detonators (Explosives)
Non-electric Detonators (Explosives)
Cast Boosters (High Explosives)
Detonating Cord (Explosives)
Diesel Fuel oil (Diesel)

Sincerely,

Robert M. Nelson
Coordinator
