

## 2015 Renewal of the Riverside and San Bernardino County Municipal NPDES Storm Water Permits

---

On January 29, 2010, the Santa Ana Regional Water Quality Control Board (Regional Board) issued area-wide MS4 permits to the County and municipalities in Riverside County, [Order No. R8-2010-0033](#) and the County and municipalities in San Bernardino County, [Order No. R8-2010-0036](#). These permits expire on January 29, 2015.

On July 29, 2014, the Riverside County Flood Control and Water Conservation District, Principal Permittee submitted a Report of Waste Discharge (ROWD) on behalf of Riverside County and the 14 incorporated cities within Riverside County.

On August 1, 2014, the San Bernardino County Flood Control District submitted a ROWD on behalf of San Bernardino County and 16 incorporated cities within San Bernardino County.

The ROWD submitted by each county serve as the permit renewal application for the fifth term MS4 permit for each county.

Both counties are within the upper Santa Ana River watershed, separated from the lower Santa Ana watershed (Orange County) by Prado Dam, and have developed storm water programs and tools that account for county-specific factors such as storm water infrastructure, topography and geography. To streamline the permit process, minimize administrative efforts and promote consistent requirements within the Upper Santa Ana River watershed where applicable, the renewal schedule for both permits is expected to be on the same timeline. Documents available for review as part of the permit renewal process will be posted in this website.

For any questions regarding the Riverside County Municipal Storm Water Program, contact [Michael Roth](#) at 951-320-2027.

For questions regarding the San Bernardino County Municipal Storm Water Program, contact [Keith Elliott](#) at 951-782-4925. .
