Subject: Complaint BMP's

The City Of Carlsbad is building a municipal golf course. Everyday they are ignoring the Storm water control BMP's along College avenue. There is consistently dirt and rock on the sidewalks and in the gutter. They use areas that are not approved ingress and egress areas to go in and out of and have equipment cross College avenue from these areas and track dirt onto College avenue daily. I have called The City OF Carlsbad and talked to the people in the Department Of Public Works and all they tell me is that they are doing their best.

When I pull permits from the City's and County's to build I am pressured daily to comply with the BMP standards set out on the project no matter how hard it is to comply. I feel that the City has it's own rules that they feel they do not have to comply 100% like they make us do.

Please advise if you will check into this and make the City comply like all of us are suppose to. I feel that they should get fined for knowingly not complying
