

Protecting a Vital Employment Base on San Diego Bay

Presentation to the
San Diego Regional Water Quality Control Board

November 9, 2011

SAN DIEGO PORT TENANTS ASSOCIATION

Who We Are

- Nonprofit organization representing more than 300 businesses on San Diego Bay
- Represent diverse industries from manufacturing to attractions to hospitality

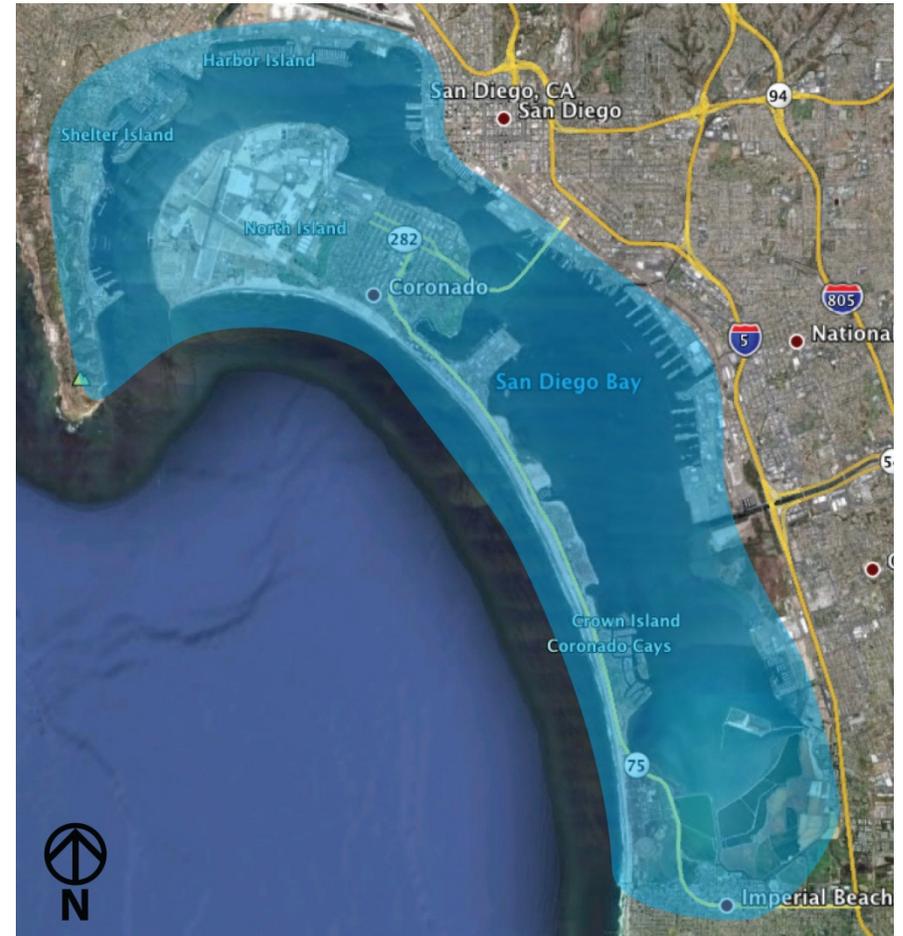

Protecting the Bay, Protecting Jobs

We are dedicated to:

1. Protecting the environment
2. Enhancing trade, commerce and tourism

Why We Are Here

1. Environmental stewardship
2. Preserve economic engine
3. Prevent loss of vital defense contracts

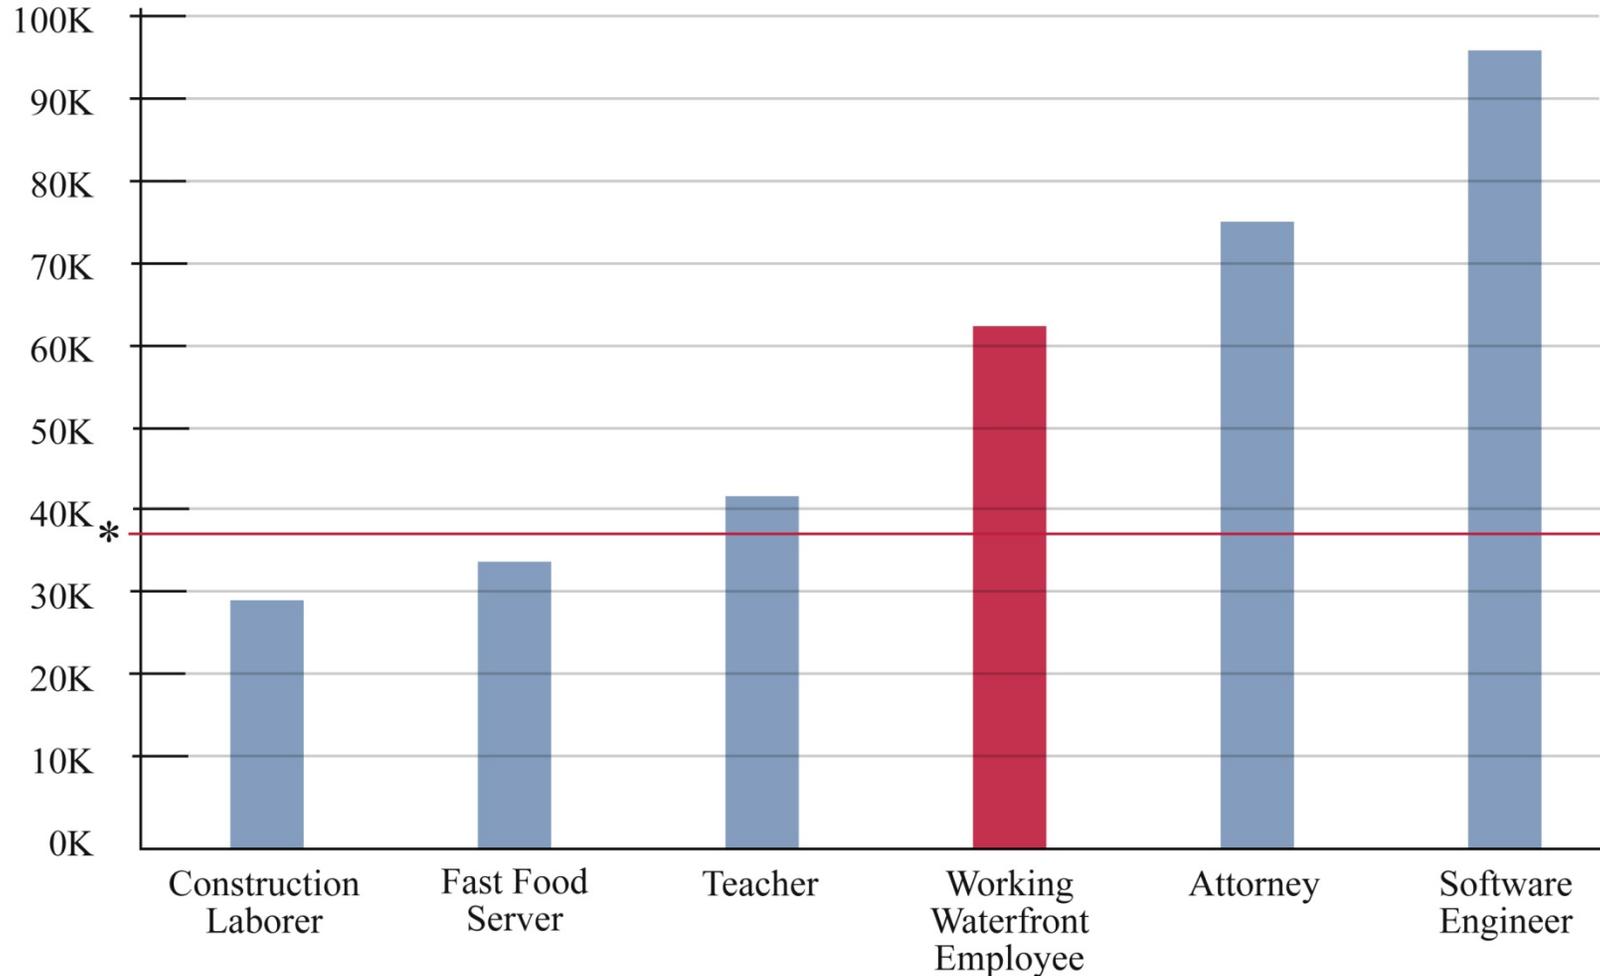

Working Waterfront Numbers

- Supports 42,000 jobs in the region
- Provides family-supporting salaries
- We need to protect and grow this sector

Vital Jobs for the Middle Class

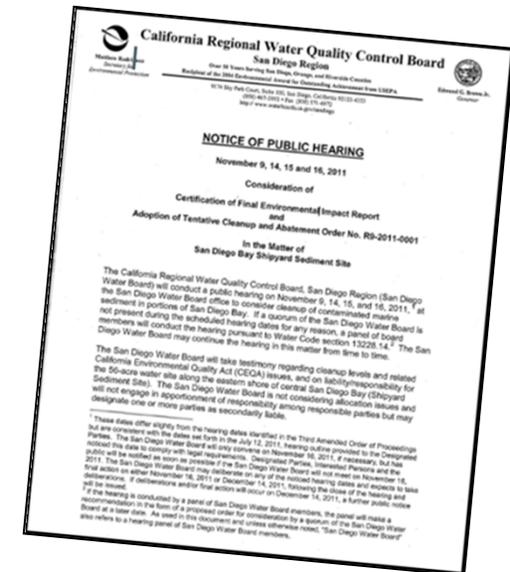

* The average annual salary in San Diego County is \$38,705 (Source: Employment Development Department)

Protecting A Vital Employment Base on San Diego Bay

Today's Issue

- If, and how, to clean up the Bay
- 20 years of discussion with Water Board and stakeholders
- Expert panel has recommended cleanup order

Bay is Healing Itself

- Recent testing shows improvement
- New sediment is covering old
- Creating a natural “cap”
- Natural attenuation is the best approach

What's at Stake?

1. Health of the Bay
2. National competitiveness
3. National security
4. Direct shipyard jobs
5. Overall economic impact of industry

A Balanced Solution is Needed

1. Resolve 20 years of discussion
2. Monitoring provides peace of mind
3. Minimal impact on the community

Our Request

- Natural attenuation is the best choice for environment and economy
- However, if something must be done, adopt the current order as it is written
