Regional Water Board Room  
San Diego Water Board Office Building  
9174 Sky Park Court, Suite 100  
San Diego, CA 92123-4340**

### **SUBJECT OF WORKSHOP**

The California Regional Water Quality Control Board, San Diego Region (San Diego Water Board) will continue an informational public workshop on December 12, 2012 at its regularly scheduled public meeting to receive information and discuss proposed requirements in the public draft of a Regional NPDES Permit for Municipal Separate Storm Sewer Systems (MS4s) Draining the Watersheds within the San Diego Region (Regional MS4 Permit) (Tentative Order No. R9-2013-0001). A public workshop was held on November 13, 2012, regarding the Tentative Order; however, the workshop was continued because more time is warranted to discuss certain proposed requirements of the Tentative Order. The San Diego Water Board posted the Tentative Order on October 31, 2012 at the following website:

[http://www.waterboards.ca.gov/sandiego/water\\_issues/programs/stormwater/index.shtml](http://www.waterboards.ca.gov/sandiego/water_issues/programs/stormwater/index.shtml)

### **BACKGROUND**

The San Diego Water Board is considering the adoption of a Regional MS4 Permit that will be issued to municipal Copermitees in San Diego County, Southern Orange County and Southwest Riverside County. Currently, each of these counties within the San Diego Region has its own MS4 Storm Water Permit. In order to better achieve regulatory consistency as well as maximum efficiency and economy of resources, the San Diego Water Board has drafted a single MS4 Permit based on the boundaries of the San Diego Region instead of county political boundaries. Under this approach, the Regional MS4 Permit will uniformly regulate all three counties within the San Diego Region once it becomes effective

<sup>1</sup> Text changes to the original November 26, 2012 notice are indicated in red.

for all Copermittees. The Regional MS4 Permit will also provide opportunities for a comprehensive monitoring framework, incentive for a regional collaborative approach, and opportunities for regional cost efficiencies among Copermittees. Upon adoption by the San Diego Water Board, this Regional MS4 Permit will be issued to all 39 Copermittees in a phased manner according to the expiration dates of their current MS4 Storm Water Permits and after consideration of Reports of Waste Discharge filed by the Orange County and Riverside County Copermittees.

## PROCEDURAL MATTERS

The San Diego Water Board held a public workshop on November 13, 2012 in which Water Board staff explained the permit development process and summarized significant elements of the Regional MS4 Permit for the San Diego Water Board Members and the public. Many Copermittees and other interested stakeholders voiced comments and concerns regarding the Tentative Order. At the conclusion of the item, San Diego Water Board members asked staff to prepare responses to specific questions (see attachment). The specific questions pertain to items of concern voiced at the public workshop and generally fall into one of three areas: hydromodification management, total maximum daily loads (TMDLs), and costs associated with storm water programs.

On December 12, 2012, the San Diego Water Board will continue the public workshop for this item. Water Board staff will provide oral responses to the questions posed by the San Diego Water Board members. Copermittees and members of the public are also invited to provide comments on the subject matter as permitted by the Chair. The San Diego Water Board may provide general feedback to staff on development of the Tentative Order; however, no action or voting will take place at this workshop.

The San Diego Water Board's acting Chair, Gary Strawn, has issued the following additional direction in response to requests from Copermittees and other interested persons wishing to make formal presentations at the December 12, 2012 workshop. The San Diego Water Board is not seeking formal presentations from the Copermittees or other interested persons on all of the questions posed to staff at the conclusion of the November 13, 2012 workshop and is not interested in rehashing presentations made at the November 13 workshop. The San Diego Water Board is seeking comments from Copermittees or other interested persons specifically on the questions related to 1) the projected costs of implementing the Tentative Order, including cost breakdowns, timeframes and comparisons with current expenditures and 2) the projected costs of not implementing the Tentative Order in terms of beach closures, public health effects, public costs and other pertinent considerations. The San Diego Water Board will allow comments pertaining to the other questions if the Copermittees or other interested persons wish to provide additional information not previously presented. Presentations may be informal, and if visual aids are necessary to convey information they will be permitted. To ensure a productive and efficient workshop, and to ensure that all attending have an opportunity to participate, presentations by Copermittees or other interested persons may be limited at the discretion of the acting Chair. This workshop has significant interest and to provide enough time for all interested persons to participate, participants with similar comments are requested to make joint presentations.

## INFORMATION REGARDING WORKSHOP

If you have any questions regarding the workshop, please contact Wayne Chiu at (858) 637-5558 or via e-mail at [wchiu@waterboards.ca.gov](mailto:wchiu@waterboards.ca.gov) or Laurie Walsh at (858) 467-2970 or via e-mail at [lwalsh@waterboards.ca.gov](mailto:lwalsh@waterboards.ca.gov).
