Hi Wayne

It was good chatting with you on Thursday, and to hear some of your thoughts about the Regional permit issues.

I discussed our suggestion to hold an informal off focus meetings meeting with some of the South County cities and the County to clear some of the misunderstandings and try to resolve some of the sticky points between us, and help us work towards a partnership that would hopefully result in less tension and more joint common goals. The South County group representatives would be happy to meet with you and anyone else you'd like to bring to the meeting. As we discussed, this meeting would not include any attorneys.

Please let me know what are some potential dates and times that you could attend, so that I could find a room and pull together some of the representatives from the neighboring cities.

I look forward to working closely with you toward a Success story for all of us.

Ziad
