

**San Diego Water Board Meeting**  
**Action Items**  
**February 10, 2021**  
**(underlined names are responsible for the action)**

**Item 3 – Future Agenda Items.**

1. Board Member Olson stated that when she first joined the Board, she asked for a briefing on chemicals that could impact the development of an unborn fetus (e.g. nitrate and perchlorate). After further reflection, Board Member Olson believes this topic is too specific and should instead look the range of chemicals that might cause problems with the symporter of the fetus and staff from the California Office of Environmental Health Hazard Assessment provide the information to the Board. State Water Resource Control Board (State Board) Liaison Firestone responded that the State Board performs an annual review of drinking water regulation and priorities and this year she is hoping the review will include information regarding risk. Liaison Firestone will keep the Board updated regarding State Board effort in this area.

**Course of Action:** Roger Mitchell will contact OEHHA and request a presentation for the Board.

Hours needed to complete request: 20

Estimated Completion Date: Summer 2021
