Subject: Staff Enforcement Letter for Southern California Edison Company, San Onofre Nuclear Generating Station, Order No. R9-2015-0073, NPDES No. CA0109282

Mr. Metz:

The California Regional Water Quality Control Board, San Diego Region (San Diego Water Board) has reviewed the following self-monitoring reports (SMRs) for the aforementioned facility:

- Monthly SMRs – April 2016 through August 2016
- Quarterly SMR – April 2016 through June 2016
- Semi-Annual SMR – January 2016 through June 2016

The following is a summary of the San Diego Water Board's findings:

- **Violation – Failure to report or use appropriate minimum levels (MLs), Attachment E, Section VII.B.4**

In accordance with Attachment E, section X.B.4, the laboratory used by the San Onofre Nuclear Generating Station (Discharger) is required to meet the minimum levels (MLs) specified in Appendix II of the California Ocean Plan. The laboratory reports documented a minimum detection limit (MDL) that is greater than the ML specified in Appendix II of the Ocean Plan for seven constituents in the semi-annual SMR.

- **Comment – Chlorine Monitoring Requirement, Attachment E, Table 9**

Total residual chlorine monitoring is required once per week at Monitoring Location M-002 and M-003 when the treatment units that are subject to Order No. R9-2015-0073 use chlorine for disinfection. Please indicate in subsequent reports whether or not chlorine was used for disinfection during the reporting period.

Pursuant to the California Water Code (CWC), the violation noted is subject to additional enforcement action(s) by the San Diego Water Board including a time schedule order, cease and desist order, cleanup and abatement order, imposition of administrative civil liability, referral to the district attorney for criminal prosecution, or referral to the attorney general. Administrative civil liability amounts
