

STATE OF CALIFORNIA  
CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD  
SAN FRANCISCO BAY REGION

STAFF SUMMARY REPORT (Jenny Chen)  
MEETING DATE: March 17, 2004

- ITEM:** 5D
- SUBJECT:** City of Emeryville, Sanitary Sewer Collection System, Alameda County – Issuance of New NPDES Permit
- CHRONOLOGY:** The Board has not previously considered this discharge.
- DISCUSSION:** This item will issue a new permit for the City of Emeryville. Emeryville was not one of the East Bay Communities originally receiving permits from the Board because it was thought that no sanitary sewer collection system overflows occurred within its city limits. More recent information shows this to be incorrect, so issuing Emeryville a permit like the ones for the other East Bay Communities is appropriate.
- The Tentative Order (Appendix A) contains requirements identical to those in the Tentative Order for Item 5A, but has facility descriptions that are specific to Emeryville. The comments and response to comments for Item 5A applies to this item. Please refer to the SSR for Item 5A for further discussion.
- RECOMMENDATION:** Adoption of the Tentative Order
- File Number:** 2199.9445 (JC)
- APPENDICES:** A. Tentative Order  
B. Fact Sheet
