

**Table 7.4.3-1. Numeric Targets to Protect Water Contact Recreation in Pillar Point Harbor Beaches and Venice Beach**

<b>Indicator</b>	<b>Geometric Mean<sup>a</sup> (cfu/100 mL)<sup>b</sup></b>	<b>Statistical Threshold Value (cfu/100 mL)<sup>b</sup></b>
Enterococci	30	110

a The waterbody geometric mean shall not be greater than the geometric mean threshold in any six-week interval, calculated weekly. The maximum daily load is 110 cfu/100 mL (i.e., equivalent to the statistical threshold value).

b Cfu per 100 milliliters of sample is equivalent to most probable number per 100 milliliters of sample.
