

CITY COUNCIL 2011

KEVIN MULLIN, MAYOR  
RICHARD A. GARBARINO, VICE MAYOR  
MARK ADDIEGO, COUNCILMEMBER  
PEDRO GONZALEZ, COUNCILMEMBER  
KARYL MATSUMOTO, COUNCILMEMBER

BARRY M. NAGEL, CITY MANAGER

OFFICE OF THE SUPERINTENDENT OF  
WATER QUALITY CONTROL  
(650) 877-8555  
FAX (650) 829-3855

September 12, 2011

Ms. Sue Ma  
San Francisco Bay Regional Water Quality Control Board  
1515 Clay St., Suite 1400  
Oakland, CA 94612

Subject: Annual Report July 1, 2010 through June 30, 2011

Dear Ms. Ma:

This report was developed and submitted in accordance with the following certification standard:

I certify, under penalty of law, that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or person(s) who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for known violators.

If you have any questions, please contact Cassandra Prudhel at 650-829-3840.

Sincerely,

Cassandra Prudhel  
Technical Services Supervisor  
City of South San Francisco

MARK N. ADDIEGO, MAYOR  
KEVIN MULLIN, VICE MAYOR  
RICHARD A. GARBARINO, COUNCILMEMBER  
PEDRO GONZALEZ, COUNCILMEMBER  
KARYL MATSUMOTO, COUNCILMEMBER

BARRY M. NAGEL, CITY MANAGER

August 11, 2010

OFFICE OF THE CITY MANAGER

Mr. Bruce Wolfe, Executive Officer  
San Francisco Bay Regional Water Quality Control Board  
1410 Clay Street Suite 1400  
Oakland, CA 94612

Subject: Notification of Duly Authorized Representative for City of South San Francisco

Dear Mr. Wolfe:

This letter will serve to document the person or position and alternate(s) I am authorizing to represent the City of South San Francisco for signing and certifying municipal regional stormwater NPDES-permit required reports for submittal to the San Francisco Bay Regional Water Quality Control Board (Regional Water Board) and signing and certifying responses to other information requests from the Regional Water Board.

The following positions (any person who occupies these named positions) are duly authorized by me to sign and certify stormwater required reports for submittal to the Regional Water Board or authorize the City/County Association of Governments (C/CAG) of San Mateo County to sign and certify countywide/regional reports and studies prepared on behalf of the City of South San Francisco.

**Technical Services Supervisor**  
**Alternate: Senior Environmental Compliance Inspector**

As describe above, the person or position and alternate(s) listed above are also authorized to direct C/CAG's Executive Director or San Mateo Countywide Water Pollution Prevention Program's Stormwater Coordinator to sign and certify reports prepared by the San Mateo Countywide Water Pollution Prevention Program (Countywide Program) or Bay Area Stormwater Management Agencies Association (BASMAA) on behalf of the city. This authorization for the submittal of countywide and BASMAA reports will typically occur by an affirmative vote of my duly authorized representative or alternate at the Countywide Program's

Stormwater Technical Advisory Committee meetings, but the authorization may also be obtained through email, telephone, face to face contact, or other method of communication.  
This notification will remain in effect until it is changed by me or my successor.

Very truly yours,

A handwritten signature in black ink, appearing to read "Barry M. Nagel", is written over a circular stamp or seal.

Barry M. Nagel, City Manager  
City of South San Francisco

cc: Superintendent of WQCP  
Superintendent of Public Works  
Technical Services Supervisor  
Senior Environmental Compliance Inspector

City Hall: 400 Grand Avenue • South San Francisco, CA 94080 • P.O.Box 711 • South San Francisco, CA 94083  
Phone: 650.877.8500 • Fax: 650.829.6609

**Section 2 - Provision C.2 Reporting Municipal Operations**

<p><b>Program Highlights and Evaluation</b>          Highlight/summarize activities for reporting year:</p>
<p><b>Summary: Refer to the C.2 Municipal Operations section of the countywide Program's FY 10-11 Annual Report for a description of activities implemented at the countywide and/or regional level.</b></p>

<p><b>C.2.a. ► Street and Road Repair and Maintenance</b></p>						
<p>Place an <b>X</b> in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type <b>NA</b> in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and provide explanation in the comments section below:</p>						
<table border="1"> <tr> <td style="text-align: center;"><b>X</b></td> <td>Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater</td> </tr> <tr> <td style="text-align: center;"><b>X</b></td> <td>Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.</td> </tr> <tr> <td style="text-align: center;"><b>X</b></td> <td>Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.</td> </tr> </table>	<b>X</b>	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater	<b>X</b>	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.	<b>X</b>	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.
<b>X</b>	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater					
<b>X</b>	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.					
<b>X</b>	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.					
<p><b>Comments: All BMPs have been implemented and are in practice for street and road repair.</b></p>						

<p><b>C.2.b. ► Sidewalk/Plaza Maintenance and Pavement Washing</b></p>				
<p>Place an <b>X</b> in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type <b>NA</b> in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:</p>				
<table border="1"> <tr> <td style="text-align: center;"><b>X</b></td> <td>Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater</td> </tr> <tr> <td style="text-align: center;"><b>X</b></td> <td>Implementation of the BASMAA Mobile Surface Cleaner Program BMPs</td> </tr> </table>	<b>X</b>	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater	<b>X</b>	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs
<b>X</b>	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater			
<b>X</b>	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs			
<p><b>Comments: All BMPs have been implemented and are in practice.</b></p>				

Permittee Name: City of South San Francisco

**C.2.c. ► Bridge and Structure Maintenance and Graffiti Removal**

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

<b>X</b>	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
<b>X</b>	Control of discharges from graffiti removal activities
<b>X</b>	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
<b>X</b>	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal
<b>X</b>	Employee training on proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.
<b>X</b>	Contract specifications requiring proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.

**Comments: No additional comments.**

**C.2.d. ► Stormwater Pump Stations**

Does your municipality own stormwater pump stations:  **Yes**  **No**

If your answer is **No** then skip to **C.2.e.**

Complete the following table for dry weather DO monitoring and inspection data for pump stations (add more rows for additional pump stations):

Pump Station Name and Location	First Inspection Dry Weather DO Data		Second Inspection Dry Weather DO Data	
	Date	mg/L	Date	mg/L
Airport Blvd. Northbound – 54 Airport Blvd.	9-17-10	6.04	10-8-10	6.73
Airport Blvd. Southbound – 125 Airport Blvd.	9-17-10	3.60	10-8-10	9.22
Shaw Road – 291 Shaw Road	9-17-10	No water	10-8-10	4.20
South Maple - Near 270 South Maple	9-17-10	2.19	10-8-10	3.81
South Canal Pump Station – South Canal – <i>No longer in service</i>	9-17-10	NA	10-8-10	NA
South Linden Pump Station – South Linden	9-17-10	4.73	10-8-10	3.91
Granite Rock Pump Station – West of 1335 Lowrie Ave. – <i>No longer in service</i>	9-17-10	NA	10-8-10	NA
San Mateo Ave Pump Station – Near 1481 San Mateo Ave.	9-17-10	5.84	10-8-10	6.70
South Airport Blvd. Pump Station – 245 Airport Blvd.	9-17-10	No Water	10-8-10	No Water
Produce Ave. Pump Station	9-17-10	3.77	10-8-10	3.97

Summarize corrective actions as needed for DO monitoring at or below 3 mg/L. Attach inspection records of additional DO monitoring for corrective actions:

**Summary: On September 17, 2010 the South Maple Pump Station had a D.O. of 2.19 mg/L which was below the threshold of 3.0 mg/L. The water in the wet well of the pump station was removed by a VAC Truck on Monday, 9-20-10.**

**The South Maple Pump Station was retested on 9-23-11 (the DO was 3.81 mg/L) and 9-29-10 (the DO was 4.01).**

**Attachments:**

**See Attachment A.**

Complete the following table for wet weather inspection data for pump stations (add more rows for additional pump stations):

Pump Station Name and Location	Date (2x/year required)	Presence of Trash (Cubic Yards)	Presence of Odor (Yes or No)	Presence of Color (Yes or No)	Presence of Turbidity (Yes or No)	Presence of Floating Hydrocarbons (Yes or No)
Airport Blvd. Northbound – 54 Airport Blvd.	1-31-11	<0.15	No	Yes	Yes/Low	Yes/Low
Airport Blvd. Southbound – 125 Airport Blvd.	1-31-11	<0.15	No	Yes	Yes/Low	Yes/Low
Shaw Road – 291 Shaw Road	1-31-11	<0.15	No	Yes	Yes/Low	Yes/Low
South Maple - Near 270 South Maple	1-31-11	<0.15	Yes	Yes	Yes/Low	Yes/Low
South Linden Pump Station – South Linden	1-31-11	1.6	Yes	Yes	Yes/Low	Yes/Low
San Mateo Ave Pump Station – Near 1481 San Mateo Ave.	1-31-11	<0.15	No	Yes	Yes/Low	Yes/ Low
South Airport Blvd. Pump Station – 245 Airport Blvd.	1-31-11	Empty	NA	NA	NA	NA
Produce Ave. Pump Station -	1-31-11	No	No	Yes	Yes/Low	Yes/Low
South Canal Pump Station – South Canal	1-31-11	Out of Service				
Granite Rock Pump Station – West of 1335 Lowrie Ave.	1-31-11	Out of Service				
Airport Blvd. Northbound – 54 Airport Blvd.	4-14-11	<0.15	No	No	No	Yes/Low
Airport Blvd. Southbound – 125 Airport Blvd.	4-14-11	0	No	No	No	No
Shaw Road – 291 Shaw Road	4-14-11	<0.15	No	No	Yes/Low	Yes/Low
South Maple - Near 270 South Maple	4-14-11	<0.15	No	No	No	No
South Linden Pump Station – South Linden	4-14-11	App. 0.80	No	Yes	Yes/Low	Yes/Low
San Mateo Ave Pump Station – Near 1481 San Mateo Ave.	4-14-11	App. 0.30	Yes	No	Yes/Low	Yes/Low
South Airport Blvd. Pump Station – 245 Airport Blvd.	4-14-11	0	Yes	No	No	No
Produce Ave. Pump Station -	4-14-11	0	No	No	Yes/Low	No
South Canal Pump Station – South Canal	4-14-11	Out of Service				
Granite Rock Pump Station – West of 1335 Lowrie Ave.	4-14-11	Out of Service				

<b>C.2.e. ► Rural Public Works Construction and Maintenance</b>			
Does your municipality own/maintain rural roads:		<input type="checkbox"/>	<input checked="" type="checkbox"/> Yes <input checked="" type="checkbox"/> No
If your answer is <b>No</b> then skip to <b>C.2.f.</b>			
Place an <b>X</b> in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:			
<input type="checkbox"/>	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas		
<input type="checkbox"/>	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources		
<input type="checkbox"/>	No impact to creek functions including migratory fish passage during construction of roads and culverts		
<input type="checkbox"/>	Inspection of rural roads for structural integrity and prevention of impact on water quality		
<input type="checkbox"/>	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion		
<input type="checkbox"/>	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate		
<input type="checkbox"/>	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings		
Comments including listing increased maintenance in priority areas:			

Permittee Name: City of South San Francisco

<b>C.2.f. ► Corporation Yard BMP Implementation</b>			
Place an <b>X</b> in the boxes below that apply to your corporations yard(s):			
<input type="checkbox"/>	We do not have a corporation yard		
<input type="checkbox"/>	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit		
<input checked="" type="checkbox"/>	We have a current <b>Stormwater Pollution Prevention Plan (SWPPP)</b> for the Corporation Yard(s)		
Place an <b>X</b> in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type <b>NA</b> in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:			
<input checked="" type="checkbox"/>	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment		
<input checked="" type="checkbox"/>	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system		
<input checked="" type="checkbox"/>	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method		
<input checked="" type="checkbox"/>	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used		
<input checked="" type="checkbox"/>	Cover and/or berm outdoor storage areas containing waste pollutants		
Comments: <b>No additional comments.</b>			
If you have a corporation yard(s) that is not an NOI facility , complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information:			
Corporation Yard Name	Inspection Date (1x/year required)	Inspection Findings/Results	Follow-up Actions
City of South San Francisco Corp Yard	10-12-10	Needed to cover stock piles of landscaping/backfill materials.	Corp yard used tarps and wattles to cover materials and protect storm drains.
Follow-up inspection	1-10-11	BMPs were employed and effective.	None

# Municipal Corporation Yard Inspection Form

Municipality: SSF

Location of Corporation Yard Inspected: SSO Canal - SSF

Date and Time of Inspection: 10/12/10

Name of Person and Position Conducting Inspection: R Lece

### A. General Good Housekeeping BMPs Being Implemented (Check all that were observed/determined):

- Clean and orderly corporation yard maintained
- Materials with potential to discharge to stormwater covered prior to rains
  - Not able to determine during inspection
- Containers are not overfilled and lids are kept closed when not in use
- Storm drain inlet labels are maintained
- A sufficient number of covered litter receptacles are used and maintained
- Materials and wastes are stored as far away from storm drain inlets as practicable
- Vehicles and equipment are maintained to minimize drips and leakage
- Spill containment kits/clean up materials available at locations where there are potential for spills
- Dry clean up methods are used for any spills or leaks
- Corporation yard maintenance staff has been trained to use BMPs listed in the Corporation Yard's Site Specific Stormwater Pollution Prevention Plan
- Describe any improvements needed: \_\_\_\_\_

### B. Vehicle and Equipment Washing (Check all that were observed/determined):

- Vehicle and/or equipment washing occurs at the corporation yard, if not skip to next section
  - Washing activities are located under a roof or in a building equipped with a municipal sewer connection
  - Vehicle washing area is adequately sized for vehicles being washed and to minimize drag-out from washed vehicles so there is no flow to storm drain inlets
  - All vehicle washing systems are maintained and cleaned out on a regular schedule
  - Outdoor equipment washing occurs and the following BMPs are used:
    - Wash area is paved and surrounded by berms or graded to prevent washwater from flowing off and stormwater from adjoining areas from flowing onto the wash area
    - Wash area is sloped to collect washwater
    - Washwaters drain to a dead-end sump or an oil-water separator connected to sanitary sewer
  - Describe any improvements needed: \_\_\_\_\_

### C. Vehicle and Equipment Maintenance and Repair (Check all that were observed/determined):

- Vehicle and/or equipment maintenance occurs at corporation yard, if not skip to next section
  - Vehicle and/or equipment maintenance are conducted indoors whenever feasible
  - Drain and drip pans or open containers of fluids are not left lying around
  - Vehicle and/or equipment maintenance and repair area is swept at least weekly

- Drip pans are used under leaky vehicles and equipment, and absorbent pads and materials are used as appropriate
- All fluids from wrecked vehicles are drained immediately using an adequately sized drain or drip pan
  - Not able to determine during inspection
- Used absorbent material from cleaning small spills is promptly and properly removed
- Vehicle and equipment maintenance are not performed outdoors during rain events unless required by emergency conditions
  - Not able to determine during inspection
- If temporary work must be conducted outdoors, a tarp, ground cloth, or drip pan is placed under the vehicle or equipment to capture spills and drips
  - Not able to determine during inspection
- Describe any improvements needed: \_\_\_\_\_

**D. Fuel Dispensing** (Check all that were observed/determined):

- Fuel dispensing occurs at the corporation yard, if not skip to the next section
- Fuel dispensing area is covered by a roof or canopy so that rainwater cannot contact the fueling area
- Fueling area is paved with Portland cement (or an equivalent smooth, impervious surface) with a 2 to 4% slope to prevent ponding, and it is separated by a grade break from the rest of the site
- Signs are posted to remind employees not to top off fuel tank
- Current spill response plan is available for fuel dispensing
- Fueling area is inspected daily during use and any deficiencies found are corrected
- Describe any improvements needed: \_\_\_\_\_

**E. Municipal Vehicle, Heavy Equipment, and Employee Parking** (Check all that were observed/determined):

- Parking lots are swept at least weekly to prevent accumulation of trash and litter
- When surface cleaning is conducted, BASMAA's "Pollution from Surface Cleaning" BMPs are used
  - Not able to determine during inspection - Part of SWPPP
- Paving and other equipment that has the potential to drip have drip pans or absorbent materials placed under the equipment to contain any leaks or spills
- Heavy equipment is inspected for leaks during each work day and repairs are made as soon as possible
- Drip pans or absorbent material are used under leaking vehicles and equipment until repairs are made
- Parking lots are inspected at least weekly to assure BMPs are used
- Describe any improvements needed: \_\_\_\_\_

**F. Waste and Recycling Storage** (Check all that were observed/determined):

- Dumpster and waste recycling areas are inspected, swept, and picked up daily during work days
- Rubbish and recyclables that have been collected from streets and storm drains are stored under a roof or cover, if possible

- Street sweeping waste and materials removed during storm drain cleaning are stored on a concrete or asphalt pad in a contained area. Water including decanted water from collected wastes drains to sanitary sewer or is allowed to evaporate so it doesn't flow to storm drain inlets
- Hazardous wastes are stored in compliance with hazardous waste regulations
- Describe any improvements needed: \_\_\_\_\_

**G. Outdoor Material Storage** (Check all that were observed/determined):

- Material is stored outdoors at corporation yard, if not do not complete this section
  - To the extent feasible materials that must be stored outside are stored in a roofed area that is bermed to prevent contact with stormwater
  - Stockpiles of raw materials that cannot be stored under a roof are kept covered when the material is not being used
  - If stockpiles are so large that they cannot feasibly be stored under a roof or covered, erosion control BMPs are used at the perimeter of the stockpile and sediment controls BMPs at downstream storm drain inlet(s)
  - Fluids are stored within secondary containment to prevent accidental release Water
  - Caution and control are used when transferring liquids to minimize spills
    - Not able to determine during inspection
  - Containers are kept out of pooled or standing water
    - Not able to determine during inspection
  - Storage areas are inspected regularly to detect any leaks and spills
  - Describe any improvements needed: \_\_\_\_\_

Additional Comments: - Tarps on order

- Has covered metal bin

- Street sweeping waste to WQCP

Section 3 - Provision C.3 Reporting New Development and Redevelopment

**C.3.a. ► New Development and Redevelopment Performance  
Standard Implementation Summary Report**

*(For FY 10-11 Annual Report only) Provide a brief summary of the methods of implementation of Provisions C.3.a.i.(1)-(8).*

**Summary:**

1. The City of South San Francisco currently has legal authority to implement C.3 under Municipal Code Chapter 14.04 Stormwater Management and Discharge Control. The Environmental Compliance Staff is working on revisions to the Municipal Code that will bring it in line with the Municipal Regional Permit
2. The Building and Planning Divisions of the City of South San Francisco route all plans to the Water Quality Control Plant (WQCP) that have the potential to affect stormwater during construction and that require treatment after construction. They also forward plans to the WQCP that propose any changes to indoor plumbing. These plans are reviewed and requirements for site controls and source control measures are described. Additionally, the NPDES Impervious Surface Data Collection Worksheet, Project Applicant Checklist and Operation and Maintenance Information for Stormwater Treatment Measures form are required to be completed and returned to the WQCP. Permit issuance is dependent upon approval of the WQCP. If approval is not sought then the WQCP has the authority to stop work on an active site.
3. If a proposed activity has the potential to cause a significant adverse environmental impact, an environmental impact report (EIR) must be prepared and its adequacy certified before action may be taken on the proposed project. The Planning Division oversees the completion of the EIR and distributes the EIR to the various City Departments for review and approval.
4. Two of the Environmental Compliance Inspectors attended the January 25<sup>th</sup> Stormwater Orientation Training which included an overview of the C3 permit requirements. While there has not been formal training of other City departments since May 2010, the WQCP staff attends a monthly Technical Advisory Group meeting with other City departments. At this meeting upcoming projects are discussed and comments are accepted. WQCP staff also takes this opportunity to discuss with the Building and Planning Divisions the implementation dates of various requirements of the MRP and how these requirements must be met. Training by Environmental Compliance staff included: two inspectors attended QSP Training, one staff member attended training on Low Impact Development and one Inspector attended How to Become, Perform and Interact with a QSP.
5. Outreach materials are provided along with plan check requirements as stated above in Item #2 including NPDES Checklists, O & M forms, and information on various stormwater treatment devices. The City also sends out letters each year to developers directing them to the Countywide Program's website which makes many outreach guidance documents available.
6. Projects that are reviewed by the WQCP staff are encouraged to implement site design measures where appropriate. Unregulated projects are encouraged to use planters and tree boxes if the project area is small, and the use of pervious pavement is also recommended.
7. Source control measures are part of the building and planning comment template that has been created. Source control requirements that are applicable to the project are implemented.
8. The General Plan was adopted in 1999. The General Plan includes a chapter on Open Space and Conservation Development which includes policies on Habitat and Biological Resources Conservation and Water Quality. See Attachment B.

**C.3.b. ► Green Streets Status Report**

(All projects to be completed by December 1, 2014)

On an annual basis (if applicable), report on the status of any pilot green street projects within your jurisdiction. For each completed project, report the capital costs, operation and maintenance costs, legal and procedural arrangements in place to address operation and maintenance and its associated costs, and the sustainable landscape measures incorporated in the project including, if relevant, the score from the Bay-Friendly Landscape Scorecard.

**Summary: See the C.3 New Development and Redevelopment section of the countywide program's FY 10-11 Annual Report for a description of any activities conducted at the countywide or regional level.**

**C.3.b.v.(1) ► Regulated Projects Reporting Table**

See attached table C.3.b.v.(1).

**C.3.c. Low Impact Development Reporting**

See the Countywide program annual report and/or the BASMAA summary report that describe the submittals made during FY 10-11 (i.e., Biotreatment Soil Specifications, Special Projects Proposal, Feasibility/Infeasibility Criteria Report, and Green Roof Specifications).

**C.3.h.iv. ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting**

(1) See the attached table C.3.h.iv.(1).

(2) On an annual basis, provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.

**Summary: As was the case during FY 09/10, inspections of treatment devices identified the need for better/more frequent maintenance. Of the 17 inspections completed, six treatment systems or 35% required maintenance. Three of these systems were drain inserts and three were oil/grit separators. By comparison, last year of the 17 systems inspected only four needed maintenance. The four systems that needed maintenance last year were an oil/grit separator, a vegetated swale, a drain insert and a vortex separator.**

(3) On an annual basis, provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).

**Summary:** We have developed a spreadsheet listing all facilities and the treatment systems associated with those facilities. At this time, the City of South San Francisco has approximately 75 treatment systems installed. The inspectors do occasionally locate additional treatment systems that are not on the spreadsheet when performing other stormwater inspections. These systems are added to the spreadsheet when they are located. Environmental Compliance Inspectors perform O&M inspections at a rate of 16-20 devices every year. The facility list is reviewed and updated as new systems are installed and additional systems are located.

There are no proposed changes or improvements to the O&M Program at this time.

**C.3.b.v.(1) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period**

Project Name Project No.	Project Location, Street Address	Name of Developer	Project Phase No.	Project Type & Description	Project Watershed	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New Impervious Surface Area (ft <sup>2</sup> )	Total Replaced Impervious Surface Area (ft <sup>2</sup> )	Total Pre- Project Impervious Surface Area (ft <sup>2</sup> )	Total Post- Project Impervious Surface Area (ft <sup>2</sup> )
<b>Private Projects</b>											
Mid-Peninsula Housing	636 El Camino Ponderosa Road and West Orange Ave.	Devcon	NA	Redevelopment/ 130 apt. units	Colma Creek/ San Francisco Bay	1.81	1.81	55,126	22,651	22,651	77,777

Project Name Project No.	Application Deemed Complete Date	Application Final Approval Date	Source Control Measures	Site Design Measures	Treatment Systems Approved	Operation & Maintenance Responsibility Mechanism	Hydraulic Sizing Criteria	Alternative Compliance Measures	Alternative Certification	HM Controls
<b>Private Projects</b>										
Mid-Peninsula Housing	6-29-09	6-23-10	Fire sprinkler test water discharged to sanitary sewer or landscape, covered and enclosed trash areas, efficient landscape irrigation, storm drain stenciling	Minimize impervious areas from being directly connected to the storm drain system, maximize permeability by clustering development and preserving open space, concentrate development density, use permeable pavement where feasible	Bioretention area/ rain garden, permeable pavers	Private landowner	3.	Not applicable	Not applicable	Drains to hardened channel

**C.3.b.v.(1) ► Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period**

Project Name Project No.	Application Deemed Complete Date	Application Final Approval Date	Source Control Measures	Site Design Measures	Treatment Systems Approved	Operation & Maintenance Responsibility Mechanism	Hydraulic Sizing Criteria	Alternative Compliance Measures	Alternative Certification	HM Controls
South San Francisco Logistics Center	6-6-08	8-6-09	Plumb interior floor drains to sanitary sewer, label storm drains, minimize pesticides, enclosed and covered dumpsters, and grade away from loading docks.	Disconnect downspouts, micro detention landscaping, install stormwater treatment devices	Bioretention and CDS units	Private landowner	2.C.	Not applicable	Not applicable	Drains to hardened channel
Compass Transportation	11-14-10	4-21-11	Stencil storm drains,	Protect sensitive areas, minimize land disturbance and impervious surfaces, minimize impervious areas from being directly connected to the storm drain system	Bioretention area, rain garden	Private landowner	3	Not applicable	Not applicable	Drains to hardened channel

**C.3.b.v.(1) ► Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period**

Project Name Project No.	Application Deemed Complete Date	Application Final Approval Date	Source Control Measures	Site Design Measures	Treatment Systems Approved	Operation & Maintenance Responsibility Mechanism	Hydraulic Sizing Criteria	Alternative Compliance Measures	Alternative Certification	HM Controls
Genentech Upper Campus Plaza Upgrade	4-25-11	Pending	Storm drain stenciling, landscape minimizes irrigation and runoff	Protect sensitive areas, minimize land disturbance, minimize impervious areas, maximize permeability by clustering development, concentrate development density, use Bay Friendly landscape design	2/ Vegetated swales, 3/ media filters	O & M by private landowner	2.C.	Not applicable	Not applicable	Drains to hardened channel
Gimbals	3-14-11	Pending	Storm drain stenciling,	Minimize land disturbance and impervious surfaces	Media filter	O & M by private landowner	2.C.	Not applicable	Not applicable	Drains to hardened channel

**C.3.h.iv. ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting**

Fill in table below or attach your own table including the same information.

Name of Facility/Site Inspected	Address of Facility/Site Inspected	Newly Installed? (YES/NO)	Party Responsible For Maintenance	Date of Inspection	Type of Inspection	Type of Treatment/HM Control(s) Inspected	Inspection Findings or Results	Enforcement Action Taken	Comments
Xtra-Oil	110 Hickey Blvd.	No	Xtra Oil Co.	2-2-11	Routine	Drain inserts	Remove debris from inserts	None	None
Genentech Building 51	642 Forbes Blvd.	No	Genentech, Inc. Facilities	2-21-11	Routine	Vortex separator, vegetated swale, media filters	Part of the treatment is not plumbed properly, The remaining treatment has proper O & M	Verbal Notice	This building is slated for demolition in the next few years so no adjustment will be made at this time.
Zarc Recycling	26 South Linden Ave.	No	Zarc Recycling	2-22-11	Routine	Bioretention facility, vegetated swale	Proper O & M	None	None
Federal Express Ground	222 Littlefield Ave.	No	Sid Valledor	4-4-11	Routine	Drain inserts (4)	Maintenance required	Verbal Notice	None
Genentech Building 31	1531 Grandview Drive	Yes	Genentech, Inc. Facilities	4-26-11	45-day	Vegetated swale	Installed Properly, Proper O & M	None	None
Flyers	176 Gateway Blvd.	No	Nella Oil	4-26-11	Routine	Oil/grit separator	Maintenance required	Verbal Notice	Service completed by 5-14-11
Oyster Point Marina	96 Harbor Master Road	No	San Mateo County Harbor District	6-13-11	Routine	Five Oil/grit separators	Proper O & M	None	None
233 South Maple Ave. – Business Park	233 South Maple Ave.	No	Mr. Welch	6-14-11	Routine	Oil/grit separator and CDS unit	Maintenance required	Verbal Notice	None
Airport Shell	899 Airport Blvd.	No	Shell Corporation	6-15-11	Routine	Oil/grit separator	Proper O & M	None	None
Miller Parking Garage	329 Miller Ave.	Yes	City of South San Francisco	6-21-11	45-Day/ Routine	Vortex separator	Proper O & M	None	None
401-421 South Canal Street	401-421 South Canal Street	No	Vic Cantanzaro	6-21-11	Routine	Vortex separator	Proper O & M	None	None

**C.3.h.iv. ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting**

Fill in table below or attach your own table including the same information.

Name of Facility/Site Inspected	Address of Facility/Site Inspected	Newly Installed? (YES/NO)	Party Responsible For Maintenance	Date of Inspection	Type of Inspection	Type of Treatment/HM Control(s) Inspected	Inspection Findings or Results	Enforcement Action Taken	Comments
Genentech Childcare Center	444 Allerton Ave.	No	Genentech, Inc. - Facilities	6-28-11	Routine	Vortex separator, drain inserts, vegetated swale	Proper O & M	None	None
Genentech Building 39	501 Grandview Ave.	No	Genentech, Inc. - Facilities	6-28-11	Routine	Vortex separator, drain inserts, vegetated swale	Proper O & M	None	None
Genentech Building 9A	640-660 Forbes Blvd.	No	Genentech, Inc. - Facilities	6-28-11	Routine	Oil/grit separator	Proper O & M	None	None
Britannia Oyster Point	1100-1180 Veterans Blvd.	No	CB Richard Ellis	6-29-11	Routine	Oil/grit separator	Proper O & M	None	None
3572 Callan Blvd.	3572 Callan Ave.	No	Unknown	6-29-11	Routine	Oil/grit separator	Requires maintenance	None	Will contact property owner
Costco Wholesale	451 S. Airport Blvd.	No	Costco	6-30-11	Routine	Drain inserts	Requires repair	None	Must repair/replace by August 30, 2011 Staff met with Costco in late August. At that time they asked for more time. They were informed that the repair had to be completed before the rainy season.

**Section 4 – Provision C.4 Industrial and Commercial Site Controls**

**Program Highlights**

Provide background information, highlights, trends, etc.

Each year, the business inspection plan (Attachment C) is reviewed to make sure that it continues to meet the needs of the industrial and commercial inspection program. The facilities list (Attachment C) is reviewed to determine the inspection frequencies and priorities for the coming fiscal year. The facility spreadsheet is updated as needed. A list of facilities to be inspected for the next fiscal year is generated in June (Attachment D). Inspectors work from this spreadsheet. Businesses are lined out as they are inspected. A master inspection spreadsheet is also updated after each inspection or at the end of each day. The findings of each inspection are summarized on the spreadsheet. More details are included on the inspection forms. Follow-up inspections are performed as needed. Inspectors attended the Pretreatment, Pollution Prevention and Stormwater Conference February 28 – March 3, 2011 in Santa Clara. Additionally, two inspectors attended the San Mateo Countywide Program Stormwater Orientation Training in January 2011. In June 2010 all inspectors completed training for PCBs, Mercury and Copper. The Senior Inspector is on the CII Committee and the CII Planning Committee.

For additional information refer to the C.4. Industrial and Commercial Site Controls section of the Program's FY 10-11 Annual Report for a description of activities of the countywide program and/or the BASMAA Municipal Operations Committee.

**C.4.b.i. ► Business Inspection Plan**

Do you have a Business Inspection Plan?  Yes  No

If No, explain: **We have a business inspection plan. (See Attachment C)**

**C.4.b.iii.(1) ► Potential Facilities List**

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

**See Attachment C.**

**C.4.b.iii.(2) ► Facilities Scheduled for Inspection**

List below or attach your list of facilities scheduled for inspection during the current fiscal year.

**See Attachment D.**

**C.4.c.iii.(1) ► Facility Inspections**

Fill out the following table or attach a summary of the following information. Indicate your violation reporting methodology below.

<input checked="" type="checkbox"/>	Permittee reports multiple discrete violations on a site as one violation.
<input type="checkbox"/>	Permittee reports the total number of discrete violations on each site.

	Number	Percent
Number of businesses inspected	316	
Total number of inspections conducted	363	
Number of violations (excluding verbal warnings)	4	
Sites inspected in violation	60	17%
Violations resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner	60	100%

**Comments:** Sites inspected found in violation are reported as one violation per site, even if multiple discrete violations are documented. The number of inspections exceeds the number of businesses inspected because of follow-up inspections that were performed to verify resolution of enforcement actions. Any violation not resolved at the time of a follow-up inspection is considered to be part of the original violation, so is not counted separately. Some violations did not warrant a follow-up inspection because the issue was addressed at the time of the inspection. All violations were resolved within 10 days, or if additional time was given it was determined that this time was needed to complete more complicated maintenance or housekeeping. See Attachment E for the list of businesses and an explanation of the maintenance and housekeeping issues that required additional time.  
 Sites inspected in violation include verbal warnings. There were a total of 56 verbal warnings, three warning notices and one administrative action.

**C.4.c.iii.(2) ► Frequency and Types/Categories of Violations Observed**

Fill out the following table or attach a summary of the following information.

Type/Category of Violations Observed	Number of Violations
Actual discharge (e.g. active non-stormwater discharge or clear evidence of a recent discharge)	7
Potential discharge and other	53

**Comments:** Discharge streams are counted as one discharge per inspection per site. "Actual discharges" are active, non-stormwater discharges or clear evidence of recent discharges. All other violations are considered to be potential discharges: Improper material storage, open or leaky dumpsters, poor housekeeping, improper storage of used oil containers, etc. are all counted as "potential discharges and other".

**C.4.c.iii.(2) ▶ Frequency and Type of Enforcement Conducted**

Fill out the following table or attach a summary of the following information.

	<b>Enforcement Action</b> (as listed in ERP)	<b>Number of Enforcement Actions Taken</b>	<b>% of Enforcement Actions Taken</b>
Level 1	Verbal warning/warning letter(NOV)/compliance meeting	59	98.3
Level 2	Administrative citation	1	1.7
Level 3	Cease & desist order/Notice to Abate	0	0
Level 4	Criminal penalties/Civil injunctions	0	0
<b>Total</b>		60	100

**C.4.c.iii.(3) ▶ Types of Violations Noted by Business Category**

Fill out the following table or attach a summary of the following information.

<b>Business Category</b>	<b>Number of Actual Discharge Violations</b>	<b>Number of Potential/Other Discharge Violations</b>
Restaurants/Food Facilities	4	17
Auto Facilities	2	13
NOIs	0	3
Nurseries	0	1
Building materials/Construction	0	2
SIUs	1	1
Powder Coating	0	1
Supermarket	0	2
Machine Shop	0	4
Cargo/Shipping	0	4
Retail	0	3
Manufacturing	0	2

**C.4.c.iii.(4) ▶ Non-Filers**

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

**There were no industries identified as non-filers during scheduled inspections during this fiscal year.**

<b>C.4.d.iii ▶ Staff Training Summary</b>				
<b>Training Name</b>	<b>Training Dates</b>	<b>Topics Covered</b>	<b>No. of Inspectors in Attendance</b>	<b>Percent of Inspectors in Attendance<sup>1</sup></b>
PCBs, Copper and Mercury	June 2010	PCBs, Copper and Mercury	4	100
Stormwater Program Orientation	January 2011	Review of New Development and Construction Site Controls, Public information and Outreach, Industrial and Commercial Site Controls, Illicit Discharge Detection and Elimination and Pollutants of Concern, Maintenance Operations, Pesticides Toxicity Control, and Trash Load Reduction and Watershed Assessment and Monitoring	2	50
CWEA Pretreatment, Pollution Prevention and Stormwater Conference	February 28 – March 2, 2011	Emerging Contaminants, Pyrethroids, DTSC's Efforts on Nano Technology, Copper, Action of Plastics, Stormwater and Trash, Update on the Statewide NPDES Stormwater Program, San Francisco Bay MRP Update, Permitting and Enforcement in the Santa Ana Region, Construction Stormwater, How to Become, Perform and Interact with a QSP, The ERP: Adapting to an Evolving Regulatory Environment, Environmental Compliance Inspector Training, Pollution prevention, and Low Impact Development.	5	100
QSP Training	December 6-7, 2010	Overview and Regulations, Erosion Control Processes and Sediment Control, SWPPP Implementation, Monitoring and Reporting	1	20
QSP Training	April 26-27, 2011	Overview and Stormwater Regulations, Erosion Processes and Sediment Production, Permit Requirements and SWPPPs, Construction Site BMPs, Construction Site Monitoring, Reporting Requirements, SMARTS and PRDs	1	20
Plastics Summit	February 23, 2011	Water quality, zero waste and litter reduction. Topics include the most recent updates and strategies on plastic bag and foam bans, extended producer responsibility, and navigating program and ordinance implementation.	2	40

<sup>1</sup> Percentages for training are based on four staff members prior to December 2010 and five staff members after December 2010.

**Section 5 – Provision C.5 Illicit Discharge Detection and Elimination**

**Program Highlights**

Provide background information, highlights, trends, etc.

- 1) **The City of South San Francisco has an ongoing program for reporting illicit discharges within the City. When the street crew observes an illicit discharge or a suspected illicit discharge in the course of performing regularly scheduled maintenance they call on the Environmental Compliance Inspectors to investigate. Additionally, Inspectors participate in a quarterly creek walk along Colma Creek with County of San Mateo staff, enabling Inspectors to identify problem areas containing evidence of past discharges. Residents of South San Francisco also call the Street Department or the WQCP to report illicit discharges/potential discharges.**  
**The WQCP maintains a stormwater hotline for residents to report suspected illicit discharges. The hotline is publicized on the City's website, and is printed on outreach materials such as brochures, reusable shopping bags, sponges, pencils, erasers, and more... The Inspectors follow up on these reports as well.**  
**The City of South San Francisco performed a storm system screening on February 11, 2011. The survey covered 7 outfalls, consisting of Sonora and Ramona Streets, South Maple Stormwater Pump Station, S. Canal and S. Linden, W. Harris and Mitchell, 300 Utah, End of Haskins Way and Gull Drive behind UPS. The flows varied from none to a trickle. Trash was not detected in 4 out of 7 outfalls. Two outfalls had a low level of trash and one outfall had a high level of trash. The latter outfall has a trash capture device in place. No odor was detected at any of the outfalls. A dark color was detected at one of the outfalls. Turbidity was low in two outfalls and non-detect in the other outfalls. No hydrocarbon sheen was observed at any of the outfalls, nor was there evidence of Illicit Discharge or Illegal Dumping.**
- 2) **Senior Inspector Lecel participates in the CII Committee Training Work Group.**
- 3) **Refer to the C.5 Illicit Discharge Detection and Elimination section of countywide program's FY 10-11 Annual Report for a description of activities at the countywide or regional level.**

**C.5.c.iii ► Complaint and Spill Response Phone Number and Spill Contact List**

List below or attach your complaint and spill response phone number and spill contact list.

Contact	Description	Phone Number
Cassie Prudhel	Technical Services Supervisor	650-829-3840
Rob Lecel	Senior Environmental Compliance Inspector	650-829-3882
Dan Fulford	Environmental Compliance Inspector	650-829-3881
Shoshana Wolff	Environmental Compliance Inspector	650-829-3880
Andy Wemmer	Environmental Compliance Inspector	650-829-3883
Operations	After hours and weekends	650-877-8556
Stormwater Hotline	Monday-Friday 7:30-3:30	650-829-3848

**C.5.d.iii ► Evaluation of Mobile Business Program**

Describe implementation of minimum standards and BMPs for mobile businesses and your enforcement strategy. This may include participation in the BASMAA Mobile Surface Cleaners regional program or local activities.

**Description: Inspectors regularly conduct surveillance. If they discover a mobile cleaner allowing washwater to flow to a stormdrain the inspectors stop and require any discharge to be stopped and immediately cleaned up. Inspectors distribute and discuss BMPs, and an NOV is generally issued. When a mobile cleaner inquires about required BMPs, we inform them of the minimum standards and direct them to the BASMAA Pollution Prevention Training Program for surface washers.**

The City of South San Francisco created a brochure entitled “Wash Water Disposal Practices for Mobile Surface Cleaners” during 2009/2010. This brochure is given to mobile surface cleaners when issues arise in the field or when we are contacted by a mobile surface cleaner.

During 2011/2012 the brochure “Wash Water Disposal Practices for Mobile Surface Cleaners” will be sent to all surface cleaners in the area.

Refer to the C.5 Illicit Discharge Detection and Elimination section of countywide program’s FY 10-11 Annual Report for a description of efforts by countywide committees/work group and the BASMAA Municipal Operations Committee to address mobile businesses.

**C.5.e.iii ► Evaluation of Collection System Screening Program**

Provide a summary or attach a summary of your collection screening program, a summary of problems found during collection system screening and any changes to the screening program this FY.

**Description: The City of South San Francisco performed a storm system screening on February 11, 2011. The survey covered 7 outfalls, consisting of Sonora and Ramona Streets, South Maple Stormwater Pump Station, S. Canal and S. Linden, W. Harris and Mitchell, 300 Utah, End of Haskins and Gull Drive behind UPS. The flows varied from none to steady. Trash levels were non-detect in 4 out of 7 outfalls. Two outfalls had low levels of trash and one outfall had a high level of trash. The latter outfall has a trash capture device in place. None of the outfalls had odor detected. Only one of the outfalls had color detected and that was a dark color. Turbidity was low in two outfalls and non-detect in the other outfalls. There was no hydrocarbon sheen observed at any of the outfalls. There was no observation of Illicit Discharge or Illegal Dumping.**

See summary chart below.

**Collection System Screening 2-11-11**

Location	Flow	Depth of Flow (inches)	Trash Volume	Odor	Color	Turbidity	Hydrocarbon Sheen
Sonora & Ramona	Steady	1	ND	Absent	Absent	ND	ND
South Maple	None	0	Low	Absent	Present	Low	ND
South Canal & Linden	Steady	2	ND	Absent	Absent	ND	ND
Harris & Mitchell	None	0	ND	Absent	Absent	Low	ND
End of Haskins	Trickle	<1	ND	Absent	Absent	ND	ND
300 Utah	None	0	High*	Absent	Unknown	Unknown	Unknown
Gull behind UPS	Trickle	2	Low	Absent	Absent	ND	ND

\* Trash in capture device

We will review the EPA Manual - Illicit Discharge Detection and Elimination: A Guidance Manual for Program Development and Technical Assessment. Program changes will be made if warranted after the review.

**C.5.f.iii.(1), (2), (3) ► Spill and Discharge Complaint Tracking**

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)

	Number	Percentage
Discharges reported (C.5.f.iii.(1))	22	
Discharges reaching storm drains and/or receiving waters (C.5.f.iii.(2))	3	14%
Discharges resolved in a timely manner (C.5.f.iii.(3))	21	95%

**Comments:** Illicit discharges are discovered in the course of routine surveillance, in response to calls to the stormwater hotline and reports from the street crew. All tabulated discharges were reported on illicit discharge forms completed by WQCP staff. In some cases, a discharge may have reached the storm drain system, but was recovered by the street crew. Such discharges were not included in the number of discharges reaching storm drains and/or receiving water.

With one exception, all reported discharges were resolved in a timely manner. The only discharge that was not resolved in a timely manner was a discharge of steam condensate from Genentech Building 51 that was discovered in the course of routine preventative maintenance. The volume of discharge was estimated to be 1440 gallons. The discharge potentially occurred over a 26 day period; although Genentech had no way of knowing the exact duration of the discharge (the estimated time and volume were based on the previous facility inspection date). Genentech received a NOV and an Administrative Citation in the amount of \$2,600.00. This discharge was reported to the California Emergency Management Agency by Genentech.

**C.5.f.iii.(4) ► Summary of major types of discharges and complaints**

Below is a tabular and graphical summary of all illicit discharges for 2010/2011.

<b>Types of Pollutants Discharged</b>				
Vehicle cleaning Washwater			7	28%
Building/Sidewalk Washwater			3	12%
Antifreeze			1	4%
Used Motor Oil			2	8%
Fuels			2	8%
Sewage			2	8%
Food Wastes			4	16%
Industrial Wastes			1	4%
Other Washwaters			2	8%
Recycling Liquids			1	4%
<b>Total</b>			<b>25</b>	<b>100%</b>

Section 6 – Provision C.6 Construction Site Controls

<b>C.6.e.iii.1.a, b, c ▶ Site/Inspection Totals</b>		
<b>Number of sites disturbing &lt; 1 acre of soil requiring storm water runoff quality inspection (i.e. High Priority) (C.6.e.iii.1.a)</b>	<b>Number of sites disturbing ≥ 1 acre of soil (C.6.e.iii.1.b)</b>	<b>Total number of storm water runoff quality inspections conducted (C.6.e.iii.1.c)</b>
1	4	63
<p><b>Comments:</b></p> <p>1) At a minimum the City of South San Francisco completes monthly inspections of regulated projects during the rainy season. Inspectors also make an effort to visit each site when rain is predicted and return during a storm to make sure that the BMPs are effective. Inspections during rainstorms are only performed during regular business hours. After each storm inspectors return to each site to determine if any maintenance of the BMPs is needed.</p> <p>2) The City of South San Francisco conducted 14 inspections that are not included in the above categories. Eight inspections were conducted at 111 Chestnut, a site of approximately .83 acres. The application for this project was deemed complete in September 2004, prior to C3 regulations. The project consists of 8 single family residences. Four inspections were conducted at a Cal Water site that was upgrading their distribution system. Two inspections were conducted at the ferry terminal site.</p>		

<b>C.6.e.iii.1.d ▶ Construction Activities Storm Water Violations</b>		
<b>BMP Category</b>	<b>Number of Violations</b>	<b>% of Total Violations</b>
Erosion Control	2	6%
Run-on and Run-off Control	0	0%
Sediment Control	27	82%
Active Treatment Systems	0	0%
Good Site Management	4	12%
Non Stormwater Management	0	0%
<b>Total</b>	<b>33</b>	<b>100%</b>

**C.6.e.iii.1.e ▶ Construction Related Storm Water Enforcement Actions**

	Enforcement Action (as listed in ERP)	Number Enforcement Actions Taken	% Enforcement Actions Taken
Level 1	Verbal Warning/Notice of Violation/Compliance Meeting	29	97
Level 2	Administrative Citation	1	3
Level 3	Stop Work Order/Notice to Abate Nuisance	0	0
Level 4	Criminal Penalties/Civil Injunctions	0	0
<b>Total</b>		<b>30</b>	<b>100%</b>

**C.6.e.iii.1.f, g ▶ Illicit Discharges**

	Number
Number of illicit discharges, actual and those inferred through evidence (C.6.e.iii.1.f)	1
Number of sites with discharges, actual and those inferred through evidence (C.6.e.iii.1.g)	1

**C.6.e.iii.1.h, i ▶ Violation Correction Times**

	Number	Percent
Violations fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	29	97%
Violations not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	1	3%
<b>Total number of violations for the reporting year</b>	<b>30</b>	<b>100%</b>

**Comments: 29 of the 30 violations were corrected within ten days. However, one site (1070 San Mateo) had repeated issues with maintenance of BMPs from November 1<sup>st</sup> through December 17<sup>th</sup>. During this period, the site received eight verbal warnings and one NOV. Nine inspections were performed during this time period in an endeavor to bring this site into compliance. The same site received two additional NOV's and an Administrative Citation in January for an illicit discharge during the remainder of the reporting period.**

**C.6.e.iii.(2) ► Evaluation of Inspection Data**

Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).

**Description:** Many issues with sediment control were identified during FY 10/11. More inspections were done and enforcement actions taken in this reporting period compared with the last reporting period. Problems were discovered at all of the sites, but 1070 San Mateo Ave. was by far the worst actor. There were more regulated projects in progress in 2010/2011 than in the previous reporting period, and it is expected that rates of new development will increase each year as the economy recovers. The City will attempt to keep up a high level of scrutiny as the number of sites increases.

See attached graphs for data trends between 2009/2010 and 2010/2011. Graphs are included for summary of violations by category, summary of enforcement actions and annual comparison of total sites and inspections.

Also included is a comparison of the number of inspections and enforcement actions per active construction site for 2010/2011.

**C.6.e.iii.(2) ► Evaluation of Inspection Program Effectiveness**

Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.

**Description:** The City of South San Francisco's program is strong, with frequent inspections performed at each construction site especially during the wet season. Inspectors inspect each construction site before the beginning of the wet season, each time rain is predicted and several times during an extended or severe storm. They follow up at each site after the storm to determine if any repairs are necessary.

A weakness of the program is in dealing with sites that do not obtain compliance within 10 days. Most sites are very quick to respond and replace or repair their BMPs. Occasionally there are sites that require numerous inspections to get them to respond and repair their BMPs. Inspectors try to work with these sites to bring them back into compliance. While it may occasionally take more than 10 days, this leeway is only given when discharge from the site is not observed.

Improvements in this area will be achieved by more outreach, increased inspections and stricter penalties.

Permittee Name: City of South San Francisco

Inspectors participate in erosion control training at least once every 2 years. Inspection and enforcement data is tabulated in a construction tracking spreadsheet. The program uses inspection forms that were updated in March 2010.

The City of South San Francisco participates in the countywide program's New Development committee. Refer to the C.6 Construction Site Control section of countywide program's FY 10-11 Annual Report for a description of activities at the countywide or regional level.

**C.6.f ► Staff Training Summary**

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
Stormwater Program Orientation	January 2011	Review of New Development and Construction Site Controls, Public information and Outreach, Industrial and Commercial Site Controls, Illicit Discharge Detection and Elimination and Pollutants of Concern, Maintenance Operations, Pesticides Toxicity Control, and Trash Load Reduction and Watershed Assessment and Monitoring	2	40
CWEA Pretreatment, Pollution Prevention and Stormwater Conference	March 1, 2011	Update on the Statewide NPDES Stormwater Program, San Francisco Bay MRP Update, Construction Stormwater, How to Become, Perform and Interact with a QSP, The ERP: Adapting to an Evolving Regulatory Environment	1	20
QSP Training	December 6-7, 2010	Overview and Regulations, Erosion Control Processes and Sediment Control, SWPPP Implementation, Monitoring and Reporting	1	20
QSP Training	April 26-27, 2011	Overview and Stormwater Regulations, Erosion Processes and Sediment Production, Permit Requirements and SWPPPs, Construction Site BMPs, Construction Site Monitoring, Reporting Requirements, SMARTS and PRDs	1	20

Section 7 – Provision C.7. Public Information and Outreach

**C.7.b.ii.1 ▶ Advertising Campaign**

Summarize advertising efforts. Include details such as messages, creative developed, and outreach media used. The detailed advertising report may be included as an attachment. If advertising is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

**Summary: Advertising is being done by participation in a countywide or regional program; refer to the separate countywide or regional Annual Report.**

**C.7.b.iii.1 ▶ Pre-Campaign Survey**

*(For the Annual Report following the precampaign survey)* Summarize survey information such as sample size, type of survey (telephone survey, interviews etc.). Attach a survey report that includes the following information. If survey was done regionally, refer to a regional submittal that contains the following information:

**Pre-Campaign Survey**

**Not required for this Annual Report. A regional pre-campaign survey is planned for FY 11-12 as part of the regional outreach implementation plan.**

- Summary of how the survey was implemented.
- Analysis of the survey results.
- Discussion of the outreach strategies based on the survey results.
- Discussion of planned or future advertising campaigns to influence awareness and behavior changes regarding trash/litter and pesticides.

Place an **X** in the appropriate box below:

<input type="checkbox"/>	Survey report attached
<input checked="" type="checkbox"/>	Reference to regional submittal:

**C.7.c ▶ Media Relations**

Summarize the media relations effort. Include the following details for each media pitch in the space below, AND/OR refer to a regional report that includes these details:

- Topic and content of pitch
- Medium (TV, radio, print, online)
- Date of publication/broadcast

**Summary: There were no local media relations efforts.**

The following reports developed by SMCWPPP and BASMAA are included within the C.7 Public Information and Outreach section of the Program's FY 10-11 Annual Report:

- FY 10-11 SMCWPPP Media Relations Report
- FY 10-11 BASMAA Regional Media Relations

**C.7.d ► Stormwater Point of Contact**

Summary of any changes made during FY 10-11: **The Countywide Program's point of contact has not changed.**

**C.7.e ► Public Outreach Events**

Describe general approach to event selection. Provide a list of outreach materials and giveaways distributed. Use the following table for reporting and evaluating public outreach events

Event Details	Description (messages, audience)	Evaluation of Effectiveness
<ul style="list-style-type: none"> <li>• FY 10-11 Coordination of California Coastal Cleanup Day in San Mateo County, September 25, 2010.</li> </ul>	Coastal Clean-up event	42,331 lbs. of litter removed and 4,296 residents volunteered county-wide
<ul style="list-style-type: none"> <li>• FY 10-11 Maker Faire at the County Expo Center, May 21-22, 2011.</li> </ul>	Educational booth with emphasis on less toxic home cleaning products	1000 people visited the booth, there was a choice of 7 pledges to complete
<ul style="list-style-type: none"> <li>• FY 10-11 County Fair, June 11-19, 2011."</li> </ul>	Stormwater program materials available	Materials restocked by County Fair staff
<ul style="list-style-type: none"> <li>• South San Francisco, Oil Filter Exchange, April 8 &amp; 9, 2011</li> </ul>	People were asked if they changed their own oil and if so would they like a free oil container. They were given buckets to collect their motor oil, drain their filters, and transport oil to a recycling facility. People were also asked if they washed their own cars. They were given BMPs for home car washing and discount coupons for commercial car washes.	105 People were given buckets and 56 people returned oil filters for recycling.

<p>Day in the Park September 18, 2010</p>	<p>Day in the Park is a Community Fair. The focus of this booth was Stormwater and Pollution Prevention. Outreach items were distributed.</p>	<p>Outreach materials distributed were: Pest Management Brochures, 100 pencils, 100 erasers, 100 rulers, 50 magnets, 25 grease scrapers, 50 sponges, 100 pillboxes, Grow It Guides, and 450 reusable Chico bags. All of these items include the contact information for the City of South San Francisco Stormwater Program.</p>
<p>Citizens Academy May 24th</p>	<p>Pollution Prevention and Stormwater Outreach</p>	<p>A power point presentation is shown to the attendees. Outreach materials were distributed including SMCWPPP "Keep Car Wash Pollution Out of the Stormdrain" flyer.</p>

**C.7.f. ► Watershed Stewardship Collaborative Efforts**

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report.

Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

**Summary:** The WQCP Staff supports the Community Preservation Task Force (CPTF). This group provides volunteers for creek clean-ups beyond the annual clean-up in September. Staff attends the CPTF meetings when possible and participates with volunteers during creek clean-ups. During FY 10-11, SMCWPPP maintained and updated the online guide, Environmental Resource Guide of Groups and Organizations in San Mateo County with Watershed Stewardship Efforts to encourage public involvement in watershed volunteer efforts. In addition, all of the organization's events throughout the year were posted on the Program's popular "Community Events" page to publicize and encourage participation by county residents in local stewardship efforts.

**C.7.g. ► Citizen Involvement Events**

List the types of events conducted (e.g., creek clean up, storm drain inlet marking, native gardening etc.). Use the following table for reporting and evaluating citizen involvement events.

Event Details	Description	Evaluation of effectiveness
FY 10-11 Coordination of California Coastal Cleanup Day in San Mateo County, September 25, 2010"	Coastal Clean-up event	42,331 lbs. of litter removed and 4,296 residents volunteered county-wide
Colma Creek Clean-up September 25, 2010	Creek Clean-up	1335 lbs of trash removed
Colma Creek Clean-up October 9, 2010	Creek Clean-up	7.2 cubic yards of trash removed
Colma Creek Clean-up November 20, 2010	Creek Clean-up	1000 lbs of waste removed
Colma Creek Clean-up March 19, 2011	Creek Clean-up	1.4 cubic yards of debris removed
Colma Creek Clean-up May 21, 2011	Creek Clean-up	1.5 cubic yards removed
Colma Creek Clean-up June 27, 2011	Creek Clean-up by Cytokinetics	2.06 cubic yards removed

**C.7.h. ► School-Age Children Outreach**

Summarize school-age children outreach programs implemented. A detailed report may be included as an attachment. Use the following table for reporting school-age children outreach efforts.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
FY 10-11 Banana Slug String Band Elementary School Assembly Program – Buri Buri School	The show, entitled "We All Live Downstream," provides information about storm drains, watersheds, the marine environment, and tips to keep water clean.	500	Approximately 84% of the students learned where water goes when it enters the stormdrain. Students also learned about ways to keep water clean.

Sewer Science	Pollution Prevention Outreach including Stormwater	270	This is the 7th year that we have presented sewer science to El Camino High School and the 2nd year we have presented it to Capuchino High School. While there is not a formal evaluation process feedback from teachers and students continues to be positive.
---------------	--	-----	---

**Section 8 - Provision C.8 Water Quality Monitoring**

**C.8 ► Water Quality Monitoring**

State below if information is reported in a separate regional report. Municipalities can also describe below any Water Quality Monitoring activities in which they participate directly, e.g. participation in RMP workgroups, fieldwork within their jurisdictions, etc.

**Summary: During FY 10-11, we contributed through the countywide Program to the BASMAA Regional Monitoring Coalition (RMC). In addition, we contributed financially to the Regional Monitoring Program for Water Quality in the San Francisco Estuary (RMP) and were represented at RMP committees and work groups. For additional information on monitoring activities conducted by the Program, BASMAA RMC and the RMP, see the C.8 Water Quality Monitoring section of the Program's FY 10-11 Annual Report."**

Section 9 – Provision C.9 Pesticides Toxicity Controls

**C.9.a ▶ Adopt an Integrated Pest Management (IPM) Policy or Ordinance**

Attach a copy of your individual IPM ordinance or policy. (Water Board staff requested resubmittal for FY 10-11.) <b>See Attachment F.</b>	<input checked="" type="checkbox"/>	<b>Attached</b>	<input type="checkbox"/>	<b>Not attached</b> , explain below
If <b>Not attached</b> , explain:				
Describe mechanism for adopting/formalizing your agency's IPM ordinance or policy (e.g., department head approval, integration into SOPs, staff training: <b>The Bay Area County Programs are revising the IPM policy (C.9.a) with changes that were recommended by the Regional Board. The City will adopt the revised IPM Policy in 2011/2012.</b>				

**C.9.b ▶ Implement IPM Policy or Ordinance**

Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphates, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.

Trends in Quantities and Types of Pesticides Used					
Pesticide Category and Specific Pesticide Used	Amount				
	FY 09-10	FY 10-11	FY 11-12	FY 12-13	FY 13-14
<b>Organophosphates</b>	none	none			
Product or Pesticide Type A	none	none			
Product or Pesticide Type B	none	none			
<b>Pyrethroids</b>	none	none			
Product or Pesticide Type X	none	none			
Product or Pesticide Type Y	none	none			
<b>Carbaryl</b>	none	none			
<b>Fipronil</b>	none	none			

<b>C.9.c ▶ Train Municipal Employees</b>	
Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	19
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within the last 3 years.	5
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within the last three years.	26%

<b>C.9.d ▶ Require Contractors to Implement IPM</b>			
Did your municipality contract with any pesticide service provider in the reporting year?	<input checked="" type="checkbox"/> X	Yes	<input type="checkbox"/> No
If yes, attach one of the following:			
<input checked="" type="checkbox"/> X	Contract specifications that require adherence to your IPM policy and standard operating procedures, OR		
<input type="checkbox"/>	Copy(ies) of the contractors' IPM certification(s) or equivalent, OR		
<input type="checkbox"/>	Equivalent documentation.		
If <b>Not attached</b> , explain: <b>See Attachment G</b>			

<b>C.9.e ▶ Track and Participate in Relevant Regulatory Processes</b>
Summarize participation efforts, information submitted, and how regulatory actions were affected <b>OR</b> reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.
Summary: <b>During FY 10-11, we participated in regulatory processes related to pesticides through contributions to the countywide Program, BASMAA and CASQA. For additional information, see the Regional Pollutants of Concern Report submitted by BASMAA on behalf of all MRP Permittees.</b>

<b>C.9.f ▶ Interface with County Agricultural Commissioners</b>				
Did your municipal staff observe any improper pesticide usage or evidence of improper usage (e.g., pesticides in storm drain systems, along street curbs, or in receiving waters) during this fiscal year?	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
If yes, provide a summary of improper pesticide usage reported to the County Agricultural Commissioner and follow-up actions taken to correct any violations. A separate report can be attached as your summary.				

<b>C.9.h.ii ▶ Public Outreach: Point of Purchase</b>	
Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); <b>OR</b> reference a report of a regional effort for public outreach in which your agency participates.	
Summary: <b>See the C.9 Pesticides Toxicity Control section of Program's FY 10-11 Annual Report for information on point of purchase public outreach conducted countywide and regionally.</b>	

<b>C.9.h.vi ▶ Public Outreach: Pest Control Operators</b>	
Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); <b>OR</b> reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.	
Summary: <b>See the C.9 Pesticides Toxicity Control section of Program's FY 10-11 Annual Report for a summary of our participation in and contributions towards countywide and regional public outreach to pest control operators and landscapers to reduce pesticide use.</b>	

Section 10 - Provision C.10 Trash Load Reduction

**C.10.a.i ▶ Short-Term Trash Loading Reduction Plan**

*(For FY 10-11 Annual Report only)* Provide description of actions/tasks initiated/conducted/completed in developing a Short-Term Trash Loading Reduction Plan (due February 1, 2012).

**Description:** See the C.10 Trash Load Reduction section of Program's FY 10-11 Annual Report for information on countywide and regional activities conducted on behalf of co-permittees.

**C.10.a.ii ▶ Baseline Trash Load and Trash Load Reduction Tracking Method**

*(For FY 10-11 Annual Report only)* Provide description of actions/tasks initiated/conducted/completed to gather trash loading data and in developing a Baseline Trash Load and Trash Load Reduction Tracking Method (due February 1, 2012).

**Description:** See the C.10 Trash Load Reduction section of Program's FY 10-11 Annual Report for information on countywide and regional activities conducted on behalf of co-permittees.

**C.10.a.iii ▶ Minimum Full Trash Capture**

*(For FY 10-11 Annual Report and Each Annual Report Thereafter)* Provide description of actions/tasks initiated/conducted/completed in implementing Minimum Full Trash Capture Devices (due July 1, 2014) within individual jurisdictions. Include information on Full Trash Capture Devices installed under Bay-area Wide Trash Capture Demonstration Project administered by San Francisco Estuary Partnership.

**Description:** The City of South San Francisco is currently working with an approved contractor to install approximately 75 small trash capture devices. Estimated time for completion of installation is September 2011.

**C.10.b.iii ► Trash Hot Spot Assessment**

(For FY 10-11 Annual Report and Each Annual Report Thereafter) Provide volume of material removed from each Trash Hot Spot cleanup, and the dominant types of trash (e.g., glass, plastics, paper) removed and their sources to the extent possible.

Fill out the following table or attach a summary of the following information.

Trash Hot Spot	Cleanup Date	Volume of Material Removed	Dominant Type of Trash	Trash Sources (where possible)
Colma Creek - COLO3	9-25-10	3.01 cubic yards, plus 110 lbs of wood and other large items	1-Convenience/Fast Food Items 2-Bottles (plastic or glass) 3-Other plastic products 4-Styrofoam 5-Plastic bags	From upstream sources, littering, and storm drain outfall
Colma Creek – COLO4	9-25-10	2.85 cubic yards, plus 200 lbs of wood and other large items and 185 lbs of recycling	1-Convenience/Fast Food Items 2-Bottles (plastic or glass) 3-Other plastic products 4-Styrofoam 5-Plastic bags	From upstream sources, littering, and storm drain outfall
<b>The following creek clean-ups were not done along the hot spots but were done in Colma Creek</b>				
Colma Creek Clean-up	10-9-10	7.2 cubic yards removed	Litter, trash and debris	Unknown
Colma Creek Clean-up	11-20-10	1000 lbs of waste removed	Litter and trash	Unknown
Colma Creek Clean-up	3-19-11	1.4 cubic yards of debris removed	Debris	Dumping along creek
Colma Creek Clean-up	5-21-11	1.5 cubic yards removed	Plastic bottles, landscaping materials, rotten food	Unknown
Colma Creek Clean-up	6-27-11	2.06 cubic yards removed	Trash	Unknown

**C.10.d Summary of Trash Load Reduction Actions**

Provide summary of new trash load reduction actions or increased levels of implementation of existing actions that were implemented after adoption of the MRP (control measures and best management practices) including the types of actions and levels of implementation, and the total trash loads and dominant types of trash removed from each type of action.

Suggested trash load reduction actions to track and report may include:

- Anti-litter Campaigns
- Anti-litter/Dumping Enforcement Activities
- Curbside Recycling Programs
- Education and Outreach Efforts
- Free Trash Pickup/Dropoff Days
- County HHW Program Activities
- Improved Trash Bin Management
- Inspection/Maintenance of Storm Drain Outfalls
- Litter Pickup and Control
- Removal of Homeless Encampments
- Solid Waste Recycling Efforts
- Source Controls/Bans/Prohibitions
- Storm Drain Operation and Maintenance
- Storm Drain Signage/Marking
- Street Sweeping Activities
- Trash Removal from Receptacles
- Volunteer Creek Cleanups

Type of Trash Load Reduction Action	Date of First Implementation	Level of Implementation (specify if level was increased after MRP adoption)	Total Trash Load Removed by Action	Dominant Types of Trash Removed by Action
Curbside recycling	Performed by SSF Scavenger	Level was not increased	6,300 tons	Plastic, Glass, Paper, Cardboard
Education and Outreach Efforts	Ongoing	Ongoing	Unknown	Unknown
Inspection/Maintenance of Storm Drain Outfalls	July 2010	Increased	Unknown	Unknown
Litter Pickup and Control	Ongoing, monthly report submitted	Level was not increased	3049 cubic yards	Unknown
Removal of Homeless Encampments	Ongoing	Level was not increased	Unknown	Unknown
Source Controls/Bans/Prohibitions	August 27, 2008	Level was not increased	Unknown	Polystyrene

Storm Drain Operation and Maintenance	Ongoing, monthly report submitted	Level was not increased	175 cubic yards	Unknown
Street Sweeping	Ongoing, monthly report submitted	Level was not increased	1374 cubic yards	Unknown
Trash Removal from Receptacles	Performed by SSF Scavengers	Level was not increased	App. 57,500 tons	General rubbish
Volunteer Colma Creek Clean-up	Sept. 25, 2010	Increased	1335 lbs	1-Convenience/Fast Food Items 2-Bottles (plastic or glass) 3-Other plastic products 4-Styrofoam 5-Plastic bags
Volunteer Colma Creek Clean-up	Oct. 9, 2010	Increased	7.2 cubic yards	Litter, trash and debris
Volunteer Colma Creek Clean-up	Nov. 20, 2010	Increased	1000 pounds	Litter and trash
Volunteer Colma Creek Clean-up	Mar. 19, 2011	Increased	1.4 cubic yards	Debris
Volunteer Colma Creek Clean-up	May 21, 2011	Increased	1.5 cubic yards	Plastic bottles, landscaping materials, rotten food
Volunteer Colma Creek Clean-up – By Cytokinetics	June 27, 2011	Increased	2.06 cubic yards	Trash

**Section 11 - Provision C.11 Mercury Controls**

**C.11.a.i ► Mercury Recycling Efforts**

List below or attach lists of efforts to promote, facilitate, and/or participate in collection and recycling of mercury containing devices and equipment at the consumer level (e.g., thermometers, thermostats, switches, bulbs).

**South San Francisco recycles fluorescent light bulbs. During FY 10/11 approximately 10.26 grams of mercury was collected and removed from the environment in fluorescent bulbs.**

**Refer to FY 10-11 Program Annual Report for a list of mercury collection and recycling efforts conducted countywide and regionally. In addition, municipalities that conduct any mercury collection and recycling efforts locally should report these activities here.**

**C.11.a.ii ► Mercury Collection**

Provide an estimate of the mass of mercury collected through these efforts, or provide a reference to a report containing this estimate.

**Amount collected: Approximately 10.26 grams of mercury were collected from the recycling of fluorescent light bulbs.**

**A draft technical memorandum describing initial load reduction quantification methods for PCBs and mercury was submitted to the Water Board in the BASMAA FY 2009-10 Regional POCs and Monitoring Annual Report supplement. Written comments from Water Board and Permittee staff were received on the technical memorandum. In FY 2011-12, BASMAA member agencies plan to revise methods presented in the draft memorandum in response to the comments. Once the methods are completed, they will be used to estimate loads removed via the collection/recycling of mercury-containing products. See the FY 2010-11 Countywide Program Annual Report and BASMAA Regional POCs and Monitoring Annual Report supplement for more information.**

- C.11.b ▶ Monitor Methylmercury**
- C.11.c ▶ Pilot Projects to Investigate and Abate Mercury Sources in Drainages**
- C.11.d ▶ Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices**
- C.11.e ▶ Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit**
- C.11.f ▶ Diversion of Dry Weather and First Flush Flows to POTWs**
- C.11.g ▶ Monitor Stormwater Mercury Pollutant Loads and Loads Reduced**
- C.11.h ▶ Fate and Transport Study of Mercury In Urban Runoff**
- C.11.i ▶ Development of a Risk Reduction Program Implemented Throughout the Region**
- C.11.j ▶ Develop Allocation Sharing Scheme with Caltrans**

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

**Summary: A summary of countywide Program and regional accomplishments for these sub-provisions are included within the C.11 Mercury Controls section of Program's FY 10-11 Annual Report and/or the BASMAA Regional POC Report.**

Section 12 - Provision C.12 PCBs Controls

**C.12.a.i,iii ▶ Municipal Inspectors Training**

*(For FY 09-10 Annual Report only)* List below or attach description of results of training municipal industrial inspectors to identify, in the course of their existing inspections, PCBs or PCB-containing equipment.

Description: **In FY 09-10, inspector training materials were developed by BASMAA and provided in the FY 09-10 BASMAA Regional POC Report. A description of efforts to train municipal industrial inspectors was provided in FY 09-10 permittee and/or Program Annual Reports.**

**C.12.a.ii,iii ▶ Ongoing Training**

*(For FY 10-11 Annual Report and Each Annual Report Thereafter)* List below or attach description of ongoing training development and inspections for PCB identification, including documentation and referral to appropriate regulatory agencies (e.g. county health departments, Department of Toxic Substances Control, California Department of Public Health, and the Water Board) as necessary.

Description: **See the FY 10-11 Program Annual Report for a description of training provided countywide and/or regionally, and report on any local training efforts, if applicable.**

- C.12.b ▶ Conduct Pilot Projects to Evaluate Managing PCB-Containing Materials and Wastes during Building Demolition and Renovation Activities**
- C.12.c ▶ Pilot Projects to Investigate and Abate On-land Locations with Elevated PCB Concentrations**
- C.12.d ▶ Conduct Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices**
- C.12.e ▶ Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit**
- C.12.f ▶ Diversion of Dry Weather and First Flush Flows to POTWs**
- C.12.g ▶ Monitor Stormwater PCB Pollutant Loads and Loads Reduced**
- C.12.h ▶ Fate and Transport Study of PCBs In Urban Runoff**
- C.12.i ▶ Development of a Risk Reduction Program Implemented Throughout the Region**

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

**Summary: A summary of countywide Program and regional accomplishments for these sub-provisions are included within the C.12 PCB Controls section of Program's FY 10-11 Annual Report and/or the BASMAA Regional POC Report.**

Section 13 - Provision C.13 Copper Controls

**C.13.a.i and iii ► Legal Authority: Architectural Copper**

(For FY 10-11 Annual Report only) Do you have adequate legal authority to prohibit discharge of wastewater to storm drains generated from the installation, cleaning, treating, and washing of the surface of copper architectural features, including copper roofs to storm drains?

X	Yes		No
---	-----	--	----

If **No**, explain and provide schedule for obtaining authority within 1 year:

**The City has adequate authority to prohibit discharge of wastewater to storm drains generated from the installation, cleaning, treating, and washing of the surface of copper architectural features, including copper roofs to storm drains. Revisions of the Stormwater Ordinance are nearing completion. These revisions will include specific language that addresses copper controls.**

**C.13.b.i and iii ► Legal Authority: Pools, Spas, and Fountains**

(For FY10-11 Annual Report only) Do you have adequate legal authority to prohibit discharges to storm drains from pools, spas, and fountains that contain copper-based chemicals?

X	Yes		No
---	-----	--	----

If **No**, explain and provide schedule for obtaining authority within 1 year:

**The City has adequate legal authority to prohibit discharges to storm drains from pools, spas, and fountains that contain copper-based chemicals. Revisions of the Stormwater Ordinance are nearing completion. These revisions will include specific language that addresses copper controls.**

**C.13.c ► Vehicle Brake Pads**

Reported in a separate regional report.

**A summary of the countywide Program's participation with the Brake Pad Partnership (BPP) is included within the C.13 Copper Controls section of Program's FY 10-11 Annual Report and/or the BASMAA Regional POC Report.**

**C.13.d.iii ► Industrial Sources Copper Reduction Results**

Based upon inspection activities conducted under Provision C.4, highlight copper reduction results achieved among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed.

**Summary: The City of South San Francisco has one plating facility that is inspected twice a year. No stormwater issues have occurred at this site.**

**C.13.e ▶ Studies to Reduce Copper Pollutant Impact Uncertainties**

Report on progress of studies being conducted countywide or regionally to reduce copper pollutant impact uncertainties. State below if information is reported in a separate regional report.

**Summary: A summary of the countywide Program and/or regional efforts to develop regional studies to reduce copper pollutant impact uncertainties is included within the C.13 Copper Controls section of Program's FY 10-11 Annual Report and/or BASMAA Regional POC Report.**

**Section 14 - Provision C.14 PBDE, Legacy Pesticides and Selenium Controls**

**C.14.a ► Control Programs for PBDEs, Legacy Pesticides and Selenium Controls**

Report on progress of studies being conducted countywide or regionally to characterize the distribution and pathways of PBDEs, legacy pesticides, and selenium. State below if information is reported in a separate regional report.

**Summary: A summary of the countywide Program and regional efforts related to the Control Program for PBDEs, Legacy Pesticides and Selenium is included within the C.14 PBDE, Legacy Pesticides and Selenium section of Program's FY 10-11 Annual Report and/or BASMAA Regional POC Report.**

**Section 15 - Provision C.15 Exempted and Conditionally Exempted Discharges**

**C.15.b.iii.(1), C.15.b.iii.(2) ► Planned and Unplanned Discharges of Potable Water**

Is your agency a water purveyor?	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
If <b>No</b> , skip to C.15.b.vi.(2):				
If <b>Yes</b> , Complete the attached reporting tables or attach your own table with the same information. Provide any clarifying comments below.				
Comments:				

**C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering**

Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:

- Promote conservation programs
- Promote outreach for less toxic pest control and landscape management
- Promote use of drought tolerant and native vegetation
- Promote outreach messages to encourage appropriate watering/irrigation practices
- Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.

**Summary: The City of South San Francisco participates in the Countywide Program's public outreach efforts and the Parks and Maintenance Committee. Additionally, new development plan review comments for the City include the following:**

1. Requires new buildings to discharge fire sprinkler test water to the sanitary sewer or to landscape.
2. Landscaping shall meet the following conditions related to reduction of pesticide use on the project site:
  - a. Where feasible, landscaping shall be designed and operated to treat stormwater runoff by incorporating elements that collect, detain and infiltrate runoff. In areas that provide detention of water, plants that are tolerant of saturated soil conditions and prolonged exposure to water shall be specified.
  - b. Plant materials selected shall be appropriate to site specific characteristics such as soil type, topography, climate, amount and timing of sunlight, prevailing winds, rainfall, air movement, patterns of land use, ecological consistency and plant interactions to ensure successful establishment.

- c. Existing native trees, shrubs and ground cover shall be retained and incorporated into the landscape plan to the maximum extent practicable.
- d. Proper maintenance of landscaping, with minimal pesticide use, shall be the responsibility of the property owner.
- e. Integrated pest management (IPM) principles and techniques shall be encouraged as part of the landscaping design to the maximum extent practicable. Examples of IPM principles and techniques include:
  - i. Select plants that are well adapted to soil conditions at the site.
  - ii. Select plants that are well adapted to sun and shade conditions at the site. In making these selections, consider future conditions when plants reach maturity, as well as seasonal changes.
  - iii. Provide irrigation appropriate to the water requirements of the selected plants.
  - iv. Select pest-resistant and disease-resistant plants.
  - v. Plant a diversity of species to prevent a potential pest infestation from affecting the entire landscaping plan.
  - vi. Use “insectary” plants in the landscaping to attract and keep beneficial insects.

**C.15.b.iii.(1) ► Planned Discharges of the Potable Water System**

Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Duration of Discharge (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L)	pH (standard units)	Discharge Turbidity <sup>49</sup> (NTU)	Implemented BMPs & Corrective Actions
Not Applicable										

<sup>49</sup> Monitor the receiving water for turbidity if necessary and feasible. Include data in this column if available.

## Attachment A

### D.O. Monitoring of South Maple Pump Station

City of South San Francisco Stormwater Pumpstation Dry Season DO Monitoring Log

**NOTES**

**Attachment B**  
**General Plan Information**

(1999)

*Colma Creek, the city's largest waterway, meanders through residential and industrial areas to the Bay. Several streets cross it, including San Mateo Avenue.*

## 7.1 HABITAT AND BIOLOGICAL RESOURCES CONSERVATION

The natural environment in South San Francisco has undergone drastic change during its history of urbanization. Although virtually the entire city is developed with urban uses, the city and the immediate surroundings are known to support remnant areas of high biological value, notably San Bruno Mountain, Sign Hill, and wetlands.

### VEGETATION AND WILDLIFE

Historic vegetation in South San Francisco included native grasslands, coastal scrub, oak woodlands, riparian communities, and coastal salt and brackish marshes. Human intervention and development have altered the landscape, restricting natural vegetation to isolated, scattered parcels. South San Francisco's vegetative communities include annual grasslands, seasonal wetlands, fresh and saltwater marshes, mud flats, disturbed grasslands, and significant stands of trees. Much of the vegetative area is landscaped. Fresh emergent wetland is limited to channelized portions of Colma Creek, and potential saline emergent wetland habitat includes the tidal salt marshes along the Bay fringe.

Primary threats to vegetative communities in the city include:

- Further intrusion of urban development into wildlife habitats;
- Non-native vegetation originally introduced as landscaping, such as French broom, eucalyptus, Monterey pine, and Monterey cypress, which currently threaten habitat for threatened and endangered plant and animal species; and
- Toxic contaminants from commercial or industrial facilities that could result in risks to sensitive waters and nearshore communities of the Bay.

The vegetative communities support habitat for a wide range of animal species, including those under federal and State protection. The best-known of these special status species are the threatened and endangered butterflies on San

Bruno Mountain and Sign Hill, including the special status Mission Blue, Calippe Silverspot, San Bruno Elfin, and Bay Checkerspot butterflies. San Bruno Mountain supports many threatened or endangered plant species, and the city's salt marshes provide foraging habitat for seven special status bird species and may include red-legged frogs and two species of protected plants. Grassland and scrub habitat in the area attract a variety of reptile, amphibian, and bird species for breeding and foraging. Some reptile and amphibian species, as well as birds and small mammals, such as raccoon, skunk, and fox, may use wetland habitat. The nearshore tidal flats of San Francisco Bay, as well as the open waters, provide habitat for many species of plankton and other invertebrates, birds, fish, and mammals.

### **HABITAT CONSERVATION PLANS (HCP)**

South San Francisco contains two areas set aside as habitat for the conservation of threatened and endangered species: the southern base of San Bruno Mountain within the city limits, and the portion of Sign Hill currently designated parkland by the City.

The purpose of the HCPs is to conserve and enhance as much of the remaining natural habitat on San Bruno Mountain and Sign Hill as possible. The plans allow for limited development in strict accordance with the provisions of each HCP, ensuring enhancement of habitat through the transfer of privately held lands to the public, and through the provision of funding for conservation and enhancement activities outlined in each HCP.

### **GUIDING POLICIES: HABITAT AND BIOLOGICAL RESOURCES CONSERVATION**

*7.1-G-1 Protect special status species and supporting habitats within South San Francisco, including species that are State or federally listed as Endangered, Threatened, or Rare.*

New development projects in ecologically sensitive areas should consider impacts on valuable and sensitive natural habitats.

*7.1-G-2 Protect and, where reasonable and feasible, restore saltmarshes and*

*Colma Creek at South Airport Avenue. Creek and marshes serve as habitat for several species.*

wetlands.

*Although much of South San Francisco's saltmarshes and wetlands have been severely degraded through years of fill, they could be restored along portions of the city's southern bayshore.*

## **IMPLEMENTING POLICIES: HABITAT AND BIOLOGICAL RESOURCES CONSERVATION**

### **Special Habitat Areas**

- 7.1-I-1** *Cooperate with State and federal agencies to ensure that development does not substantially affect special status species appearing on any State or federal list for any rare, endangered, or threatened species. Require assessments of biological resources prior to approval of any development on sites with ecologically sensitive habitat, as depicted in Figure 7-1.*

The city contains two types of ecologically sensitive habitat: Habitat Conservation areas and wetlands. Sign Hill and San Bruno Mountain—the two Habitat Conservation areas—consist of the annual grassland-Coyote Brush series vegetative community that has the potential to support many special status species. The marshes and seasonal wetlands concentrated along the city's southern shoreline and Colma Creek also could support protected species. Conservation will provide for the perpetuation of threatened, endangered, and other rare species, as well as the protection of the unique and diverse ecology of these areas as a whole.

Development located in these ecologically sensitive areas must complete a site-specific assessment of biological resources as part of the development review process. If development is located outside these ecologically sensitive regions, no site-specific assessment of biological resources is necessary. The City's environmental review process would be utilized to impose appropriate mitigation measures on development to reduce impacts on sensitive habitats and special status species. Figure 7-2 shows special environmental studies required for develop-

Figure 7-1  
General Plan Policies for  
Sensitive Biological Resources

Source: Environmental Science Associates

ment proposals.

- 7.1-I-2 *As part of the Park, Recreation and Open Space (PROS) Master Plan update, institute an ongoing program to remove invasive plant species from ecologically sensitive areas, including Sign Hill Park, Colma Creek Linear Park, Bayfront Linear Park, and other City-owned open space, as depicted in Figure 7-1.*

Non-native vegetation originally introduced as landscaping includes French broom, eucalyptus, Star Thistle, and Pampas Grass. Removal of invasive species from public parks and open space in designated wetlands or habitat conservation areas is required only where these species are known to threaten habitat for special status plant and animal species. Removal of invasive species may also be required if they are a notable fire hazard in the parks or open space.

- 7.1-I-3 *As part of development approvals on sites that include ecologically sensitive habitat designated in Figure 7-2, require institution of an on-going program to remove and prevent the re-establishment of the invasive species and restore the native species.*

Development projects on ecologically sensitive lands at Sign Hill and wetlands along the bayshore and Colma Creek must consider the impact of invasive species on native plant communities in the assessment of biological resources. This program would be required only if the invasive species are found to be degrading to the habitat for special status plant and animal species. Table 7.1-1 presents a list of non-native invasive plant species that should be evaluated.

-  Assessments of Biological Resources Required
-  Geotechnical and Engineering Geology Reports Required

Source: Environmental Science Associates

Figure 7-2  
Special Environmental Studies  
Required for Development Proposals

**Table 7.I-1:**

**Non-Native Invasive Plant Species that Should be Evaluated in Assessments of Biological Resources**

Acacia (Acacia spp.)	Mattress vine (Muelenbeckia complexa)
Tree-of-heaven (Ailanthus altissima)	Tree tobacco (Nicotiana glauca)
Giant reed (Arundo donax)	Fountain grass (Pennisetum setaceum)
Bamboo (Bambusa spp., et al)	Pyracantha (Pyracantha angustifolia)
Pampas grass (Cortaderia selloana)	Castor bean (Ricinus communis)
Cotoneaster (Cotoneaster pannosa)	Black locust (Robinia pseudoacacia)
French broom (Cytisus monspessulanus)	German ivy (Senecio mikianoides)
Scotch broom (Cytisus scoparius)	Spanish broom (Spartium junceum)
Blue gum (Eucalyptus globulus)	Tamarisk (Tamarix spp.)
English ivy (Hedera helix)	Gorse (Ulex europaeus)
Ice plant (Mesembryanthemum chilensis)	Periwinkle (Vinca major)
Tall fescue (Festuca arundinacea)	Purple fountain grass (Pennisetum setaceum)

**Wetland Conservation**

*7.I-I-4 Require development on the wetlands delineated in figure 7-1 to complete assessments of biological resources.*

The assessments of biological resources would consider the impacts on wetlands and special status species. Appropriate mitigation measures may be required as a condition of approval for development that significantly impacts wetland habitat or special status species. If any development is permitted within wetlands or to fill currently submerged portions of the Bay, mitigation measures must be required. This mitigation may include providing wetland habitat of the same type as the lost habitat, equal to or greater than existing conditions. Off-site mitigation of wetland impacts should be required in cases where on-site mitigation is not possible. Off-site mitigation sites should be as close to the project site as possible.

**7.1-1-5** *Work with private, non-profit conservation, and public groups to secure funding for wetland and marsh protection and restoration projects.*

Since the City ability to fund these projects is limited, funding for restoration projects should be sought from a variety of sources. Alternative sources of funding may include development projects impacting Bay wetlands and habitat outside of South San Francisco that require wetland restoration as a mitigation measure, such as the expansion of the San Francisco International Airport. This will also enrich the overall visual quality of new shoreline parks that are being created.

## 7.2 WATER QUALITY

Water quality is a particular area of concern because of the ease of water pollution and the effects of pollution on nearshore wildlife habitat. Point sources of pollution are regulated through the National Pollutant Discharge Elimination System (NPDES) permit process. Permits are required under NPDES for all publicly operated treatment plants and for surface-water runoff in urban areas. These permits specify the discharge limits for certain pollutants and ensure that local industries pretreat the pollutants they discharge into treatment plants.

For the purposes of administering NPDES, the State Water Resources Control Board (SWRCB) has jurisdiction over nine Regional Water Quality Control Boards (RWQCB) in California. South San Francisco falls under the authority of the San Francisco Bay RWQCB, which is responsible for implementing State policy through the preparation of basin plans for water quality control and the regulation of all activities affecting water quality.

The quality of groundwater and water flowing into Colma Creek and the Bay is most likely to be affected by nonpoint pollution sources in South San Francisco, simply because they are not as rigorously regulated as point sources. Development can potentially pose a threat to surface and groundwater quality through construction sediment, materials used on-site, and related increases in automobile use.

### **SURFACE WATER QUALITY AND POLLUTION**

Since the city is largely developed, there is a high proportion of impermeable surface area. Also, the clay soils typical of the hills surrounding the city are relatively impermeable, resulting in significant runoff with very little ground infiltration. Stormwater and irrigation runoff is collected in the City's storm system and discharged to Colma Creek or San Francisco Bay.

Colma Creek is particularly susceptible to water quality problems due to nonpoint sources of pollution. These sources include general pollutants picked up by runoff from streets, open areas, and urban lands. In most urban areas, nonpoint pollution includes sediment, oil, debris, heavy metals, hydrocarbons, volatile organic com-

pounds, herbicides and pesticides, and fertilizers. Industrial areas may have a variety of other toxic and hazardous substances as well. Any pollution in Colma Creek affects the immediate habitat and is ultimately discharged into San Francisco Bay near sensitive mudflat habitat areas.

In order to control nonpoint source pollution, which is generally difficult to manage, the City joined the San Mateo Countywide Stormwater Pollution Prevention Program (STOPPP) in 1991. STOPPP functions under a Joint Municipal NPDES Permit for stormwater quality management, as authorized by the San Francisco Bay RWQCB. The program includes pollutant source identification and water quality measurement, and elimination of illicit discharges; structural and nonstructural controls for commercial and residential areas, and controls for industrial facilities; and, controls for new development and construction sites<sup>1</sup> and other elements.

The program also calls for the preparation of a Stormwater Management Plan (SWMP) for each municipality. The City has selected a variety of best management practices (BMPs) for adoption into its plan. These practices include street sweeping, storm drain stenciling, spill cleanup, and annual catch basin maintenance. Since much of Colma Creek flows through private property, the City has also adopted a number of BMPs aimed at private land owners to control litter, gain compliance from industrial dischargers, reduce pollutants at commercial sites, minimize construction sediment, and clean and maintain privately-owned watercourses.

## **GROUNDWATER QUALITY AND POLLUTION**

Much of the alluvium that underlies the lowland areas of the City is capable of transmitting groundwater, especially in the southwestern portion of the City which is underlain by a portion of the San Mateo Groundwater Basin. With the exception of industrial areas or locations with underground storage tanks where high levels of nitrate and manganese have been detected, the quality of this water is considered good. However, contamination may be present in existing or former industrial areas of unconfined waste disposal, or in the areas of high groundwater levels.

<sup>1</sup> Under the regulations promulgated by EPA, construction disturbance on sites greater than five acres requires a separate NPDES permit.

*The quality of surface water resources will be improved through continued participation in regional programs.*

## **GUIDING POLICIES: WATER QUALITY**

- 7.2-G-1 *Comply with the San Francisco Bay RWQCB regulations and standards to maintain and improve the quality of both surface water and groundwater resources.*
- 7.2-G-2 *Enhance the quality of surface water resources and prevent their contamination.*
- 7.2-G-3 *Discourage use of insecticides, herbicides, or toxic chemical substances within the city.*

## **IMPLEMENTING POLICIES: WATER QUALITY**

- 7.2-I-1 *Continue working with the San Francisco Bay RWQCB in the implementation of the NPDES, and continue participation in STOPPP for the protection of surface water and groundwater quality.*

The NPDES and STOPP have and will continue to be successful in improving surface water quality in the city.

The City has already identified a variety of best management practices to minimize construction sediment in its Stormwater Management Plan. Construction disturbance on sites greater than five acres also requires a separate NPDES permit.

- 7.2-I-2 *Review and update the Best Management Practices adopted by the City and in STOPP as needed.*

The BMPs were last updated for STOPP in 1991 when the program was established. Additional City BMPs may be updated if necessary.

- 7.2-I-3 *Prepare and disseminate information, including a page on the City's website, about the potentially harmful effects of toxic chemical substances and safe alternative measures, including information about safe alternatives to toxics for home and garden use.*

**Business Inspection Plan and**  
**Potential Facilities List**

**INDUSTRIAL AND COMMERCIAL BUSINESS INSPECTION PLAN  
CITY OF SOUTH SAN FRANCISCO, CA**

**Date Originally Prepared: June 30, 2010**

**Date Last Updated: August 24, 2010**

---

**BACKGROUND**

This industrial and commercial business inspection plan (Inspection Plan) serves as the city's prioritized inspection work plan that the city will implement to comply with the municipal regional stormwater permit's (MRP) Provision C.4.b requirements. This MRP provision requires that an Inspection Plan be developed. The Inspection Plan's attached Prioritized Inspection List of Businesses (Inspection List) must be submitted with the 2010 Annual Report, and an annually updated Inspection List must be submitted with subsequent annual reports.

Municipal staff used the following steps to create this Inspection Plan and comply with the MRP. Steps 1 and 2 address MRP requirements for the Inspection Plan and Step 3 addresses compliance with MRP requirements for creating an Inspection List that is included as an attachment to the Inspection Plan.

Steps

1. Identify a method of establishing priorities for inspections and the frequency of inspections for each category of priority.
2. Describe the method that will be used to identify newly opened businesses that may need inspection.
3. Develop an Inspection List that includes:
  - a. A list of all of the industrial and commercial businesses located within the municipality's jurisdiction that require inspection;
  - b. A determination of the priority for inspection of each business on the Inspection List using the identified method of establishing inspection priorities;
  - c. Identification of businesses on the Inspection List that are scheduled for inspection during the current fiscal year; and
  - d. An annual update or revision of the Inspection List starting in 2011.

Each of these steps was followed to develop this Inspection Plan as described in the following sections.

**STEP 1: IDENTIFY A METHOD OF ESTABLISHING PRIORITIES FOR INSPECTIONS AND FREQUENCY OF INSPECTIONS**

**What the MRP Requires**

The MRP requires that each of the businesses to be inspected be assigned a priority for inspection based on "the potential for water quality impact using criteria such as pollutant sources on site, pollutants of concern, proximity to a waterbody, violation history of the facility, and other relevant factors" (Provision C.4.b.ii.(3)). In addition, the MRP requires that appropriate inspection frequencies be established based on the priority for inspection, "potential for contributing pollution to stormwater runoff" and be "commensurate with the threat to water quality" (Provision C.4.b.ii.(5)).

Further, the MRP requires: "A description of the process for prioritizing inspections and frequency of inspections" (Provision C.4.b.i.(2)).

### **Description of Prioritization Process and Assignment of Inspection Frequencies to Different Priorities**

- Businesses meeting the following criteria generally have been assigned as having a high priority for inspection:
1. Businesses that are subject to the State General NPDES Permit for Stormwater Discharges Associated with Industrial Activity.
  2. Businesses that have a history of using inadequate best management practices.
  3. Businesses that have had a non-stormwater discharge disallowed by the MRP during the previous fiscal year.
  4. Food service facilities and vehicle mechanical repair that are due for re-inspection and/or re-permitting with wastewater permits.

All other businesses have generally been assigned as having a low priority for inspection.

1. High priority for inspection means that the business will typically be inspected annually. Low priority for inspection means that the business will be inspected less frequently than annually, such as every other year or every third year. Businesses that have a non-stormwater discharge during any fiscal year will be moved to the high priority category and then inspected during the next fiscal year.
2. Food service facilities on the low priority inspection will be inspected upon renewal of their wastewater discharge permit.
3. Auto facilities on the low priority will be inspected at least every 3 years.

## **STEP 2: DESCRIBE METHOD THAT WILL BE USED TO IDENTIFY NEW BUSINESSES**

### **What the MRP Requires**

The MRP requires that the Inspection Plan have a "mechanism to include newly opened businesses that warrant inspection ..." (Provision C.4.b.i.(2)).

### **Description of Method for Identifying New Businesses**

The City of South San Francisco will identify new businesses that warrant inspection through the business license sign off process. New businesses require a sign off from the Environmental Compliance department. At that time, should the business warrant inspection, it will be inspected before the business license is signed off. The business will be added to the inspection spreadsheet and prioritized at the time of addition. If the business is deemed to not have an impact on the stormwater system it will be omitted from the list.

## **STEP 3: DEVELOP AN INSPECTION LIST**

This step includes the following four substeps associated with the development and maintenance of the Inspection List:

- a. Develop a list of all of the industrial and commercial businesses that require inspection;
- b. Determine the priority for inspection of each business on the Inspection List;

- c. Identify businesses on the Inspection List that are scheduled for inspection during the current fiscal year; and
- d. Prepare an annual update or revision of the Inspection List starting in 2011.

### **What the MRP Requires**

#### **Develop a List of All Businesses Requiring Inspection**

The MRP requires that the Inspection Plan be used to maintain an Inspection List of industrial and commercial businesses “that could reasonably be considered to cause or contribute to pollution of stormwater runoff” (Provision C.4.b.ii).

In particular, the MRP lists the following types of businesses as needing to be inspected if they “have a reasonable likelihood to be sources of pollutants to stormwater and non-stormwater discharges:” (Provision C.4.b.ii(2))

- 1) Industrial facilities<sup>1</sup>, as defined in 40 CFR 122.26(b)(14), including those subject to the State General NPDES Permit for Stormwater Discharges Associated with Industrial Activity;
- 2) Vehicle salvage yards;
- 3) Metal and other recycled material collection facilities, waste transfer facilities;
- 4) Vehicle mechanical repair, maintenance, fueling, or cleaning;
- 5) Building trades central facilities or yards, corporation yards, nurseries, and greenhouses;
- 6) Building material retailers and storage;
- 7) Plastic manufacturers; and
- 8) Other facilities designated by the City or Water Board as having a reasonable potential to contribute to pollution of stormwater runoff. The Water Board staff places a priority on inspecting retail food facilities, and these businesses should be included in the Inspection List if they “have a reasonable likelihood to be sources of pollutants to stormwater and non-stormwater discharges.”

In addition, the MRP lists the following functional aspects of businesses that may produce pollutants when exposed to stormwater as part of the criteria for developing the Inspection List:

- 1) Outdoor process and manufacturing areas;
- 2) Outdoor material storage areas;
- 3) Outdoor waste storage and disposal areas;
- 4) Outdoor vehicle and equipment storage and maintenance areas;
- 5) Outdoor wash areas;
- 6) Outdoor drainage from indoor areas;
- 7) Rooftop equipment; and
- 8) Other sources determined by the city or Water Board to have a reasonable potential to contribute to pollution of stormwater runoff.

#### **Establish Inspection Priority for Businesses on the Inspection List**

The MRP requires that businesses that have a reasonable potential to pollute stormwater runoff be prioritized using factors listed in the MRP (Provision C.4.b.ii.(3)).

#### **Identify Businesses Scheduled for Inspection During the Current Fiscal Year**

---

<sup>1</sup> The MRP appears to use the terms “facilities” and “businesses” interchangeably. This template generally uses the term business since that is used in the title of Provision C.4.b., and it is the term most inspectors use.

The MRP requires that the annual report include “the list of facilities scheduled for inspection during the current fiscal year” (Provision C.4.b.iii.(2)).

### Annual Updates

The MRP requires that the Inspection List be annually updated and maintained (Provision C.4.b.ii). The annual updates should include new businesses; any needed modifications to inspection priorities based on recent inspections, illicit discharge notifications, or other relevant factors; and removal of businesses that are no longer operating. In addition, updates or revisions to the Inspection List need to be included in annual reports starting in 2011 (Provision C.4.b.iii.(1)).

### **Substep 3a: Develop Inspection List**

See attachment A.

### **Substep 3b: Determine Priority for Businesses**

Businesses meeting the following criteria generally have been assigned as having a high priority for inspection:

5. Businesses that are subject to the State General NPDES Permit for Stormwater Discharges Associated with Industrial Activity.
6. Businesses that have a history of using inadequate best management practices.
7. Businesses that have had a non-stormwater discharge disallowed by the MRP (illicit discharge) during the previous fiscal year.
8. Food service facilities and vehicle mechanical repair that are due for re-inspection and/or re-permitting with wastewater permits.

### **Substep 3c: Identify Businesses Scheduled for Inspection in the Current Fiscal Year**

See attachment B.

### **Substep 3d: Annual Update**

To be completed in the 2011 Annual Stormwater report.

### Businesses Requiring Additional Time For Maintenance and Housekeeping

**Businesses Requiring Additional Time  
For Maintenance and Housekeeping**

<b>Name of Business</b>	<b>Address</b>	<b>Initial Inspection Date</b>	<b>Enforcement Action</b>	<b>Follow-up Inspection Date</b>	<b>Explanation for violation not resolved w/in 10 days</b>
Holiday Inn	275 South Airport Blvd.	11/22/10	Verbal	12/13/11	Compactor went to garbage company. Had to replace parts. Completed on 12/13/11
Two Guns Press	152 Utah Ave. #180	2/10/11	Verbal	2/28/11 & 3/4/11	Pieces of equipment needed to be hauled and/or properly disposed of. The few high priority items were removed by 2/28/11. All items were cleared from the lot by 3/4/11. Code Enforcement was also involved with this facility and issued a fine to the facility.
JMB Construction	123 S. Maple	6/29/11	Verbal	8/31/11	Allowed this facility more time (8/31/11) as there was no immediate threat to the storm system. Required action involved making larger engineering improvements in the lot. Re-inspected on 8/31/11. Debris box was replaced, drain inlet was cleaned and filter fabric was placed in DI.
Interstate Paving	128 South Maple Ave.	6/23/11	Verbal	7-18-11	Unable to re-inspect until 7/18/11 because the manager was out of town until 7/11/11 and needed time to complete the work. Requirements were met at that time.
Glenn's Customs	233 Ryan Way	12/15/10	Verbal	1/6/11 and 1/12/11	Facility required to keep car washwater from entering the stormdrain system. While the inspector was on-site, the owner instructed his staff to use as little water as possible and direct all run-off to the landscaped area in front of the shop. A follow-up inspection was done on 1/6/2011, and the inspector found that despite these efforts, some washwater was still flowing to the street. The facility was given another 10 business days to dig a trench and build a berm to contain overflow. A follow-up inspection was done on 1/12/11, and the facility had installed sandbags and dug a trench, keeping washwater from reaching the street.
United Parcel Service	657 Forbes Blvd.	6/16/11	Verbal	7/13/11	Required to place mesh under stormdrain grates on the west side of the yard, and to begin using covered carts to collect plastic film from unloading of pallets. Manager indicated that it would take three weeks for the carts to come in. An email from the manager indicated that the carts would be in use starting 7/7/11, and a follow-up inspection on 7/13/11 showed the facility to be in compliance with both of the original requirements.

**City of South San Francisco**  
**Integrated Pest Management Policy**

## **San Mateo Countywide Water Pollution Prevention Program Model Integrated Pest Management (IPM) Policy**

### **GOAL**

The City of South San Francisco seeks to protect the health and safety of its employees and the general public, the environment and water quality, as well as to provide sustainable solutions for pest control, through the reduced use of pesticides on property owned or managed by the City/County to the maximum extent practicable.

### **RECOMMENDATIONS**

Employees implementing pest management operations will use Integrated Pest Management (IPM) techniques that emphasize non-pesticide alternatives and, when necessary, employ the least toxic chemicals. Preference will be given to contractors who implement IPM. The City of South San Francisco Maintenance Services departments and their contractors that apply pesticides will develop and maintain an active IPM Plan to ensure the long-term prevention and suppression of pest problems with minimum negative impacts on the health and safety of the community and environment. The City of South San Francisco will track employee and contractor pesticide use and prepare an annual report summarizing pesticide use and evaluating pest control activities performed.

The City of South San Francisco shall encourage pilot projects to demonstrate landscape and structural pest control alternatives, seeking to use the most recent technology, best management practices and least toxic methods for all pest control measures. Pilot projects should include an objective analysis of the effectiveness of the alternative techniques applied.

The City of South San Francisco will review its purchasing procedures, contracts or service agreements with pesticide applicators and employee training practices to determine what changes can be made to support the goal of pesticide reduction and promote the purchase and use of the least harmful chemicals.

The City of South San Francisco will perform educational outreach and/or support Countywide or regional efforts to educate residential and commercial pesticide users on a) goals and techniques of IPM, and b) pesticide related water quality issues.

### **BACKGROUND**

Pesticides are defined as: any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest. Pests can be insects, rodents and other animals, unwanted plants (weeds), bacteria or fungi. The term pesticide applies to herbicides, fungicides, insecticides, rodenticides, molluscicides and other substances used to control pests. Antimicrobial agents are not included in this definition of pesticides. In general, the intent of antimicrobial agents is to reduce or mitigate the growth or development of microbial organisms.

They are used to avoid health hazards and include in-door cleaning, spa and swimming pools, medical sterilizer and sanitizer products.

Integrated Pest Management (IPM) is an ecosystem-based strategy that focuses on long-term prevention of pests or their damage through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and use of resistant varieties. Pesticides are used only after monitoring indicates they are needed according to established guidelines, and treatments are made with the goal of removing only the target organism. Pest control materials are selected and applied in a manner that minimizes risks to human health, beneficial and nontarget organisms, and the environment.

IPM techniques could include biological controls (e.g., ladybugs and other natural enemies or predators); physical or mechanical controls (e.g., hand labor or mowing); cultural controls (e.g., mulching, discing, or alternative plant type selection); and reduced risk chemical controls (e.g., soaps or oils).

The City of South San Francisco owned or managed property includes but is not limited to parks and open space, golf courses, roadsides, landscaped medians, flood control channels and other outdoor areas, as well as municipal buildings and structures.

**Attachment G**  
**IPM Contract Specifications**

- (D) Stakes and guys are to be inspected twice per year (Spring & Fall) and adjusted or removed as necessary. When trees attain a trunk caliper of 4 inch consider removal of existing stakes and guys. If tree is unstable at this time, removal and replacement should be considered by Owner, with cost of work to be paid by Owner.

14. Integrated Pest Management

The Contractor shall act as or coordinate with a licensed specialist to identify any Pest management problems that may arise in the street and parkway landscapes.

The Contractor shall be familiar with various integrated pest management (IPM) programs. The Contractor may be required, by written order from the City, to develop an IPM plan to effectively eradicate any diseases or pests which develop during the duration of this contract. The development and execution of the IPM program shall be the responsibility of the Contractor and will not be considered extra work.

The Superintendent will request to see any or all labels, licenses, certificates, categories, permits or recommendations before chemicals are applied. An IPM plan developed by the Contractor may have to be approved by the Superintendent and the County Agricultural Commissioner before implementation. A MSDS must be submitted for each chemical to be used prior to any application program.

- (A) Some approved noxious weed, disease, and pest control methods may include:

1. Pre-emergent herbicide applications.
2. Post-emergent herbicide applications.
3. Mechanical cultivation and disposal.
4. Stringline trimming or mowing
5. Chemical growth regulators.
6. Traps.
7. Pre-bait and poison bait techniques.
8. Poison gas or fog applications.
9. Debris or food source removal.
10. Water jetting.
11. Insecticide, fungicide, or other pesticide applications.
12. Verdant spraying.
13. Repeated control methods as necessary.

- (B) Prior to application, the Contractor shall provide a copy of any spray report showing details of areas, times, chemicals, MSDS, and rates of application as provided by a licensed pest control advisor. A copy shall be provided with billing at the end of the month as well.
