

September 11, 2014

Bruce Wolfe, Executive Officer
San Francisco Regional Water Quality Control Board
1514 Clay Street
Oakland, CA 94612

SUBJECT: Annual Report for Fiscal Year 2013-2014 for the Alameda County
Unincorporated Area.

Dear Mr. Wolfe:

Enclosed herewith is the subject for the Fiscal Year 2013-2014 (months of July 2013 through June 2014). This is being submitted in accordance with the requirements of our NPDES permit.

Chapter 13.08 Section 13.08.040 of the Alameda County Code give the responsibility for the administration of the Unincorporated Area of Alameda County's NPDES permit requirements to the director of public works. I certify under penalty of law that this document and all attachments were prepared under my direction or supervision with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Yours truly

Daniel Woldesenbet, Ph.D., P.E.
Director of Public Works

Permittee Name: County of Alameda

Section 1 – Permittee Information

Background Information				
Permittee Name:	County of Alameda			
Population:	Approximately 140,800			
NPDES Permit No.:	CAS612008			
Order Number:	R2-2009-0074R			
Reporting Time Period (month/year):	July 2013 through June 2014			
Name of the Responsible Authority:	Daniel Woldesenbet	Title:	Director of Public Works	
Mailing Address:	399 Elmhurst Street			
City:	Hayward	Zip Code:	94544	County: Alameda
Telephone Number:	510-670-5541	Fax Number:	510-670-5541	
E-mail Address:	danielw@acpwa.org			
Name of the Designated Stormwater Management Program Contact (if different from above):	Sharon Gosselin	Title:	Stormwater Program Manager Associate ECS	
Department:				
Mailing Address:	399 Elmhurst Street			
City:	Hayward	Zip Code:	94544	County: Alameda
Telephone Number:	510-670-6547	Fax Number:	510-67-5262	
E-mail Address:	sharon@acpwa.org			

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary: See Section C.2 - Municipal Operations - of the Alameda Countywide Clean Water Program's (ACCWP) FY 13-14 Annual Report for a summary of Program activities.
 County staff continued to participate in the CWP M&O subcommittee and attended the CWP Full-Day Training (Street and Road Maintenance Best Management Practices Workshop on October 29, 2013, the 2014 Annual Meeting held on Thursday, April 3 at the City of Hayward Utilities Division Building, 24499 Soto Road, Hayward, and the Trash Capture Device Field Trip, a field trip featuring several types of trash capture devices installed in Oakland, held on Wednesday, April 30.

C.2.a. ► Street and Road Repair and Maintenance

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

x	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
x	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
x	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments:

C.2.b. ► Sidewalk/Plaza Maintenance and Pavement Washing

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

NA	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
NA	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs
Comments:	

C.2.c. ► Bridge and Structure Maintenance and Graffiti Removal

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

x	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
x	Control of discharges from graffiti removal activities
x	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
x	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal
x	Employee training on proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.
x	Contract specifications requiring proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.
Comments:	

C.2.d. ► Stormwater Pump Stations

Does your municipality own stormwater pump stations: **Yes** **No**

If your answer is **No** then skip to **C.2.e.**

Complete the following table for dry weather DO monitoring and inspection data for pump stations¹ (add more rows for additional pump stations). If a pump station is exempt from DO monitoring, explain why it is exempt.

Pump Station Name and Location	First inspection Dry Weather DO Data		Second inspection Dry Weather DO Data	
	Date	mg/L	Date	mg/L
NA				

Summarize corrective actions as needed for DO monitoring at or below 3 mg/L. Attach inspection records of additional DO monitoring for corrective actions:

Summary: NA

Attachments:

Complete the following table for wet weather inspection data for pump stations (add more rows for additional pump stations):

Pump Station Name and Location	Date (2x/year required)	Presence of Trash (Cubic Yards)	Presence of Odor (Yes or No)	Presence of Color (Yes or No)	Presence of Turbidity (Yes or No)	Presence of Floating Hydrocarbons (Yes or No)
NA						

¹ DO monitoring is exempted where all discharge from a pump station remains in a stormwater collection system or infiltrates into a dry creek immediately downstream.

C.2.e. ► Rural Public Works Construction and Maintenance	
Does your municipality own/maintain rural ² roads:	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
If your answer is No then skip to C.2.f.	
Place a Y in the boxes next to activities where applicable BMPs were implemented. If not applicable, type NA in the box and provide an explanation in the comments section below. Place an N in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.	
<input checked="" type="checkbox"/>	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas
<input checked="" type="checkbox"/>	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources
<input checked="" type="checkbox"/>	No impact to creek functions including migratory fish passage during construction of roads and culverts
<input checked="" type="checkbox"/>	Inspection of rural roads for structural integrity and prevention of impact on water quality
<input checked="" type="checkbox"/>	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion
<input checked="" type="checkbox"/>	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate
<input checked="" type="checkbox"/>	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings
Comments including listing increased maintenance in priority areas:	

² Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. ► Corporation Yard BMP Implementation

Place an **X** in the boxes below that apply to your corporations yard(s):

- We do not have a corporation yard
- Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit
- We have a **Stormwater Pollution Prevention Plan (SWPPP)** for the Corporation Yard(s)

Place an **X** in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

- Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment
- Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system
- Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method
- Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used
- Cover and/or berm outdoor storage areas containing waste pollutants

Comments:

If you have a corporation yard(s) that is not an NOI facility, complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information:

Corporation Yard Name	Inspection Date (1x/year required)	Inspection Findings/Results	Follow-up Actions
Public Works	July 7, 2014	No Violations Found	NA

Section 3 - Provision C.3 Reporting New Development and Redevelopment

C.3.b.v.(2)(a) ► Green Streets Status Report

(All projects to be completed by December 1, 2014)

On an annual basis (if applicable), report on the status of any pilot green street projects within your jurisdiction. For each completed project, report the capital costs, operation and maintenance costs, legal and procedural arrangements in place to address operation and maintenance and its associated costs, and the sustainable landscape measures incorporated in the project including, if relevant, the score from the Bay-Friendly Landscape Scorecard.

Summary:

The County has an update to the operations and maintenance costs for the Stanley Boulevard Green Streets Project which was reported last year (2012-13). \$65,000 of the \$14,500,000 awarded for the total project costs was budgeted for the 5-year maintenance component (including trash collection and vegetation watering, trimming and replacement). However, the true cost of maintenance are estimated to be closer to \$500,000 to \$750,000 for the 5-year term. The reason for the excessively low costs are because the contractor inflated other bid items that get paid out early in the construction process in order to front load their payments allowing them to get pre-paid for the maintenance work.

C.3.b.v.(1) ► Regulated Projects Reporting

Fill in attached table **C.3.b.v.(1)** or attach your own table including the same information.

C.3.e.v. ► Alternative or In-Lieu Compliance with Provision C.3.c.

(For FY 11-12 Annual Report and each Annual Report thereafter)

Is your agency choosing to require 100% LID treatment onsite for all Regulated Projects and not allow alternative compliance under Provision C.3.e.?

	Yes	No
	X	

Comments (optional):

Permittee Name: County of Alameda

C.3.e.vi ► Special Projects Reporting

1. Has your agency received, but not yet granted final discretionary approval of, a development permit application for a project that has been identified as a potential Special Project based on criteria listed in MRP Provision C.3.e.ii(2) for any of the three categories of Special Projects (Categories A, B or C)?		Yes	X	No
2. Has your agency granted final discretionary approval of a project identified as a Special Project in the March 15, 2014 report? If yes, include the project in both the C.3.b.v.(1) Table, and the C.3.e.vi. Table.		Yes	X	No
If you answered "Yes" to either question, 1) Complete Table C.3.e.vi. below. 2) Attach narrative discussion of 100% LID Feasibility or Infeasibility for each project.				

C.3.h.iv. ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

(1) Fill in attached table C.3.h.iv.(1) or attach your own table including the same information.
<p>(2) On an annual basis, provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.</p> <p>Summary: As shown in Table C.3.h.iv, a total of seven sites were inspected during this reporting period. The inspections included one site which contained a vault or underground systems and six sites with stormwater based treatment systems. Four of the seven sites involved initial 45-day inspections. The remaining three sites were inspected to fulfill the annual inspection requirement of the program.</p> <p>This year's inspections went very well with only one verbal warning being issued compared to last year's four written warnings. The sites observed were well maintained. Routine inspections were conducted during the installation of the treatments systems on each of the four sites to confirm proper installation in accordance with the approved plans. In addition to the routine inspection during construction, a 45-day inspection was conducted on all four sites to confirm that the treatment systems functioned properly.</p>
<p>(3) On an annual basis, provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).</p> <p>Summary: We continue to believe that the program is effective because it has raised the awareness of the stormwater treatment program and its potential to reduce the impact of stormwater pollution to the environment. All newly constructed treatment systems are inspected during construction and within 45-days of being installed. Corrective measures identified are linked to County acceptance and building permit</p>

finalization which further strengthens the program. The program is both proactive and preventative and provides consistency in inspection findings.

One possible improvement to the program would be to conduct all O&M inspections during rain events to better evaluate the effectiveness of the treatment system to convey stormwater. The inspections could include observations regarding measuring retention time or infiltration rates. However, this may be problematic in drought years and would be extremely difficult to schedule.

(4) During the reporting year, did your agency:

<ul style="list-style-type: none"> Inspect all newly installed stormwater treatment systems and HM controls within 45 days of installation? 	X	Yes		No		Not applicable. No new facilities were installed.
<ul style="list-style-type: none"> Inspect at least 20 percent of the total number of installed stormwater treatment systems or HM controls?³ 		Yes	X	No		Not applicable. No treatment measures
<ul style="list-style-type: none"> Inspect at least 20 percent of the total number of installed vault-based systems? 		Yes	X	No		Not applicable. No vault systems.

If you answered "No" to any of the questions above, please explain:

During the first three reporting years of the permit, our vault based system and installed stormwater treatment system inspection programs averaged 35% of the sites per year and met the 100% inspection threshold. We exceeded the minimum of 20% per reporting year and met the 100% within five years and therefore scaled back our O&M inspections during this reporting period (2013 – 2014) by inspecting 10% of the vault based system inventory and 13% of the installed stormwater treatment system inventory, the inventory remaining.

For the next reporting period (2014 – 2015), we plan to inspect at least 20% of the vault based systems and 20% of the non-vault-based systems in our program and will continue to inspect each site at least once every five years.

C.3.i. ► Required Site Design Measures for Small Projects and Detached Single Family Home Projects

On an annual basis, discuss the implementation of the requirements of Provision C.3.i, including ordinance revisions, permit conditions, development of standard specifications and/or guidance materials, and staff training.

Summary:

³ If there is only 1 treatment measure in the jurisdiction, the agency must inspect it every year.

BASMAA prepared standard specifications in four fact sheets regarding the site design measures listed in Provision C.3.i, as a resource for Permittees. We have modified local policies/procedures and forms to require all applicable projects approved after December 1, 2012 to implement at least one of the site design measures listed in Provision C.3.i. We are using the following products for C.3.i implementation:

- BASMAA's site design fact sheets
- County forms: Stormwater Requirements Pre-Screening Checklist and Single Family Residential Lot Clean Water Site Measures

C.3.b.v.(1) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location ¹⁰ , Street Address	Name of Developer	Project Phase No. ¹¹	Project Type & Description ¹²	Project Watershed ¹³	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New Impervious Surface Area (ft ²) ¹⁴	Total Replaced Impervious Surface Area (ft ²) ¹⁵	Total Pre- Project Impervious Surface Area ¹⁶ (ft ²)	Total Post- Project Impervious Surface Area ¹⁷ (ft ²)
Private Projects											
TJ Maxx Department Store	3242 Village Dr, Castro Village Shopping Center, S of Jamison Way, Castro Valley	R.T. Nahas Co.	N.A.	Redevelopment of 3 existing residential parcels, a portion of shopping center parking lot, and a self- service car wash facility into a new department store and parking lot	San Lorenzo Creek	3.4	3.4	35,547	43,505	101,725	79,052
Ashland Family Housing	East 14th Street at Kent Avenue, unincorporated San Leandro	RCD Housing, LLC	N.A.	Redevelopment of 4 existing residential and commercial parcels into a combined multi- family residential/ commercial development	Estudillo Canal	2.21	2.21	79,860	51,194	51,194	79,860

Latter-Day Saints Church	859 Grant Av., east of Washington Ave., San Lorenzo	Latter-Day Saints	N.A.	Redevelopment of existing church, including buildings and site.	Bockman Canal	3.5	3.2	3000	116,000	122,000	119,000

¹⁰ Include cross streets

¹¹ If a project is being constructed in phases, indicate the phase number and use a separate row entry for each phase. If not, enter "NA".

¹² Project Type is the type of development (i.e., new and/or redevelopment). Example descriptions of development are: 5-story office building, residential with 160 single-family homes with five 4-story buildings to contain 200 condominiums, 100 unit 2-story shopping mall, mixed use retail and residential development (apartments), industrial warehouse.

¹³ State the watershed(s) in which the Regulated Project is located. Downstream watershed(s) may be included, but this is optional.

¹⁴ All impervious surfaces added to any area of the site that was previously existing pervious surface.

¹⁵ All impervious surfaces added to any area of the site that was previously existing impervious surface.

¹⁶ For redevelopment projects, state the pre-project impervious surface area.

¹⁷ For redevelopment projects, state the post-project impervious surface area.

C.3.b.v.(1) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

³⁰ For public projects, enter the plans and specifications approval date.

³¹ List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.

³² List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.

³³ List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).

³⁴ List the legal mechanism(s) (e.g., maintenance plan for O&M by public entity, etc...) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.

³⁵ See Provision C.3.d.i. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria. Enter the corresponding provision number of the appropriate criterion (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3).

³⁶ For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.

³⁷ For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.

³⁸ Note whether a third party was used to certify the project design complies with Provision C.3.d.

³⁹ If HM control is not required, state why not.

⁴⁰ If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), bioretention unit(s), regional detention basin, or in-stream control).

C.3.h.iv. ► Table of Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Fill in table below or attach your own table including the same information.

Name of Facility/Site Inspected	Address of Facility/Site Inspected	Newly Installed? (YES/NO) ⁴¹	Party Responsible ⁴² For Maintenance	Date of Inspection	Type of Inspection ⁴³	Type of Treatment/HM Control(s) Inspected ⁴⁴	Inspection Findings or Results ⁴⁵	Enforcement Action Taken ⁴⁶	Comments/Follow-up
Jesus Christ of Latter Day Saints	895 Grant Ave, San Lorenzo	Yes	O&M agreement with private landowner	1/6/2014	45-day	Four bioretention basins and a vegetative swale on site	Proper installation & O & M	None	None
St. Antonius Coptic Church	2500 Hansen Rd., Hayward	Yes	O&M agreement with private landowner	4/11/2014	45-day	Five Bioretention basins, onsite	Proper installation & O & M	None	None
TJ Max	3542 Village Dr., Castro Valley	Yes	O&M agreement with private landowner	5/16/2014	45-day	Five Bioretention basins, onsite	Proper installation & O & M	None	None
Garre Winery	3891 Greenville Rd., Livermore	Yes	O&M agreement with private landowner	6/6/2014	45-day	Gravel infiltration trench	Proper installation & O & M	None	None
PG&E Tesla Substation	17585 Patterson Pass Road, Livermore	No	O&M agreement with private landowner	2/18/2014	Annual O & M	Bioretention trench, infiltration through vegetative buffer, extended detention basin	Proper O&M	None	None
Castro Valley Public Library	3600 Norbridge Ave., Castro Valley	No	O&M by public entity, GSA-BMD	3/10/2014	Annual O&M	Three vegetative swales and one CDS unit	Minor maintenance issues, corrected during inspection	None	None
Condominium	21059 Wilbeam Ave., Castro Valley	No	Homeowner's Association/CC& R's	2/6/2014	Annual O & M	Vegetated swales	Proper O&M	None	None

⁴¹ Indicate "YES" if the facility was installed within the reporting period, or "NO" if installed during a previous fiscal year.

⁴² State the responsible operator for installed stormwater treatment systems and HM controls.

⁴³ State the type of inspection (e.g., 45-day, routine or scheduled, follow-up, etc.).

⁴⁴ State the type(s) of treatment systems inspected (e.g., bioretention facility, flow-through planter, infiltration basin, etc...) and the type(s) of HM controls inspected, and indicate whether the treatment system is an onsite, joint, or offsite system.

⁴⁵ State the inspection findings or results (e.g., proper installation, improper installation, proper O&M, immediate maintenance needed, etc.).

⁴⁶ State the enforcement action(s) taken, if any.

C.3.e.vi.Special Projects Reporting Table												
Reporting Period – January 1 – June 30, 2013												
Project Name & No.	Permittee	Address	Application Submittal Date ⁴⁷	Status ⁴⁸	Description ⁴⁹	Site Total Acreage	Density DU/Acre	Density FAR	Special Project Category ⁵⁰	LID Treatment Reduction Credit Available ⁵¹	List of LID Stormwater Treatment Systems ⁵²	List of Non-LID Stormwater Treatment Systems ⁵³
The Unincorporated County does not have any special projects to report.	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

⁴⁷ Date that a planning application for the Special Project was submitted.

⁴⁸ Indicate whether final discretionary approval is still pending or has been granted, and provide the date or version of the project plans upon which reporting is based.

⁴⁹ Type of project (commercial, mixed-use, residential), number of floors, number of units, type of parking, and other relevant information.

⁵⁰ For each applicable Special Project Category, list the specific criteria applied to determine applicability. For each non-applicable Special Project Category, indicate n/a.

⁵¹ For each applicable Special Project Category, state the maximum total LID Treatment Reduction Credit available. For Category C Special Projects also list the individual Location, Density, and Minimized Surface Parking Credits available.

⁵² List all LID stormwater treatment systems proposed. For each type, indicate the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area.

⁵³ List all non-LID stormwater treatment systems proposed. For each type of non-LID treatment system, indicate: (1) the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area, and (2) whether the treatment system either meets minimum design criteria published by a government agency or received certification issued by a government agency, and reference the applicable criteria or certification.

Section 4 – Provision C.4 Industrial and Commercial Site Controls

Program Highlights

Provide background information, highlights, trends, etc.

Alameda County CWP continued participation with countywide municipalities at bi-monthly IIDC subcommittee meetings in part to continue development of consistent approaches to comply with MRP requirements. Facility inspections continued using CUPA staff as well as one temporary staff. Facility inspection priorities were refined for all sites. Sixty four (64) inventoried sites were closed /in activated. In addition, a total of 147 newly identified CWP facilities were added to the list of sites to be inspected for FY 2014-2015. Several facilities were enforced against using administrative enforcement tools. Annual inspector training on November 14, 2013 attended by inspectors. In addition, an in-house training session for inspectors was held on February 19, 2014. A summer intern assisted the CWP in several projects during July & August 2014. The full time CWP inspector vacancy is expected to be filled in fall 2014.

C.4.b.i. ► Business Inspection Plan

Do you have a Business Inspection Plan? Yes No

If No, explain:

C.4.b.iii.(1) ► Potential Facilities List

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

SEE: Attached list of commercial and industrial facilities i.e. C.4 Attachment: Potential Facilities List

C.4.b.iii.(2) ► Facilities Scheduled for Inspection

List below or attach your list of facilities scheduled for inspection during the current fiscal year.

SEE: Attached list of facilities scheduled for inspection during the current fiscal year i.e. C.4 Attachment: Facilities Scheduled for Inspection FY 2014-2015

C.4.c.iii.(1) ► Facility Inspections

Fill out the following table or attach a summary of the following information. Indicate your violation reporting methodology below.

<input checked="" type="checkbox"/>	Permittee reports multiple discrete violations on a site as one violation.
<input type="checkbox"/>	Permittee reports the total number of discrete violations on each site.

	Number	Percent
Number of businesses inspected	404	
Total number of inspections conducted	423	
Number of violations (excluding verbal warnings)	5	
Sites inspected in violation	10	2
Violations resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner	9	90

Comments:

- “Number of violations (excluding verbal warnings)” means facilities inspected where a subsequent county CWP enforcement action followed, including Notice of Violation, Administrative Invoice or referral to other agency for further investigation or enforcement.
- “Sites inspected in violation” means facilities where evidence of an unpermitted NSW discharge was observed or reported
- “Violations resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner” means the number of facilities where unpermitted NSW were abated within acceptable time frames

Sites where violations not resolved w/in 10 days or longer period deemed acceptable:

99 Cents Store Only, 20882 Mission Blvd., Hayward- off & on-going NSW for several years, requiring replacement of trash compactor in 7/2014, finally replaced on August 19, 2014. Will issue an administrative enforcement invoice.

C.4.c.iii.(2) ► Frequency and Types/Categories of Violations Observed

Fill out the following table or attach a summary of the following information.

Type/Category of Violations Observed	Number of Violations
Actual discharge (e.g. active non-stormwater discharge or clear evidence of a recent discharge)	10
Potential discharge and other	94

Comments:

<ul style="list-style-type: none"> •“Actual discharge” means facilities where evidence of an unpermitted NSW discharge was observed or reported •“Potential discharge and other” means the number of facilities where BMP= 2 or 3 as observed in at least one area of site activity (e.g., rooftop equipment, etc.) during inspection 	
---	--

C.4.c.iii.(2) ► Frequency and Type of Enforcement Conducted

Fill out the following table or attach a summary of the following information.

	Enforcement Action (as listed in ERP) ⁴⁸	Number of Enforcement Actions Taken	% of Enforcement Actions Taken⁴⁹
Level 1	Warning Notice (e.g., NOV)	5	71
Level 2	Administrative Action w/o Penalty or Cost Recovery	0	0
Level 3	Administrative Action w/Penalty and Cost Recovery	2	29
Level 4	Legal Action	0	0
Total		7	100

C.4.c.iii.(3) ► Types of Violations Noted by Business Category

Fill out the following table or attach a summary of the following information.

Business Category⁵⁰	Number of Actual Discharge Violations	Number of Potential/Other Discharge Violations
Food Facility (Restaurant, Retail Food Svc.)	2	24
Auto Facility (Fueling, Repair/Service, Misc.)	4	26
Animal care/Boarding	0	1
Miscellaneous	2	6
Construction/Contractor	1	8
NOI	1	8
Retail/Wholesale	0	6

⁴⁸ Agencies to list specific enforcement actions as defined in their ERPs.
⁴⁹ Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.
⁵⁰ List your Program's standard business categories.

Parking Lots/Plazas	0	3
Mobile Cleaners	0	2
Municipal	0	6
Manufacturing	0	4

C.4.c.iii.(4) ► Non-Fileers

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

1. JW Enterprises, 15471 Railroad Ave., San Lorenzo; SFRWQB does not require permit per 6/19/14 joint inspection with ACDEH
2. Cycle Salvage, 21065 Foothill Blvd., Hayward
3. Cemex Aggregate Plant, 1544 Stanley Blvd., Pleasanton
4. Granite Construction Co., 1544 Stanley Blvd., Pleasanton
5. Westover Vineyards, 34329 Palomares Rd., Castro Valley
6. Raybern’s Foods, LLC, 311 W. A St. Hayward

C.4.d.iii ► Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
ACCWP Stormwater Business Inspectors Workshop: Enforcement Tools	November 14, 2013	<ul style="list-style-type: none"> • Using the Enforcement Response Plan • Enforcement Case Scenarios • BMPs for Businesses • Controlling Pre-production Plastics 	9	90
In-house Clean Water Insp. Training	February 19, 2014	<ul style="list-style-type: none"> • Inspection Plan, Goals, Frequency • Inspection Checklist, How to Complete • BMP Resources 	10	100
IIDC Subcommittee Meetings	Bi-monthly	Large Equipment Rental Yards, AC Vent Cleaning, Utility Vaults, Fire Sprinkler & Mobile Business Tip sheets	1	100

Section 5 – Provision C.5 Illicit Discharge Detection and Elimination

Program Highlights
Provide background information, highlights, trends, etc.
County staff participates in the CWP's I&IDC subcommittee. See Section C.5 – Illicit Discharge Detection and Elimination – of the ACCWP FY 13-14 Annual Report for a summary of Program activities.

C.5.c.iii ► Complaint and Spill Response Phone Number and Spill Contact List		
List below or attach your complaint and spill response phone number and spill contact list.		
Contact	Description	Phone Number
Public Works Agency	Maintenance and Operations Main Number	510-670-5500

C.5.d.iii ► Evaluation of Mobile Business Program
Describe implementation of minimum standards and BMPs for mobile businesses and your enforcement strategy. This may include participation in the BASMAA Mobile Surface Cleaners regional program or local activities.
<p>Description:</p> <p>See Section C.5 – Illicit Discharge Detection and Elimination – of the ACCWP FY 13-14 Annual Report for a summary of related Program and BASMAA activities.</p> <p>If County receives a complaint regarding mobile cleaner, it is processed as an illicit spill/discharge and a County inspector responds. Should an inspector observe a mobile business (e.g., car detailer, mobile food truck, etc.) while in the field engaged in activities absent appropriate BMP, or generate an illicit discharge, the inspector will stop to address the circumstances in real time. Other departments or agencies with shared compliance responsibility, such as the County environmental health agency in the case of food trucks, are contacted and concerns forwarded to them. Mobile businesses identified as having a primary business address in a neighboring municipality, the associated CWP in that municipality is contacted. And where circumstances suggest a mobile operator may be operating across multiple jurisdictional lines and violations have been observed, the District Attorney investigator is contacted in case they wish to conduct surveillance of the operator in pursuit of a comprehensive enforcement action.</p>

C.5.e.iii ► Evaluation of Collection System Screening Program

Provide a summary or attach a summary of your collection screening program, a summary of problems found during collection system screening and any changes to the screening program this FY.

Description: In the first quarter of 2013-14, staff conducted evaluation surveys of the 20 selected high priority screening points (no changes made to selected high-priority sites), both "non-inlet" points and those done in conjunction with drop inlet cleaning. No problems or anything remarkable was found during system screening.

C.5.f.iii.(1), (2), (3) ► Spill and Discharge Complaint Tracking

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)

	Number	Percentage
Discharges reported (C.5.f.iii.(1))	18	
Discharges reaching storm drains and/or receiving waters (C.5.f.iii.(2))	3	17%
Discharges resolved in a timely manner (C.5.f.iii.(3))	18	100%

Comments:
 Complaints/Spill/Discharge incidents are tracked by Maintenance and Operations Department using Work Order software and "Mainstar" database. Service requests are given to Construction Inspection Division for inspection and follow-up and Construction Division staff are tracked using ACCESS database. Summary report is generated by sampling Mainstar database using activity code unique to spill and illicit discharges.

C.5.f.iii.(4) ► Summary of major types of discharges and complaints

Provide a narrative or attach a table and/or graph.

On 8/8/2013 a complaint was made on a homeless encampment. It took 28 days to coordinate with necessary agencies, post legal notice, adhere to required waiting period post-notice, clean-up, and proceed through the steps to make sure the clean-up was done correctly with all involved.

Section 6 – Provision C.6 Construction Site Controls

C.6.e.iii.1.a, b, c ▶ Site/Inspection Totals		
Number of High Priority Sites (sites disturbing < 1 acre of soil requiring storm water runoff quality inspection) (C.6.e.iii.1.a)	Number of sites disturbing ≥ 1 acre of soil (C.6.e.iii.1.b)	Total number of storm water runoff quality inspections conducted (include only High Priority Site and sites disturbing 1 acre or more) (C.6.e.iii.1.c)
3	11	96
Comments: The total number of inspections equals the initial monthly inspection for sites plus any follow-up inspections that may have been required.		

C.6.e.iii.1.d ▶ Construction Activities Storm Water Violations		
BMP Category	Number of Violations⁵¹ excluding Verbal Warnings	% of Total Violations⁵²
Erosion Control	2	20
Run-on and Run-off Control	0	0
Sediment Control	5	50
Active Treatment Systems	0	0
Good Site Management	2	20
Non Stormwater Management	1	10
Total⁵³	10	100%

⁵¹ Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category. For example, if during one inspection at a site, there are 2 erosion control violations, only 1 violation would be counted for this table.

⁵² Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

⁵³ The total number of violations may count more than one violation per inspection, since some inspections may result in violations in more than one category. For example, during one inspection of a site, there may have been both an erosion control violation and a sediment control violation. For this reason, the total number of violations in this table may not match the total number of enforcement actions reported in Table C6.e.iii.1.e.

C.6.e.iii.1.e ▶ Construction Related Storm Water Enforcement Actions

	Enforcement Action (as listed in ERP) ⁵⁴	Number Enforcement Actions Issued	% Enforcement Actions Issued⁵⁵
Level 1 ⁵⁶	Verbal Warning	17	81%
Level 2	Written Warning	4	19%
Level 3	Notice of Violation	0	0%
Level 4	Stop Notice	0	0%
Total		21	100%

C.6.e.iii.1.f, g ▶ Illicit Discharges

	Number
Number of illicit discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.f)	0
Number of sites with discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.g)	0

⁵⁴ Agencies should list the specific enforcement actions as defined in their ERPs.

⁵⁵ Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

⁵⁶ For example, Enforcement Level 1 may be Verbal Warning.

C.6.e.iii.1.h, i ► Violation Correction Times

	Number	Percent
Violations (excluding verbal warnings) fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	4	100% ⁵⁷
Violations (excluding verbal warnings) not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	0	0% ⁵⁸
Total number of violations (excluding verbal warnings) for the reporting year ⁵⁹	4	100%
Comments:		

C.6.e.iii.(2) ► Evaluation of Inspection Data

Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).

Description:
 A total of 96 inspections were conducted at 14 different sites in the unincorporated areas and County owned properties during this reporting period. The tracking data showed that the sediment control BMP category was again the largest problem area. This is most likely due to sediment controls being used as the primary protection measures at sites instead of utilizing appropriate erosion controls. This data is consistent with prior reporting years. Generally, the majority of violations/warnings for this BMP category were issued due to inadequate maintenance.

C.6.e.iii.(2) ► Evaluation of Inspection Program Effectiveness

Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.

Description:
 To better the County's program, the stormwater construction inspection form was revised to include a carbon copy and the inspection notification policy was changed. The policy was changed to notify site supervisors via email 48 hours prior to the each monthly inspection so that site personnel can be present and properly notified of any corrective actions during the inspection. The carbon copy construction inspection form allows the site supervisor to have a copy of the report immediately after the inspection. A formal report including photos is subsequently submitted via email to the construction manager and site supervisor. This approach further reduced the turn-around time for corrective action. Since these changes

⁵⁷ Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

⁵⁸ Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

⁵⁹ The total number of violations reported in the table of Violation Correction Times equals the number of initial enforcement actions. I.e., This assumes one violation is issued for several problems during an inspection at a site. The total number of violations in the table of Violation Correction Times may not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

Permittee Name: County of Alameda

went into effect, generally all corrective actions, have been completed within 2 to 5 days and potential violations were significantly reduced. Currently our stormwater compliance program is very effective and running smoothly.

C.6.f ► Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
Construction Stormwater C.6 Training	May 29, 2014	Review of Provisions C.6 Requirements How the State Construction General Permit Relates to the MRP Proper Use of Construction BMP's Review of Inspection Tools Enforcement Options	5 GSA/TSD and BMD Project Managers attended the training.	0%* Training was focused to educate managers.
Certified Inspector Sediment and Erosion Controls	June 10 & 11, 2014	EPA Information, Inspector Background Material, Best Management Practices, and Conducting Inspections	1 PWA Project Managers attended the training.	0%* Training was focused to educate managers.

Section 7 – Provision C.7. Public Information and Outreach

C.7.b.ii.1 ► Advertising Campaign

Summarize advertising efforts. Include details such as messages, creative developed, and outreach media used. The detailed advertising report may be included as an attachment. If advertising is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

Summary: See Section C.7 – Public Information and Outreach – of the ACCWP FY 13-14 Annual Report and the BASMAA FY 2013-2014 Regional Supplement for Training and Outreach for a summary of related Program and BASMAA activities.

Local Effort

The Alameda County Unincorporated Area Program had a .30 second movie ad derived from the Be the Street campaign youth video contest “Pick Up Trash” video, and had it played before every movie showing in the local Castro Valley movie theater from 11/1/13 – 5/16/14.

C.7.b.iii.1 ► Pre-Campaign Survey

(For the Annual Report following the pre-campaign survey) Summarize survey information such as sample size, type of survey (telephone survey, interviews etc.). Attach a survey report that includes the following information. If survey was done regionally, refer to a regional submittal that contains the following information:

Information on the pre-campaign surveys was included in previous annual reports.

Place an **X** in the appropriate box below: N/A

<input type="checkbox"/>	Survey report attached
<input type="checkbox"/>	Reference to regional submittal:

Permittee Name: County of Alameda

C.7.b.iii.2 ► Post-Campaign Survey

(For the Annual Report following the post-campaign survey) Discuss the campaigns and the measureable changes in awareness and behavior achieved. Provide an update of outreach strategies based on the survey results. If survey was done regionally, refer to a regional submittal that contains the following information:
 Information on the post-campaign survey for the BASMAA Regional Youth Litter Campaign was provided in the BASMAA FY 13-14 Annual Report. Place an **X** in the appropriate box below:

	Survey report attached
X	Reference to regional submittal: Regional Youth Litter Campaign report in the BASMAA FY 2013-2014 Regional Supplement for Training and Outreach

C.7.c ► Media Relations

Summarize the media relations effort. Include the following details for each media pitch in the space below, AND/OR refer to a regional report that includes these details:

- Topic and content of pitch
- Medium (TV, radio, print, online)
- Date of publication/broadcast

Summary:
 The following separate report developed by BASMAA summarizes media relations efforts conducted during FY 13-14: BASMAA FY 2013-2014 Regional Supplement for Training and Outreach

Other media relations efforts conducted countywide are included within the C.7 Public Information and Outreach section of the ACCWP FY 13-14 Annual Report.

Local Effort
 The following press releases were posted to the Castro Valley Patch and sent to the Castro Valley Forum:

- Clean Streets in Alameda County Pave the Way to Clean Water in the SF Bay - 9/27/12
- Holiday Wrapping Paper Press Release – 12/17/13
- Got Ants? – 2/26/14 (this release also went to Bay Area News and The Independent newspaper)
- Castro Valley Eco-Friendly Car Wash Fundraiser – 5/8/14
- Car Washing Tips – sent to San Lorenzo Homeowner's Association for their newsletter on 5/13/14
-

Permittee Name: County of Alameda

C.7.d ► Stormwater Point of Contact

Summary of any changes made during FY 13-14:

Please refer to countywide Program's C.7 Public Information and Outreach section of Program's FY 13-14 Annual Report for efforts conducted by the countywide program to publicize stormwater points of contact (e.g. program website, hotline, outreach materials, etc.).

Local Effort

Alameda County started using a smart phone application during the 2013-14FY called "Mobile Citizen" to make it easier for local residents to report illegal dumping and spills and send photos of the incident s. The application has GPS functionality, so it simultaneously maps the location and generates a work request for the Maintenance and Operations Department.

C.7.e ► Public Outreach Events

Describe general approach to event selection. Provide a list of outreach materials and giveaways distributed.

Use the following table for reporting and evaluating public outreach events

Event Details	Description (messages, audience)	Evaluation of Effectiveness
<p>Provide event name, date, and location. Indicate if event is local, countywide or regional.</p>	<p>Identify type of event (e.g., school fair, farmers market etc.), type of audience (school children, gardeners, homeowners etc.) and outreach messages (e.g., Enviroscene presentation, pesticides, stormwater awareness)</p>	<p>Provide general staff feedback on the event (e.g., success at reaching a broad spectrum of the community, well attended, good opportunity to talk to gardeners etc.). Provide other details such as:</p> <ul style="list-style-type: none"> • Estimated overall attendance at the event. • Number of people that visited the booth, comparison with previous years • Number of brochures and giveaways distributed • Results of any spot surveys conducted
<p>Stormwater Exhibit at the Alameda County Fair - July 1 through July 8, 2013 and June 18 through June 30, 2014. Setting up the exhibit and producing the outreach materials are Countywide Program efforts. Staffing the exhibit is an effort conducted by individual Permittees.</p>	<p>The County Fair is attended by a wide range of residents from throughout the County. The primary message of the exhibit and outreach materials is to encourage residents to reduce their use of pesticides or when necessary use less-toxic pesticides. The exhibit also illustrates the basic watershed awareness/stormwater pollution message.</p>	<p>Several hundred thousand residents attend the fair each year. A more detailed description of the exhibit is included in Section C.7 Public Information and Outreach of the Countywide Program's FY 13/14 Annual Report.</p>

Permittee Name: County of Alameda

<p>Stormwater Exhibit at the Alameda County Fair – The Unincorporated Area Program Staffed the Fair Booth on 7/4/13.</p>	<p>County Fair, open to the general public. Outreach message focused on using less toxic methods to manage pests around the yard, and the negative consequences of using pesticides. This year an extra emphasis was put on how pesticides not only pollute our waterways, but can also negatively affect native bee populations, and CA agriculture.</p>	<p>This year the Fair had 475,762 attendees, a 22% increase from last year. Very good opportunity to speak to homeowners about how they can use less toxic methods to control pests in their yard and garden. A craft activity was added each Fridays for “Kids’ Day”, to increase the amount of children attending the booth, and to provide opportunities to speak to children and their families about our booth message. Handout materials included non-toxic pest control recipes label for water bottles, Our Waterful World newsletters and mood pencils. The non-toxic recipe label was a great conversation piece to start the discussion on pesticides.</p>
<p>Castro Valley Fall Festival, Castro Village Shopping Center, Castro Valley – 9/14 & 9/15/13</p> <p>The Unincorporated Area Program created the booth concept, did all set-up and breakdown of the booth and staffed the event.</p>	<p>Local Street Fair open to the general public. To coincide with Coastal Clean-up efforts, the focus of our booth at Fall events is reducing litter that ends up in local creeks, and eventually the San Francisco Bay.</p>	<p>A large community event with an estimated 4,000 residents in attendance and 200 vendors. We had lots of participation in our interactive booth, which was staffed from 10am-6pm both days of the event. We had a life-size stormdrain on the table, where people could lift the grate and take a look at some of the trash that ends up in our creeks by going down the stormdrain. This was used as a conversation piece, to engage with the public, and talk about alternatives to some commonly used trash items (use a reusable water bottle instead of plastic ones, use Tupperware in lunches instead of plastic bags, use a reusable shopping bag, reusable coffee cup, etc.) We also had a colored wheel game, that was used along with our “true or rubbish questions”, Families that visited our booth could also play our interactive game, where they went “fishing” in our “Bay”, with the goal of pulling out a fish and not one of the disposable litter items mentioned above. If they pulled out litter, they were asked which reusable they could have used to prevent this from ending up in the Bay. We also gave away 150 reusable chico bags,</p>

Permittee Name: County of Alameda

		mood pencils, seed packets, fish erasers, activity guides, Detain the Rain brochures and car maintenance guides, along with a flyer featuring local volunteer opportunities through the ACFC&WCD's Hands-On-Conservation program,
<p>San Lorenzo Farmers Market, Hesperian Boulevard, San Lorenzo – 7/13/13, 8/10/13, 9/28/13, 10/12/13</p> <p>The Unincorporated Area Program created the booth concept, did all set-up and breakdown of the booth and staffed the event.</p>	<p>Local Farmers market open to the public. Unincorporated Area booth materials focused on pesticides and less toxic ways to control pests around the home and yard in July, and focused on reducing litter in August, September and October.</p>	<p>Very successful, interactive booth with games for both children and adults to test their knowledge of general stormwater pollution prevention practices, and a more targeted message of how pesticides harm useful bugs, such as bees, ladybugs, spiders and beetles that help keep a healthy garden (in July and August 2013). Litter reducing message as mentioned above under the Castro Valley Fall Festival is featured during the fall months (September and October 2013). We transitioned our spring message in May and June of 2013 to focus more on how water pollution affects frogs in our local creeks, and incorporated the new frog-themed materials and games produced through the Alameda Countywide Clean Water Program. Approximately 200-500 local residents attended each farmers market. Outreach materials included: non-toxic water bottle recipe labels, mood pencils, fish erasers, reusable chico and new Clean Water Program bags, and drought tolerant native plant seeds.</p>
<p>Sunol Ag Park Harvest Festival – 10/6/13</p>	<p>Local festival open to the public. Lots of families attend this event.</p>	<p>Event participants made custom wildflower seed packets and learned how to protect the beneficial insects that visit the hedgerow by not using pesticides. The AgPark Harvest Festival attracted almost 700 people, with activity table having 35-40 visitors, including a number of children.</p>
<p>ACT (Ashland/Cherryland Together) Street Party – 10/19/13, Ashland Community Center</p>	<p>Local health fair open to the public. Many Unincorporated Area families attend this event.</p>	<p>Approximately 500 local residents attended this event. Our booth featured our anti-litter message, including playing the colored wheel</p>

Permittee Name: County of Alameda

<p>The Unincorporated Area Program created the booth concept, did all set-up and breakdown of the booth and staffed the event.</p>		<p>game with "True or Rubbish" questions, and the litter/fishing game. We gave away 50 chico bags, Detain the Rain brochures, Keeping it all in Tune brochures, mood pencils, fish erasers, and native plant seeds.</p>
<p>Sunol Wildflower Festival – 4/12/14, Sunol-Ohlone Regional Wilderness</p> <p>The Unincorporated Area Program created the booth concept, did all set-up and breakdown of the booth and staffed the event.</p>	<p>Local, family friendly festival that is open to the public. Many families with young children in the Sunol/East Bay Area attend this event. In addition to the outreach booths, East Bay Parks staff take groups on wildflower walks, and State Sen. Ellen Corbett hosts her annual Walking Town Hall the event and gives an update on important state and East Bay environmental issues.</p>	<p>Approximately 300 local community members attended this event. Our Clean Water booth utilized a frog theme in order to educate event participants about frogs' roles as an indicator species and how they tell us about the water quality of our local creeks.</p> <p>In order to explain how frogs are an indicator species for water quality in our local creeks and create awareness of the environmental impacts of water pollution, staff engaged children with the following two environmental activities: the "Fact or Frog-tale Quiz" game and a bookmark craft activity. The "Fact or Frog-tale Quiz" game utilized a large colored wheel for players to spin. The color they landed on corresponded to a same-color card which asked a question about frogs. No matter if they answered correctly or not, each player received a prize and staff used the game to open up discussion about how we use frogs as an indicator species for water quality and about the importance of keeping our waterways clean of pollution. Staff then finished the game by reminding players of main ways in which they could prevent contaminants from entering our storm drains.</p> <p>A bookmark craft activity allowed children to make their own frog bookmark. This activity used a press that stamped out the shape of a frog onto cardstock. Children came up one at a time to stamp out their frog-shaped bookmark with the help of a staff member. Staff then stamped with ink the back of the bookmark with CWP's message "remember</p>

		<p>only rain down the storm drain." Children were then able to color and decorate their bookmark, while discussing with staff different ways in which we can keep our creeks and streams clean of pollution.</p> <p>To promote the use of non-toxic methods in the home and garden to control pests in order to reduce stormwater pollution, CWP spray bottle sticker labels and fact cards were given out to event participants. The labels and fact cards contained recipes for non-toxic pest controls which could be used instead of store-bought chemicals.</p> <p>In order to further encourage the prevention of toxic chemicals being released into our storm drains, "Keeping it All in Tune" brochures were available for event participants which discuss keeping your car free from leaks and the proper way to dispose of automotive fluids.</p>
<p>Cinco de Mayo Health Fair, Ashland Community Center – 5/3/14</p> <p>The Unincorporated Area Program created the booth concept, did all set-up and breakdown of the booth and staffed the event.</p>	<p>Community Health Fair, with a large turnout of Hispanic community members. General storm water pollution prevention message, with an emphasis on using non-toxic methods to deal with pests around the home and garden.</p>	<p>Approximately 250 local community members attended the event. We hosted an interactive booth with games for both children and adults with a targeted message of how pesticides harm important creek animals such as frogs, which are an indicator species for creek health (see above entry for the Sunol Wildflower Festival for full details). Since a large portion of Spanish speaking residents attend this event, we had materials printed in Spanish available such as Our Water Our World (OWOW) flyers that give non-toxic tips to deal with pests such as ants, spiders, cockroaches, yellow jackets, and aphids . We also had a Spanish OWOW flyer on the harms of pesticides. People who played our games or interacted with our staff received mood pencils, non-toxic water bottle recipe labels, and native plant seeds.</p>
<p>Sunol AgPark Plant Sale/ Open House/Farm Tours - 5/3/14</p>	<p>Community event, open to the general public. The focus of this event was to</p>	<p>The AgPark Plant Sale event attracted nearly 200 people, with 20-25 visitors to the Clean</p>

Permittee Name: County of Alameda

	<p>educate the public on organic farming without the use of pesticides, and demonstrate successful practices.</p>	<p>Water Program (CWP) table. CWP Wildflower seed packets were given out.</p>
<p>Castro Valley Farmers Market – 5/17/14 and 6/28/14, Castro Valley BART Station, Redwood Road & Norbridge, Castro Valley</p> <p>The Unincorporated Area Program created the booth concept, did all set-up and breakdown of the booth and staffed the event.</p>	<p>Local Farmers market open to the public. Unincorporated Area booth materials</p>	<p>Approximately 350 local community members attend each of these events. We featured our spring anti-pesticide message on how to use non-toxic methods to deal with pests around the home and garden. Games and activities listed above for the Sunol Wildflower Festival were featured at our booth. Giveaways included native flower seeds, mood pencils, non-toxic recipe water bottle labels, activity guides and Keeping it all in Tune brochures.</p>
<p>Watershed Science Expo at Palomares School, Castro Valley - 5/16/14. All Day Event that Serves Castro Valley and San Lorenzo schools.</p> <p>The Unincorporated Area Program created the booth concept, did all set-up and breakdown of the booth and staffed the event.</p>	<p>This watershed education-focused day features watershed/hands-on science - focused activity stations on campus and by the creek, led by watershed/science exhibitors for 3rd grade students and their teachers from schools throughout the watershed.</p> <ul style="list-style-type: none"> - 24 Palomares students trained as "Creek Tour Guides" led 43 tours of the creek restoration sites and their own stewardship projects. They also led 3 activity stations with a creek theme. -Palomares Jr. Naturalists also assist with event-wide trash cleanup of campus by all participants. 3 assemblies with live wildlife presented by Wildlife Associates 	<p>All six grade levels from Palomares School participated. 3rd grade students from 38 classes from 13 schools from Castro Valley, San Lorenzo, and Hayward attended. Totals: 1200 students, 44 teachers, 2 principals, and 250 parent helpers/chaperones attended. 56 Palomares parent/community and PTA volunteers helped out preparing for the event and the day of. 19 agencies/organizations had activity stations; total of 21 stations at the Expo.</p> <p>Donations of materials came from the local sanitary district, stores, adult school, parent club. Attending classes donated \$750.</p> <p>All 12 teacher responses were positive and cited the hands-on learning, creek education, and the fact that the activities were linked to the 3rd grade science standards.</p>

Permittee Name: County of Alameda

C.7.f. ► Watershed Stewardship Collaborative Efforts

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report.

Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

See Section C.7 (Public Outreach and Involvement) of the Countywide Program's FY 13/14 Annual Report for a summary of the *Bringing Back the Natives Garden* tour that is sponsored by the Program.

Local Watershed Stewardship Efforts:
Collaboration also continues with the Friends of San Lorenzo Creek community group, to find ways to work together and include group members in our local outreach events. 2013/2014 fiscal year collaboration efforts are described under the Citizen Involvement section below.

In spring of 2014, Unincorporated Area Program staff took the lead on fostering a relationship between the Castro Valley Boy Scouts and a local car wash to encourage the Scouts to hold their car wash fundraisers at the car wash facility, instead of a local parking lot as they had with past fundraising events. Through the Program's efforts, Castro Valley's Boy Scout Troop 722 teamed up with Chabot Car Wash at 20735 Lake Chabot Rd for their annual car wash fundraiser on 5/31/14. By using the facilities at Chabot Car Wash, the scouts ensured that the water was collected and properly treated.

C.7.g. ► Citizen Involvement Events

List the types of events conducted (e.g., creek clean up, storm drain inlet marking, native gardening etc.). Use the following table for reporting and evaluating citizen involvement events.

Event Details	Description	Evaluation of effectiveness
Provide event name, date, and location. Indicate if event is local, countywide or regional	Describe activity (e.g., creek clean-up, storm drain marking etc.)	Provide general staff feedback on the event. Provide other evaluation details such as:

FY 2013-2014 Annual Report

C.7 Public Information and Outreach

		<ul style="list-style-type: none"> • Number of participants. Any change in participation from previous years. • Distance of creek or water body cleaned • Quantity of trash/recyclables collected (weight or volume). • Number of inlets marked. • Data trends
<p>Community Stewardship Program</p> <p>The Unincorporated Area Program is a major funder of this program.</p>	<p>The Countywide Program sponsors the Community Stewardship Grants (CSG) Program. The CSG Program provides approximately \$20,000 annually in \$1,000 to \$5,000 increments to individuals and community groups to support stormwater improvement/outreach projects throughout the County.</p>	<p>See the Countywide Program's FY 13/14 Annual Report for a summary.</p>
<p>11th Unincorporated Area Fall Clean-Up and Beautification, Ashland and Cherryland sections of San Lorenzo – 9/28/13</p> <p>The Unincorporated Area Program staff at Nate Miley's office coordinated and staffed this event.</p>	<p>Large, annual clean-up organized and funded by the Unincorporated Area Program in the Ashland and Cherryland communities.</p>	<p>Approximately 60 volunteers participated and picked up trash at the following locations: Blossom Way, Meekland Avenue, A Street, Mission Blvd., Laurel Ave, and Western Blvd. – Ashland and Cherryland Communities. The Unincorporated Area Program also provided donated reusable bags for volunteers, 250 garbage bags, and picked up approximately 16 cu yds of trash. Volunteers also received native seed packets, chico bags and Clean Water Program Activity Guides.</p>
<p>REACH Ashland Youth Center Clean-Up Along E 14th Street and Surrounding Neighborhoods, Ashland – 3/22/14</p> <p>The Unincorporated Area Program sponsored this event.</p>	<p>Community clean-up that was sponsored by the Unincorporated Area Program.</p>	<p>The Unincorporated Area provided the following supplies to this event for the 50 participants: grabbers, trash bags, green waste bags, hedge trimmers, tools for weed abatement, gloves, and assistance picking up 3 cu yds of trash and 5 cu yds of green waste.</p>

Permittee Name: County of Alameda

<p>San Lorenzo Homeowners' Association Earth Day Clean-Up, 377 Paseo Grande, San Lorenzo – 4/26/14</p> <p>The Unincorporated Area Program sponsored this event.</p>	<p>Community clean-up that was sponsored by the Unincorporated Area Program.</p>	<p>The Unincorporated Area Program provided the following supplies to this event for 100 participants: 100 Vests, 75-100 Litter Picks, 120 sets of gloves and 50-75 large garbage bags. 20 cu yds of trash was hauled by Maintenance Staff at the end of the event.</p>
<p>Cull Canyon Reservoir Earth Day Clean-Up, Castro Valley – 4/26/14</p> <p>Unincorporated Area staff facilitated this clean-up site the day of the event.</p>	<p>The Unincorporated Area Program partnered with the East Bay Regional Park District to facilitate a native planting/clean-up site at Cull Canyon Reservoir. This site was one of the 5 public sites sponsored by the Castro Valley Sanitary District.</p>	<p>This event consisted of 12 local volunteers working at the site from 9am – 12pm, clearing weeds and trash from an area within the park and installing native trees. Accomplishments of the day:</p> <ul style="list-style-type: none"> - 8 bags of weeds and debris taken - 25 yards of hillside mulched - 20 trees planted
<p>Castro Valley Sanitary District Earth Day Clean-Up, Throughout Castro Valley – 4/26/14</p> <p>The Unincorporated Area Program sponsored this event.</p>	<p>The Unincorporated Area Program is a major sponsor (in addition to planning and facilitating two clean-up sites for the event) of this large, annual clean-up at trash "hot spot" locations within the Castro Valley Community.</p>	<p>Approximately 600 volunteers at 13 Castro Valley schools and 5 public sites participated in the 12th annual clean-up. Volunteers cleared 55 cu yds of organic debris and 7 cu Yds of litter from Castro Valley streets, parks, schools and creeks. As a major event sponsor, the Unincorporated Program provided:</p> <ul style="list-style-type: none"> - Participation of two additional teams of weekend work crews in the Clean-Up event on Saturday, April 26, 2014 from 9:00 a.m. - 12:00 p.m. for increased assistance. - Picked-Up of bagged organics and garbage from the Clean-Up event on Saturday, April 26, 2014 from 12:00 p.m. - 4:00 p.m., and dropped-off of organics and garbage bags at corresponding Waste Management bins at CVSan. - Provided materials for the Clean-Up, including: Two hundred and fifty plastic garbage bags, two hundred pairs of gloves, two hundred litter grabbers/picks, and ten shovels.

FY 2013-2014 Annual Report

C.7 Public Information and Outreach

Permittee Name: County of Alameda

<p>Dig Deep Farm, Ashland - 2/23/13 Stewardship activities with EarthTeam and the Hands-On Conservation program</p>	<p>Local event for students. Native plant establishment and application of mulch at Dig Deep's Ashland farm in order to support beneficial insects and pollinators. Dig Deep is a non-profit farm serving Ashland, a limited-resource area in unincorporated Alameda County, with produce grown in the neighborhood. EarthTeam, a non-profit, supplied the bus to bring the students to the farm to assist Dig Deep, and HOC provided tools and assistance with planting.</p>	<p>30 students from San Lorenzo High School, their high school teacher and staff from the EarthTeam organization planted approximately 40 native plants and applied 1 cubic yard of mulch (wood chips). 2 gallons of litter picked up at site as well. The high school students have developed an ongoing service relationship with this farm as it is a beneficial neighborhood resource. Trash total volume: .01 cu yd</p>
<p>Sunol AgPark (organic farm) Hedgerow workdays, Sunol - Stewardship activities with the Hands-On Conservation (HOC) program Community volunteers workdays at the hedgerow led by SAGE -11/2/13, 12/7/13, 4/5/14. High School/middle school student workdays at the hedgerows- 9/24/13, 10/1/13, 10/22/13, 10/29/13, 3/7/14, 12/4/13 Hedgerow maintenance workdays with AgPark interns with HOC guidance-7/23/14, 8/29/14.</p>	<p>Hedgerow planning, design and installation project with high school students for new segments of the farm hedgerow. Educational activities for students on beneficial insect monitoring, soil evaluation and creek water quality protection practices were provided. Creek studies hike conducted by HOC for students; worked with landowner to maintain creek access. Community volunteers also maintained native plants, removed invasive plants and weeds in a grass filter strip and native plant hedgerow alongside the Arroyo de la Laguna which borders the farm with assistance from the Hands-On Conservation Program.</p>	<p>As part of the service learning element of education program at the Sunol AgPark farm, 40 native plants were installed, 3- 100' sections of new hedgerow designed and planted by 25 Kennedy, 35 San Lorenzo, and 22 Castlemont high school students. Also 40 Head-Royce Middle School students and 10 teachers/chaperones. Each class had 2 trips to the farm. -600' of Creekside hedgerow/filter strip maintained, plant signage installed and beneficial insects monitored by volunteers on the various community volunteer workdays, with 10-15 volunteers at each. CWP reusable shopping bags given to volunteers.</p>
<p>Bay Trees Park, Native Plant Trail and Creek Cleanup workdays, Castro Valley -Camp Evergreen (Girl Scouts) workdays 7/19/13, 8/10/13 -National Public Lands Day community workday with Castro Valley High School students and Dublin Boy Scouts: 9/28/13 -EarthTeam and San Lorenzo High School workday on 12/14/13</p>	<p>Student and community volunteers installed bender board to define pathways in a native plant trail, planted native plants, removed weeds and invasive plants, and cleaned up trash and spray paint cans along the creek banks in the park. "Creek Care" concepts were passed along informally to volunteers during creek walks and cleanup work. Water quality testing was done by high school students. The site was maintained and monitored an additional 6 times during the year by staff in</p>	<p>Approximately 50' of bender board installed, repaired 300' of bender board, 35 plants installed, irrigation provided for plants, and plant caging was installed. 1 large bag (12 cu ft each) filled with trash from each workday from creek side areas and park trail. 40 students from San Lorenzo High School worked on 12/14/13 transported by bus provided by EarthTeam. 30 Girl Scout (Camp Evergreen) participants and parent helpers. 25 Boy Scouts and Castro Valley High School students attend National Public Lands</p>

Permittee Name: County of Alameda

	order to maintain irrigation in drought conditions, to repair broken bender board and weed in order to reduce fire hazard.	workday; many spray paint cans picked up from creek channel in addition to trash. CWP reusable trash bags given to volunteers. Trash total volume: 1.80 cu yds
Castro Valley Creek, Castro Valley- Earth Day 4/26/14 Unincorporated Area staff facilitated this clean-up site the day of the event.	The creek trail was cleaned up, invasive plants removed, mulch applied, and native riparian plants along creek side trail were maintained. Event included coordination and assistance from other involved agencies and the local group, Friends of San Lorenzo Creek; pre-cleanup presentation given by Friends group on the creek restoration that had taken place.	Approximately 1000 linear feet of creek bank and trail was cleaned up by 25-30 community volunteers, yielding 12 trash bags; bulky items in addition. 2 cubic yards of mulch applied to habitat plantings along creekside trail. Volunteers were given CWP reusable shopping bags. Trash total volume: 2.5 cu yd
Palomares Creek at Palomares School Earth day, Castro Valley – 4/26/14 Trail maintenance and school campus cleanup day held as part of Castro Valley community Earth Day event	Parent volunteers and community members work at the school to clean up the campus, pick up trash, clear debris and provide erosion control along the trail, remove invasive plants and poison oak in preparation for the May Watershed Expo.	The event had 46 parents, teachers, students and community members in attendance. Approx. 400-500 linear feet of creek area/ trail improved, mulch applied where needed, and overgrown plants pruned back along trail. School campus cleaned up. Poison oak cleared away from trails. Trash total volume: .10 cu yd
School wide Campus Litter Cleanup by students at Palomares Watershed Science Expo- 5/16/14	Each Expo activity station exhibitor was given a trash bag and was responsible for having each group of students pick up trash from the area surrounding the station on the campus during the event, with help from parent chaperones. Trash was collected at the end of the day from each station and recycled by Palomares Elementary Jr. Naturalists.	Everyone who attended the Expo participated in this activity that was coordinated by ACRC staff; each of the 21 Expo activity stations participated. Approximately 3 gallons of trash collected/recycled. Trash total volume: .015 cu yd

Permittee Name: County of Alameda

C.7.h. ► School-Age Children Outreach

Summarize school-age children outreach programs implemented. A detailed report may be included as an attachment. Use the following table for reporting school-age children outreach efforts.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
Provide the following information: Name Grade or level (elementary/ middle/ high)	Brief description, messages, methods of outreach used	Provide number or participants	Provide agency staff feedback. Report any other evaluation methods used (quiz, teacher feedback etc.). Attach evaluation summary if applicable.
See the Section C.7 of the ACCWP FY 13/14 Annual Report for a summary of the Program's School-Age Outreach Program	See the Section C.7 of the ACCWP FY 13/14 Annual Report for a summary of the Program's School-Age Outreach Program	See the Section C.7 of the ACCWP FY 13/14 Annual Report for a summary of the Program's School-Age Outreach Program	See the Section C.7 of the ACCWP FY 13/14 Annual Report for a summary of the Program's School-Age Outreach Program
Palomares School – Creek Program - Loaned program materials and expertise to Washington Middle School in San Lorenzo for week of May 4 th 2014 -Training for Sulphur Creek Nature Center docents at Palomares School 4/3/14	The science program at Washington Middle School (San Lorenzo) utilized Palomares creek program materials for a field trip to Samuel Taylor State park; water quality testing and other creek investigations were done by students. -Docents from the Sulphur Creek Nature Center visited Palomares School to learn from the Palomares Creek Tour Guides about the creek restoration and campus restoration projects in prep for their upcoming healthy creeks workshop, and borrowed Palomares' native plant signage.	300 students, 6 teachers on field trip 3 Palomares student Creek Tour Guides and a teacher led the restoration site tour for two nature center docents	Utilizing creek studies materials and expertise from the Palomares program to share with other entities in the watershed who wish to do hands-on learning about creek life and restoration is an efficient and appreciated use of resources.

Permittee Name: County of Alameda

<p>Palomares School- Castro Valley Bi-weekly Watershed and Creek Science Lessons for Palomares School students -October 2013 through June 2014</p>	<p>Bi-weekly creek and watershed-based lessons taught at Palomares Creek on school campus by credentialed teacher to Palomares School students K-5th grades. Covers water quality studies, creek ecology, soil/geology, landforms in relation to creek and watershed; math, science. 5th graders participate in World Water Monitoring Day.</p> <p>Lessons for Palomares students primarily take place on campus at the outdoor classroom at the creek. Curriculum is tied to state standards for each grade level and is science based.</p> <p>Hands-on stewardship activities are carried out by all students, including playground area erosion control practices and creek bank invasive plant removal with 4th graders. 1st graders work on the native plant garden.</p> <p>\$300 grant received for materials.</p>	<p>104 lessons to Palomares classes, grades 1-5; bi-weekly lessons during school year (24-32 students per class).</p> <p>“Trout in the Classroom program” engaged 135 Palomares students and 5 teachers.</p>	<p>Creek lessons are part of regular science instruction during the school day and meet state standards. Time allowed for the lessons during the school day. Science testing reflects what students learn. Numerous visits to creek for hands-on lessons to reinforce classroom learning.</p> <p>The creek lessons are featured at an annual presentation to Castro Valley School Board by the school's teachers, and for Palomares Open House. Many parents have their children attend this school because of the creek studies program.</p> <p>CDFW “Trout In the Classroom” program included this year for first time at the school; students raised and released fingerling trout.</p>
<p>Palomares School- Castro Valley After-School Programs Programs - April -June 2014 - Junior Naturalists after- school program and Creek Tour Guides</p>	<p>After-school Jr. Naturalist program conducted at Palomares Creek on school campus for Palomares School students 1st-5th grades. Hands-on activities cover water quality studies, creek ecology, conservation activities and stewardship. Tour Guides (3rd-5th grades) learn content and methods for leading creek tours, and material for use at 3 activity stations they lead at annual Watershed Expo. After-school programs open to Palomares School and other schools in watershed</p>	<p>Junior Naturalists (70 students) and Creek Tour Guides (24 students) April -June 2014. Two Palomares teachers lead the two afterschool programs. 3-5 parent volunteers assist.</p>	<p>Students in these programs lead creek tours for other students from other schools, their teachers and chaperones at the annual Watershed Expo; in leading the tours students demonstrate the material they have learned. Teachers want to expose their students to their peers (the student Tour Guides), and the information they share.</p>

Section 8 - Provision C.8 Water Quality Monitoring

C.8 ► Water Quality Monitoring

State below if information is reported in a separate regional report. Municipalities can also describe below any Water Quality Monitoring activities in which they participate directly, e.g. participation in RMP workgroups, fieldwork within their jurisdictions, etc.

Summary

During FY 13-14, we contributed through ACCWP to the BASMAA Regional Monitoring Coalition (RMC). In addition, we contributed financially to the Regional Monitoring Program for Water Quality in the San Francisco Estuary (RMP) and were represented at RMP committees and work groups. Monitoring efforts and results are documented in a separate report submitted March 15 of each year, as required in Provision C.8. For additional information on monitoring activities conducted by the Program, BASMAA RMC and the RMP, see the C.8 Water Quality Monitoring section of the Program's FY 13-14 Annual Report and the Integrated Monitoring Report.

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.b ► Implement IPM Policy or Ordinance

Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphates, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.

Trends in Quantities and Types of Pesticides Used ⁶⁰					
Pesticide Category and Specific Pesticide Used	Amount ⁶¹				
	FY 09-10	FY 10-11	FY 11-12	FY 12-13	FY 13-14
Organophosphates					
Product or Pesticide Type A	0	0	0	0	0
Product or Pesticide Type B	0	0	0	0	0
Pyrethroids					
Product or Pesticide Type X	0	0	0	2.4 fl. oz.	3.0 fl.oz.
Product or Pesticide Type Y	0	0	0	0	0
Carbaryl	0	0	0	0	0
Fipronil	0	0	0	3.6 fl. oz.	4.8 fl. oz.

C.9.c ► Train Municipal Employees

Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	17
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within the last 3 years.	17
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within the last three years.	100%

⁶⁰ Includes all municipal structural and landscape pesticide usage by employees and contractors.

⁶¹ Weight or volume of the product or preferably its active ingredient, using same units for the product each year. The active ingredients in any pesticide are listed on the label. The list of active ingredients that need to be reported in the pyrethroids class includes: allethrin, bifenthrin, beta-cyfluthrin, bioallethrin, cyfluthrin, cypermethrin, cyphenothrin, deltamethrin, esfenvalerate, etofenprox, fenpropathrin, gamma-cyhalothrin, imiprothrin, lambda-cyhalothrin, metofluthrin, permethrin, phenothrin, prallethrin, resmethrin, sumithrin (d-phenothrin), tau-fluvalinate, tefluthrin, tetramethrin, tralomethrin, cis-permethrin, and zeta-cypermethrin.

C.9.d ▶ Require Contractors to Implement IPM

Did your municipality contract with any pesticide service provider in the reporting year?				<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/>	No
If yes, attach one of the following:							
	Contract specifications that require adherence to your IPM policy and standard operating procedures, OR						
<input checked="" type="checkbox"/>	Copy(ies) of the contractors' IPM certification(s) or equivalent, OR						
<input type="checkbox"/>	Equivalent documentation.						
If Not attached , explain:							

C.9.e ▶ Track and Participate in Relevant Regulatory Processes

Summarize participation efforts, information submitted, and how regulatory actions were affected **OR** reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.

Summary:

During FY 13-14, we participated in regulatory processes related to pesticides through contributions to the countywide Program, BASMAA and CASQA. See the CASQA Pesticides Subcommittee Annual Report 2013-14: Preventing Urban Pesticide Pollution in Stormwater for a summary of CASQA activities.

C.9.f ▶ Interface with County Agricultural Commissioners

Did your municipal staff observe any improper pesticide usage or evidence of improper usage (e.g., pesticides in storm drain systems, along street curbs, or in receiving waters) during this fiscal year?				<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
If yes, provide a summary of improper pesticide usage reported to the County Agricultural Commissioner and follow-up actions taken to correct any violations. A separate report can be attached as your summary.							

C.9.h.ii ▶ Public Outreach: Point of Purchase

Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); **OR** reference a report of a regional effort for public outreach in which your agency participates.

Summary:

Permittee Name: County of Alameda

See the C.9 Pesticides Toxicity Control section of the ACCWP FY 13-14 Annual Report and the BASMAA FY 2013-2014 Regional Supplement for Training and Outreach for information on point of purchase public outreach conducted countywide and regionally.

C.9.h.vi ► Public Outreach: Pest Control Operators

Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); **OR** reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.

Summary:

See the C.9 Pesticides Toxicity Control section of Program's FY 13-14 Annual Report for a summary of outreach to pest control operators and landscapers to reduce pesticide use.

Section 10 - Provision C.10 Trash Load Reduction

C.10.a.iii ► Minimum Full Trash Capture

Provide the following:

- 1) Descriptions of actions/tasks completed towards achieving the Minimum Full Trash Capture requirement in provision C.10.a.iii. Include the:
 - Total number and types of full capture devices (publicly and privately-owned) installed to-date;
 - Total land area (acres) and land areas within each trash generation category (i.e., very high, high, moderate and low) treated by full capture devices (or other types of devices for non-population based Permittees), in comparison to the MRP-required full capture requirements in Attachment J to the MRP; and,
 - Percentage of jurisdictional land areas with very high, high, moderate and low trash generation rates treated by full capture devices.
- 2) A narrative summary of maintenance activities implemented for each device, group of devices, or device type, including descriptions of typical maintenance frequencies and issues associated with maintaining these devices.

Descriptions of Actions/Tasks (Conducted or Planned):

The County's Trash Long Term Reduction Plan includes primarily the use of large, in-line full trash capture devices. Due to issues involving the sites selected and changed drainage systems at new road project, we had a delay in the construction contractor procurement process. The in-line full trash capture device planned to have been installed 2013/2014 in TMA 5/7 and TMA will be installed in 2014/2015.

In order to meet full capture requirements, the County is in the process of installing 37 Stormtek Inlet Full Capture devices however only information for 23 has been included in this report. Installation of the entire 37 will be completed by the contractor (Stormtek) by October 3, 2014.

Total area treated by 23 devices: 267acres
Total required: 112 acres
Area in high TGA: 45
Area in Medium TGA: 66
Area in Low TGA: 156

Descriptions of Maintenance Activities:

For the first year, maintenance will occur four times per year, (before, during, and after rainy season) and more often if deemed necessary. We will analyze site collection data to determine an appropriate regular maintenance schedule for each site. We anticipate that because on the size of some of the inlet vaults, some site may not require maintenance during the dry season.

C.10.b.iii ► Trash Hot Spot Assessment

Provide the volume of material removed during each MRP-required Trash Hot Spot cleanup during each fiscal year, and the dominant types of trash (e.g., glass, plastics, paper) removed and their sources in FY 2013-14 to the extent possible.

Trash Hot Spot	FY 13-14 Cleanup Date	Volume of Trash Removed (cubic yards)				Dominant Type(s) of Trash in FY 2013-14	Trash Sources in FY 2013-14 (where possible)
		FY 2010-11	FY 2011-12	FY 2012-13	FY 2013-14		
ala_san_3 behind Big Lots 20800 Mission Blvd. Hayward 94541.	12/4/13 6/18/14	1cy	60cy	24cy	4cy 3cy	Paper, plastic bags, Styrofoam, household furniture & homeless encampment debris.	Littering from pedestrians, motorists illegal dumping, and homeless.

C.10.c ► Long-Term Trash Load Reduction Plan

Provide descriptions of significant revisions made to your Long-term Trash Load Reduction Plan submitted to the Water Board in February 2014. Describe significant changes made to primary or secondary trash management areas (TMA), trash generation maps, control measures, or time schedules identified in your plan.

Description of Significant Revision	Associated TMA
Edits have been made to the Alameda County's Trash Generation Map to account for area that was originally reported as part of the County's jurisdiction but is Caltrans' jurisdiction (Mission Blvd/East 14 Street) and the City of Hayward (small portions of Hesperian Blvd. and West A Street.	4, 5/7, and 9

C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)				
Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.				
Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
Single-use Plastic Bag Ordinance or Policy	The Alameda County Waste Management Authority adopted the Single-Use Bag Ban. As of January 1, 2013, all grocery stores, supermarkets, mini-marts, convenience stores, liquor stores, pharmacies, drug stores or other entities that sell milk, bread, soda and snack foods (all four items) and/or alcohol (Type 20 or 21 license) in Alameda County must comply with the Single-Use Bag Ban Ordinance. Affected stores may no longer provide customers with single-use bags at check-out. A copy of the Ordinance is available on the Alameda County Waste Management Authority's website: http://reusablebagsac.org/ordinancetext.html	See Section C.10 of the ACCWP FY 13-14 Annual Report.	See Section C.10 of the ACCWP FY 13-14 Annual Report.	4%

C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)				
Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.				
Public Education and Outreach Programs Targeted at Trash Reduction and Implemented post-MRP Adoption	<p>-See the C.10 Trash Load Reduction section of the Countywide Program's FY 13/14 Annual Report for a summary of related outreach activities.</p> <p>-Alameda County utilized materials developed through the Regional Media Relations effort and Countywide Clean water program, develop our own on local issues, and follow up with local media including our community access channel, local weekly papers, and on-line community "Patch" newspapers</p> <p>-The County utilized the Litter Outreach Kit (developed through the ACCWP) at 10 events per year including San Lorenzo and Castro Valley Farmers Markets, the Cherryland Festival, and the Castro Valley Fall Festival. The trash message is included at all County stormwater outreach events and school outreach programs and is described in detail in section C.7 of this report.</p> <p>-There are now 13 active spot's adopted by community groups/members through the County's Adopt-A-Spot/Creek programs Targets all sources of litter</p>			0%

C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)				
Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.				
On-land Trash Cleanups	<p>On-land cleanups is the primary method of trash reduction that the County uses</p> <ul style="list-style-type: none"> -The County has two Annual FTE county staff dedicated to on-land trash removal. -Through the County's Work Furlough Program, three "weekend workers" remove trash on-land in the unincorporated area County, full-time on Saturdays and Sundays throughout the year. -County staff organize, staffed, and verified amounts at 5 on-land community cleanup events (detailed in section C.7) <p>Sources are from pedestrian litter, vehicle litter, container management failure, illegal dumping</p> <p>Types of litter include bottles (mainly plastic, some cans and glass), paper cups, paper, plastic lids, polystyrene, plastic and foil food wrappers, misc. hard plastic, cardboard cigarette butts, and large items however, larger items are not part of the quantity listed here.</p>	<p>Staff removal amounts are tracked through the County's Mainstar system.</p> <p>Weekender staff amounts are calculated based on tracking the service of the 40 cubic yard debris box used for collection.</p> <p>Volunteer event amount where verified and tracked by County staff</p>	<p>Collection amounts (these amounts do not include large debris items (i.e. furniture, tires, etc.) Amount include items that could potentially go through the MS4 system:</p> <p>7/1/2013 through 6/30/2014</p> <p>County staff: 2294 cu yds (463,388 gallons)</p> <p>Weekend workers: 800. cu yds (161,600 gallons)</p> <p>Vol. events total: 46 cu yds (9,292. Gallons)</p> <p>Tot: 3,140cuyd (634,280 gal)</p>	36%
Creek and Shoreline	<p>-County staff do regular trash removal from creeks and shorelines in the County's unincorporated area.</p> <p>-County staff organize, staffed, and verified amounts at 3 Creek/Shoreline community cleanup events (detailed in section C.7)</p> <p>Sources are from pedestrian litter, vehicle litter, container management failure, illegal dumping</p> <p>Types of litter include bottles (mainly plastic, some cans and glass), paper cups, paper, plastic lids, polystyrene, plastic and foil food wrappers, misc. hard plastic, cardboard, cigarette butts, and large items however, larger items are not part of the quantity listed here.</p>	<p>Staff removal amounts are tracked through the County's Mainstar system.</p> <p>Volunteer event amount where verified and tracked by County staff</p>	<p>Collection amounts</p> <p>7/1/2013 through 6/30/2014</p> <p>County staff: 550 cu yds (111,160 gallons)</p> <p>Vol. event total: 4.5 (909 gallons)</p> <p>Tot: 554.5cuyds(112,009 gal)</p>	20%

C.10.d ► PART B - Trash Control Measure Implementation and Assessment (TMA Specific Actions)

Complete the following trash control measure implementation and assessment summary for each primary trash management area (TMA) identified in your Long-term Plan. Include the following information:

- Identify the total jurisdictional area and the % of that area that generates very high (VH), high (H), moderate (M), or low (L) levels of trash;
- Identify the dominant trash source(s) and dominant type(s) of trash addressed or to-be addressed in the TMA;
- Include the area currently treated by full capture devices, the quantity and type of devices installed to-date, and the % of jurisdictional area that generates very high (VH), high (H), moderate (M), and low (L) levels of trash after accounting for reductions via full capture devices;
- Summarize control measures other than full capture devices implemented to-date, distinguishing between implementation that began pre- and post-MRP effective date. If not implemented in the entire TMA, describe generation category targeted and % of TMA addressed;
- Provide the % of the jurisdictional area that generates very VH, H, M or L levels of trash after accounting for all control measures implemented to-date;
- Describe the methods used to evaluate the effectiveness of control measures other than full capture devices, and any assessment results to-date. If the method was not implemented in the entire TMA, describe generation category targeted and %of TMA addressed; and
- Provide an estimate of the % of trash reduced in the TMA and jurisdiction-wide.

C.10.d ► PART B - Trash Control Measure Implementation and Assessment (TMA Specific Actions)								
TMA ID	TMA Area (Acres)	Dominant Sources	Dominant Types		% TMA in Each Trash Generation Category			
					VH	H	M	L
1	1376	Mostly vehicle litter some pedestrian litter	Foil and plastic wrappers, polystyrene, plastic bottles, misc. plastic (cup lids, caps) paper, cig butts	Baseline Generation (Pre-MRP)	0	3	5	92
Trash Full Capture Devices		Summary Descriptions of Full Trash Capture Devices (Quantity and Type)		After taking into account Full Capture Devices	0	3	5	92
Total Area (Acres)	7	4 StormTek Catch Basin Inserts						
% of TMA	1							
% of VH/H/M/L	1							
Summary Descriptions of Control Measures Implemented Since MRP Adoption, Other than Full Capture Devices				After taking into account all New or Enhanced (post-MRP) Control Measures				
<p>TMA 1 includes portions of Redwood Rd and Castro Valley Blvd that account for almost all the high trash generation road area. Post-MRP, the County has gone from sweeping once/month to sweeping once/week. Sweeping is done in the late night/early hours while cars are not on the roadways.</p> <p>Trash canister have been place along the retail portions of Redwood Rd and Castro Valley Blvd and are maintained by Castro Valley Sanitary District.</p>								
Assessment Methods for Control Measures Other than Full Capture Devices								
Summary of Assessment Results To-date								
Estimated % Trash Reduction in TMA due to New or Enhanced Post-MRP actions					1			
Estimated % Trash Reduction Jurisdiction-wide due to New or Enhanced Post-MRP actions					0			

C.10.d ► PART B - Trash Control Measure Implementation and Assessment (TMA Specific Actions)								
TMA ID	TMA Area (Acres)	Dominant Sources	Dominant Types		% TMA in Each Trash Generation Category			
					VH	H	M	L
2	1,446	Vehicle litter, pedestrian litter, container management	Foil and plastic wrappers, polystyrene, plastic bottles, misc. plastic (cup lids, caps) paper, cig butts	Baseline Generation (Pre-MRP)	0	1	17	81
Trash Full Capture Devices		Summary Descriptions of Full Trash Capture Devices (Quantity and Type)		After taking into account Full Capture Devices	0	1	16	83

					Estimated % Trash Reduction <u>Jurisdiction-wide</u> due to New or Enhanced Post-MRP actions				3			

Permittee Name: County of Alameda

C.10.d ► PART C – Estimated Overall Trash Load Reduction	
<p>For Population-based Permittees, provide an estimate of the overall trash reduction percentage achieved to-date within the jurisdictional area of your municipality that generates problematic trash levels (i.e., Very High, High or Moderate trash generation). Base the estimate on the information presented in C.10.d – Parts A and B and creek/shoreline cleanups not reported in C.10.b.iii. Provide a statement regarding the confidence in the estimate and challenges and/or successes in measuring progress towards the 40% trash reduction target described in provision C.10.</p>	
<p>Discussion of Trash Reduction Estimate:</p> <p>Based on the BASMAA approved methodology 67% of the trash in the County's MS4 was removed in FY2013-14. This reduction equates to 18,689 gallons of trash generated by the storm sewer system. Extensive new (post-MRP) On-land Clean-up efforts are responsible for reducing trash by 36% (or 10,042 gallons) and Creek/Shoreline Clean-up efforts are responsible for reducing trash by 20% (or 5,578 gallons).</p> <p>The County uses Mainstar to track staff hours and volume of trash collected in cubic yards. The total documented volume of trash removed this past year from County On-land and Creek/Shoreline Cleanup efforts combined is 746,286 gallons. The County applied 2% of the total documented volume of trash removed from County On-land and Creek/Shoreline Cleanup to account for the reduction reported.</p>	
Estimated % Trash Reduction due to Jurisdictional-wide Actions	40
Estimated % Trash Reduction due to Trash Full Capture Devices (All TMAs)	7
Estimated % Trash Reduction due to Other Control Measures (All TMAs)	0
SubTotal for Above Actions	47
Estimated % Trash Reduction due to Creek/Shoreline Cleanups (All TMAs)	20
Total Estimated % Trash Reduction in FY 13-14	67

Section 11 - Provision C.11 Mercury Controls

C.11.a.i ► Mercury Recycling Efforts

List below or attach lists of efforts to promote, facilitate, and/or participate in collection and recycling of mercury containing devices and equipment at the consumer level (e.g., thermometers, thermostats, switches, bulbs).

See Section C.11 of the ACCWP FY 13-14 Annual Report for a summary of countywide recycling efforts.

The County promotes ongoing events and service of Alameda County Waste Management Authority through stopwaste.org.

C.11.a.ii ► Mercury Collection

Provide an estimate of the mass of mercury collected through these efforts, or provide a reference to a report containing this estimate.

Please refer to the ACCWP FY 13-14 Annual Report for an estimate of the mass of mercury collected through collection and recycling efforts in the Countywide Program area.

Permittee Name: County of Alameda

- C.11.b ▶ Monitor Methylmercury**
- C.11.c ▶ Pilot Projects to Investigate and Abate Mercury Sources in Drainages**
- C.11.d ▶ Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices**
- C.11.e ▶ Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit**
- C.11.f ▶ Diversion of Dry Weather and First Flush Flows to POTWs**
- C.11.g ▶ Monitor Stormwater Mercury Pollutant Loads and Loads Reduced**
- C.11.h ▶ Fate and Transport Study of Mercury In Urban Runoff**
- C.11.i ▶ Development of a Risk Reduction Program Implemented Throughout the Region**
- C.11.j ▶ Develop Allocation Sharing Scheme with Caltrans**

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary

A summary of ACCWP and regional accomplishments for these sub-provisions are included within the C.11 Mercury Controls section of Program's FY 13-14 Annual Report, and the March 2014 Integrated Monitoring Report.

Section 12 - Provision C.12 PCBs Controls

C.12.a.ii,iii ▶ Ongoing Training

(For FY 10-11 Annual Report and Each Annual Report Thereafter) List below or attach description of ongoing training development and inspections for PCB identification, including documentation and referral to appropriate regulatory agencies (e.g. county health departments, Department of Toxic Substances Control, California Department of Public Health, and the Water Board) as necessary.

Description:

See the FY 13-14 ACCWP Annual Report for a description of PCB related training.

C.12.b ▶ Conduct Pilot Projects to Evaluate Managing PCB-Containing Materials and Wastes during Building Demolition and Renovation Activities

C.12.c ▶ Pilot Projects to Investigate and Abate On-land Locations with Elevated PCB Concentrations

C.12.d ▶ Conduct Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices

C.12.e ▶ Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit

C.12.f ▶ Diversion of Dry Weather and First Flush Flows to POTWs

C.12.g ▶ Monitor Stormwater PCB Pollutant Loads and Loads Reduced

C.12.h ▶ Fate and Transport Study of PCBs In Urban Runoff

C.12.i ▶ Development of a Risk Reduction Program Implemented Throughout the Region

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary

A summary of countywide Program and regional accomplishments for these sub-provisions are included within the C.12 PCB Controls section of Program's FY 13-14 Annual Report, and the March 2014 Integrated Monitoring Report.

Section 13 - Provision C.13 Copper Controls

C.13.a.iii.(2) ▶ Training, Permitting and Enforcement Activities

(FY 11-12 Annual Report and each Annual Report thereafter) Provide summaries of activities implemented to manage waste generated from cleaning and treating of copper architectural features, including copper roofs, during construction and post-construction including. :

- Development of BMPs on how to manage the water during and post construction
- Requiring the use of appropriate BMPs when issuing building permits
- Educating installers and operators on appropriate BMPs
- Enforcement actions taken again noncompliance

Fact sheets describing the required BMP are developed collectively through the ACCWP and distributed at the County's planning counter through the permitting procedure. In FY2013-14, the County has not received one application that included any copper architectural features.

C.13.c ▶ Vehicle Brake Pads

Based upon inspection activities conducted under Provision C.4, highlight copper reduction results achieved among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed.

Summary

During FY 13-14, we participated in implementation of the California Brake Friction Material Law through contributions to the countywide Program, BASMAA and CASQA. For additional information, see the C.13 Copper Controls section of Program's FY 13-14 Annual Report.

C.13.d.iii ▶ Industrial Sources Copper Reduction Results

Based upon inspection activities conducted under Provision C.4, highlight copper reduction results achieved among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed.

Summary

Any businesses identified during industrial/commercial CWP inspections as potential sources of copper are presented with information describing ways to reduce copper exposure risks. In the unincorporated County, automotive repair facilities and carwashes appear to represent the most likely potential sources of copper in the form of brake dust and additional BMP are often requested (i.e., drain inlet filters) to supplement existing BMP that may appear underperforming. No industries considered to be big copper sources are present in unincorporated County, such as metal platers, semi-conductor manufacturers, smelters, foundries, boat yards, scrap yards, etc.

Section 14 - Provision C.14 PBDE, Legacy Pesticides and Selenium Controls

Note: There are no reporting requirements in the FY 13-14 Annual Report for Section C.14.

Section 15 - Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.iii.(1), C.15.b.iii.(2) ► Planned and Unplanned Discharges of Potable Water

Is your agency a water purveyor?	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
If No , skip to C.15.b.vi.(2):				
If Yes , Complete the attached reporting tables or attach your own table with the same information. Provide any clarifying comments below.				
Comments:				

C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

<p>Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:</p> <ul style="list-style-type: none"> • Promote conservation programs • Promote outreach for less toxic pest control and landscape management • Promote use of drought tolerant and native vegetation • Promote outreach messages to encourage appropriate watering/irrigation practices • Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.
<p>Summary:</p> <p>Local outreach efforts include messaging with a less toxic pest control and use of native plants focus, as describe in section C.7 of this report.</p> <p>Also, see C.3 New Development and Redevelopment, C.7. Public Information and Outreach and C.9. Pesticide Toxicity Control sections of ACCWP's FY 13-14 Annual Report.</p>

C.15.b.iii.(1) ► Planned Discharges of the Potable Water System										
Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Duration of Discharge (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L)	pH (standard units)	Discharge Turbidity ⁶² (NTU)	Implemented BMPs & Corrective Actions
None										

⁶² Monitor the receiving water for turbidity if necessary and feasible. Include data in this column if available.

C.15.b.iii.(2) ► Unplanned Discharges of the Potable Water System ⁶³														
Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Discharge Duration (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L) ⁶⁴	pH (standard units) ⁵²	Discharge Turbidity (Visual) ⁵²	Implemented BMPs & Corrective Actions	Time of discharge discovery	Regulatory Agency Notification Time ⁶⁵	Inspector arrival time	Responding crew arrival time
None														

⁶³ This table contains all of the unplanned discharges that occurred in this FY.

⁶⁴ Monitoring data is only required for 10% of the unplanned discharges. If you monitored more than 10% of your unplanned discharges, report all of the data collected.

⁶⁵ Notification to Water Board staff is required for unplanned discharges where the chlorine residual is >0.05 mg/L and total volume is ≥ 50,000 gallons. Notification to State Office of Emergency Services is required after becoming aware of aquatic impacts as a result of unplanned discharge or when the discharge might endanger or compromise public health and safety.

Complaint/Spill/Discharge Tracking Spreadsheet

[Enter Agency Name]

MRP

Requirements The MRP's Provision C.5.1 requires the following: "All incidents or discharges reported to the complaint/spill system that might pose a threat to water quality shall be logged to track follow-up and response through problem resolution. The data collected shall be sufficient to demonstrate escalating responses for repeat problems, and inter/intra-agency coordination, where appropriate."

Purpose: The purpose of this spreadsheet is to provide an example "water quality spill and discharge complaint and follow up" tracking method for the ACCWP agencies to adapt for their use starting April 1, 2010.

July 21, 2014

Final Report for Fiscal Year 2013/14- ACRCDD Contract C- 5013

Submitted by Amy Evans, Resource Conservationist,
Alameda County Resource Conservation District

The Alameda County RCD contracted with the Alameda County Flood Control and Water Conservation District during FY 2013/14 for work to be accomplished on a number of tasks, including:

- Task 1- Hands-On Conservation, an ongoing program of the ACRCDD that supports on-the-ground stewardship/education activities for middle school through college age youth, and additional community volunteers.
- Task 2- A ongoing multi-faceted, creek-based watershed education program at Palomares Elementary School in Castro Valley, that serves the school and wider community.
- Task 3- Support for the annual Bringing Back the Natives garden tour (subcontract with Kathy Kramer, originator and operator of the tour).
- Task 6- Support for the Alameda Creek watershed Forum, a watershed group In Alameda County that works to improve the health of the watershed through information sharing and enhanced partnerships.
- Task 9- Administration of the Community Stewardship Grants program for the Alameda Countywide Clean Water Program
- Task 10- Cynthia Butler, RCD staff, works in conjunction with Sharon Gosselin to coordinate the Clean Water Program's Public Information and Outreach Program for the ACFC&WCD and the Unincorporated Area.
- Task 12- Cynthia Butler serves as project manager and reports to Sharon for the update and enhancement of the Google Earth Watershed Map Program for Western Alameda County. This includes managing a contract with Fugro and overseeing the research needed for this task.
- Task 13- Development of information and outreach materials that inform and educate specific audiences as needed

The activities undertaken for these tasks have been organized into the following four sections, which are the same as those in the MRP Section C.7 report:

- Public Outreach Events
- Watershed Stewardship Collaborative Efforts
- Citizen Involvement Events
- School-Age Children Outreach

Public Outreach Events

Watershed Science Expo at Palomares School (Task 2)

The Watershed Science Expo was held at Palomares School, Castro Valley, on Friday 5/16/14, from 8:30-2:30 PM. Local schools in the San Lorenzo Creek watershed attended, along with teachers, principals and many parent volunteers. There was a large increase in the number of classes attending over last year- 38 classes of 3rd grade students (up from 14 last year) from 13 schools from Castro Valley, Hayward and San Lorenzo. Over 1200 students, 2 principals, 44 teachers, 250 chaperones, and 56 parent/community and PTA members attended and assisted with the event. Sherry Johnson, a retired credentialed science teacher from the school originated the watershed education program at the school, organized and oversaw the Expo.

The watershed education-focused day featured 21 watershed/hands-on science -focused activity stations for 3rd grade students from schools in the San Lorenzo Creek watershed, which includes Palomares Creek. The 19 Expo exhibitors, representing agencies, special districts, colleges and non-profit organizations throughout the East Bay, donated their time to run hands-on activity stations on natural resources and watershed science themes, and learning activities at the creek. Groups of students rotated through the exhibitors' stations during the course of the day. ACRCDD staff hosted a "creek critters" station alongside the creek at which students could practice identifying aquatic insects that are typically found in Palomares Creek and learn about watersheds and water quality protection by interacting with a watershed diorama.

A highlight of the Expo was the glass-walled fish tank, basically a huge aquarium (with a naturalistic creek setting) on a truck bed stocked with local fish, set up and staffed by a very dynamic East Bay Regional Park District naturalist. Another highlight was the 3 Wildlife Associates presentations; naturalist-led, live-animal shows, featuring live wildlife that is native to the area. Every class attending the Expo got to experience the program, which really engages the students in understanding the importance of healthy habitats needed to support the animals.

Another important element of the Expo were the 43 creek tours conducted by the 24 Palomares 3rd-5th grade students who were trained as "Creek Tour Guides" by Sherry Johnson during the Palomares School afterschool program. The Tour Guides also devised and ran 3 water-themed activity stations at the Expo. This is described further in the School Age Children Outreach section below.

For the 3rd consecutive year, students participated in a litter pickup activity at each activity station during the course of the Expo. This effort, developed and led by ACRCDD staff as part of their work at the Expo, is described below under Citizen Involvement Events.

Extensive contributions of materials were donated for the Expo event from the local sanitary district, stores, small businesses, adult school, and nearby schools. The Palomares Parent Club organized and presented a lunch for the exhibitors, with most of the food donated.

Classes attending the Expo donated a total of \$750 towards the cost of the event. The Alameda County Flood Control and Water Conservation District provide road closure materials and assistance, and parking on an adjacent property was generously allowed by the landowner.

Evaluation: the 12 teacher responses received were positive and cited the hands-on learning, creek education and the fact that the activities were linked to the 3rd grade science standards. A quote from a teacher evaluation:

"The teachers at Strobridge Elementary want to thank you for making it possible for our students to learn about the watershed first hand and to have access to such wonderful science presenters. The free bussing you provide is the only way we are able to attend. We truly appreciate your help in providing a quality science experience for our students. They especially enjoy the hands on stations and talk about them for days afterward. Several students are still wearing their water cycle bracelets and we have planted the seed balls outside our classrooms. The Palomares Tour Guides are amazing and should be complimented for their knowledge and kind manner. Great job! We can't wait for next year. Please be sure we are on your invitation list".

ACRCD staff filmed students in action during the day at the Expo, primarily the Palomares Creek Tour Guides, and interviewed teachers, exhibitors and students during the day. Short film clips will be posted on the Palomares program page on the ACRCD website.

(Unincorporated Area)

Stewardship-Palooza, Bay Area Open Space Council Event (Task 1)

The goal of this 3/20/14 BAOSC event, held at the David Brower Center in Berkeley, was to inform participants about selected, successful local land stewardship programs and practices, and to pique curiosity through demonstration and interaction at activity tables hosted by the invited organizations, which included the ACRCD's Hands-On Conservation program. At least 100 East Bay area resource professionals, watershed group members, participants, educators, participated in this first-time event.

The Hands-On Conservation table featured information about the HOC program, demonstrations of a watershed diorama and restoration planting/maintenance "how to" information. Approximately 25 attendees were actively engaged at our Hands-On Conservation table, and took handouts publicizing the upcoming HOC Earth Day creek cleanup events. Participants also entered a contest to guess the hardiest restoration plant at our Bay Trees adopted spot; this generated even more interest and questions. It was a good learning opportunity as well for HOC staff to connect with and learn from other restoration practitioners at the event.

(Flood Control District)

Community Service and Volunteer Fair, Logan High School, Union City (Task 1)

ACRCD staffed one of about 15 tables at the Fair, a high school lunchtime event for 100-150 students and teachers, on 3/27/14. Display materials focused on "Creek Care" and anti-littering messages, and informal discussion held with students about volunteer opportunities at the nearby Union City Civic Center Park, a HOC adopted spot in Union City. Students were encouraged to sign up to volunteer for the HOC 4/19/14 Earth Day cleanup event. During the event, talked with approximately 30 high schools students, 4-5 other environmental organization tablers, and several school staff members. 40 mini flyers on

participating in nearby Hands-On Conservation stewardship activities for Earth Day were handed out. This event is an effective venue for publicizing the close-by stewardship opportunities available to students and to inform teachers of the program. Students need to earn Community Service hours and the HOC programs near the school help students with meeting these requirements.

(Flood Control District)

Alameda County Fair- Farm Fresh Thursday (Task 1)

Farm Fresh Thursday is a series of three Thursday events that take place at the Alameda County Fair in Pleasanton, in order to educate and inform the general public about healthy eating and gardening locally. The HOC program tabled at the event held on 6/26/14, with a display featuring plants that sustain beneficial insects and pollinators and informal discussion with table visitors on ways to enhance plantings to support beneficials, and reduce use of pesticides. HOC workday info was given for local farm hedgerow stewardship opportunities in fall 2014. Approximately 20 fair visitors stopped by to look at plants and display, review and take handouts, and discuss HOC activities. 16 Clean Water Program wildflower seed packets were handed out.

(County-wide event)

Sunol AgPark- on-farm events for the public (Task 1)

The Sunol AgPark hosted two large- scale events open to the public, the Harvest Festival on 10/6/13 and the Plant Sale/ Farm Tours event on 5/3/14. The Hands-On Conservation program staffed an activity table at each event, which and attracted event participants who learned about suitable native and edible plants for hedgerows, made custom wildflower seed packets and learned how to protect the beneficial insects that visit the hedgerow. The AgPark Harvest Festival attracted almost 700 people, with the HOC activity table staffed by HOC having 35-40 visitors, including a number of children. The AgPark Plant Sale event attracted nearly 200 people, with 20-25 visitors to the HOC table. CWP Wildflower seed packets were given out at both events.

Kathy Kramer's Bringing Back the Natives Garden Tour (Task 3)

This project is a subcontract through ACRCDC. The annual native plant garden tour for the public was held on 5/4/14. Gardens featuring drought tolerant and wildlife-friendly plants were showcased. Kathy provided an annual report to Cynthia Butler with details of the tour and results.

Watershed stewardship Collaborative Efforts

Alameda Creek Watershed Forum (ACWForum) (Task 6)

The objective of this task is to enhance partner coordination, knowledge, and effectiveness, in ways that help improve Alameda Creek watershed conditions.

Work under Task 6 supported the activities of the ACWForum, a watershed group in Alameda County. The group underwent a rebranding during 2013, as the Alameda Creek Watershed Council name and webpage were reintroduced as the "Alameda Creek Watershed Forum"; this effort, led by the Council planning workgroup, was designed to

support the effort to make the group more interactive among participants. A new website was designed and launched at www.acwForum.org, through which ACWForum members can post project and stewardship event information and from which a quarterly e-newsletter is to be sent. The ACWForum Steering Committee was formalized and two meetings were held on 7/26/13 and 8/14/13 in order to plan the annual conference and website. ACWForum activities were utilized as match for an ACRCDD USEPA Healthy Watersheds grant that focuses on application of BMPs in the Alameda Creek Watershed.

Planning and implementation of the 3/13/14 Annual Conference for watershed stakeholders held at the Dublin community center. A guided walking tour of creek restoration at the site was held during the lunch break. The 68 conference attendees included: watershed stakeholders, including Forum members/signatories, agency staff, members of the public and organizations, college students, and teachers.

Topics discussed included water quality and wildlife habitat protection, creek restoration, stewardship, climate change impacts and related topics/issues in the watershed. A round-robin session at which stakeholders could briefly give updates on their activities was offered; this format for information sharing facilitated communication among stakeholders in regard to their watershed programs and stewardship projects.

A table with handouts provided by stakeholders on pertinent topics was visited by participants. The 5 tablers (event sponsors and others) included creek groups in the watershed, consultants with relevant project information and involved agencies, including exhibits on watershed mapping and a new adopt a creek program in the watershed.

Information was provided by stakeholders for input to planning for future Forum activities. Participants who responded to a post-conference survey cited the value round-robin agency/organization updates session and the information presented by the array of speakers as the most valued elements of the day.

Citizen Involvement Events

Community Stewardship Grants Program (Task 9)

Alameda County RCD administers the Alameda Countywide Clean Water Program's Community Stewardship Grant program. Five grants were awarded in the 2013/14 grant cycle which offered a total of \$20,000 in grant funding to watershed groups and others for water quality and conservation improvement activities. Work began in March on the 2014/15 grant cycle, with over \$24,250 (up from \$20,000 in previous years) in grant funding awarded to seven grantees. RCD tasks included developing the updated RFP and flyer, publicizing the grant, preparing grant summaries and materials for the workgroup, developing the agreements, making payments, providing reports to the PIP committee and answering grantee questions; all of these activities were done in close coordination with the CSG workgroup. Projects from the 2012/13 cycle were completed, and final funds were paid out by October 2013.

Youth Stewardship - Hands-On Conservation (HOC) (Task 1)

The Hands-On Conservation Program provides opportunities for outdoor stewardship activities for young adults of middle school through college age to increase knowledge of natural resources and protection of watersheds through hands-on activities that include water quality improvement activities at local creeks, stewardship education and creek side habitat restoration. Activities include age-appropriate elements of watershed education and career development; these are described in the School-Age Children Outreach section.

Hands On Conservation workdays are publicized at the www.handsonconservation.org website, which also features event registration and liability waiver form downloads. The HOC workday sites at which plantings have been installed and trash cleanups done have been formally adopted through the ACFC&WCD Adopt A Creek/Spot program. In addition to the workdays with volunteers, the adopted spots are maintained by HOC staff on a regular basis, and coordination with the site landowner occurs on a regular basis. Part time HOC staff members are hired and trained to help with program events and workdays. HOC staff continued to develop and maintain partnerships and co-host events with other groups such as Earth Team, the Friends of San Lorenzo Creek, the Alameda Creek Alliance, Sustainable Agriculture Education, agency landowners and others, in order to enhance the offerings of the HOC program.

Activities during 2013/14 included these events:

Union City Civic Center Park, Union City

This is an adopted spot through the ACFC&WCD Adopt A Creek/Spot program. The park features a flood control channel with an adjacent paved walking trail that extends beyond the park, following the channel 1/8 mile to Alameda Creek. The site is very close to Logan High School, which is a primary source of volunteers for the Hands-On Conservation workdays.

Workday activities included trash removal from creek banks, planting and maintaining irrigation for previously installed native plants in a creek side trail area, invasive plant removal, litter and trash cleanup along the creek trail and throughout the park. Students from Logan High School (Union City) Interact Club, students and teachers from a nearby middle school, and other community volunteers participated. At the start of each workday, HOC staff briefed the volunteers on safety measure and the importance of reducing litter and other pollutants that impact local creeks.

Coordination was maintained with Union City Parks staff to maintain tools in the shed at the site and to provide wildflower seed for planting at the site. Previous plantings were maintained with weeding, mulching and irrigation replacement. Coordination was maintained with Logan High School teachers and the school volunteer/career center to notify students of volunteer opportunities and to confirm student volunteer credits.

Workdays at the adopted spot in 2013/14 include:

-A Coastal Cleanup Day event was held with the hands-On conservation program in coordination with the Alameda Creek Alliance on 9/21/13, with more than 50 volunteers. The trash cleaned up during the workday came from approximately 3000 linear feet of creek banks in the park and beyond the boundary towards the Alameda Creek channel; approximately 3-4 bags (12 cu ft) of trash, and a number of bulky items gathered by the

Alliance members, was collected, tallied, sorted and recycled as part of the Coastal Cleanup Day procedure.

-Make a Difference Day was held at the park on 10/26/14 with at more than 40 volunteers participating in conjunction with the City of Union City Parks Department, which supplied many native trees that were planted in the park by volunteers, in addition to the litter cleanup effort that yielded another 4 large trash bags. Hands-On Conservation was involved with planting 8 of the trees along the creek trail, helped with the cleanup, and with dealing with the recyclables that were retrieved from the trash bags.

-A Martin Luther King National Day of Service creek cleanup day was held at the park on 1/20/14 with 5 volunteers, most from Logan High School. The turnout was small but the creek channel within the park was nonetheless cleaned up with another 3 bags of trash collected.

Trash total: A total of approximately 1.8 cubic yards of trash, litter and recyclables were gathered at this site. Recyclables that were not muddy or contaminated were recycled, and Union City parks hauled the trash away. In addition to the bags there were 1-2 cubic yards of bulky items gathered between the three cleanup events.

All volunteers were given reusable trash bags provided by the Clean Water Program; they were well-received by the volunteers.

(Flood Control District)

Sabrecat Creek, Fremont

On 5/10/14 the Hands-On Conservation program worked with two enthusiastic neighborhood volunteers and USDA NRCS staff to weed and apply 2 cubic yards of mulch to an 800' long native riparian shrub and tree planting area along Sabrecat Creek in order to help support the NRCS/City of Fremont project. Litter and debris were also collected along the creek and trail during the course of the workday.

Trash total: .025 cubic yards of litter and recyclables

(Flood Control District)

Dig Deep Farm, Ashland

Dig Deep is a non-profit farm serving Ashland, a limited-resource area in unincorporated Alameda County, with produce grown in the neighborhood. On 3/1/14, 30 students from San Lorenzo High School, their high school teacher, staff from the Hands-On Conservation program and EarthTeam, a local non-profit environmental organization, planted approximately 40 native plants and applied 1 cubic yard of mulch (wood chips) to the urban farm planting beds. Native plants were specifically selected in order to attract and support beneficial insects and pollinators at the farm site. Litter and rubble was collected from the site as students worked; the site was formerly a vacant lot, so the students were encountering broken glass and other debris as they dug holes for planting.

EarthTeam provided the bus to bring the students to the farm to assist Dig Deep, and HOC provided tools and assistance with planting. Staff discussed with students what land stewardship is, and how the tasks being undertaken at the workday are related. They also

discussed the array of careers in the field and necessary education to work towards them. The high school students have developed an ongoing service relationship with this farm as it is a beneficial neighborhood resource and it is located in the neighborhood where many of the students live.

Trash total: .01 cubic yard of litter, debris and recyclables

(Unincorporated area)

Sunol Agpark Hedgerows, Sunol

Stewardship workdays were held in Sunol at the Sunol AgPark, an organic farm located along the edge of the Arroyo de la Laguna. Students and community volunteers planted native and drought tolerant flowering plants in the hedgerows, wildflowers in the hedgerows and grass filter strip, and removed invasive plants and weeds in the grass filter strip and native plant hedgerow. The hedgerows provide habitat for pollinators and beneficial insects. The grass filter strip prevents sediment from the farm fields from entering the creek corridor.

-Sunol community workdays were led by Sustainable Agriculture Education (SAGE) with the assistance of Hands-On conservation on 11/2/13, 12/7/13 and 4/5/14 during which native flowering plants and grasses were planted in the hedgerows. Volunteers also helped with monitoring beneficial insects, creating and installing 1 plant signage, and organizing educational materials. Volunteers received CWP reusable shopping bags.

HOC staff also worked with AgPark farm interns on 7/23/13 and 8/29/13 on hedgerow signage installation.

-RCD staff assisted with a hedgerow planning, design and installation project with 25 students from Kennedy High School (Fremont), 22 Castlemont High School (Oakland) students, 35 SanLorenzo High School students, 40 Head-Royce School students and a total of 10 teachers/chaperones. SAGE (Sustainable Agriculture Education) led the project, with educational focus being the role of hedgerows in supporting beneficial insects and pollinators which are needed for the farm's organic program. RCD staff assisted with the planting workdays as well as led creek study walks with two of the schools, to show the connection between farm and creek and the stewardship practices that are applied. Dates for the school programs included: 9/24/13, 10/1/13, 10/22/13, 10/29/13, 3/7/14 and 12/4/13. 40 plants were installed in each of the three 100' sections of new hedgerow that were designed and planted by students.

-The HOC program tabled at two AgPark events, the Harvest Festival in October 2013 and the Plant Sale/Farm tours event in May 2014. These are described under Public Outreach Events.

(Unincorporated and Flood Control District)

Bay Trees Park, Native Plant Trail, Castro Valley, Hands-On Conservation

Work continued at the native plant trail in Bay Trees Park, an adopted spot of the Hands-On Conservation program; workdays had a "Creek Care" theme and stewardship activities reflected the actions that residents can take to protect creeks and enhance wildlife habitat around them. High School students and community volunteers worked to install and repair bender board to define pathways at the site, planted and monitored native plants, removed weeds, cleaned up trash along the creek banks in the park, and removed ivy from

creek-side trees. Approximately 50' of bender board was installed and 300' repaired, 35 plants installed with irrigation, mulch and plant caging. Overall, approximately 4 large bags were filled with trash, debris and recyclables from creek side areas and the park trail. During the workdays we continued to receive direct positive feedback from park users about the project.

-On 12/14/13 a group of 40 students and teachers from the environmental club at San Lorenzo High School worked with HOC at the adopted spot and planted native plants, working in conjunction with the Earth Team organization, which provided the bus for the students and environmental lessons and activities, including creek water testing. A creek cleanup was also held, and ivy removed from native trees.

-30 Girl Scouts and parent helpers from a troop in Fremont developed an environmental day camp named Camp Evergreen, and led two service learning workdays at Bay Trees park with the Hands-On Conservation program. On 7/19/13 HOC staff trained the Scouts on planting methods, bender board installation, seeding wildflowers, making and installing plant caging and signage, weeding, irrigation and creek water quality monitoring and cleanup; on 8/10/13 the day campers arrived and the trained scouts worked together to accomplish all the stewardship tasks. Scouts and campers were given CWP wildflower seed packets, mood pencils and reusable trash bags as a thank you for their dedicated work.

-On 9/28/13, National Public Lands Day, a HOC community workday was held at Bay Trees with 25 Castro Valley High School students and Dublin Boy Scouts. The volunteers worked on bender board, invasive plant and weed removal, and an extensive litter cleanup along the creek and pathways in the park; many spray paint cans were picked up from the creek channel in addition to the trash.

CWP reusable trash bags were given to volunteers.

The Bay Trees adopted spot site was maintained and monitored an additional 6 times during the year by staff in order to maintain irrigation for plants in drought conditions, to repair broken bender board and weed in order to reduce fire hazard. Coordination with the park manager was maintained and two informal meetings were held with park maintenance staffers to discuss shared weed management efforts.

Trash total: A total of approximately 1.8 cubic yards of trash, litter, spray paint cans/paint trays and recyclables were gathered at this site. Recyclables that were not muddy or contaminated were recycled, and park staff took the trash and bulky items. In addition to the bags there was approximately .5 cubic yards of bulky items gathered between the three cleanup events.

(Unincorporated Area)

Castro Valley Creek, Castro Valley- Earth Day (Task 1)

-An Earth Day creek/trail cleanup event was held at Castro Valley Creek along the trail that extends from the Castro Valley Library to Castro Valley Blvd. on 4/26/14. The creek trail was cleaned up, invasive plants removed and native riparian plants along creek side trail were

maintained. Approximately 1000 linear feet of creek bank and trail was cleaned up by 25-30 student and community volunteers, resulting in the collection of approximately 12 trash bags; bulky items were collected in addition to the bags of trash, and also additional bags of invasive plant material.

The Earth Day event was primarily a project of other involved agencies, especially County Supervisor Nate Miley's office, Castro Valley Sanitary District, the local group Friends of San Lorenzo Creek; and Alameda County Flood Control and Water Conservation District, which picked up the bags of trash and brought volunteers. A pre-cleanup presentation was given by Friends group on the creek restoration that had taken place at that spot. The Hands-On conservation program provided tools and equipment and lead one of the groups of volunteers in weeding the plantings. The Earth Day cleanup at this spot is the Friends of San Lorenzo Creek's primary annual service project, and they expressed appreciation for the help from the Hands-On Conservation program. This is an excellent stewardship project area because of the relatively large turnout of local volunteers for workdays, and because of the real need for cleanup of this highly visible and widely used creek trail and restoration spot.

Trash total: approximately 2.5 cubic yards of trash, litter and recyclables were gathered at the site. Recyclables that were not muddy or contaminated were recycled, and Alameda County Flood Control and Water Conservation District hauled the trash, bulky items and plant material away. Plant material was composted.

Earth Day Cleanup at Palomares Creek and School, Castro Valley (Task 2)

A school campus, creek and trail maintenance day was held as part of the Castro Valley Earth Day event on 4/26/14. 46 parent volunteers, students, teachers and community members worked at the school to clean up the campus, apply mulch, to clear debris and provide erosion control along the trail, remove invasive plants and poison oak in preparation for the school's 5/16 Watershed Expo event. Approx. 400-500 linear feet of creek area/ trail was improved.

Trash total: a 20- gallon trash can was filled with trash and debris (not plant material) during the campus cleanup, or .10 cubic yard. Recyclable materials were recycled at the recycling stations on campus.

(Unincorporated Area)

Earth Day- Alameda Creek, Niles (Task 1)

The Saturday 4/19/14 Earth Day creek cleanup was initiated by the Hands-On Conservation program and publicized and conducted in collaboration with the Alameda Creek Alliance at their newly adopted spot along Alameda Creek in Niles. ¼ mile of creek bank was cleaned up by 20 community volunteers. 6 large trash bags were filled (bag size 12 cu ft), with bulky materials collected in addition. Volunteers also worked with ACA staff Ralph Boniello on invasive plant removal. He talked with the group about Alameda Creek and its fisheries that the Alliance has been working hard to restore with the cooperation of local agencies. HOC staff filmed shots of the volunteers picking up trash in the creek area, and did interviews with volunteers to document the project. The EBRPD Niles Staging Area is an excellent spot for staging a cleanup, as it has the necessary facilities and good access to both the Alameda Creek flood control channel and the natural creek upstream.

Trash total: at least 2.5 cubic yards of trash, litter and recyclables were collected by volunteers at the site. Recyclables that were not muddy or contaminated were recycled, and Alameda County Flood Control and Water Conservation District hauled the trash, bulky items and plant material away from a pickup spot along Old Canyon Rd. Plant material was composted by the county.

(Flood Control District)

School wide Trash Cleanup at Palomares School Watershed Science Expo (Task 2)

A school wide Campus Trash Cleanup was held during the Palomares Watershed Science Expo on 5/17/13 (Expo described above under Public Outreach Event). The trash pickup activity was done by groups of students, exhibitors, teachers and volunteers at each of 17 stations during the day. Each activity station was given a trash bag with instructions for the exhibitor to have each group of students pick up trash from the area surrounding their station on the campus. Trash (approximately 3 gallons) was collected at the end of the day from each station and recycled by a team of 6 Jr. Naturalists- primarily Palomares Elementary students. The campus and creek area was left clean at the end of the Expo. A storm drain is situated in the schoolyard, which leads directly via a short pipeline to Palomares Creek, so cleanup is critical. The storm drain pipe outfall at the creek was pointed out to students at the "Creek Critters" activity station alongside the creek.

Trash total: .015 cubic yards of litter and recyclables was gathered by all in attendance at the Expo; Jr. Naturalists gathered the bags of trash that had been collected for each of the 21 activity stations. As many trash items as possible were recycled at the recycling station on campus.

(Unincorporated Area)

School-Age Children Outreach

Hands-On Conservation (Task 1)

The Hands-On Conservation Program provides opportunities for outdoor stewardship activities for young adults of middle school through college age to increase knowledge of natural resources and protection of watersheds through hands-on activities that include water quality improvement activities at local creeks, stewardship education and creek side habitat restoration. Activities include age appropriate elements of watershed education and career development.

See the above sections of this report for specific information on 2013/14 HOC workdays and outreach events.

The education-related aspects of the Hands-On Conservation program include:

- HOC and partner organization staff communicate with volunteers during the workdays, in two different ways: at the start and conclusion of each workday volunteers are educated in the goals and reasons for undertaking the stewardship project, the watershed protections strategies being employed, and the positive impact that the day's work will have.

Throughout the events, more informal conversations are had with volunteers to discuss these themes and also the particulars of the stewardship practices being employed during the project. Career and education information is also passed on in relation to the level of

interest of the group or individual volunteers.

Palomares School Watershed Education, Castro Valley (Task 2)

Through this program, hands-on, site-specific creek and watershed lessons are taught to Palomares students and to classes from schools in the San Lorenzo Creek watershed. Palomares Creek, which flows along the edge of the school campus, was restored by the Alameda County Flood Control District and other partners in 2000-2001. A creek side trail and outdoor classroom area was also developed at that time. A curriculum that met state standards was developed for the program, and it continues to be utilized by Sherry Johnson, a credentialed teacher and ACRCDD staff member. Biweekly creek science lessons are taught at the school, and after-school programs include Junior Naturalists and Palomares Creek Tour Guides; these are discussed below.

One of the elements of the program that involves public participation, the campus-wide cleanup on Earth Day, is covered in that section above. The Palomares School Watershed Expo event is discussed under the Public Outreach Event section above.

Bi-Weekly watershed and creek science lessons during the school day at Palomares School

-Creek and watershed lessons were conducted between October and June in the 2013/14 school year for Palomares students in K-5th grades. 104 watershed-based lessons were taught to classes of 24-32 students at the school campus by the credentialed teacher and watershed educator Sherry Johnson. Creek lessons are part of regular science instruction during the school day and meet state standards. Numerous visits are made to the creek for hands-on lessons to reinforce classroom learning. Topics cover water quality studies, creek ecology, soil/geology, wildlife and plants, and bird life in relation to the creek and larger San Lorenzo creek watershed.

-Hands-on stewardship activities, including installation of campus hillside erosion control practices and vegetation, native plantings of shrubs and grasses, bioswale maintenance and invasive plant removal continued to be done at the Palomares campus by the students, led by Sherry. A \$300 grant was received from the local garden club to cover materials for the stewardship projects.

-A CA Dep't. of Fish and Wildlife "Trout In the Classroom" program was included this year for first time at the school; 1st and 2nd grade students raised and released fingerling trout. The program engaged 135 Palomares students and 5 teachers.

-The Palomares School principal and teachers consider creek lessons to be a part of their regular science instruction, since creek lessons meet state standards. The creek lessons are featured at an annual presentation to the Castro Valley School Board by the school's teachers, and for the Palomares Open House. Many parents have their children attend this school because of the creek studies program.

(Unincorporated Area)

Palomares School after-school programs

A Junior Naturalists after school program for 70 1st-5th grades and a Creek Tour Guides

program for 24 3rd-5th graders was held between April and June 2014. They are open to Palomares School students and other schools in the watershed. The program is conducted at Palomares Creek on the school campus at the end of the school day and features hands-on activities that cover water quality studies, creek ecology, conservation activities and stewardship. Tour Guides learn content and methods for leading creek tours at the annual Watershed Expo. The Tour guides also staffed 3 activity tables at the Expo, and the Jr. Naturalists helped with separating the recyclables at the Expo campus litter cleanup.

Two Palomares teachers lead the two after-school programs, and 3-5 parent volunteers assist them. The Jr. Naturalist and Tour Guides programs were highlighted in a presentation to the Castro Valley School Board members and at the Palomares Elementary Open House event in May.

Palomares School –creek program outreach to community

Sherry Johnson utilizes creek studies materials and expertise from the Palomares program to share with other entities in the watershed who wish to do hands-on learning about creek life and restoration. This is an efficient and appreciated use of the learning resources that have been developed over the years.

Activities included:

-The science program at Washington Middle School (San Lorenzo) borrowed and utilized Palomares creek program materials during the week of May 4th for a field trip to Samuel Taylor State park; water quality testing and other creek investigations were done by students there. 300 students participated in the field trip, along with 6 teachers.

-Docents from the Sulphur Creek Nature Center visited Palomares School on 4/3/13 to learn from three Palomares Creek Tour Guides and Sherry about the creek restoration and campus restoration projects in prep for their upcoming healthy creeks workshop, and borrowed Palomares' native plant signage.

Additional information on Contract Tasks 10, 12 and 13

Task 10 Storm Water Information and Outreach Assistance

Cynthia Butler, RCD storm water outreach coordinator, works in conjunction with Sharon Gosselin as the Alameda County Clean Water Program Outreach and Public Information Coordinator.

Cynthia's activities include coordination and leadership activities with the PIP subcommittee, coordination of outreach events and materials, local media and communications activities and event planning, and coordination of a regional program for BASMA. Cynthia is responsible for reporting on Public outreach and Education for the MRP; her activities are covered in those reports. Cynthia collaborates with various RCD staff in implementing her projects.

Task 12 Interactive Watershed Maps

Cynthia Butler also manages Task 12. In FY14 she implemented the plan for the task, which involves the development of an interactive watershed map based on Google Earth, two subcontracts to assist with the project, coordination with partners who preparing the documents for posting on a county website, and hiring and overseeing staff who are developing watershed information for the map and website.

Task 13- Development of information and outreach materials

Work began in spring 2014 to document (visual/audio) contract program and project activities in order to enhance the ability to create materials as needed to inform and educate specific audiences. Material developed will be utilized on websites, in presentations and documents on an as-needed basis.
