FAX (510) 238-2233

TDD (510) 238-7644

September 15, 2015

Mr. Bruce Wolfe  
Executive Officer  
Regional Water Quality Control Board  
1515 Clay Street; Suite 1400  
Oakland, CA 94612

**RE: Annual Deliverables Report (July 2014 – June 2015)  
Order R2-2009-0074 – NPDES Permit No. CAS612008**

Dear Mr. Wolfe,

Enclosed please find the City of Oakland's Annual Deliverables Report for Fiscal Year 2014 – 2015 (July 2014 – June 2015) as required by the California Regional Water Quality Control Board, San Francisco Bay Region Municipal Regional Stormwater National Pollutant Discharge Elimination System (NPDES) Permit.

Information for Private Projects for Provision C.3.h.iv Installed Stormwater Treatment Systems Operation & Maintenance Verification Inspection Program Reporting and Provision C.6 are not included in this Annual Deliverables Report submittal. These sections will be submitted under separate cover at a later date. Public Project information for Provision C.3.h.iv and Provision C.6 are included in this submittal.

I certify under penalty of law that these documents and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Lesley Estes', with a stylized flourish at the end.

Lesley Estes  
Watershed Program Manager

Enclosure

# CITY OF OAKLAND

## Stormwater Management 2014-2015 Annual Report

### PREPARED BY:

City of Oakland, Public Works Department,  
Bureau of Engineering and Construction,  
Watershed and Stormwater Management

### CONTRIBUTORS:

Planning, Building & Neighborhood Preservation – *Planning and Zoning, Building Services*  
Public Works Department – *Bureau of Facilities and Environment, Bureau of Infrastructure and Operations, Bureau of Engineering and Construction*  
Fire Services Agency

### Damon Slough Trash Clean-Up

### Green Street Conceptual Design

### Storm Drain Inlet Trash Screen

### Lakeshore Street Median Swale

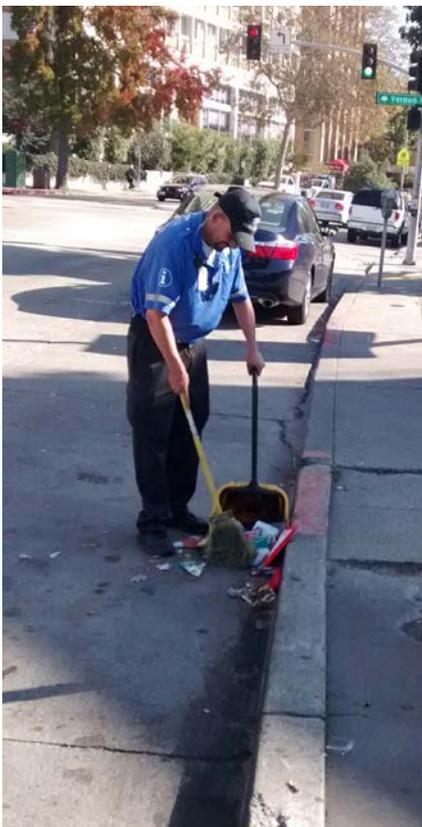

## 2014/2015 City of Oakland Stormwater Quality Program Highlights

*Volunteers collecting trash*

### TRASH REDUCTION

Reducing trash in Oakland not only benefits water quality, but the quality of life for our residents. Because of this reducing street litter in Oakland is a very high priority, but a litter-free City is an enormous challenge. To reach our goals Oakland continues to grow existing programs and grow new ones including installation of trash capture devices, growing its volunteer stewardship programs, implementing new source control programs, improving container management oversight and using our stormwater inspection program to ensure litter-free facilities. Oakland's trash reduction efforts include:

*Business Improvement District Cleaning*

- Installation of 25 full trash capture devices including one of the largest CDS units on the West Coast, Connector Pipe Screens (CPS) and Gross Solids Linear Removal Devices (GSRD) - capturing a total of 928 acres and preventing over 8% of Oakland's trash from entering our waterways.
- Source reduction through a City ordinance prohibiting Expanded Polystyrene Foam Food Service (EPS) ware (adopted in 2008)

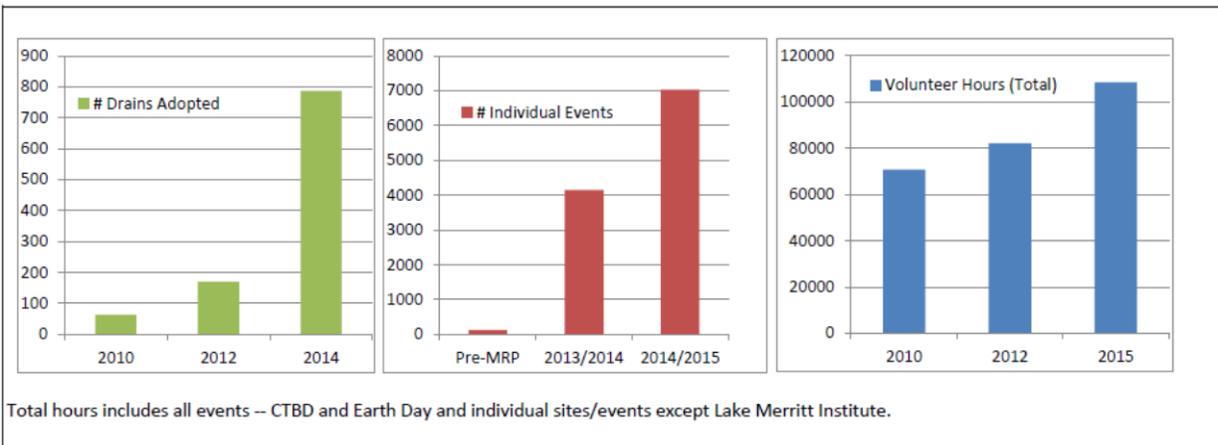

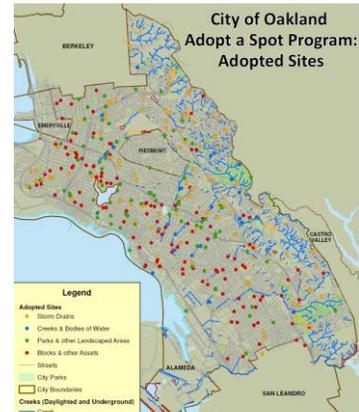

*Storm drain trash unit cleaning*

and banning single use plastic bags (adopted in 2013). Oakland has ensured implementation of the EPS program through targeted inspections of over 750 restaurants since 2012 with an overall compliance rate of 93%. Compliance with the single use bag ban is monitored through a County-wide inspection program.

Illegal dumping

- Increasing resources devoted to its Illegal Dumping Abatement program and has seen illegal dumping abatement increase over 66% since data tracking began in 2009. The program has focused its efforts most heavily in West Oakland and portions of East Oakland. This fiscal year the City removed an additional 11,000 cubic yards; this equals over 400% of the City's estimated baseline trash load.
- Targeting the stormwater inspection program to enforce proper container management and on-site litter control of almost 400 facilities inspected;
- Targeting education and enforcement efforts to businesses with documented trash container overages and to all facilities with a trash assessment rating of High or Very High.

*Business Improvement District Cleaning*

- Extensive street sweeping efforts. None of Oakland's 13,000 curb miles that are regularly swept were accounted for in the City's trash reduction estimates. However, when the results of the *Tracking California's Trash* are released, the City will be able to quantify its trash reductions from sweeping.
- Growing its volunteer stewardship program and has achieved enormous success in leveraging creek and on-land cleanups City-wide. Since adoption of the MRP, the City has seen the number of annually

registered volunteers grow 425% (from 4000 pre-MRP to 17,000) and the number of clean-up events has grown over 5600% (from 125 to 7031 events). The City has also expanded its Adopt-A-Drain program and now has officially adopted 10% of its 10,000 storm drains through this program.

- Leveraging trash reduction effort through Business Improvement Districts. These business districts provide full-time staff for picking up litter, managing overflowing trash cans, landscape maintenance and installing improved container facilities (such as Big Belly Solar Trash Cans) in their designated commercial assessment areas. In the coming year, the Downtown BID will launch a pilot program to install cigarette butt receptacles outside bars and restaurants. In addition the City will use its Excess Litter Fee to clean-up storefront areas of over 900 businesses.

## **REDUCTION OF POLYCHLORINATED BIPHENYLS (PCBs)**

West Oakland, referred to as the Ettie Street Pump Station Watershed (ESPSW) was identified early on as a former industrial area with elevated PCB levels and Oakland initiated sampling and abatement efforts within the watershed in 2006. Oakland is an active participant in Clean Watersheds for a Clean Bay (CW4CB); a project to help implement the Total Maximum Daily Load (TMDL) for PCBs. Through this effort, the

*Tree well stormwater unit installation*

City inspected ESPSW facilities, conducted more sampling and installed six pilot tree well stormwater retrofit units in ESPW. In the FY 2014-2015 rainy season, the tree well retrofits were monitored for their effectiveness in removing PCBs and this information will be used to inform future PCB reduction efforts.

Through its inspection and sampling effort, the City has identified three properties for referrals. The City has been coordinating with US Environmental Protection Agency (EPA) and Regional Water Board to share information on cleanups, thresholds and sediment samples collected by San Francisco Estuary Institute. As an outgrowth of these discussions, the EPA and the City have identified a core swath of the San Leandro Bay watershed as a pilot initiative to leverage additional loading reductions and increase resources for sediment sampling.

*Tree well stormwater unit*

*Biotreatment*

The City has worked through its County-wide program to apply screening criteria to identify properties with high potential opportunity for PCB reduction. The screening in the ESPSW and the core swath of San Leandro Bay was completed in August 2014 and identified 23 parcels in the ESPSW watershed and 21 parcels in the San Leandro Bay watershed as high potential opportunity for PCB reduction. The City conducted field investigations of these facilities and identified key locations at these sites recommended for further sampling.

Lastly, in FY 14/15 the City performed a file review of its existing brownfield reports and synthesized data on properties previously screened or sampled for PCBs. The City's goal for this effort was summarize existing sampling data and centralize available information to help guide future review of PCB properties.

## GREEN INFRASTRUCTURE

The City of Oakland is implementing projects that utilize green infrastructure as an integral part of their design to manage stormwater and is conducting a planning process to identify opportunities across the city to retrofit existing public infrastructure with green infrastructure systems. Several of the projects that have been implemented to date include a bioretention swale and green roof at the Lake Chalet adjacent to Lake Merritt, a bioretention swale in the Lakeshore Avenue median, the retrofit of the parking lot at Fire

*Green roof*

Station One with permeable pavers and a rain garden, and the retrofit of the parking lot at the Lake Merritt Sailboat House with bioretention areas to treat runoff from the lot before it is discharged to the lake. In the near future the City will be implementing a green streets retrofit project along Harrison Street and Lakeside Drive, adjacent to Lake Merritt. The project will include numerous rain gardens and new street trees for significant stormwater detention and treatment. The City sees green infrastructure as a key component of its sustainable city planning efforts in order to improve stormwater quality while providing co-benefits including improved storm system capacity, improved air quality, lowered heat island effect, reduced flooding, climate change impact mitigation, and beautification, among others.

The City of Oakland is in the process of creating its Oakland Urban Greening Stormwater Retrofit Plan. The Green retrofit Plan use GIS-based screening tools and in the field research to identify opportunities for retrofitting existing “grey” infrastructure and ensuring that city policies and plans such as transportation guidelines and design guidance, General Plan amendments, and area specific plans incorporate green infrastructure opportunities. Through the implementation of a growing number of green infrastructure projects and the creation of a plan, the City of Oakland is getting ready to meet future challenges of stormwater management with green infrastructure.

E-mail Address:	SAME AS ABOVE				

Section 2 - Provision C.2 Reporting Municipal Operations

**Program Highlights and Evaluation**

Highlight/summarize activities for reporting year:

Summary:

City staff conducting daily municipal operations implement Best Management Practices (BMPs) available from the Alameda Countywide Clean Water Program (ACCWP), the California Stormwater Quality Association (CASQA), the Bay Area Stormwater Management Agencies Association (BASMAA), the California Regional Water Quality Control Board (RWQCB), and other entities.

During FY 2014-2015, City staff participated in the Municipal Maintenance/Operations Subcommittee and associated workgroups and trainings.

See Provision C.2 Municipal Operations section of the Alameda Countywide Clean Water Program (ACCWP) FY 2014-2015 ACCWP Annual Report for a description and summary of activities implemented at the countywide and/or regional level.

**C.2.a. ► Street and Road Repair and Maintenance**

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

<b>Y</b>	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
<b>Y</b>	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
<b>Y</b>	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments:

The City's Street & Sidewalk Maintenance Division of the Oakland Public Works (OPW) department conducts limited work on streets and sidewalks. Operations include preventative maintenance (such as minor asphalt and pothole repairs) and minor street repairs (including street milling and placement of new asphalt) on streets and sidewalks in the City. Staff implements typical stormwater Best Management Practices (BMPs) such as storm drain protection and scheduling work to avoid rainy weather for construction to prevent stormwater impacts.

Street milling involves the removal of approximately 2-4" of the surficial layers of the roadway using an asphalt grinder/milling machine. The milling machine is a self contained piece of equipment with a holding box that loads the ground asphalt onto a conveyer belt that loads materials into a waiting dump truck. Work crews use a guide person to avoid spillage from the milling machine to the conveyor belt and truck.

Additionally, a skip loader follows behind the equipment to ensure remnant pieces of asphalt are picked up. Final cleanup prior to the placement of new asphalt using a box hopper includes the use of a mechanical broom sweeper vehicles and manual sweeping by City staff.

**C.2.b. ► Sidewalk/Plaza Maintenance and Pavement Washing**

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

<b>Y</b>	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
<b>Y</b>	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs

Comments:

Plaza maintenance and pavement washing is conducted in the City Hall Plaza at Frank Ogawa Plaza in Oakland, California. Staff is trained to pressure wash materials towards the permeable pavement located in the plaza so that washwaters can infiltrate into the substrate. Washwater generated containing soaps, sanitizers or sediment/particulate matter is vacuumed up using the on-site mini-street sweeper, and disposed of into nearby sanitary sewer manholes.

City staff that conduct sidewalk/plaza maintenance and pavement washing receive both an initial training and continuous on the job training. Bi-weekly safety meetings are also conducted with staff. These tailgate meetings may include discussions regarding stormwater issues that have arisen on the job or from complaints.

**C.2.c. ► Bridge and Structure Maintenance and Graffiti Removal**

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

<b>Y</b>	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
<b>Y</b>	Control of discharges from graffiti removal activities
<b>Y</b>	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
<b>Y</b>	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal
<b>Y</b>	Employee training on proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.
<b>Y</b>	Contract specifications requiring proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.

Comments:

**City staff does not conduct bridge and/or structural maintenance activities directly over a waterbody. City staff may conduct work on portions of a bridge (such as abutments) that fall within the City's jurisdiction from adjacent accessible on-land areas. Best Management Practices (BMPs) are implemented to ensure there are no water quality impacts as a result of the work to nearby storm drain inlets.**

**If there is a need to conduct bridge and/or maintenance activities over a waterbody, the work is contracted out, and the implementation of BMPs are required in contractual language, scope of work, and project specifications to avoid impacts to the waterbody.**

**Staff in the City of Oakland Public Works (OPW) Department – Keep Oakland Clean and Beautiful (KOCB), Graffiti Abatement use the following methods to abate graffiti:**

1. Paint over (spray on or roll over)
2. Chemical removal of graffiti (wipe on)

**If needed, power washing using a pressure washer is used to remove graffiti from structures. The City has two reclamation units that are used as BMPs during pressure washing activities.**

**Additionally, many structures (such as electrical boxes and signs) and bridge structures located within the Oakland boundaries may not be City responsibility or jurisdiction. Some structures belong to utility companies (such as EBMUD, PG&E, etc.) and the bridge structures may fall under the responsibilities of CalTrans. These cases are referred by City staff to the responsible agency for response.**

<b>C.2.d. ► Stormwater Pump Stations</b>						
Does your municipality own stormwater pump stations:		<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/>	No	
If your answer is <b>No</b> then skip to C.2.e.						
Complete the following table for dry weather DO monitoring and inspection data for pump stations <sup>1</sup> (add more rows for additional pump stations). If a pump station is exempt from DO monitoring, explain why it is exempt.						
Pump Station Name and Location	First inspection Dry Weather DO Data		Second inspection Dry Weather DO Data			
	Date	mg/L	Date	mg/L		
7 <sup>th</sup> Street (@ Interstate 880)	Not Applicable	Not Applicable	Not Applicable	Not Applicable		
73 <sup>rd</sup> Avenue (@ San Leandro Street)	Not Applicable	Not Applicable	Not Applicable	Not Applicable		
105 <sup>th</sup> Avenue (@San Leandro Street)	Not Applicable	Not Applicable	Not Applicable	Not Applicable		
Summarize corrective actions as needed for DO monitoring at or below 3 mg/L. Attach inspection records of additional DO monitoring for corrective actions:						
Summary: Dissolved Oxygen (DO) monitoring and data collection at the City of Oakland Stormwater Pump Stations is not required. As stated in Section C.2.d.ii.(2) of the Municipal Regional Permit (MRP), "DO monitoring is exempted where all discharge from a pump station remains in the stormwater collection system or infiltrates into a dry creek immediately downstream. " Attachments: Not Applicable						
Complete the following table for wet weather inspection data for pump stations (add more rows for additional pump stations):						
Pump Station Name and Location	Date (2x/year required)	Presence of Trash (Cubic Yards)	Presence of Odor (Yes or No)	Presence of Color (Yes or No)	Presence of Turbidity (Yes or No)	Presence of Floating Hydrocarbons (Yes or No)
7 <sup>th</sup> Street (@ Interstate 880)	10/14/2014	Minimal <0.25 cubic yards	No	No	No	No
	4/28/2015	Minimal <0.25 cubic Yards	No	No	No	No

<sup>1</sup> DO monitoring is exempted where all discharge from a pump station remains in a stormwater collection system or infiltrates into a dry creek immediately downstream.

Pump Station Name and Location	Date (2x/year required)	Presence of Trash (Cubic Yards)	Presence of Odor (Yes or No)	Presence of Color (Yes or No)	Presence of Turbidity (Yes or No)	Presence of Floating Hydrocarbons (Yes or No)
73rd Avenue (@ San Leandro Street)	10/14/2014	Minimal <0.25 cubic yards	No	No	No	No
	4/28/2015	Minimal <0.25 cubic yards	No	No	No	No
105th Avenue (@ San Leandro Street)	10/14/2014	Minimal <0.25 cubic yards	No	No	No	No
	4/28/2015	Minimal <0.25 cubic yards	No	No	No	No
<p>Summary:            The City conducts inspection / maintenance of four stormwater pump stations at 3 locations at the roadway underpasses listed above on a bi-weekly schedule. Accumulated trash removed, presence of odor, presence of color, presence of color, presence of turbidity, and presence of floating hydrocarbons observed in the respective pump station sumps are noted on the Oakland Public Works Department – Drainage Maintenance, Storm Drainage Department Pump Stations field log forms.</p> <p>Trash and debris accumulation is limited to the volume that can be collected in the specific underpass storm drain inlets located at the roadway surface.</p>						

C.2.e. ► Rural Public Works Construction and Maintenance			
Does your municipality own/maintain rural <sup>2</sup> roads:	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/> No
If your answer is <b>No</b> then skip to C.2.f.			
Place a <b>Y</b> in the boxes next to activities where applicable BMPs were implemented. If not applicable, type <b>NA</b> in the box and provide an explanation in the comments section below. Place an <b>N</b> in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.			
<input type="checkbox"/>	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas		
<input type="checkbox"/>	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources		
<input type="checkbox"/>	No impact to creek functions including migratory fish passage during construction of roads and culverts		
<input type="checkbox"/>	Inspection of rural roads for structural integrity and prevention of impact on water quality		
<input type="checkbox"/>	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion		
<input type="checkbox"/>	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate		
<input type="checkbox"/>	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings		
Comments including listing increased maintenance in priority areas:			

<sup>2</sup>Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. ► Corporation Yard BMP Implementation			
Place an X in the boxes below that apply to your corporations yard(s):			
<input type="checkbox"/>	We do not have a corporation yard		
<input type="checkbox"/>	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit		
<input checked="" type="checkbox"/>	We have a <b>Stormwater Pollution Prevention Plan (SWPPP)</b> for the Corporation Yard(s)		
Place an X in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type <b>NA</b> in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:			
<input checked="" type="checkbox"/>	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment		
<input checked="" type="checkbox"/>	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system		
<input checked="" type="checkbox"/>	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method		
<input checked="" type="checkbox"/>	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used		
<input checked="" type="checkbox"/>	Cover and/or berm outdoor storage areas containing waste pollutants		
Comments:			
If you have a corporation yard(s) that is not an NOI facility, complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information:			
Corporation Yard Name	Inspection Date (1x/year required)	Inspection Findings/Results	Follow-up Actions
7101 Edgewater Boulevard Municipal Service Center (MSC)	June 12, 2015	<u>Southwest Corner</u> <ul style="list-style-type: none"> <li>• Clean up debris</li> <li>• Remove rusty lids and old paint cans</li> <li>• E-Waste Stockpile Area - Product in appropriate bins, but exposed to inclement weather</li> <li>• Former Soil Stockpile Area - Soil and Trash stockpiling in this area</li> </ul>	Conducted required cleanup of Corporation Yard as directed <ul style="list-style-type: none"> <li>• <i>General Housekeeping/Clean-Up Needed</i></li> <li>• <i>Upgraded BMPs</i></li> <li>• <i>Moved Soil Stockpile and Trash in former Stockpile Area to new Stockpile Containment Area with Roof</i></li> </ul>

Section 3 - Provision C.3 Reporting New Development and Redevelopment

**C.3.b.v.(2)(a) ► Green Streets Status Report**

(All projects to be completed by December 1, 2014)

On an annual basis (if applicable), report on the status of any pilot green street projects within your jurisdiction. For each completed project, report the capital costs, operation and maintenance costs, legal and procedural arrangements in place to address operation and maintenance and its associated costs, and the sustainable landscape measures incorporated in the project including, if relevant, the score from the Bay-Friendly Landscape Scorecard.

Summary: **The three Green Streets Pilot Projects located in Alameda County (in Albany, Emeryville, Unincorporated Alameda County) have been completed. The Green Street Pilot Project Summary Report submitted by the Bay Area Stormwater Management Agencies Association (BASMAA), on behalf of the Municipal Regional Permit (MRP) permittees, in BASMAA's MRP FY 2012-2013 Regional Supplement – New Development and Redevelopment included available information on the green street projects constructed within Alameda County, including capital costs, O&M costs, legal and procedural arrangements to address O&M and its associated costs, and sustainable landscape measures.**

In addition, the City of Oakland is a participant in the San Pablo Spine Project; a United States Environmental Protection Agency-funded effort to create a green street along San Pablo Avenue in each of the seven participating cities (Oakland, Emeryville, Berkeley, Albany, El Cerrito, Richmond and San Pablo). Oakland's proposed design will treat half of a City block and includes installation of a 10-foot wide rain garden for stormwater treatment and installation of a new bicycle lane. Construction anticipated to begin in November 2015.

See Provision C.3 New Development and Redevelopment section of the Alameda Countywide Clean Water Program (ACCWP) FY 2014-2015 Annual Report for a description and summary of activities conducted at the countywide or regional level.

**C.3.b.v.(1) ► Regulated Projects Reporting**

Fill in attached table C.3.b.v.(1) or attach your own table including the same information.

**C.3.e.v. ► Alternative or In-Lieu Compliance with Provision C.3.c.**

(For FY 11-12 Annual Report and each Annual Report thereafter)

Is your agency choosing to require 100% LID treatment onsite for all Regulated Projects and not allow alternative compliance under Provision C.3.e.?

	Yes	✓	No
--	-----	---	----

Comments (optional):

C.3.e.vi ► Special Projects Reporting			
1. Has your agency received, but not yet granted final discretionary approval of, a development permit application for a project that has been identified as a potential Special Project based on criteria listed in MRP Provision C.3.e.ii(2) for any of the three categories of Special Projects (Categories A, B or C)?	✓	Yes	No
2. Has your agency granted final discretionary approval of a project identified as a Special Project in the March 15, 2015 report? If yes, include the project in both the C.3.b.v.(1)Table, and the C.3.e.vi. Table.		Yes	No
<p>If you answered "Yes" to either question,</p> <p>1) Complete Table C.3.e.vi .below.</p> <p>2) Attach narrative discussion of 100% LID Feasibility or Infeasibility for each project.</p> <p><b>100% LID on-site treatment is feasible for most projects listed in Table C.3.b.v.(1) and Table C.3.e.vi. Exceptions include the following:</b></p> <ul style="list-style-type: none"> <li>• 2270 Broadway- using storm filters as the building takes up the whole site.</li> <li>• 2300 Valdez Street- using storm filters as the building takes up most of the site and the proposed treatment areas cannot accommodate all the run-off.</li> <li>• Children’s Hospital- using storm filters as the building takes up most of the site and the proposed treatment areas cannot accommodate all the run-off.</li> <li>• <b>250 17<sup>th</sup> Street</b> - using storm filters as the building takes up the whole site.</li> <li>• 459 22<sup>nd</sup> Street - using a treatment vault as the building takes up the whole site.</li> <li>• Fruitvale Transit Village- using storm filters as the building takes up most of the site and the proposed treatment areas cannot accommodate all the run-off.</li> <li>• West Grand Avenue &amp; Brush Street –</li> <li>• Hannah Street Lofts – using storm filters as the building takes up most of the site and the proposed treatment areas cannot accommodate all the run-off.</li> <li>• 2935 Ford Street - using storm filters as the building takes up most of the site and the proposed treatment areas cannot accommodate all the run-off.</li> <li>• 1900 Broadway - using mechanical treatment as the building takes up the whole site.</li> <li>• 4<sup>th</sup> Street &amp; Madison Street - using mechanical treatment as the building takes up the whole site.</li> <li>• 459 23<sup>rd</sup> Street- using mechanical treatment as the building takes up the whole site.</li> <li>• The High Street and MacArthur Boulevard project was listed in the March 2014 Special Project Report as having received final discretionary approval on 11/19/2013. Subsequent to the March 2014 Special Project Report, a lawsuit was filed against the project; the approval is currently suspended. The project is listed in Table C.3.e.vi as pending final discretionary approval and is not listed in Table C.3.b.v.(1) as an approved project.</li> </ul>			

**C.3.h.iv. ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting**

(1) Fill in attached table C.3.h.iv.(1) or attach your own table including the same information.

(2) On an annual basis, provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.

Summary:  
 Information provided is for Provision C.3.h.iv.(2) is for Public Projects. Information for Provision C.3.h.iv.(2) Private Projects will be submitted at a later date under separate cover.

Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspections for Public Projects are conducted numerous times during the year by a City Contractor. The City Contractor performs these inspections under contract, and is managed by a City staffed Resident Engineer.

(3) On an annual basis, provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).

Summary:  
 Information provided is for Provision C.3.h.iv.(3) is for Public Projects. Information for Provision C.3.h.iv.(3) Private Projects will be submitted at a later date under separate cover.

(4) During the reporting year, did your agency:

• Inspect all newly installed stormwater treatment systems and HM controls within 45 days of installation?		Yes		No	✓	Not applicable. No new facility installations were completed during FY 2014-2015.
• Inspect at least 20 percent of the total number of installed stormwater treatment systems or HM controls? <sup>3</sup>	✓	Yes		No		Not applicable. No treatment measures
• Inspect at least 20 percent of the total number of installed vault-based systems?	✓	Yes		No		Not applicable. No vault systems.

If you answered “No” to any of the questions above, please explain:  
 Information provided is for Provision C.3.h.iv.(4) is for Public Projects. Information for Provision C.3.h.iv.(4) Private Projects will be submitted at a later date under separate cover.

<sup>3</sup>If there is only 1 treatment measure in the jurisdiction, the agency must inspect it every year.

**C.3.i. ► Required Site Design Measures for Small Projects and Detached Single Family Home Projects**

On an annual basis, discuss the implementation of the requirements of Provision C.3.i, including ordinance revisions, permit conditions, development of standard specifications and/or guidance materials, and staff training.

Summary:

**BASMAA prepared standard specifications in four fact sheets regarding the site design measures listed in Provision C.3.i, as a resource for Permittees. We have modified local ordinances/policies/procedures and forms/checklists to require all applicable projects approved after December 1, 2012 to implement at least one of the site design measures listed in Provision C.3.i. We are using the following Program and BASMAA products for C.3.i implementation:**

- **BASMAA’s site design fact sheets**
- **C.3 Technical Guidance Manual Appendix M**

**C.3.b.v.(1) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period**

Project Name Project No.	Project Location <sup>10</sup> , Street Address	Name of Developer	Project Phase No. <sup>11</sup>	Project Type & Description <sup>12</sup>	Project Watershed <sup>13</sup>	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New Impervious Surface Area (ft <sup>2</sup> ) <sup>14</sup>	Total Replaced Impervious Surface Area (ft <sup>2</sup> ) <sup>15</sup>	Total Pre- Project Impervious Surface Area <sup>16</sup> (ft <sup>2</sup> )	Total Post- Project Impervious Surface Area <sup>17</sup> (ft <sup>2</sup> )
<b>Private Projects</b>											
3093 Broadway	Broadway & Hawthorne Ave 3093 Broadway	3093 Broadway Holdings, LLC	Not Applicable	Redevelopment (Mixed Use ) of car dealership into 423 residential units & 22,000 sq. ft. commercial	Glen Echo Creek; Lake Merritt (Oakland Estuary)	3.43	3.43	0	136,546	149,750	136,546
McDonald's	66 <sup>th</sup> Street & San Pablo Ave 6623 San Pablo Ave	Tom Clark	Not Applicable	Redevelopment (Commercial) of existing building/parking lot	San Francisco Bay	0.80	0.71	0	31,157	31,157	28,994
2270 Broadway	Broadway & 23 <sup>rd</sup> Street 2270 Broadway	Lakeshore Partners, LLC	Not Applicable	Redevelopment (Mixed Use) of parking lot into 223 residential units and 6,000 sq. ft. commercial	Glen Echo Creek; Lake Merritt (Oakland Estuary)	0.46	0.46	0	19,382	20,146	19,382
2300 Valdez Street	Valdez Street & 23 <sup>rd</sup> Street 2300 Valdez	WP West Acquisitions, LLC	Not Applicable	Redevelopment (Mixed Use) of a parking lot into 196 residential units and 30,000 sq. ft. commercial	Glen Echo Creek; Lake Merritt (Oakland Estuary)	1.26	1.26	0	52,296	55,129	52,296
Wood Street Development Area 1	Wood Street, 14 <sup>th</sup> Street, 11 <sup>th</sup> Street, and Frontage, 0 10 <sup>th</sup> Street	City Ventures	Not Applicable	Development (Residential); Construction of 47 residential units	San Francisco Bay	2.11	2.09	19,614	18,723	61,359	62,250

<sup>10</sup>Include cross streets

<sup>11</sup>If a project is being constructed in phases, indicate the phase number and use a separate row entry for each phase. If not, enter "NA".

<sup>12</sup>Project Type is the type of development (i.e., new and/or redevelopment). Example descriptions of development are: 5-story office building, residential with 160 single-family homes with five 4-story buildings to contain 200 condominiums, 100 unit 2-story shopping mall, mixed use retail and residential development (apartments), industrial warehouse.

<sup>13</sup>State the watershed(s) in which the Regulated Project is located. Downstream watershed(s) may be included, but this is optional.

<sup>14</sup>All impervious surfaces added to any area of the site that was previously existing pervious surface.

<sup>15</sup>All impervious surfaces added to any area of the site that was previously existing impervious surface.

<sup>16</sup>For redevelopment projects, state the pre-project impervious surface area.

<sup>17</sup>For redevelopment projects, state the post-project impervious surface area.

**C.3.b.v.(1) ► Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period (private projects)**

Project Name Project No.	Application Deemed Complete Date <sup>18</sup>	Application Final Approval Date <sup>19</sup>	Source Control Measures <sup>20</sup>	Site Design Measures <sup>21</sup>	Treatment Systems Approved <sup>22</sup>	Type of Operation & Maintenance Responsibility Mechanism <sup>23</sup>	Hydraulic Sizing Criteria <sup>24</sup>	Alternative Compliance Measures <sup>25/26</sup>	Alternative Certification <sup>27</sup>	HM Controls <sup>28/29</sup>
<b>Private Projects</b>										
3093 Broadway	09/02/14	12/15/14	Covered trash areas and loading docks; discharges from covered trash areas to sanitary sewer; discharge pool to vegetated area; fire sprinkler water to vegetation or sanitary sewer; sustainable landscaping; efficient irrigation; drain inlet stenciling	Roof and sidewalk runoff to vegetated areas	Bioretention areas	Maintenance Agreement with Owner	2c	Not Applicable	Not Applicable	Not required. No increase in impervious surface; not located in susceptible area.
McDonald's	10/31/14	03/03/15	Discharges from covered trash areas and restaurant activities to sanitary sewer; fire sprinkler water to sanitary sewer; sustainable landscaping; drain inlet stenciling	Roof and sidewalk runoff to vegetated areas	Bioretention areas	Maintenance Agreement with Owner	1a	Not Applicable	Not Applicable	Not required. No increase in impervious surface; not located in susceptible area.

<sup>18</sup>For private projects, state project application deemed complete date. If the project did not go through discretionary review, report the building permit issuance date.

<sup>19</sup>For private projects, state project application final discretionary approval date. If the project did not go through discretionary review, report the building permit issuance date.

<sup>20</sup>List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.

<sup>21</sup>List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.

<sup>22</sup>List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).

<sup>23</sup>List the legal mechanism(s) (e.g., O&M agreement with private landowner; O&M agreement with homeowners' association; O&M by public entity, etc...) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.

<sup>24</sup>See Provision C.3.d.i. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria. Enter the corresponding provision number of the appropriate criterion (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3).

<sup>25</sup>For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.

<sup>26</sup>For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.

<sup>27</sup>Note whether a third party was used to certify the project design complies with Provision C.3.d.

<sup>28</sup>If HM control is not required, state why not.

<sup>29</sup>If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), bioretention unit(s), regional detention basin, or in-stream control).

No increase in impervious surface; not located in susceptible area.
Fruitvale Transit Village	02/13/15	05/06/15	Covered trash and loading docks; discharges from covered trash areas to sanitary sewer; fire sprinkler water to vegetation or sanitary sewer; sustainable landscaping; efficient irrigation; drain inlet stenciling	Minimize impervious surfaces and disturbance to natural drainages; direct runoff to vegetated areas	Bioretention areas / Stormfilters	Maintenance Agreement with Owner	1b, 2b	Not Applicable	Not Applicable	Not required. No increase in impervious surface; not located in susceptible area.
Coliseum Transit Village	08/28/14	01/15	Covered trash and loading docks; fire sprinkler water to vegetation or sanitary sewer; sustainable landscaping; efficient irrigation; drain inlet stenciling	Direct runoff to vegetated areas; use permeable surfaces	Bioretention areas	Maintenance Agreement with Owner	1a, 2a	Not Applicable	Not Applicable	Not required. No increase in impervious surface; not located in susceptible area.
495 22nd Street	11/19/14	02/19/15	Covered trash and loading docks; fire sprinkler water to vegetation or sanitary sewer; sustainable landscaping; efficient irrigation	Direct runoff to vegetated areas	Treatment Vault	Maintenance Agreement with Owner	1a	Not Applicable	Not Applicable	Not required. No increase in impervious surface; not located in susceptible area.

**C.3.b.v.(1) ► Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period (private projects)**

Project Name Project No.	Application Deemed Complete Date <sup>18</sup>	Application Final Approval Date <sup>19</sup>	Source Control Measures <sup>20</sup>	Site Design Measures <sup>21</sup>	Treatment Systems Approved <sup>22</sup>	Type of Operation & Maintenance Responsibility Mechanism <sup>23</sup>	Hydraulic Sizing Criteria <sup>24</sup>	Alternative Compliance Measures <sup>25/26</sup>	Alternative Certification <sup>27</sup>	HM Controls <sup>28/29</sup>
EBRP Parking Lot	05/08/15	05/08/15	Sustainable landscaping; efficient irrigation	Direct runoff to vegetated areas	Bioretention areas	Maintenance Agreement with Owner	2c	Not Applicable	Not Applicable	Not required. No increase in impervious surface; not located in susceptible area.
East Bay Bus Rapid Transit (BRT) Parking Lot	06/06/14	07/18/14	Sustainable landscaping; efficient irrigation	Minimize impervious surfaces; direct runoff to vegetated areas	Bioretention areas	Maintenance Agreement with Owner	2c	Not Applicable	Not Applicable	Not required. No increase in impervious surface; not located in susceptible area.
Jefferson Street Apartments	09/08/14	12/03/14	Covered trash and loading docks; discharges from covered trash areas to sanitary sewer; fire sprinkler water to vegetation or sanitary sewer; sustainable landscaping; efficient irrigation; drain inlet stenciling	Direct runoff to vegetated areas	Bioretention areas	Maintenance Agreement with Owner	2c	Not Applicable	Not Applicable	Not required. No increase in impervious surface; not located in susceptible area.
T5/T6	06/22/15	07/13/15	Covered trash and loading docks; discharges from covered trash areas and restaurant activities to sanitary sewer; fire sprinkler water to vegetation or sanitary sewer; sustainable landscaping; efficient irrigation; drain inlet stenciling	Conserve natural areas; minimize disturbance to natural drainages; direct runoff to vegetated areas	Bioretention areas	Maintenance Agreement with Owner	2c	Not Applicable	Not Applicable	Not required. No increase in impervious surface; not located in susceptible area.

Comments: None

**C.3.b.v.(1) ► Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period (public projects)**

Project Name Project No.	Approval Date <sup>30</sup>	Date Construction Scheduled to Begin	Source Control Measures <sup>31</sup>	Site Design Measures <sup>32</sup>	Treatment Systems Approved <sup>33</sup>	Operation & Maintenance Responsibility Mechanism <sup>34</sup>	Hydraulic Sizing Criteria <sup>35</sup>	Alternative Compliance Measures <sup>36/37</sup>	Alternative Certification <sup>38</sup>	HM Controls <sup>39/40</sup>
<b>Public Projects</b>										
Sailboat House Shoreline Improvement C393710	2/2014	8/25/14	Storm drain medallions, subsurface irrigation, infiltration basins	Retain existing trees, infiltration basins, subsurface drainage	Infiltration basins, subsurface storm water collection	Contract maintenance, City maintenance				
Golden Gate Recreation Center C457510	4/2014	10/1/14	Discharge fire sprinkler water to on-site vegetated areas. Install storm drain stenciling. Incorporate sustainable landscaping practices. Efficient irrigation systems.	Conserve natural areas, including existing trees, other vegetation and soils. Minimize impervious surfaces. Direct roof runoff onto vegetated areas. Direct hardscape to vegetated areas.	Bioretention facilities.	O&M Manual. Mechanism TBD.	Uniform flow method (2.C)	Not applicable	Not applicable	Not applicable

<sup>30</sup>For public projects, enter the plans and specifications approval date.

<sup>31</sup>List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.

<sup>32</sup>List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.

<sup>33</sup>List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).

<sup>34</sup>List the legal mechanism(s) (e.g., maintenance plan for O&M by public entity, etc...) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.

<sup>35</sup>See Provision C.3.d.i. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria. Enter the corresponding provision number of the appropriate criterion (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3).

<sup>36</sup>For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.

<sup>37</sup>For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.

<sup>38</sup>Note whether a third party was used to certify the project design complies with Provision C.3.d.

<sup>39</sup>If HM control is not required, state why not.

<sup>40</sup>If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), bioretention unit(s), regional detention basin, or in-stream control).

C.3.h.iv. ► Table of Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting									
Name of Facility/Site Inspected	Address of Facility/Site Inspected	Newly Installed? (YES/NO) <sup>41</sup>	Party Responsible <sup>42</sup> For Maintenance	Date of Inspection	Type of Inspection <sup>43</sup>	Type of Treatment/HM Control(s) Inspected <sup>44</sup>	Inspection Findings or Results <sup>45</sup>	Enforcement Action Taken <sup>46</sup>	Comments/Follow-up
<b>Public Projects</b>									
Sailboat House	668 Bellevue Avenue (near Perkins Street)	Yes	Owner	Not complete	Not complete	Bioretention swale	Proper installation	No violation; no enforcement action required	None
Golden Gate Recreation Center	1075 62 <sup>nd</sup> Street (@ Herzog Street)	Not Complete	Owner	Not complete	Not complete	Bioswale	Not complete	Not applicable	None

<sup>41</sup>Indicate “YES” if the facility was installed within the reporting period, or “NO” if installed during a previous fiscal year.

<sup>42</sup>State the responsible operator for installed stormwater treatment systems and HM controls.

<sup>43</sup>State the type of inspection (e.g., 45-day, routine or scheduled, follow-up, etc.).

<sup>44</sup>State the type(s) of treatment systems inspected (e.g., bioretention facility, flow-through planter, infiltration basin, etc..) and the type(s) of HM controls inspected, and indicate whether the treatment system is an onsite, joint, or offsite system.

<sup>45</sup>State the inspection findings or results (e.g., proper installation, improper installation, proper O&M, immediate maintenance needed, etc.).

<sup>46</sup>State the enforcement action(s) taken, if any.

C.3.e.vi.Special Projects Reporting Table												
Reporting Period –January1 – June 30, 2015												
Public Projects												
Project Name & No.	Permittee	Address	Application Submittal Date <sup>47</sup>	Status <sup>48</sup>	Description <sup>49</sup>	Site Total Acreage	Density DU/Acre	Density FAR	Special Project Category <sup>50</sup>	LID Treatment Reduction Credit Available <sup>51</sup>	List of LID Stormwater Treatment Systems <sup>52</sup>	List of Non-LID Stormwater Treatment Systems <sup>53</sup>
West Grand Avenue & Brush Street	City of Oakland	Corner of West Grand Avenue and Brush Street	July 10, 2014	Final discretionary approval pending Plans dated July 10, 2014	Residential new development :9 stories; 59 units, day care; covered parking	0.40 acres	N/A (Mixed Use Project)	5.2 FAR	Category A N/A Category B N/A Category C Location: Within 1/2 mile transit hub None auto related project Over minimum density	Category A N/A Category B N/A Category C Total credit= 65% Location: Within PDA = 25% Density:>4.0 FAR = 20% Parking: No surface parking = 20%	Flow through planters (65%)	Stormfilters (35%)
500 Kirkham Street	City of Oakland	500 Kirkham Street; 1304 5 <sup>th</sup> Street	June 22, 2015	Alternative A: Incomplete	Mixed use new development: 222 live work, 351 units and 101,550 sq. ft. commercial	2.96 acres	N/A (Mixed Use Project)	Incomplete	Incomplete	Incomplete	Incomplete	Incomplete

<sup>47</sup>Date that a planning application for the Special Project was submitted.

<sup>48</sup> Indicate whether final discretionary approval is still pending or has been granted, and provide the date or version of the project plans upon which reporting is based.

<sup>49</sup>Type of project (commercial, mixed-use, residential), number of floors, number of units, type of parking, and other relevant information.

<sup>50</sup> For each applicable Special Project Category, list the specific criteria applied to determine applicability. For each non-applicable Special Project Category, indicate n/a.

<sup>51</sup>For each applicable Special Project Category, state the maximum total LID Treatment Reduction Credit available. For Category C Special Projects also list the individual Location, Density, and Minimized Surface Parking Credits available.

<sup>52</sup>: List all LID stormwater treatment systems proposed. For each type, indicate the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area.

<sup>53</sup>List all non-LID stormwater treatment systems proposed. For each type of non-LID treatment system, indicate: (1) the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area, and (2) whether the treatment system either meets minimum design criteria published by a government agency or received certification issued by a government agency, and reference the applicable criteria or certification.

Section 4 – Provision C.4 Industrial and Commercial Site Controls

<b>Program Highlights</b>
Provide background information, highlights, trends, etc.
<p>See Provision C.4 Industrial and Commercial Site Control section of the Alameda Countywide Clean Water Program (ACCWP) FY 2014-2015 ACCWP Annual Report for a description and summary of Program activities.</p> <p>The City's estimated goal for total Industrial and Commercial Business Stormwater inspections conducted for FY 2014-2015 was 1,000 inspections. During the FY 2014-2015 reporting period, the City met its FY goals and conducted a total of 1,015 inspections at 975 facilities.</p> <p>Small unlicensed car wash facilities city-wide are increasing. These facilities are not properly equipped to handle wash water discharge in violation of local state and/or federal stormwater regulations. Small automotive repair facilities continue to be a problem because of illicit discharges and contract operations that discharge their power washing waste and chemicals into the storm drain are an increasing problem. These commercial facility stormwater inspections includes the following:</p> <ol style="list-style-type: none"> <li>1. Review of Stormwater Pollution Prevention Plan (SWPPP) if applicable.</li> <li>2. Review and compare stormwater monitoring results to stormwater benchmarks set forth in the SWPPP.</li> <li>3. Evaluate current BMP's in use and determining whether they are appropriate and /or adequate for the facilities operation.</li> <li>4. Recommend/require additional or upgrades to the existing BMP's and provide examples and potential options/upgrades to be implemented.</li> <li>5. Inspect ancillary property for high trash.</li> </ol>

<b>C.4.b.i. ► Business Inspection Plan</b>
Do you have a Business Inspection Plan? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
If No, explain: The City updated its Business Inspection Plan (BIP) on June 7, 2013.

<b>C.4.b.iii.(1) ► Potential Facilities List</b>
List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.
See Attachment C.4.1 for the City of Oakland's List of Potential Facilities for FY 2015-2016.

<b>C.4.b.iii.(2) ► Facilities Scheduled for Inspection</b>
List below or attach your list of facilities scheduled for inspection during the current fiscal year.
See Attachment C.4.2 for the City of Oakland's List of Facilities Scheduled for Inspection for FY 2015-2016.

**C.4.c.iii.(1) ► Facility Inspections**

Fill out the following table or attach a summary of the following information. Indicate your violation reporting methodology below.

<input checked="" type="checkbox"/>	Permittee reports multiple discrete violations on a site as one violation.
<input type="checkbox"/>	Permittee reports the total number of discrete violations on each site.

	Number	Percent
Number of businesses inspected	980	
Total number of inspections conducted	1,015	
Number of violations (excluding verbal warnings)	7	
Sites inspected in violation	18	1.7%
Violations resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner	18	100%

Comments:  
**The City of Oakland conducted stormwater inspections of the following facilities during FY 2014-2015 including all NOI Facility stormwater inspection under the City's jurisdiction.**

Business Type	Number of Inspections Conducted
Automotive Related Business	<b>293</b>
Construction Related Businesses	<b>20</b>
Food Related Businesses	<b>92</b>
Fueling Facilities	<b>85</b>
Grocery / Convenient Store	<b>83</b>
Manufacturing/ Industrial	<b>50</b>
Miscellaneous	<b>240</b>
NOI Facilities	<b>90</b>
Re-Inspection	<b>35</b>
Response to Complaints	<b>27</b>
TOTAL INSPECTIONS	<b>1,015</b>

**Of the 18 violations observed during business stormwater inspections during FY 2014-2015, 11 of the incidents were potential violations and/or minor violations that were addressed immediately and 7 incidents were given written violation notifications. All 18 potential violations and violations were resolved within 10 working days or less.**

**C.4.c.iii.(2) ► Frequency and Types/Categories of Violations Observed**

Fill out the following table or attach a summary of the following information.

Type/Category of Violations Observed	Number of Violations
Actual discharge (e.g. active non-stormwater discharge or clear evidence of a recent discharge)	2
Potential discharge and other	2

Comments:  
**Illicit Discharge streams are counted as one discharge per inspection per site.**

**C.4.c.iii.(2) ► Frequency and Type of Enforcement Conducted**

Fill out the following table or attach a summary of the following information.

	Enforcement Action (as listed in ERP) <sup>48</sup>	Number of Enforcement Actions Taken	% of Enforcement Actions Taken <sup>49</sup>
Level 1	Verbal Warning	11	61%
Level 2	Notice of Violation	7	39%
Level 3	Administrative Action w/ Monetary Fines	0	0%
Level 4	Referral to the City Attorney and/or County District Attorney's Office	0	0%
<b>Total</b>		<b>18</b>	<b>100%</b>

<sup>48</sup>Agencies to list specific enforcement actions as defined in their ERPs.

<sup>49</sup>Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

**C.4.c.iii.(3) ► Types of Violations Noted by Business Category**

Fill out the following table or attach a summary of the following information.

Business Category <sup>50</sup>	Number of Actual Discharge Violations	Number of Potential/Other Discharge Violations
Animal Care/Boarding	0	0
Auto Gas / Fueling Stations	0	3
Auto Repair and Service	1	3
Automotive Miscellaneous	0	5
Boats/Marinas	0	0
Construction/Contractor	1	5
Dental Offices	0	0
Dry Cleaners	0	0
Industrial	0	0
Laboratory	0	0
Machine Shop	0	0
Manufacturing	0	2
Miscellaneous	0	2
NOI Permits	0	3

**C.4.c.iii.(4) ► Non-Filers**

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

There were no Non-Filers identified during FY 2014-2015.

<sup>50</sup>List your Program's standard business categories.

C.4.d.iii ► Staff Training Summary				
Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
<p><b>ACCWP Stormwater Business Inspectors Workshop: Enforcement Tools</b></p> <p>ACCWP provided training to Oakland City stormwater staff and fire inspectors and stormwater inspectors on detecting sites with high potential risk of PCB.</p>	<p>June 3, 2015</p> <p>March 13, 2015</p>	<ul style="list-style-type: none"> <li>• MRP C.4 overview and brush up terminology</li> <li>• NPDES Industrial General Permit (IGP) update</li> <li>• Facility sources of PCB</li> <li>• Drinking water system discharge permit</li> <li>• The CASQA Industrial/Commercial BMP Handbook</li> </ul>	<p>1/2</p> <p>See Comment 1</p>	<p>50%</p>
<p><b>Inspecting Industrial / Commercial Facilities for Pollutants of Concern (POCs) Copper (Cu), Mercury (Hg), and PCBs</b></p>	<p>Required Power-Point Self Training module/session to be completed by inspection staff annually</p>	<p>Inspection Tools for POCs Cu, Hg, and PCBs encountered when conducting industrial / commercial business stormwater inspections.</p>	<p>2/2</p>	<p>100%</p>
<p>Comments:</p> <p>1. The City of Oakland Fire Department – Fire Prevention Bureau (OFD-FPB) formerly was the Certified Unified Program Agency (CUPA) for the City of Oakland, and conducted stormwater inspections of businesses in conjunction with CUPA inspections. During FY 2014-2015, the CUPA was transferred to Alameda County Environmental Health, and OFD-FPB inspectors that formerly conducted CUPA and stormwater inspections were tasked with other job responsibilities.</p> <p>Currently, the City has 1 dedicated inspector conducting business stormwater inspections, and has hired a Contractor to conduct business stormwater inspections on behalf of the City. In addition, to the City's OFD-FPB inspector dedicated to conducting stormwater inspections, the City required Contractor staff to attend the <i>ACCWP Stormwater Business Inspectors Workshop: Enforcement Tools</i> training on June 3, 2015. The City's Contractor sent 5 staff to the above mentioned training on June 3, 2015.</p>				

**Section 5 – Provision C.5 Illicit Discharge Detection and Elimination**

**Program Highlights**

Provide background information, highlights, trends, etc.

Illicit Discharge inspection staff performs inspections and enforcement for incidents identified by complaints and field identified issues. Resources such as aerial maps, sewer sheets, and Geographic Information System (GIS) are readily available, and enable staff to quickly and accurately locate the source of the illicit discharge. Recently, City staff has incorporated the use of mobile technology (mobile applications, GIS maps, other resources on cell phones and field dedicated mobile devices) to aid in expediting the inspection process. In addition, the City of Oakland Public Works (OPW) Department - Maintenance staff and equipment are available to assist in more complex inspection of storm drain infrastructure.

City staff in the OPW – Drainage Maintenance staff conducts inspection, monitoring, and maintenance of the storm drain collection system. The City also conducts inspections of survey/screening point locations (creeks and flood control channels) to enhance the storm collection system screening program. City staff participates in the Industrial and Illicit Discharge Control Subcommittee (I&IDC) and the Municipal Maintenance Subcommittee and associated work groups of the Alameda Countywide Clean Water Program (ACCWP).

See Provision C.5 Illicit Discharge Detection and Elimination section of the ACCWP FY 2014-2015 Annual Report for a summary and description of activities at the countywide or regional level.

**C.5.c.iii ► Complaint and Spill Response Phone Number and Spill Contact List**

List below or attach your complaint and spill response phone number and spill contact list.

Contact	Description	Phone Number
Oakland Fire Department – Hazardous Materials	Hazardous Materials Spill/Release	(510) 444-3322 or “911”
Public Works Agency Hotline	Illicit Discharges	(510) 615-5566

**C.5.d.iii ► Evaluation of Mobile Business Program**

Describe implementation of minimum standards and BMPs for mobile businesses and your enforcement strategy. This may include participation in the BASMAA Mobile Surface Cleaners regional program or local activities.

Description:

The City continues to inspect mobile businesses as needed and to conduct enforcement of mobile businesses in the manner described Section C.5.d.iii Evaluation of Mobile Business Program in the City’s FY 2010-2011 Annual Deliverables Report. Any complaints regarding mobile businesses are followed up with an inspection from City staff. Enforcement is directed to the property owner of the mobile business site, the property owner typically passes enforcement requirements onto the mobile business vendor. Additionally, the City has the authority to issue enforcement actions against mobile businesses and work s with the City Attorney’s Office, the City’s Business Tax department or the County District Attorney’s Office to obtain compliance with Local, State, and Federal stormwater regulations. Stormwater violations that are observed during inspections caused by mobile business are immediately addressed with the mobile business vendor. City staff provides mobile business operators with the Bay Area

Permittee Name: City of Oakland

Stormwater Management Agencies Association (BASMAA) Mobile Surface Cleaner Program and ACCWP Best Management Practices (BMPs) when applicable.

The City continues to implement the enforcement protocols developed in recent years by the Industrial and Illicit Discharge Control (I&IDC) Subcommittee of the ACCWP to obtain compliance with the mobile food vendors. These protocols include working in collaboration with the Alameda County Department of Environmental Health (ACDEH), who has jurisdiction over mobile food vendors in Alameda County, to obtain stormwater compliance. As part of the mobile food vendor permitting with the ACDEH, mobile food vendors receive BMPs and information on stormwater regulations, and agree to comply with local, state, and federal stormwater regulations in the process of acquiring their permit to operate within Alameda County from the ACDEH.

Additionally, the City Administrator’s Office operates the Mobile Food Vending (MFV) Permit Program for mobile food vendors conducting business on private property. MFV permits puts strict guidelines on allowable areas to conduct business, and enables the City to protect the community from health, safety, and stormwater issues that may arise as a part of the mobile vending. MFV permits are obtained in the City’s Permit Center, and require permitting from the Alameda County Environmental Health Services for the operation of the commissary for the mobile food vendor. As a legacy of the MFV Permit Program, the City has developed a number of mobile food vending Ordinances. City staff conducts inspection of the initial installation of the commissaries to ensure that Best Management Practices (BMPs) and the appropriate building standards are implemented for the waste disposal lines, trailer hookups, truck washing areas, and the cleanout of mats.

The City does not typically contract with third party mobile business contractors. Work is normally conducted utilizing City staff and resources.

See Provision C.5 Illicit Discharge Detection and Elimination section of the ACCWP FY 2014-2015 Annual Report for a summary of related ACCWP and BASMAA activities.

**C.5.e.iii ► Evaluation of Collection System Screening Program**

Provide a summary or attach a summary of your collection screening program, a summary of problems found during collection system screening and any changes to the screening program this FY.

Description:

City of Oakland continues to maintain a variety of stormwater infrastructure types (including weirs, tree wells, CDS Units, storm drain (SD) inlets, SD inlet baskets, SD inlet screens, culvert and storm pipe, manholes, “V” ditches, pump stations, and continuous deflective separation [CDS] trash collection units) on a routine basis. The main function of the stormwater infrastructure is to convey stormwater and prevent flooding. An indirect function of the City’s stormwater infrastructure includes the improvement of water quality by collecting and removing trash, organic material, and other types of debris before it enters nearby waterbodies (creeks, estuary and lakes), other storm drain infrastructure, Lake Merritt, and the San Francisco Bay.

A summary of maintenance conducted in the FY 2014-2015 reporting period on the City’s storm drain system by City staff is shown below.

Maintenance Activity	Work Conducted
Maintain/Service SD Inlets	13,394 Storm Drain Inlets
Inspect/Service Pump Stations (3 Locations)	88 inspections
Gutter Cleanout	42,768 linear feet
Storm Drain Line Cleanout	68,112 linear feet
Maintain/Service Storm Drain V-Ditches	24,920 linear feet
Resolve Flooding Incidents	354 locations
Repair SD Pipe, Manhole, Inlets	50 locations
Inspect/Maintain/Service Stormwater Infrastructure	208 Stormwater Structures - Including Weirs, CDS Units, SD Inlet Baskets, SD Inlet Screens, Culverts, Miscellaneous Structures

**C.5.f.iii.(1), (2), (3) ► Spill and Discharge Complaint Tracking**

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)		
	Number	Percentage
Discharges reported (C.5.f.iii.(1))	48	
Discharges reaching storm drains and/or receiving waters (C.5.f.iii.(2))	24 See Narrative Summary Below	50%
Discharges resolved in a timely manner (C.5.f.iii.(3))	24 / 24 See Narrative Summary Below	100%
<p>Comments:</p> <p>Reported illicit discharges are received through the City’s OPW Department Hotline Call Center, and distributed to the appropriate department(s) through a computerized maintenance management system (CMMS) reporting/tracking/referral database called City Works. Response from individual or multiple City departments may include, but are not limited to OPW Watershed and Stormwater Management, OPW Storm Drain Maintenance, Planning, Building, and Neighborhood Services (PBNS) Code Enforcement, PBNS Construction Inspection, and the Oakland Fire Department – Fire Prevention Bureau (OFD-FPB) staff. Additionally, City staff worked with local agencies and utility companies (such as the East Bay Municipal Utility District [EBMUD], the East Bay Regional Parks District [EBRPD], and the Alameda County Flood Control District [ACFCD]) to maximize efficiency, streamline efforts, and work together as a cohesive group to increase responsiveness and reduce the time for obtaining compliance.</p>		

Permittee Name: City of Oakland

During FY 2014-2015, 48 illicit discharges were reported to the City. The following is a categorized summary of the 48 reported illicit discharge cases.

- Reported Illicit Discharges - 48 incidents
- 24 of the 48 reported illicit discharges (50%) were actual illicit discharges that reached the storm drain system or a nearby receiving water
  1. Unsubstantiated (not found/located in the field) Cases – 15 incidents
  2. No discharge/Not a discharge – 7 incidents
  3. Unresolved (illicit discharge observed; no source identified) - 2 incidents

The illicit discharges listed above do not include Hazardous Materials responses conducted the Oakland Fire Department (OFD) Hazardous Materials (Haz Mat) Response Teams or Sanitary Sewer Overflow (SSO) responses conducted by PWA Sanitary Sewer Maintenance.

Hazardous Materials Response

OFD Haz-Mat operates under standard operating procedures (SOP) that requires staff respond to reported discharges within 24-48 hours from the time the incident is reported. Response to reported discharges are prioritized by the type / volume of material discharged and the location of the discharge (e.g. discharges close to highly sensitive areas). Discharges to storm drains and/or receiving waters are prioritized as a top priority for immediate response.

SSO Response

SSO Response is conducted by Sanitary Sewer Maintenance of the City’s PWA. SSO incidents are reported separately to the CA RWQCB, and are not included in this Annual Report.

**C.5.f.iii.(4) ► Summary of major types of discharges and complaints**

Provide a narrative or attach a table and/or graph.

The major types of complaints and reported illicit discharges in the City of Oakland during FY 2014-2015 consisted of miscellaneous wash water and construction related discharges. Reported wash water illicit discharge cases included cleaning in front and behind businesses to reduce odor and accumulation of dirt and debris for patrons, the public’s effort to conserve water by discharging laundry machine wash water to vegetated landscaping, and a result of car wash facilities inappropriately plumbed to discharge to the street gutter and storm drain system. Illicit Discharges also occurred as a result of various construction activities including painting and grading work. Due to current drought conditions, the public continues to take note of miscellaneous unknown discharges to the street gutter and storm drain system, and a larger number of unknown discharges were reported to the City in an effort to report wasteful use of water and to conserve water.

In addition to the prevalent types of discharges and complaints listed above, the City obtains numerous incident and complaint calls regarding illegal dumping of hazardous materials (commonly discarded left over paint and automotive fluids). Complaint calls for illegal dumping of hazardous materials are fielded and handled by the OFD and through a hazardous materials disposal Contractor. Most of these cases involving illegal dumping of hazardous materials result in the pickup and disposal of contained hazardous materials. On occasion, these containers are

Permittee Name: City of Oakland

turned over and spilled into the street gutter and storm drains. OFD Haz Mat responds to these illicit discharges and abates the situation by applying absorbent to the spilled material and implementing dry cleanup methods.

The following is a summary and highlights the City’s successful response to an major illicit discharge incident.

*EBMUD Illicit Discharge of Concrete*

In early April 2015, East Bay Municipal Utility District (EBMUD) notified the City that they had spilled a large amount of light weight concrete into the City’s storm drain system and, subsequently, the Rockridge Creek Branch of Glen Echo Creek. Unbeknownst to the City, EBMUD water mains are connected to the City’s storm drain infrastructure through pressure release valves as a means to discharge a small amount of water created by the release of excess pressure in the line. The illicit discharge was a result of EBMUD’s injecting lightweight concrete into an old potable water main so the pipe could be decommissioned. However, despite checking the entire line and associated structures, the EBMUD contractor left a valve open which resulted in the spill of approximately 35,000 gallons along 500 feet of open Rockridge Creek channel.

City staff immediately responded using California Office of Emergency Service protocols and coordinated its response with appropriate regulatory agencies. City staff provided on-site information and guidance to the California Department of Fish and Wildlife (CA DFW), the lead responder.

Assistance efforts included multiple inspections of the storm drain system using closed circuit television trucks, documenting the extent of impacts to the open channel creek, using high-powered hydro flusher trucks to assist with containment, providing detailed of the infrastructure and creeks in the area, and reviewing proposed cleanup strategies.

The extent of the impacts was major, and the City continues to work with EBMUD to resolve issues that arise from the incident. The City is also assisting EBMUD and regulatory agencies to design a creek restoration plan.

Section 6 – Provision C.6 Construction Site Controls – PRIVATE PROJECTS

<b>C.6.e.iii.1.a, b, c ▶ Site/Inspection Totals</b>		
Number of High Priority Sites (sites disturbing < 1 acre of soil requiring storm water runoff quality inspection) (C.6.e.iii.1.a)	Number of sites disturbing ≥ 1 acre of soil (C.6.e.iii.1.b)	Total number of storm water runoff quality inspections conducted (include only High Priority Site and sites disturbing 1 acre or more) (C.6.e.iii.1.c)
No Information Submitted	No Information Submitted	No Information Submitted
Comments: Information for Provision C.6 Construction Site Controls - Private Projects section will be submitted at a later date under separate cover.		

<b>C.6.e.iii.1.d ▶ Construction Activities Storm Water Violations</b>		
BMP Category	Number of Violations <sup>51</sup> excluding Verbal Warnings	% of Total Violations <sup>52</sup>
Erosion Control	No Information Submitted	No Information Submitted
Run-on and Run-off Control	No Information Submitted	No Information Submitted
Sediment Control	No Information Submitted	No Information Submitted
Active Treatment Systems	No Information Submitted	No Information Submitted
Good Site Management	No Information Submitted	No Information Submitted
Non Stormwater Management	No Information Submitted	No Information Submitted
Illicit Discharge	No Information Submitted	No Information Submitted
<b>Total<sup>53</sup></b>	No Information Submitted	No Information Submitted

<sup>51</sup>Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category. For example, if during one inspection at a site, there are 2 erosion control violations, only 1 violation would be counted for this table.

<sup>52</sup>Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

<sup>53</sup>The total number of violations may count more than one violation per inspection, since some inspections may result in violations in more than one category. For example, during one inspection of a site, there may have been both an erosion control violation and a sediment control violation. For this reason, the total number of violations in this table may not match the total number of enforcement actions reported in Table C6.e.iii.1.e.

**C.6.e.iii.1.e ► Construction Related Storm Water Enforcement Actions**

	Enforcement Action (as listed in ERP) <sup>54</sup>	Number Enforcement Actions Issued	% Enforcement Actions Issued <sup>55</sup>
Level 1 <sup>56</sup>	Verbal Notice	No Information Submitted	No Information Submitted
Level 2	Correction Notice	No Information Submitted	No Information Submitted
Level 3	Stop Work Order	No Information Submitted	No Information Submitted
Level 4	Legal Action	No Information Submitted	No Information Submitted
<b>Total</b>		No Information Submitted	No Information Submitted

**C.6.e.iii.1.f, g ► Illicit Discharges**

	Number
Number of illicit discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.f)	No Information Submitted
Number of sites with discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.g)	No Information Submitted

<sup>54</sup>Agencies should list the specific enforcement actions as defined in their ERPs.

<sup>55</sup>Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

<sup>56</sup>For example, Enforcement Level 1 may be Verbal Warning.

<b>C.6.e.iii.1.h, i ► Violation Correction Times</b>		
	Number	Percent
Violations (excluding verbal warnings) fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	No Information Submitted	No Information Submitted <sup>57</sup>
Violations (excluding verbal warnings) not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	No Information Submitted	No Information Submitted <sup>58</sup>
Total number of violations (excluding verbal warnings) for the reporting year <sup>59</sup>	No Information Submitted	No Information Submitted
Comments: Information for Provision C.6 Construction Site Controls section will be submitted at a later date under separate cover.		

<b>C.6.e.iii.(2) ► Evaluation of Inspection Data</b>
Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).
Description: Information for Provision C.6 Construction Site Controls - Private Projects section will be submitted at a later date under separate cover.

<b>C.6.e.iii.(2) ► Evaluation of Inspection Program Effectiveness</b>
Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.
Description: Information for Provision C.6 Construction Site Controls – Private Projects section will be submitted at a later date under separate cover.

<sup>57</sup> Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

<sup>58</sup> Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

<sup>59</sup> The total number of violations reported in the table of Violation Correction Times equals the number of initial enforcement actions. I.e., This assumes one violation is issued for several problems during an inspection at a site. The total number of violations in the table of Violation Correction Times may not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

Section 6 – Provision C.6 Construction Site Controls – PUBLIC PROJECTS

<b>C.6.e.iii.1.a, b, c ▶ Site/Inspection Totals</b>		
Number of sites disturbing < 1 acre of soil requiring storm water runoff quality inspection (i.e. High Priority) (C.6.e.iii.1.a)	Number of sites disturbing ≥ 1 acre of soil (C.6.e.iii.1.b)	Total number of storm water runoff quality inspections conducted (C.6.e.iii.1.c)
5	3	27
Comments: See Attachment C.6.2 for Summary of Construction Site Control Inspections – PUBLIC PROJECTS FY 2014-2015: Capital Improvement Projects for the City of Oakland are typically inspected on a daily basis by staff. When projects require a Notice of Intent (NOI) in accordance with National Pollutant Discharge Elimination System (NPDES) requirements, the City also requires the periodic Best Management Practice (BMP) reports from the Contractor’s Qualified SWPPP [Stormwater Pollution Prevention Plan] Practitioner (QSP). Reports from the QSP are provided in addition to staff’s regular reports which include observations related to stormwater runoff issues, as appropriate.		

<b>C.6.e.iii.1.d ▶ Construction Activities Storm Water Violations</b>		
BMP Category	Number of Violations <sup>60</sup> excluding Verbal Warnings	% of Total Violations <sup>61</sup>
Erosion Control	0	0%

Sediment Control	0	0%
Active Treatment Systems	0	0%
Good Site Management	0	0%
Non-Stormwater Management	0	0%
Illicit Discharge	0	0%
<b>Total<sup>62</sup></b>	<b>0</b>	<b>0%</b>

<sup>60</sup> Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category. For example, if during one inspection at a site, there are 2 erosion control violations, only 1 violation would be counted for this table.

<sup>61</sup> Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

<sup>62</sup> The total number of violations may count more than one violation per inspection, since some inspections may result in violations in more than one category. For example, during one inspection of a site, there may have been both an erosion control violation and a sediment control violation. For this reason, the total number of violations in this table may not match the total number of enforcement actions reported in Table C6.e.iii.1.e.

<b>C.6.e.iii.1.e ► Construction Related Storm Water Enforcement Actions</b>			
	Enforcement Action (as listed in ERP) <sup>63</sup>	Number Enforcement Actions Issued	% Enforcement Actions Issued <sup>64</sup>
Level 1 <sup>65</sup>	Verbal Notice	0	0%
Level 2	Field Order	0	0%
Level 3	Non-Compliance Form/Letter	0	0%
Level 4	Default/Termination of Contract	0	0%
	<b>Total</b>	<b>0</b>	<b>0%</b>

<b>C.6.e.iii.1.f, g ► Illicit Discharges</b>	
	Number
Number of illicit discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.f)	0
Number of sites with discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.g)	0

<sup>63</sup> Agencies should list the specific enforcement actions as defined in their ERPs.

<sup>64</sup> Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

<sup>65</sup> For example, Enforcement Level 1 may be Verbal Warning.

<b>C.6.e.iii.1.h, i ► Violation Correction Times</b>		
	Number	Percent
Violations (excluding verbal warnings) fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	0	0% <sup>66</sup>
Violations (excluding verbal warnings) not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	0	0% <sup>67</sup>
Total number of violations (excluding verbal warnings) for the reporting year <sup>68</sup>	0	0%
<b>Comments:</b> City Resident Engineers are on-site daily for all public projects and are responsible to promptly correct violations. During this FY 2014-2015, no violations were reported or they were relatively minor enough to be resolved immediately.		

<b>C.6.e.iii.(2) ► Evaluation of Inspection Data</b>
Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).
Description: City of Oakland had fewer high-risk projects during FY 2014-2015, and with drought conditions, there were significantly fewer rain events and violations than in previous years. City staff that oversee construction sites has a higher level of awareness of potential violations now and has make it a priority in progress meeting discussions. Contractors are proactive in addressing issues before they become violations.

<b>C.6.e.iii.(2) ► Evaluation of Inspection Program Effectiveness</b>
Describe what appear to be your program’s strengths and weaknesses, and identify needed improvements, including education and outreach.
Description: Staff has increased its knowledge in NPDES regulations and stormwater requirements from available workshops being offered annually. In addition, emphasis in BMPs has been discussed regularly in staff meetings and during progress reports with Contractor (s). The City’s daily report inspection template reports include a checklist for the observation of site maintenance and stormwater issues.
Fewer violations occurred this past fiscal year due to a higher level of awareness by staff and contractors. Fewer rain events also contributed to fewer violations this Fiscal Year. As regulations evolve, regular and additional training will be provided to staff.

<sup>66</sup> Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

<sup>67</sup> Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

<sup>68</sup> The total number of violations reported in the table of Violation Correction Times equals the number of initial enforcement actions. I.e., This assumes one violation is issued for several problems during an inspection at a site. The total number of violations in the table of Violation Correction Times may not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

<b>C.6.f ► Staff Training Summary</b>				
Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
Inspecting C.6 BMPs & Installation Demonstration	3/5/15	Correct uses of specific BMPs Proper installation and maintenance of BMPs Permit requirements Copper Architectural BMPs.	5 / 16	31%
Inspecting Permanent Stormwater Treatment Control	10/16/14	C.3 LID systems	5 / 16	33%
Comments: Training is required to be conducted every other year.  City inspectors responsible for construction inspection on private and public projects include staff from multiple departments including the City's Public Works Department and the Building Department. Inspection of Permanent Stormwater Treatment Controls (LID Systems) is comprised of primarily the same staff. In addition to the specified inspectors, various City staff including Supervisors/Managers and other inspection staff may attend trainings to obtain additional knowledge on the specified topic and/or may conduct inspections indirectly related to specified topic.				

**Section 7 – Provision C.7 Public Information and Outreach**

**C.7.b.ii.1 ▶ Advertising Campaign**

Summarize advertising efforts. Include details such as messages, creative developed, and outreach media used. The detailed advertising report may be included as an attachment. If advertising is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

Summary:

**See Provision C.7 Public Information and Outreach section of the Alameda Countywide Clean Water Program (ACCWP) FY 2014-2015 ACCWP Annual Report for a description and summary of activities implemented at the countywide and/or regional level.**

**The following separate report developed by the Bay Area Stormwater Management Agencies Association (BASMAA) summarizes the activities of the Regional Youth Litter Campaign**

- **BASMAA Be the Street Campaign Report**

**C.7.b.iii.1 ▶ Pre-Campaign Survey**

*(For the Annual Report following the pre-campaign survey)* Summarize survey information such as sample size, type of survey (telephone survey, interviews etc.). Attach a survey report that includes the following information. If survey was done regionally, refer to a regional submittal that contains the following information:

**Information on the pre-campaign survey for the BASMAA Regional Youth Litter Campaign was provided in the FY 2011-2012 Annual Report.**

Place an **X** in the appropriate box below: **N/A**

<input type="checkbox"/>	Survey report attached
<input checked="" type="checkbox"/>	Reference to regional submittal:

Permittee Name: City of Oakland

**C.7.b.iii.2 ► Post-Campaign Survey**

(For the Annual Report following the post-campaign survey) Discuss the campaigns and the measureable changes in awareness and behavior achieved. Provide an update of outreach strategies based on the survey results. If survey was done regionally, refer to a regional submittal that contains the following information:

**Information on the post-campaign survey for the BASMAA Regional Youth Litter Campaign was provided in the BASMAA FY 2013-2014 Annual Report.**

Place an **X** in the appropriate box below:

	Survey report attached
X	Reference to regional submittal: <b>Regional Youth Litter Campaign report in the BASMAA FY 2014-2015 Regional Supplement for Training and Outreach</b>

**C.7.c ► Media Relations**

Summarize the media relations effort. Include the following details for each media pitch in the space below, AND/OR refer to a regional report that includes these details:

- Topic and content of pitch
- Medium (TV, radio, print, online)
- Date of publication/broadcast

Summary:

**The following separate report developed by BASMAA summarizes media relations efforts conducted during FY 2014-2015:**

- **BASMAA Media Relations Final Report FY 2014-2015.**

This report and any other media relations efforts conducted countywide is included within the C.7 Public Information and Outreach section of the Countywide Program’s FY 2014-2015 Annual Report.

**Oakland Local Media Relations:**

**C.7.d ► Stormwater Point of Contact**

Summary of any changes made during FY 14-15:

**No change was made to Oakland’s Stormwater Point of Contact.**

Refer to countywide Program’s C.7 Public Information and Outreach section of Program’s FY 2014-2015 Annual Report for efforts conducted by the countywide program to publicize stormwater points of contact.

Permittee Name: City of Oakland

C.7.e ► Public Outreach Events		
Describe general approach to event selection. Provide a list of outreach materials and giveaways distributed. Use the following table for reporting and evaluating public outreach events		
Event Details	Description (messages, audience)	Evaluation of Effectiveness
<p><b>Stormwater Exhibit at the Alameda County Fair:</b> July 1 through July 6, 2014 and June 17 through June 30, 2015. Setting up the exhibit and producing the outreach materials are Countywide Program efforts. Staffing the exhibit is an effort conducted by individual Permittees.</p>	<p>The County Fair is attended by a wide range of residents from throughout the County. The primary message of the exhibit and outreach materials is to encourage residents to reduce their use of pesticides or when necessary use less-toxic pesticides. The exhibit also illustrates the basic watershed awareness/stormwater pollution message. Oakland staff tabled at the event on June 27, 2015.</p>	<p>Several hundred thousand residents attend the fair each year. A more detailed description of the exhibit is included in Section C.7 Public Information and Outreach of the ACCWP FY 2014-2015 Annual Report.</p>
<p><b>Oakland Creek to Bay Day, 9/20/2014;</b> citywide event at 34 Oakland locations</p>	<p>Event type: environmental volunteer trash cleanup and ecological restoration event</p> <p>Audience: Volunteers that live, work, and play in Oakland</p> <p>Outreach Message: Environmental cleanup of trash in creeks and waterways, habitat protection and restoration, local stewardship of waterways.</p>	<p>Attendance: 1,037 volunteers contributing 2,931 volunteer hours.</p> <p>Volunteers removed approximately 18,000 pounds of trash and 250 cubic yards of green waste.</p> <p>Volunteers also removed graffiti, and performed weeding, planting, and creek restoration projects.</p>
<p><b>Oakland Earth EXPO, 4/8/2015;</b> local event at Frank H. Ogawa Plaza, downtown Oakland</p>	<p>Event type: environmental fair</p> <p>Audience: Residents and employees in Oakland and nearby communities</p> <p>Outreach Message: Practice Sustainability in our everyday lives. Information and resources provided across environmental issues including water conservation and protection, waste reduction, environmental cleanups, habitat protection and restoration, and other conservation initiatives. Outreach provided by City of Oakland employees and one hundred partner organizations.</p>	<p>Attendance: 2,000</p> <p>Engaged the public to educate visitors about stormwater pollution prevention messages using interactive matching game (match cleanup tool to cleanup activity).</p> <p>Distributed 200 flyers about upcoming Earth Day cleanups that protect and restore San Francisco Bay and local creeks and waterbodies.</p>

Permittee Name: City of Oakland

Event Details	Description (messages, audience)	Evaluation of Effectiveness
<p><b>Oakland Earth Day</b>, 4/18/2015; citywide event at 90 Oakland locations</p>	<p>Event type: environmental volunteer trash cleanup and ecological restoration event</p> <p>Audience: Volunteers that live, work, and play in Oakland</p> <p>Outreach Message: Environmental cleanup of trash in streets, parks, and creeks, and restoration of creek habitat.</p>	<p>Attendance: 3,366 volunteers contributing 14,747 volunteer hours.</p> <p>Volunteers removed approximately 213 cubic yards of trash and 467 cubic yards of green waste.</p> <p>Volunteers also removed graffiti, and performed weeding, planting, and creek restoration projects.</p>
<p><b>Public Works Week</b> 5/18-5/22/15; stormwater pollution prevention and water conservation display in lobby of 250 Frank H. Ogawa Plaza, Oakland</p>	<p>Event type: Public display</p> <p>Audience: City of Oakland employees and members of the public visiting 250 Frank H. Ogawa Plaza, Oakland</p> <p>Outreach Message: Stormwater protection; volunteer creek and shoreline cleanups and ecological restoration; water conservation and protection.</p>	<p>Attendance: Display viewed by an estimated 300 city employees and about 5,000 public visitors.</p>

Permittee Name: City of Oakland

**C.7.f. ► Watershed Stewardship Collaborative Efforts**

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report.

Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

Summary:

Program Efforts

- See the Public Outreach and Involvement section of the Alameda Countywide Clean Water Program FY 2014-2015 Annual Report for a summary of the *Bringing Back the Natives* garden tour.

Local Efforts

- Facilitated Lake Merritt Water Quality Technical Committee to address issues of trash and low dissolved oxygen in Lake Merritt. Committee was developed in response to listing of Lake Merritt on EPA’s 303d List.
- Participated in the BASMAA Clean Watersheds for a Clean Bay (CW4CB) Project Management Team to address PCBs and mercury in stormwater runoff.
- Provided support to the restoration, watershed and stormwater protection, and native plant nursery efforts of the Friends of Sausal Creek (FOSC). FOSC implements numerous habitat restoration, water quality protection, trash remediation, and public outreach and engagement activities throughout the watershed.
- Participated in meetings of the San Leandro Creek Alliance (SLCA) to support efforts to protect the San Leandro Creek watershed and plans for restoration and a greenway along San Leandro Creek.
- Participated in BASMAA Bay Area Trash Workgroup, a team of municipal staff, RWQCB, and non-governmental organizations that focus on meeting trash reduction efforts.
- Participated in CalTrans workgroup that meets bi-monthly to address issues of homeless encampments and associated trash issues.
- Participated in Technical Advisory Committee for the Urban Greening Plan Bay Area led by the San Francisco Estuary Partnership to collaborate and share knowledge and opportunities for implementing Low Impact Development (LID)/urban greening projects throughout cities to detain stormwater, reduce flooding, and improve water quality.
- Participated in ongoing pilot project with Clean Water Action to reduce disposable products and litter from food service establishments. Assisted with development of business outreach materials and identification of food service establishments interested in participating in the study.

C.7.g. ► Citizen Involvement Events		
List the types of events conducted (e.g., creek clean up, storm drain inlet marking, native gardening etc.). Use the following table for reporting and evaluating citizen involvement events.		
Event Details	Description	Evaluation of effectiveness
Community Stewardship Grants Program	The Countywide Program sponsors the Community Stewardship Grants (CSG) Program. The CSG Program provides approximately \$20,000 annually in \$1,000 to \$5,000 increments to individuals and community groups to support stormwater improvement/outreach projects throughout the County.	See Section C.7 of the ACCWP FY 2014-2015 Annual Report for a summary.
Adopt a Spot/Park, Adopt a Creek, and Community Cleanup Events <sup>69</sup>	In FY 2014-2015, the City organized and supported <b>7,031 volunteer events</b> through its Adopt a Spot program and Community Cleanup events.  Activities for these events included litter pickup, graffiti abatement, weeding, planting, and creek restoration. Volunteers contributed a total of <b>90,832 hours</b> during these events.	<b>Adopt a Creek</b> <ul style="list-style-type: none"> <li>• Events: 631</li> <li>• Volunteer Hours: 30,421</li> </ul> <b>Adopt a Park and Adopt a Spot</b> <ul style="list-style-type: none"> <li>• Events: 6,306</li> <li>• Volunteer Hours: 51,055</li> </ul> <b>Other Community Cleanups</b> <ul style="list-style-type: none"> <li>• Events: 94</li> <li>• Volunteer Hours: 9,356</li> </ul> A summary spreadsheet of dates, description of work, and volunteer hours is provided in Attachment C.7.1.
Adopt a Drain <sup>70</sup>	Oakland continued to outreach about <a href="http://adoptadrainoakland.com/">http://adoptadrainoakland.com/</a> which was built in partnership with Open Oakland to facilitate regular volunteer maintenance of storm drain inlets.  Several media stories covered Oakland's Adopt a Drain program. See Section C7.c Media Relations for the list.	Over 500 Volunteers have adopted maintenance of over 700 storm drain inlets via this website. There are another 100 drains that were adopted prior to the website. The Adopt a Drain program has been receiving interest from other municipalities looking to Oakland as a model. Staff has received calls from nearby cities like Alameda, Los Altos, Redwood City, as well as Fort Worth, Texas, and Burlington, Vermont which launched a program in 2014 based on Oakland's.

<sup>69</sup> Additional discussion on the Adopt a Spot and Community Clean-up Events is provided in Section C.10.d.

<sup>70</sup> More information on the Adopt-a-Drain program is also found in Section C.10d.

<b>C.7.h. ► School-Age Children Outreach</b>			
Summarize school-age children outreach programs implemented. A detailed report may be included as an attachment. Use the following table for reporting school-age children outreach efforts.			
<b>Program Details</b>	<b>Focus &amp; Short Description</b>	<b>Number of Students/Teachers reached</b>	<b>Evaluation of Effectiveness</b>
See the Section C.7 of the ACCWP FY 2014-2015 Annual Report for a summary of the Program's School-Age Outreach Program. A School-Age Outreach Summary is included at Attachment C.7.2.			

Section 8 - Provision C.8 Water Quality Monitoring

**C.8 ► Water Quality Monitoring**

State below if information is reported in a separate regional report. Municipalities can also describe below any Water Quality Monitoring activities in which they participate directly, e.g. participation in RMP workgroups, fieldwork within their jurisdictions, etc.

Summary

During FY 2014-2015, the City contributed through the Alameda Countywide Clean Water Program (ACCWP) to the BASMAA Regional Monitoring Coalition (RMC). In addition, the City contributed financially to the Regional Monitoring Program for Water Quality in the San Francisco Estuary (RMP) and was represented at RMP committees and work groups. Monitoring efforts and results are documented in a separate report submitted March 15 of each year, as required in Provision C.8. For additional information on monitoring activities conducted by the Program, BASMAA RMC and the RMP, see the C.8 Water Quality Monitoring section of the Program’s FY 2014-2015 Annual Report and the Integrated Monitoring Report.

Section 9 – Provision C.9 Pesticides Toxicity Controls

<b>C.9.b ► Implement IPM Policy or Ordinance</b>						
Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphates, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.						
<b>Trends in Quantities and Types of Pesticides Used<sup>71</sup></b>						
Pesticide Category and Specific Pesticide Used	Amount <sup>72</sup>					
	FY 2009-2010	FY 2010-2011	FY 2011-2012	FY 2012-2013	FY 2013-2014	FY 2014-2015
<b>Organophosphates</b>	See Comment 1	See Comment 1	See Comment 1	None Reported	None Reported	None Reported
<b>Pyrethroids</b>						
Dagnet (Permethrin)	See Comment 1	See Comment 1	See Comment 1	None Reported	5 ounces	1 ounce
Masterline (Bifenthrin)	See Comment 1	See Comment 1	See Comment 1	None Reported	10 ounces	82.7 ounces
P.I. (Pyrethrins)	See Comment 1	See Comment 1	See Comment 1	None Reported	None Reported	3 ounces
Suspend SC (Deltamethrin)	0.75 ounces See Comment 1	See Comment 1	See Comment 1	19.99 ounces See Comment 2	None Reported	19 ounces

Temprid (Beta-Cyfluthrin)	See Comment 1	See Comment 1	See Comment 1	None Reported	None Reported	8.1 mL
<b>Carbaryl</b>	See Comment 1	See Comment 1	See Comment 1	None Reported	None Reported	None Reported
<b>Fipronil</b>						
Termidor	See Comment 1	See Comment 1	See Comment 1	7 ounces See Comment 2	6 ounces	2.4 ounces

<sup>71</sup>Includes all municipal structural and landscape pesticide usage by employees and contractors.

<sup>72</sup>Weight or volume of the product or preferably its active ingredient, using same units for the product each year. The active ingredients in any pesticide are listed on the label. The list of active ingredients that need to be reported in the pyrethroids class includes: allethrin, bifenthrin, beta-cyfluthrin, bioallethrin, cyfluthrin, cypermethrin, cyphenothrin, deltamethrin, esfenvalerate, etofenprox, fenpropathrin, gamma-cyhalothrin, imiprothrin, lambda-cyhalothrin, metofluthrin, permethrin, phenothrin, prallethrin, resmethrin, sumithrin (d-phenothrin), tau-fluvalinate, tefluthrin, tetramethrin, tralomethrin, cis-permethrin, and zeta-cypermethrin.

Permittee Name: City of Oakland

Comments

1. As reported in the City of Oakland’s Annual Deliverables Report FY 2013-2014 (July 2013-June 2014), the City identified inaccuracies with information reported in Provision C.9 Pesticides Toxicity Controls section of past years Annual Reports for FY 2009-2010, FY 2010-2011, FY 2011-2012, and FY 2012-2013. A revised Provision C.9 Pesticides Toxicity Controls section of the Annual Report was submitted to the RWQCB on October 31, 2014 including information provided by the City’s pesticide application providers for pesticides applied during FY 2009-2010 (by 1 of 2 Contractors) and FY 2012-2013. At that time, a request to obtain the additional outstanding pesticide application data was made in an attempt to complete the above reporting table. No additional information was provided by the City’s pesticide application providers for FY 2009-2010, FY 2010-2011, and FY 2011-2012.
  
2. Pesticide volumes for (Pyrethroids - Suspend SC [Deltamethrin] – 49.33 gallons and Fipronil – Termidor - 16 gallons) reported for FY 2012-2013 in the City of Oakland’s Revision to Provision C.9 Pesticides Toxicity Controls Section of the City’s Annual Deliverables Report FY 2013-2014 (July 2013-June 2014) submitted to the RWQCB on October 31, 2014 was the total volume of diluted product used in pesticide application in the City of Oakland. Volumes included in Table C.9.b Implement IPM Policy or Ordinance are concentrated volumes of pesticide used.

The City contracts with an outside pesticide service provider that conducts pesticide application primarily indoors at various City facilities, but pesticide application at City facilities does include some outdoor locations that may be exposed to inclement weather and stormwater runoff. The contractor is required to be IPM Certified and implement IPM practices.

During FY 2014-2015, the City of Oakland staff applied 49.0 gallons of Ranger PRO (a generic equivalent to RoundUP) in accordance with the City’s IPM Ordinances in street medians. Additionally, the City uses a pre-emergent herbicide called Surflan AS, but no product application of Surflan AS was conducted during FY 2014-2015.

**C.9.c ► Train Municipal Employees**

Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	24
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within the last 3 years.	24
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within the last three years.	100%

Permittee Name: City of Oakland

C.9.d ▶ Require Contractors to Implement IPM			
Did your municipality contract with any pesticide service provider in the reporting year?			<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
If yes, attach one of the following:			
<input type="checkbox"/>	Contract specifications that require adherence to your IPM policy and standard operating procedures, OR		
<input checked="" type="checkbox"/>	Copy(ies) of the contractors' IPM certification(s) or equivalent, OR		
<input type="checkbox"/>	Equivalent documentation.		
<p>If <b>Not attached</b>, explain:</p> <p>The City contracted a pesticide service provider during FY 2014-2015. This contractor is IPM Certified (Contractor IPM Certification(s) or equivalent are included as Attachment C.9.1) as indicated above, and the majority of the pesticides applied were indoor applications.</p> <p>For new public projects during short-term plant establishment period only:</p> <p>The City requires Contractor's to comply with all Local, State, and Federal codes and ordinances including the City of Oakland's IPM Ordinance. The City's IPM Ordinances (including amendments) are attached as Attachments C.9.2, C.9.3, and C.9.4.</p>			

C.9.e ▶ Track and Participate in Relevant Regulatory Processes	
Summarize participation efforts, information submitted, and how regulatory actions were affected <b>OR</b> reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.	
<p>Summary:</p> <p>Supervisors must utilize the principles of Integrated Pest Management (IPM) to minimize weed growth in parks and medians. This includes consideration of alternatives to chemical control such as sheet mulching, mowing, and dense planting to compete with the weeds. When warranted, the application of herbicides on landscaped medians requires careful consideration of public and employee safety, weather conditions, and target weed species.</p> <ul style="list-style-type: none"> <li>▪ All pesticide related documents are kept at the City of Oakland Municipal Service Center (MSC), Building 4 located at 7101 Edgewater Drive, Oakland, CA. These include product labels, Material Safety Data sheets, written recommendations, training records, and monthly use reports.</li> <li>▪ Employees must be trained prior to applying herbicides for the first time, when new products are used and annually thereafter. At a minimum, training must cover the topics listed on the "Annual Pesticide Handler Safety Training Record" and kept on file for two years.</li> <li>▪ All application equipment must be tested in August prior to use in the field in September through October. Follow procedures in the "Spray Tank Checklist." August equipment testing allows time for major repairs that require funding and purchase orders.</li> <li>▪ Appropriate safety signage and notices must be posted 24 hours prior to application and left in place 24 hours after the application.</li> <li>▪ Pre-emergent herbicide is applied in the Fall and before the first rains. The following is a standard guidance for pre-emergent herbicide application: Start with landscaped medians that have irrigation systems in mid-September. By mid-October apply pre-emergent herbicide to non-irrigated medians. Plan to complete all pre-emergent applications by late October, when the first fall rain typically occurs. Water in each application with approximately 1" of water. Do not apply irrigation to the point where water runs off site. Rain</li> </ul>	

Permittee Name: City of Oakland

provides moisture that helps to activate the herbicide and usually initiates the weed seed germination. It is a best practice not to apply herbicide if rain is forecasted within four (4) days.

- Post-emergent herbicide is applied in early Spring when the weed seedlings are less than 6" in height. Less herbicide is required to kill smaller, younger weeds. If the target weed reaches a height of six (6") inches, cut the weedy area and allow the weeds to "green up" so there is sufficient plant growth to uptake the herbicide. Do not spray freshly cut weeds and do not spray large mature weeds.
- Applicators may not apply tank mixes of Pre and Post emergent herbicides to landscaped medians. Doing so will result in damage or death of desirable landscape material. Apply pre-emergent herbicides over the top of desirable landscape material. Spot spray weeds in landscaped medians with post emergent herbicides while shielding desirable plants from spray or mist.
- The quantity of herbicide used must be reported monthly. It is the Park Supervisor's responsibility to submit a written herbicide use report for the previous month on the third day of the month. The reports are collected, summarized and submitted to Alameda County Department of Agriculture.
- Keep all herbicides in locked and fenced storage areas. Label all service containers with the following:

City of Oakland Public Works Department  
 7101 Edgewater Drive, Oakland CA  
 Name of herbicide  
 Signal Word

- Alameda County by the PCA by the 10th of the month.
- Prepare spill kits for your crews to place on their vehicles. Include absorbent material, brooms.

During FY 2014-2015, the City participated in regulatory processes related to pesticides through contributions to the Alameda Countywide Clean Water Program (ACCWP), the Bay Area Stormwater Management Agencies Association (BASMAA) and the California Stormwater Quality Association (CASQA). For additional information, see the CASQA Pesticides Subcommittee Annual Report 2014-2015 titled Preventing Urban Pesticide Pollution in Stormwater for a summary of CASQA activities.

**C.9.f ► Interface with County Agricultural Commissioners**

Did your municipal staff observe any improper pesticide usage or evidence of improper usage (e.g., pesticides in storm drain systems, along street curbs, or in receiving waters) during this fiscal year?		Yes	✓	No
--	--	-----	---	----

If yes, provide a summary of improper pesticide usage reported to the County Agricultural Commissioner and follow-up actions taken to correct any violations. A separate report can be attached as your summary.

**The County Agricultural Commissioner's Field Inspectors routinely inspect various locations throughout the City Of Oakland on a continuous basis & conducts annual facility inspections. Inspector Blaine Manchester of the County Agricultural Commissioner's Office inspected our facility on December 31, 2014.**

Permittee Name: City of Oakland

**C.9.h.ii ► Public Outreach: Point of Purchase**

Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); **OR** reference a report of a regional effort for public outreach in which your agency participates.

Summary:

See Provision C.9 Pesticides Toxicity Control section of the ACCWP FY 2014-2015 Annual Report and the BASMAA FY 2014-2015 Regional Supplement for Training and Outreach for information on point of purchase public outreach conducted countywide and regionally.

**C.9.h.vi ► Public Outreach: Pest Control Operators**

Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); **OR** reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.

Summary:

See Provision C.9 Pesticides Toxicity Control section of the ACCWP FY 2014-2015 Annual Report for a summary of outreach to pest control operators and landscapers to reduce pesticide use.

Section 10 - Provision C.10 Trash Load Reduction

C.10.a.iii ► Minimum Full Trash Capture						
Per Minimum Full Trash Capture Requirements (MRP C.10.a.iii), cities are required to treat runoff from an area equivalent to 30% of retail/wholesale land that drains to MS4s within their jurisdiction. Oakland’s minimum acreage required per Attachment J of the MRP is 228 acres. Currently, Oakland is treating 936 acres with full capture. As such, Oakland has fulfilled and surpassed its Full Trash Capture Requirement.						
Type of Device	# of Devices	Acres Treated in FY 14-15 by Trash Generation Category				
		Low	Moderate	High	Very High	Total
Connector Pipe Screens/Filters	20 <sup>73</sup>	0	6	7	10	23
Gross Solids Removal Device (GSRD)	2	0	0	0	27	27
Hydrodynamic Separator Units (HDS)	10	34	240	315	287	877
Low Impact Development (LID)	2	0	0	1	10	11
Booms <sup>74</sup>						
<b>Total for all Types (acres)</b>	<b>34</b>	<b>34</b>	<b>246</b>	<b>323</b>	<b>334</b>	<b>938</b>
<b>Required by Permit</b>						<b>228</b>
Partial Capture						
Lake Merritt Trash Booms (25% Reduction) (acres)	6	1,701	718	213	204	2,836
Full Trash Capture Reduction Credit From Trash Booms (weighted acres)		0	180	213	612	1,005
<b>Maintenance Summary</b>						
Attachment C.10.1 shows the maintenance frequency for each of the full trash capture devices. The City has not had any devices with flooding, bypassing or overloading of debris.						

<sup>73</sup> Note that four of these Connector Pipe Screens were installed by the City of Emeryville and contribute full trash capture for 3.7 acres of Oakland’s Very High (D) Trash areas. Total acreages are reported here, but the ¼ partial capture reductions are noted for each TMA.

<sup>74</sup> Oakland has installed booms in TMA #7, Lake Merritt Watershed. These are equivalent to ¼ of the full trash capture for that acreage. Total acreages are reported here, but the reductions are reduced to the ¾ equivalency in in TMA #7.

**C.10.b.iii ► Trash Hot Spot Assessment**

Provide the volume of material removed during each MRP-required Trash Hot Spot cleanup during each fiscal year, and the dominant types of trash (e.g., glass, plastics, paper) removed and their sources in FY 2014-2015 to the extent possible. Also, provide additional information on creek cleanups conducted beyond those required that are.

Trash Hot Spot	FY 14-15 Cleanup Date(s)	Volume of Trash Removed (cubic yards)					Dominant Type(s) of Trash in FY 2014-15	Trash Sources in FY 2014-15 (where possible)
		FY 2010-11	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15		
Arroyo Viejo Creek  (Recreation Center)	Creek-to-Bay Day (9/20/2014)  Earth Day (4/18/2015)	180 lbs	563 lbs. 266 lbs.	900 gallons	Poundage data of litter collected was not tracked separately for this site. Trash volume collected from this site is included in Coastal Clean-up Day total.	1,900 lbs. on Creek-to-Bay Day.  1,520 lbs. on Earth Day.	Litter & illegal dumping including items such as: mattresses, appliances, tires, shopping carts. Small items such as plastic bags, aluminum cans, bottles, plastic wrappers, and clothing, etc.	Litter, homeless encampments, illegal dumping
Courtland Creek	Creek-to-Bay Day (9/20/2014)  Earth Day (4/18/2015)	1,200 gallons	1,600 lbs. 760 lbs.	1,140 lbs.*	Poundage data of litter collected was not tracked separately for this site.  Trash volume collected from this site is included in Coastal Clean-up Day total.	1,254 lbs. on Creek-to-Bay Day  6,346 lbs. on Earth Day.	Plastics, glass bottles, cans, pottery, toys, clothing, misc. urban items. Large illegally dumped items such as speakers, car bumper, car tires, motor oil.	Litter, homeless encampments, illegal dumping

Trash Hot Spot	FY 14-15 Cleanup Date(s)	Volume of Trash Removed (cubic yards)					Dominant Type(s) of Trash in FY 2014-15	Trash Sources in FY 2014-15 (where possible)
		FY 2010-11	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15		
Damon Slough/ Arroyo Viejo (Line K, 1)	June 23, 2015	450 lbs  Per the City's request, the coliseum staff conduct routine cleanup of the property and nearby creek areas after events.	Poundage data of litter collected was not tracked separately for this site. Trash volume collected from this site is included in Coastal Clean-up Day total.	3,078 lbs.*	90 gallons	117 cubic yards <sup>75</sup>	Large illegally dumped items such as mattresses, appliances tires, shopping carts. Small items such as plastic bags, aluminum cans, bottles, plastic wrappers, and clothing, etc.	Litter from upstream watershed, homeless encampments, windblown from freeway, illegal dumping
Damon Slough/ Arroyo Viejo (2)	June 23, 2015	Poundage data of litter collected was not tracked separately for this site.  Per the City's request, the coliseum staff conduct routine cleanup of the property and nearby creek areas after events.	Poundage data of litter collected was not tracked separately for this site.	Poundage data of litter collected was not tracked separately for this site.	90 gallons	117 cubic yards <sup>76</sup>	Large illegally dumped items such as mattresses, appliances tires, shopping carts. Small items such as plastic bags, aluminum cans, bottles, plastic wrappers, and clothing, etc.	Litter from upstream watershed, homeless encampments, windblown from freeway, illegal dumping

<sup>75</sup> Damon Slough clean-up included 3 hotspot sites. The volume of trash removed is combined for all three hotspots at Damon Slough.

<sup>76</sup> Damon Slough clean-up included 3 hotspot sites. The volume of trash removed is combined for all three hotspots at Damon Slough.

Trash Hot Spot	FY 14-15 Cleanup Date(s)	Volume of Trash Removed (cubic yards)					Dominant Type(s) of Trash in FY 2014-15	Trash Sources in FY 2014-15 (where possible)
		FY 2010-11	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15		
Damon Slough/ Arroyo Viejo(3)	June 23, 2015	Poundage data of litter collected was not tracked separately for this site. Per the City's request, the coliseum staff conduct routine cleanup of the property and nearby creek areas after events.	Poundage data of litter collected was not tracked separately for this site.	Poundage data of litter collected was not tracked separately for this site.	90 gallons	117 cubic yards <sup>77</sup>	Large illegally dumped items such as mattresses, appliances tires, shopping carts. Small items such as plastic bags, aluminum cans, bottles, plastic wrappers, and clothing, etc.	Litter from upstream watershed, homeless encampments, windblown from freeway, illegal dumping
East Creek Slough /Seminary Creek  (Line I, Section 1)	This site is cleaned weekly by Swap Meet staff.  Creek-to-Bay Day  (9/20/2014)  June 19, 2015	Poundage data of litter collected was not tracked separately for this site.	Poundage data of litter collected was not tracked separately for this site.	Poundage data of litter collected was not tracked separately for this site.	30 gallons (weekly amount)	8,436 lbs. on Creek-to-Bay Day.  240 gallons on 6/19/15.	Dominant trash types include small items such as plastic bags, bottles, clothing, and food wrappers.	Litter, homeless, windblown from freeway, illegal dumping
East Creek Slough / Seminary Creek (Section 2)	This site is cleaned weekly by Swap Meet staff.	Poundage data of litter collected was not tracked separately for this site.	Poundage data of litter collected was not tracked separately for this site.	Poundage data of litter collected was not tracked separately for this site.	30 gallons (weekly amount)	30 gallons (weekly amount)	Dominant trash types include small items such as plastic bags, clothing, and food wrappers.	Litter, homeless, windblown from freeway, illegal dumping

<sup>77</sup> Damon Slough cleanup included 3 hotspot sites. The volume of trash removed is combined for all three hotspots at Damon Slough.

<p>Additional Receiving Water Cleanups –</p> <p>Since 1992, the City of Oakland has been managing a community stewardship program that organizes two City-wide clean-up events per year (Earth Day and Creek-to-Bay Day). In addition, the City supports volunteers to "adopt" individual sites. These individual sites are both on-land (Adopt-A-Spot, Adopt-A-Drain, Adopt-A-Park, Community Clean-ups) and creek/shoreline sites (Adopt-A-Creek).</p> <p>The City has recorded the "active" sites by asking volunteers to document the number of volunteers and hours spent on an "adopted" site. These volunteer hours are recorded and used to estimate total volume of trash removed through volunteer efforts.</p> <p>In 2009, the City began to build the "Adopt" program with promotion on several volunteer recruitment websites, attending numerous community events and working to establish partnerships with businesses, community service organizations and local schools, colleges and universities. The program has</p>								

expanded its outreach strategy by incorporating more electronic forms of communication to reach out to the community about watershed stewardship events.

The City has maintained records on the number of volunteer hours, sites and events provided through this “Adopt” program.

The City has produced gigantic growth with its “Adopt” program and currently has documented just under 100,000 volunteer hours city-wide this fiscal year. See Attachment C.7.1 for a summary of the “Adopt” program volunteer hours.

Of those total volunteer hours, 30,421 hours were spent on creek and shoreline clean-up in FY 2014-2015. The table below provides information on the creek and shoreline clean-up program and its growth from 2010 to present:

<b>Indicator</b>	<b>2010<sup>78</sup></b>	<b>2014-5</b>	<b>%Change</b>	<b>Change 2010 to 2015</b>
Volunteer Hours – (creek only) <sup>79</sup>	10,079	30,421	+ 300%	+20,342
No. of Adopt-A-Creek Events:	229	633	+276%	+404

The City has estimated that each volunteer hour removes 2.5 gallons of litter. This 2.5 gal/volunteer hour is based on 9 years of recorded data from Creek-to-Bay day events (2006 – 2014) in which both the amount of litter collected and the total number of volunteer hours were recorded.

Applying the NET INCREASE in creek volunteer hours of 20,342, the City estimates a trash reduction of 10% through our creek/shoreline program.

**C.10.c ► Long-Term Trash Load Reduction Plan**

Provide descriptions of significant revisions made to your Long-term Trash Load Reduction Plan submitted to the Water Board in February 2014. Describe significant changes made to primary or secondary trash management areas (TMA), trash generation maps, control measures, or time schedules identified in your plan.

<b>Description of Significant Revision</b>	<b>Associated TMA</b>
City is currently reassessing its trash generation rates and reviewing trash visual assessment data to determine if the trash generation map should be modified.	

<sup>78</sup> Data in 2010 is only available in calendar year. This 2010 calendar year is compared to FY 2014-2015 fiscal year.

<sup>79</sup> The data excludes volunteer hours for Creek-to-Bay, Earth Day, and Lake Merritt Institute events – as those are attributed toward Trash Hot Spot Clean-ups

**C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)**

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
Single-use Plastic Bag Ordinance or Policy	<p>The Alameda County Waste Management Authority adopted the Single-Use Bag Ban. As of January 1, 2013, all grocery stores, supermarkets, mini-marts, convenience stores, liquor stores, pharmacies, drug stores or other entities that sell milk, bread, soda and snack foods (all four items) and/or alcohol (Type 20 or 21 license) in Alameda County must comply with the Single-Use Bag Ban Ordinance. Affected stores may no longer provide customers with single-use bags at check-out. A copy of the Ordinance is available on the Alameda County Waste Management Authority's website:  <a href="http://reusablebagsac.org/ordinancetext.html">http://reusablebagsac.org/ordinancetext.html</a></p> <p>Additionally since 2010, the City has had its own, separate "Bring your own Bag" campaign to promote using reusable bags in lieu of single use/plastic bags.</p>	<p>For information on the study documenting trash reduction from the ban on single use plastic bags, see Section C.10 of the ACCWP FY 2013-2014 Annual Report.</p> <p>The ACCWP Report describes the monitoring study and methodology used to calculate the average number of single use plastic bags observed annually in the stormwater conveyance system during pre-ordinance and post-bag-ban implementation.</p> <p>StopWaste has inspectors that determine compliance with this ban.</p>	See Section C.10 of the ACCWP FY 2013-2014 Annual Report.	City estimates 4% reduction based on Single Use Bag Ban.

**C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)**

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
<p>Expanded Polystyrene Food Service Ware Ordinance or Policy</p>	<p>In 2008, the City adopted An Ordinance to Prohibit the Use of Polystyrene Foam Disposable Food Service Ware and Require the Use of Biodegradable or Compostable disposable Food Service Ware by Food Vendors and City Facilities (Oakland Municipal Code Chapter 8.07 Polystyrene Foam Food Service Ware, Ordinance No. 12747). This ordinance applies to ALL food vendors at City-sponsored events and on City-owned property and to food service vendors. This ordinance is available on line at:  <a href="http://library.municode.com/mobile/contents.aspx?clientID=16308&amp;chosenNode=16308_1501.16308_1446.16308_1.#16308_1501.16308_1446.16308_1">http://library.municode.com/mobile/contents.aspx?clientID=16308&amp;chosenNode=16308_1501.16308_1446.16308_1.#16308_1501.16308_1446.16308_1</a></p> <p>Compliance with the ordinance was designed to be verified on a complaint driven basis. The City maintains a hotline for citizens to report violations of the ordinance. This year the hotline received eleven complaints. Staff follow-up on all potential violations with 1) a letter to business owner letting them know they are in violation and providing alternatives. If a second complaint is received the City will visit the establishment. Attachment C.10.2 is the standard letter sent to businesses which have been reported using polystyrene foam.</p> <p>Starting in FY 2012-2013, the City integrated compliance with the polystyrene ban into its stormwater inspection program. In FY 2014-2015 the City inspected 69 restaurants with 93% of inspected restaurants in compliance with the EPS ordinance.</p> <p>The City issues notification letters to each of the restaurants that are out of compliance.</p> <p>Follow-up visits and enforcement are targeted to non-compliant businesses in “high” and “very high” trash areas.</p>	<p>For information on the study documenting trash reduction from this EPS ban, see Section C.10 of the ACCWP FY 2013-2014 Annual Report.</p> <p>The ACCWP Report describes the monitoring study and methodology used to calculate the average number of expanded polystyrene food service ware observed annually in the stormwater conveyance system during pre-ordinance and post-ordinance.</p> <p>City uses its stormwater inspections of restaurants to determine compliance with the polystyrene ban.</p> <p>Those restaurants found to be out of compliance were provided a formal warning to comply and follow-up inspections are targeted to “high” and “very high” trash areas.</p> <p>In FY 2014-2015 the City inspected 69 restaurants and 5 were found to be out of compliance for an overall compliance rate of 93%. This is an improvement from FY 2013-2014 which had a compliance rate of 88%.</p>	<p>See Section C.10 of the ACCWP FY 2014-2015 Annual Report.</p>	<p>City estimates 4% reduction based on EPS ban</p>

**C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)**

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
<p>Street Sweeping                      This control measure is used city-wide with a heavy emphasis on TMA #1, TMA #2, TMA #5 and TMA #8.</p>	<p>The most widespread control measure the City uses to remove its trash is its street sweeping program. The City has posted signs and has a rigorous enforcement program to help ensure compliance with the parking restrictions during sweeping events.</p> <p>The City of Oakland targets more frequent street sweeping efforts to “Very High” trash producing areas including downtown Oakland, business districts and major arterials. This targeted street sweeping program provides three or more street sweeping events per week in those designated high trash areas. See Attachment C.10.3 showing the areas swept 3 or more times per week.</p> <p>In addition, the City has identified additional high trash areas (primarily residential) that are swept once per week.</p> <p>In 2010 all sweeper units were equipped with GPS devices that log the route and speed of each vehicle. This helps ensure sweepers are operated in a way that provides the most effective result.</p> <p>In 2012, the City added a regenerative air sweeper which in high trash areas is used in tandem with a mechanical broom sweeper to ensure full trash removal. In 2013-2014, the City added three more regenerative air sweepers and eight new mechanical broom sweepers.</p> <p>In 2014-2015, the City placed all of its existing street sweeping routes into GIS and analyzed routes in two neighborhoods to help identify opportunities for increased efficiency. This analysis resulted in a route change that freed up one sweeper. When analysis is completed for the entire City, the City will redirect “new” sweeping resources to provide more frequent sweeping in high and very high trash areas.</p>	<p>Oakland is participating in Prop 84 – <i>Tracking California Trash</i> to evaluate effectiveness of street sweeping in combination with inlet screen. Results expected in 12/2016. See Attachment C.10.4 for details of study.</p>	<p>Pending the results from Tracking California’s Trash study.</p>	<p>No trash reduction estimated.</p> <p>While this program provides trash reduction benefit, the City is not currently utilizing this activity for trash reduction credit in Sections C.10.d PART B – TMA Specific Actions and PART C Estimated Overall Trash Load Reduction.</p> <p>Estimated trash reduction levels will be added pending results from Tracking California’s Trash study</p>

**C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)**

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
Homeless Encampment Management	<p>Starting in 2011, the City initiated a multi-agency homeless encampment task force that meets monthly to target the areas vulnerable to homeless occupation, recommends installation of new fences and/or repair of damaged fences. This task force identifies the priority homeless encampments for abatement and coordinates agency resources (illegal dumping crew, homeless social services and fire department personnel) for the monthly abatement efforts. This task force also coordinates with adjacent landowners (such as Caltrans) on encampment prevention and abatement. This task force also identifies physical barriers to establishment of encampments such as fencing an area or placement of boulders on potential tent site locations.</p> <p>City's clean-up efforts of homeless encampments have increased dramatically. Data from 2010 – 2013 show that the City removes approximately 10 homeless encampments per month and approximately 500 cy/year.</p> <p>In FY 2013-2014, City removed over 500 cubic yards of debris from its homeless encampment abatement efforts.</p> <p>In FY 2014-2015, City abated over 91 homeless encampments and removed over 125 cubic yards of debris.</p> <p>Starting July 1, 2014, the City established a priority clean-up protocol for all homeless encampments within 250 feet of an open waterway. All reports of homeless encampments will now be screened to identify how close they are to an open waterway and prioritized accordingly.</p>	Not Applicable	Not Applicable	<p>No trash reduction estimated. While this program provides trash reduction benefit, the City is not currently utilizing this activity for trash reduction credit in Sections C.10.d PART B – TMA Specific Actions and PART C Estimated Overall Trash Load Reduction. The City has not yet devised a workable methodology for measuring and assessing this activity due to challenging factors and changing variables.</p>

**C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)**

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced												
Facility Stormwater Inspections for Trash Management	<p>Starting in January 2015, Oakland’s stormwater inspections incorporated a number of trash related factors. In particular, the stormwater inspections were expanded to include a trash assessment of each inspected facility’s site. Trash-related issues that were evaluated include:</p> <p>1) Restaurants – In FY 2014-2015 the City inspected restaurants for compliance with polystyrene ban and trash container management. Starting in 2015 stormwater inspections included visual assessment of any ancillary property (e.g parking lot) and information on facility-specific trash control measure(s) (e.g. Does facility sweep up litter on the public ROW and/or ancillary facility and frequently?).</p> <p>2) Auto Body Inspections - Starting in 2015 auto body facilities were inspected for visual assessment of any ancillary property (e.g parking lot) and information on facility-specific trash control measure (e.g. Does facility sweep up litter on the public ROW and/or ancillary facility? How frequently?)</p> <p>3) Shopping Malls &amp; Grocery Stores - Starting in 2015 shopping malls &amp; grocery facilities were inspected for compliance with polystyrene ban, trash container management, visual assessment of any ancillary property (e.g parking lot) and information on facility-specific trash control measures (e.g. Does facility sweep up litter on the public ROW and/or ancillary facility? How frequently?)</p> <p>The following table summarizes the results of the inspections of facilities and their visual assessment rating for on-site litter:</p> <table border="1" data-bbox="409 1133 1066 1317"> <thead> <tr> <th>Facility Type</th> <th># of Facilities Inspected</th> <th>Litter on Facility Property<sup>80</sup></th> </tr> </thead> <tbody> <tr> <td>Restaurants</td> <td>69</td> <td>1</td> </tr> <tr> <td>Auto Mechanics</td> <td>245</td> <td>9</td> </tr> <tr> <td>Groceries/Shopping Facilities</td> <td>81</td> <td>2</td> </tr> </tbody> </table>	Facility Type	# of Facilities Inspected	Litter on Facility Property <sup>80</sup>	Restaurants	69	1	Auto Mechanics	245	9	Groceries/Shopping Facilities	81	2	Visual assessment of properties using Trash Visual Assessment Protocol.	<p>See Attachment C.10.5 for maps showing visual assessment results of facility inspections.</p> <p>The City is evaluating how to account for this parcel by parcel information and facility-specific control measures in estimating trash reduction.</p>	No trash reduction estimated. While this program provides trash reduction benefits, the City is not currently utilizing this activity for trash reduction credit in Sections C.10.d PART B–TMA Specific Actions and PART C Estimated Overall Trash Load Reduction. The City has not yet devised a workable methodology for measuring and assessing this activity due to challenging factors and changing variables.
Facility Type	# of Facilities Inspected	Litter on Facility Property <sup>80</sup>														
Restaurants	69	1														
Auto Mechanics	245	9														
Groceries/Shopping Facilities	81	2														

<sup>80</sup> Facilities with a visual assessment rating of “High” (C) or “Very High” (D) rating were considered to have litter on their property.

**C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)**

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

<b>C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)</b>													
Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.													
<b>Control Measure</b>	<b>Summary Description of Control Measure &amp; Dominant Trash Sources and Types</b>	<b>Assessment Method(s)</b>	<b>Summary of Assessment Results To-date</b>	<b>Estimated % Trash Reduced</b>									
Adequate Trash Containment	<p>In addition to examining on-site litter management during stormwater inspections, the City is also inspecting and assisting facilities and businesses to ensure adequate trash containment practices.</p> <p>In FY 2013-2014, Oakland initiated a technical assistance program (in conjunction with StopWaste) which assists food service establishments in proper trash management and meeting the new requirement for mandatory recycling in FY 2014-2015. This technical assistance program includes an evaluation of improper containment (open dumpsters with potential for wind deposition of trash) and verification of compliance with the polystyrene ordinance. Alongside implementation of the mandatory recycling program, all food service establishments will receive information describing requirements to control litter from: trash containment, polystyrene foam ban and information on reducing non-reusable products. In FY 2013-2014, technical assistance was provided to 116 businesses.</p> <p>As part of the City's annual stormwater inspections in FY 2012-2013, 2013-2014, and 2014-2015, facility inspections identified businesses with overflowing bins and/or practices that contribute to poor trash containment practices that could cause an illicit discharge. The waste hauler was notified of each facility identified as having inadequate containment and followed up to facilitate additional capacity, as appropriate.</p> <p>In FY 2014-2015, the City inspected 150 facilities (restaurants and groceries/shopping only<sup>81</sup>) for proper trash containment and identified 19 facilities with poor container management. These facilities have been referred to the waste hauler for follow-up with container overages.</p> <p>The following table summarizes the results of the Trash Containment inspections per facility type:</p> <table border="1"> <thead> <tr> <th><i>Facility Type</i></th> <th><i># Facilities Inspected</i></th> <th><i>Poor Trash Container Management</i></th> </tr> </thead> <tbody> <tr> <td>Restaurants</td> <td>69</td> <td>18</td> </tr> <tr> <td>Groceries/Shopping Facilities</td> <td>81</td> <td>1</td> </tr> </tbody> </table>	<i>Facility Type</i>	<i># Facilities Inspected</i>	<i>Poor Trash Container Management</i>	Restaurants	69	18	Groceries/Shopping Facilities	81	1	Not Applicable	Not Applicable	No trash reduction estimated. While this program provides trash reduction benefit, the City is not currently utilizing this activity for trash reduction credit in Sections C.10.d PART B – TMA Specific Actions and PART C Estimated Overall Trash Load Reduction. The City has not yet devised a workable methodology for measuring and assessing this activity due to challenging factors and changing variables.

<sup>81</sup> Auto Mechanics were inspected for general housekeeping” and litter on-site. Trash container management was not evaluated separately.

**C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)**

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
Adequate Trash Containment <i>(continued)</i>	<p>In addition, the City's franchise hauler (WMI) has a comprehensive "snapshot" program. This snapshot program automatically videos the entire route and the video is reviewed later to identify businesses with trash containers that are overflowing or overfilled. All businesses and residences identified through this program automatically receive a letter from the franchise hauler recommending increased service level and a bill for increased waste. See Attachment C.10.7 showing a sample letter sent to facility when WMI notes container overage(s).</p> <p>In January 2015, the City worked with WMI to identify all businesses that had a container overage in the 2014. Each of these businesses (approximately 150) received a notice from WMI and a "Courtesy Notification" letter. See Attachment C.10.8 showing a sample of the letter sent.</p>	Not Applicable	Not Applicable	No trash reduction estimated. While this program provides trash reduction benefit, the City is not currently utilizing this activity for trash reduction credit in Sections C.10.d PART B – TMA Specific Actions and PART C Estimated Overall Trash Load Reduction. The City has not yet devised a workable methodology for measuring and assessing this activity due to challenging factors and changing variables.

**C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)**

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
Public Education and Outreach Programs Targeted at Trash Reduction and Implemented post-MRP Adoption	<p>See the Provision C.7.e Public Information and Outreach section of the ACCWP FY 2014-2015 Annual Report for a summary of related outreach activities. Oakland also has the following programs:</p> <p>Through its contractor, the Lake Merritt Institute, the City continues to conduct watershed educational activities targeted toward trash reduction. LMI leads local school groups on field trips around Lake Merritt to collect litter and debris and educate the students about the sources of trash and trash reduction strategies. See Section C.7.e for detailed discussion of public education and outreach.</p> <p>In addition, the ACCWP funded a community stewardship grant to Earth Team for the Zero Litter Internship at Oakland High. This program worked with 10 Zero Litter interns in the 2014-2015 school year and tasked them with finding a way to reduce litter at their school and surrounding neighborhood.</p>	See the Provision C.7.e Public Information and Outreach section of the ACCWP FY 2014-2015 Annual Report for a summary of assessment methods for outreach activities.	Not Applicable	No trash reduction estimated. While this program provides trash reduction benefit, the City is not currently utilizing this activity for trash reduction credit in Sections C.10.d PART B – TMA Specific Actions and PART C Estimated Overall Trash Load Reduction.

**C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)**

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
Public Education and Outreach Programs Targeted at Trash Reduction and Implemented post-MRP Adoption ( <i>continued</i> )	<p>City continues to partner with five other Bay Area Cities and Clean Water Action (through US EPA grant) to reduce litter from take-out establishments. The "ReThink Disposable" program has developed an inspection check list for evaluating whether the business-type can reduce its disposable materials. Businesses participating in the program will receive an official audit and commit to implementing waste reduction actions.</p> <p>See Attachment C.10.9 inviting Oakland take-out establishments to participate in the trash reduction audit. This program also provides public education to restaurant customers on how they can use fewer disposable items.</p> <p>See Attachment C.10.9 for an example of public education material in a downtown Oakland restaurant and outreach materials for businesses.</p> <p>To date Oakland, ReThink Disposable has completed the following outreach and engagement activities in Oakland:</p> <p><b>Outreach</b> – Observed and identified 186 businesses candidates.  <b>Met with</b> – 106 businesses and gave them program materials.  <b>Interested</b> – 44 businesses.  <b>Signed up</b> – 18 restaurants.  <b>Total Oakland Restaurants in process or completed</b> = 15</p>	<p>The ReThink Disposable program is evaluating possible methods of calculating trash reduction from this program.</p>	<p>Pending the results from ReThink Disposable estimation study.</p>	<p>No trash reduction estimated. While this program provides trash reduction benefit, the City is not currently utilizing this activity for trash reduction credit in Sections C.10.d PART B – TMA Specific Actions and PART C Estimated Overall Trash Load Reduction. Estimated trash reduction levels will be added pending results from ReThink Disposable study.</p>

**C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)**

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
City-Wide Clean-Up Events & Adopt-A-Spot (Land-based clean ups only)	<p>Since 1992, the City of Oakland has been managing a community stewardship program that organizes two City-wide clean-up events per year (Earth Day and Creek-to-Bay Day). In addition, the City supports volunteers to “adopt” individual sites. These individual sites are both on-land (Adopt-A-Spot, Adopt-A-Drain, Adopt-A-Park, Community Clean-ups) and creek/shoreline sites (Adopt-A-Creek).</p> <p>The City has maintained records on the number of volunteer hours, sites and events provided through this “Adopt” program. The City has recorded the “active” sites by asking volunteers to document the number of volunteers and hours spent on an “adopted” site. These volunteer hours are recorded and used to estimate total volume of trash removed through volunteer efforts.</p> <p>In 2009, the City began to build the “Adopt” program with promotion on several volunteer recruitment websites, attending numerous community events and working to establish partnerships with businesses, community service organizations and local schools, colleges and universities. The program has expanded its outreach strategy by incorporating more electronic forms of communication to reach out to the community about watershed stewardship events.</p> <p>In 2013, the City incorporated Google map technology to provide an accessible way for prospective volunteers to find sites and “Adopt” opportunities.</p>	<p>The City has estimated that each volunteer hour removes 2.5 gallons of litter. This 2.5 gal/volunteer hour is based on 9 years of recorded data from Creek-to-Bay day events (2006 – 2014) in which both the amount of litter collected and the total number of volunteer hours were recorded. See Attachment C.10.12 for a summary of the estimated volunteer litter removal.</p> <p>The City has maintained records on the number of volunteer hours, sites and events provided through this “Adopt” program. The City has recorded the “active” sites by asking volunteers to document the number of volunteers and hours spent on an “adopted” site. These volunteer hours<sup>82</sup> are recorded and used to estimate total volume<sup>83</sup> of trash removed through volunteer efforts.</p>	<p>Trash reduction amounts have been estimated based on the net increase since 2010 of the number of reported volunteer hours, locations, and average litter removal rates.</p>	<p>Applying the NET INCREASE in on-land volunteer hours of 16,412, the City estimates a trash reduction of 8% through our on-land clean-up program.</p>

<sup>82</sup> Please note, that any volunteer hours recorded on Annual Earth Day or Creek-to-Bay Day or Lake Merritt Clean-ups are NOT included in this estimate.

<sup>83</sup> Please note, that the number of volunteer hours devoted to the “Adopt-a Drain” program in FY 2014-2015 (10,020) was NOT included in the calculations for trash reduction. The City has not gathered sufficient data to make an estimate of the trash reduction amount from the over 900 storm drains adopted.

**C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)**

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced												
City-Wide Clean-Up Events & Adopt-A-Spot (Land-based clean ups only) (continued)	<p>Per the table below, the City has produced gigantic growth with its “Adopt” program and currently has documented just under 100,000 volunteer hours city-wide this fiscal year. See Attachment C.7.1 for a summary of the “Adopt” program volunteer hours.</p> <p>The table below provides information on the program’s growth for on-land clean-up activities:</p> <table border="1"> <thead> <tr> <th>Indicator</th> <th>2010<sup>84</sup></th> <th>2014-15</th> <th>% Change</th> </tr> </thead> <tbody> <tr> <td>Volunteer Hours – on-land, parks, medians &amp; community events</td> <td>44,000</td> <td>60,412</td> <td>+137%</td> </tr> <tr> <td>No. of On-Land Events – on-land, parks, medians &amp; community events</td> <td>1,109</td> <td>6,400</td> <td>+577%</td> </tr> </tbody> </table> <p><b>ADOPT A DRAIN PROGRAM</b></p> <p>In 2013, the City added an on-line registration system for Adopt-A-Drain (<a href="http://www.adoptadrainoakland.com">www.adoptadrainoakland.com</a>) and dramatically increased participation in the program.</p> <p>The City added 350 new adopters of storm drains in 2014 (a 110% increase) and as of the end of the fiscal year 2014-2015 the City approached a 10% adoption rate for the City’s more than 10,000 storm drains. While the primary focus is removal of debris during storm events, this program is also working with volunteers to emphasize removal of litter at the storm drain.</p> <p>See Attachment C.10.10 for more information on the adopt-a-drain program.</p>	Indicator	2010 <sup>84</sup>	2014-15	% Change	Volunteer Hours – on-land, parks, medians & community events	44,000	60,412	+137%	No. of On-Land Events – on-land, parks, medians & community events	1,109	6,400	+577%	Not Applicable	Not Applicable	The City has not estimated a trash reduction amount for the Adopt-A-Drain program. While this program provides trash reduction benefit, the City is not currently utilizing this activity for trash reduction credit in Sections C.10.d PART B – TMA Specific Actions and PART C Estimated Overall Trash Load Reduction. The City is studying options for evaluating the effectiveness of this control measure and gathering the necessary to estimate reduction from this program.
Indicator	2010 <sup>84</sup>	2014-15	% Change													
Volunteer Hours – on-land, parks, medians & community events	44,000	60,412	+137%													
No. of On-Land Events – on-land, parks, medians & community events	1,109	6,400	+577%													

<sup>84</sup> Data in 2010 is only available in calendar year. This 2010 calendar year is compared to FY 2014-2015 fiscal year.

**C.10.d ► PART B - Trash Control Measure Implementation and Assessment (TMA Specific Actions)**

Complete the following trash control measure implementation and assessment summary for each primary trash management area (TMA) identified in your Long-term Plan. Include the following information:

- Identify the total jurisdictional area and the % of that area that generated very high (VH), high (H), moderate (M), or low (L) levels of trash in 2009, as depicted on trash generation maps;
- Identify the dominant trash source(s) and dominant type(s) of trash addressed or to-be addressed in the TMA;
- Provide the area currently treated by full capture devices, the quantity and type of devices installed to-date, and the % and acres of jurisdictional area in very high (VH), high (H), moderate (M), and low (L) generation categories that are currently treated by full capture devices in the TMA;
- Summarize control measures other than full capture devices implemented to-date, distinguishing between implementation that began pre- and post-MRP effective date. If not implemented in the entire TMA, describe generation category targeted and % of TMA addressed;
- Provide the acres of jurisdictional area in very high (VH), high (H), moderate (M), and low (L) generation categories in areas associated with actions other than full capture devices in the TMA;
- Describe the methods used to evaluate the effectiveness of control measures other than full capture devices, and any assessment results to-date. If the method was not implemented in the entire TMA, describe generation category targeted and %of TMA addressed.
- Provide the acres in VH, H, M or L generation categories after accounting for reduction associated with control measures other than full capture devices;
- Provide the acres in VH, H, M or L generation categories after accounting for reductions associated with ALL control measures (i.e., full capture and other actions) implemented to-date in the TMA
- Provide an estimate of the % of trash reduced in the TMA as a result of ALL control measures implemented to-date in the TMA. using the following formula:

$$\% \text{ Reduction} = 100 [(12A_{VH(2009)} + 4A_{H(2009)} + A_{M(2009)}) - (12A_{VH} + 4A_H + A_M)] / (12A_{VH2009} + 4A_{H2009} + A_{M2009})$$

where:

- $A_{VH(2009)}$  = total amount of the 2009 very high trash generation category in jurisdictional area
- $A_{H(2009)}$  = total amount of the 2009 high trash generation category in jurisdictional area
- $A_{M(2009)}$  = total amount of the 2009 moderate trash generation category in jurisdictional area
- $A_{VH}$  = total amount of very high trash generation category in jurisdictional area in the reporting year
- $A_H$  = total amount of high trash generation category in jurisdictional area in the reporting year
- $A_M$  = total amount of moderate trash generation category in jurisdictional area in the reporting year
- 12 = Very High to Moderate weighing ratio
- 4 = High to Moderate weighing ratio
- 100 = fraction to percentage conversion factor

Permittee Name: City of Oakland

C.10.d ► PART B - Trash Control Measure Implementation and Assessment (TMA Specific Actions)								
TMA ID	TMA Area (Acres)	Dominant Sources	Dominant Types		Area (Acres) in Each Trash Generation Category			
					VH	H	M	L
1 - Arterials	2,701	Trash is generated by passengers littering from their cars, homeless encampments, illegal dumping, and associated retail industries.	Food and beverage packaging and cigarette butts. Illegally dumped materials such as construction materials, clothing, and other debris. Homeless encampments.	Baseline Generation Areas (2009)	1276	792	530	103
Full Capture Devices	Area Treated by Full Trash Capture Devices (Acres)	Quantity and Type of Full Trash Capture Devices		Area Treated by Full Capture Devices	111	77	32	1
	220	This TMA has: 8 Connector Pipe Screens/Filters; 4 Hydrodynamic Separators; 1 Gross Solids Removal Device; 3 Trash Booms.						
Actions other than Full Capture Devices	Summary Description of Other Actions Implemented in the TMA Since MRP Adoption			Area Not Treated by Full Capture Devices	1164	715	499	103
	<p><u>STREET SWEEPING</u>: City sweeps this TMA with extremely high frequency. Specifically, these areas are swept three times per week or more and parking restrictions are in place and strictly enforced during sweeping events. See Attachment C.10.3 for the arterials in this TMA and their sweeping frequency. The City has not taken a specific trash reduction amount for this control measure. Pending results of the <i>Tracking California Trash Study</i>, future trash reduction estimates will be modified to include the estimated reduction due to street sweeping at this frequency.</p> <p><u>BUSINESS IMPROVEMENT DISTRICTS (BIDs) EFFORTS</u>: City-wide there are nine BID's. Certain portions of this arterial TMA have overlap with commercial areas where BIDs, have implemented programs to reduce litter. Specific programs implemented in the BIDs include hiring full-time staff to remove litter, increasing the number or capacity of trash containers in their BIDs, landscaping maintenance, assisting commercial establishments with trash container management, installing cigarette butt receptacles, and public signage about littering. See Attachment C.10.11 for a map showing the five specific BIDs whose litter removal activities have been included in this trash reduction estimate.</p> <p><u>ILLEGAL DUMPING ABATEMENT</u> (Jurisdiction-wide): The City responds to requests for removal of illegal dumping city-wide – including this TMA. The volume of illegally dumped materials removed has increased by over 66% since the volumes were first tracked in 2009. This control measure is implemented City-wide, but City is only proposing trash reductions for from this control measure in TMA#5, TMA #11 and TMA #12.</p> <p><u>HOMELESS ENCAMPMENT ABATEMENT</u> (Jurisdiction-wide): Arterials are locations that often attract development of homeless encampments. No specific trash reduction amount has been estimated for this control measure.</p> <p><u>CITY ADOPT-A-SPOT EFFORTS</u> (Jurisdiction-wide): The City organizes and supports over 7,000 individual clean-up events per year. These include both city-wide events such as Creek-to-Bay Day and Earth Day and individual citizens volunteering to adopt City of storm drains, parks, streets, and creek/shoreline areas. See the Jurisdiction-Wide</p>			Area after Accounting for Other Actions (based on assessment results)	924	809	627	121

Permittee Name: City of Oakland

<p>Measures for a full discussion of this trash reduction measure. The major arterials are a prime clean-up area for businesses and volunteers.</p> <p><u>JURISDICTION-WIDE ACTIVITIES</u>: The City's jurisdiction-wide activities also include Adopt-A-Drain, facility trash inspections, containment management, public education and outreach, and product bans (EPS ban and Bag ban).</p>					
<b>Assessment Methods for Control Measures Other than Full Capture Devices</b>					
<p><u>STREET SWEEPING</u> : Assessment method includes visual assessment before and after street sweeping. See discussion on assessment methods for Jurisdiction-wide control measures. No reduction has been taken for street sweeping</p>					
<p><u>BUSINESS IMPROVEMENT DISTRICT (BID) EFFORTS</u>: Assessment is conducted visually by BID staff before and after litter removal. City staff has also received information from the BIDs describing the volume of trash they typically remove from the area. Other activities such as installation of more trash containers in their area (i.e. Big Belly Solar Containers) and serving as public "ambassadors" for litter removal are also noted.</p>					
<p><u>ILLEGAL DUMPING ABATEMENT</u> (Jurisdiction-wide): No assessment for illegal dumping abatement in this TMA. Although this control measure is a City-wide activity, reduction is only estimated for TMAs #5, #11 and #12.</p>					
<p><u>HOMELESS ENCAMPMENT ABATEMENT</u> (Jurisdiction-wide): See Jurisdiction-Wide Control Measures for a description of the Homeless Encampment Abatement control measure.</p>					
<p><u>CITY ADOPT-A-SPOT EFFORTS</u> (Jurisdiction-wide): The City has recorded the "active" sites by asking volunteers to document the number of volunteers and hours spent on each "adopted" site. These volunteer hours are recorded and used to estimate total volume of trash removed through volunteer efforts. See Attachment C.10.12 and discussion of the assessment results in the Jurisdiction-Wide Activities (Part A).</p>					
<p><u>VISUAL TRASH ASSESSMENTS</u>: There were visual trash assessments at 49 locations in this TMA and 166 individual facilities. Results of the facility inspections (restaurants, grocery stores, auto repair and miscellaneous sites) are summarized in the Jurisdiction-wide section and found in Attachment C.10.5. See Attachment C.10.13 for TMA visual assessment summary maps. Maps summarizing the location and results of facility inspections are also found in Attachment C.10.5.</p>					
<p><u>JURISDICTION-WIDE ACTIVITIES</u>: See Jurisdiction-Wide Control Measures for a description of the assessment methods for control measure(s) including: Adopt-A-Drain, facility trash inspections, containment management, public education and outreach, and product bans (EPS ban and Bag ban).</p>					
<b>Summary of Assessment Results</b>					
<p><u>STREET SWEEPING</u>: No reduction has been taken for street sweeping, pending the results from <i>Tracking California's Trash</i> study.</p>					
<p><u>BUSINESS IMPROVEMENT DISTRICT (BID) EFFORTS</u>: Reduced trash volume by one whole level (i.e. from a "very high" level pre-BID to a "high" level post BID).</p>					
<p><u>ILLEGAL DUMPING ABATEMENT</u>: No reduction estimated for illegal dumping abatement in this TMA. Although this</p>

TMA ID	TMA Area (Acres)	Dominant Sources	Dominant Types		Area (Acres) in Each Trash Generation Category			
					VH	H	M	L
#5 – West Oakland	946	Trash in this area is generated by the regional freeway system, transportation activities, and homeless encampments. This TMA also has illegal dumping as a significant trash source.	Food and beverage packaging and cigarette butts. Illegally dumped materials such as construction materials, clothing, and miscellaneous debris. Homeless encampments.	Baseline Generation Areas (2009)	95	767	84	0
Full Capture Devices	Area Treated by Full Trash Capture Devices (Acres)	Quantity and Type of Full Trash Capture Devices		Area Treated by Full Capture Devices	0	0	1	0
	1	This TMA is partially treated by devices within neighboring TMAs.						
Actions other than Full Capture Devices	Summary Description of Other Actions Implemented in the TMA Since MRP Adoption			Area <u>Not</u> Treated by Full Capture Devices	95	767	83	0
	<p><u>STREET SWEEPING:</u> City sweeps this TMA with extremely high frequency. Specifically, these areas are swept weekly and parking restrictions are in place and strictly enforced during sweeping events. See Attachment C.10.3 for the areas in this TMA and their sweeping frequency. The City has not taken a specific trash reduction amount for this control measure. Pending results of the <i>Tracking California Trash Study</i>, future trash reduction estimates will be modified to include the estimated reduction due to street sweeping at this frequency.</p> <p><u>ILLEGAL DUMPING ABATEMENT:</u>                      Illegal dumping has been identified as a high source of trash generation in Oakland. Though dumping occurs City-wide, it is concentrated in TMA 5, TMA 11 and TMA 12. See Attachment C.10.14 with a “heat map” showing which of the areas in Oakland have the largest removal of illegally dumped materials.</p> <p>Keep Oakland Clean and Beautiful (KOCB) staff responds to citizen calls of trash and illegal dumping. The program operates six-days /week with 12 crews operating City-wide with the following equipment: two mattress trucks, one tire truck, five pickup trucks, one overhead loader and three garbage trucks on a full-time basis. Materials are picked up and taken to the Davis Street Landfill.</p> <p>Starting in 2009, every call and clean-up activity for illegal dumping is tracked through the City’s data tracking system, Cityworks. In 2009, the City established a performance standard that 85% of its illegal dumping requests will be completed within three working days.</p> <p>In FY 2012-13, the City increased the resources devoted to illegal dumping removal and added an overhead loader, two mini-packers, 2 new full-time staff to litter abatement and 5 new full-time staff to the illegal dumping removal.</p>			Area after Accounting for Other Actions (based on assessment results)	24	327	553	42

Permittee Name: City of Oakland

Per the summary chart below, the volume of material removed and the number of work orders issued for illegal dumping abatement has steadily increased.

	2010	2011	2012	2013	2014
% of Sites Resolved Within 3 days	91%	96%	86%	75%	90%
# of Illegal Dumping Work Orders	12,319	12,354	15,692	17,346	17,848
Volume of Material Removed (cy)	22,783	25,002	36,169	37,648	34,106

Number of work orders issued for illegal dumping has increased over 66% since data tracking began in 2009. Total number of work orders issued for illegal dumping abatement has increased over 144% since data tracking began in 2009.

Enforcement Initiative:

Starting in Spring of 2013, the City of Oakland launched an illegal dumping enforcement initiative. See Attachment C.10.15 for detailed information. This effort is multi-pronged and has created a more effective mechanism for holding illegal dumpers accountable. The initiative includes: creation of a multi-departmental task force, modification of the City ordinance: institution of administrative fines for illegal dumping incidents, and creation of “sting operations” and establishment of a rewards program for encouraging reporting of illegal dumping. TMA #5 is one of the areas targeted for Illegal Dumping Removal and the illegal dumping enforcement initiative.

In FY 2013-2014 the City issued 71 citations and collected \$17,160 in fines. This fiscal year the City has issued 72 citations for illegal dumping and collected \$23,459.25 in fines.

In September 2015, the City Council appropriated funds to increase awareness and launched a reward program to encourage community members to provide info on illegal dumping, See Attachment C.10.16 for sample of Media used to publicize reward program.

Physical Deterrence:

Oakland’s Keep Oakland Clean and Beautiful (KOCB) has implemented structural controls to help reduce illegal dumping.

In 2009, KOCB identified 83 “high priority” illegal dumping sites and in 2010 the City launched a pilot video program that placed deterrence devices (live cameras and dummy cameras) at 46 of those locations.

In addition, the City has installed physical barriers (logs, boulders, fences) at known dump sites to discourage dumping. In FY 2013-2014, physical barriers were installed at 3 sites (Golflinks Rd and Glenly, 105th and Edes, 32nd St and Hannah Avenue) and staff has noted a decline in dumping at those sites. The City continues to evaluate options for use of physical deterrence methods.

Permittee Name: City of Oakland

<p><u>HOMELESS ENCAMPMENT ABATEMENT</u> (Jurisdiction-wide): This TMA has attracted a number of homeless encampments. No specific trash reduction amount has been estimated for this control measure.</p> <p><u>CITY ADOPT-A-SPOT EFFORTS</u> (Jurisdiction-wide): The City organizes and supports over 7,000 individual clean-up events per year. These include both city-wide events such as Creek-to-Bay Day and Earth Day and individual citizens volunteering to adopt City of storm drains, parks, streets, and creek/shoreline areas. West Oakland has a large number of "adopted" sites. See the Jurisdiction-Wide Measures for a full discussion of this trash reduction measure.</p> <p><u>JURISDICTION-WIDE ACTIVITIES</u>: The City's jurisdiction-wide activities include Adopt-A-Drain, facility trash inspections, containment management, street-sweeping, homeless encampment abatement, public education and outreach, and product bans (EPS ban and Bag ban).</p>					
<b>Assessment Methods for Control Measures Other than Full Capture Devices</b>					
<p><u>STREET SWEEPING</u>: Assessment method includes visual assessment before and after street sweeping. See discussion on assessment methods for Jurisdiction-wide control measures. No reduction has been taken for street sweeping.</p> <p><u>ILLEGAL DUMPING ABATEMENT</u>: City tracked volume of trash removed from City streets and number of calls received from public. Through tracking locations of each illegal dumping pickup, the City generated a "heat map" showing which of the areas in Oakland have the largest removal of illegally dumped materials. This map, shown in Attachment C.10.14 indicates that TMA #5, TMA #11 and TMA #12 have the highest incidence of calls requesting illegal dumping abatement. City uses visual assessment to determine how much of litter on streets in these TMAs is generated from illegal dumping – which is subsequently resolved within designated response time.</p> <p><u>HOMELESS ENCAMPMENT ABATEMENT</u> (Jurisdiction-wide): See Jurisdiction-Wide Control Measures for a description of the assessment methods for Homeless Encampment Abatement control measure.</p> <p><u>CITY ADOPT-A-SPOT EFFORTS</u> (Jurisdiction-wide): The City has recorded the "active" sites by asking volunteers to document the number of volunteers and hours spent on each "adopted" site. These volunteer hours are recorded and used to estimate total volume of trash removed through volunteer efforts. See Attachment C.10.12 and discussion of the assessment results in the Jurisdiction-Wide Activities (Part A).</p> <p><u>VISUAL TRASH ASSESSMENTS</u>: There were visual trash assessments at 3 locations in this TMA and 32 individual facilities. Results of the facility inspections (restaurants, grocery stores, auto repair and miscellaneous sites) are summarized in the Jurisdiction-wide section. See Attachment C.10.13 for TMA visual assessments summary maps for the 3 site locations. Maps summarizing the location and results of facility inspections are found in Attachment C.10.5.</p> <p><u>JURISDICTION-WIDE ACTIVITIES</u>: See Jurisdiction-Wide Control Measures for a description of the assessment methods for control measure(s) including: Adopt-A-Drain, facility trash inspections, containment management, street-sweeping, homeless encampment abatement, public education and outreach, and product bans (EPS ban and Bag ban).</p>					

Summary of Assessment Results					
<p><u>STREET SWEEPING:</u> No trash reduction has been taken for street sweeping pending results of the Tracking California's Trash Study.</p> <p><u>ILLEGAL DUMPING ABATEMENT:</u> Volume of trash collected through illegal dumping program has had a NET increase of 66% since MRP adoption. City has removed a total of 34,106 cubic yards of material from City streets and right of way in FY 2014-2015 – much of it concentrated in TMA 5. Through visual assessment, the City estimates that 50% of litter in TMA #5 is illegally dumped materials and has been removed through its illegal dumping abatement program.</p> <p><u>HOMELESS ENCAMPMENT ABATEMENT:</u> No reduction has been taken for homeless encampment abatement.</p> <p><u>CITY ADOPT-A-SPOT EFFORTS:</u> See Attachment C.10.12 and discussion of the assessment results in the Jurisdiction-Wide Activities (Part A).</p> <p><u>VISUAL TRASH ASSESSMENTS:</u> Maps summarizing the location of TMA visual assessments are found in Attachment C.10.13.</p> <p><u>JURISDICTION-WIDE ACTIVITIES:</u> See Jurisdiction-Wide Control Measures for a description of the assessment results for control measure(s) including: Adopt-A-Drain, facility trash inspections, containment management, public education and outreach, and product bans (EPS ban and Bag ban).</p>

C.10.d ► PART B - Trash Control Measure Implementation and Assessment (TMA Specific Actions)								
TMA ID	TMA Area (Acres)	Dominant Sources	Dominant Types		Area (Acres) in Each Trash Generation Category			
					VH	H	M	L
#6 - Shoreline	809	Predominant sources of trash are the regional freeway system and associated on-ramps and litter associated with recreational use of parks and trails in the area.	Food and beverage packaging and cigarette butts. Miscellaneous debris.	Baseline Generation Areas (2009)	23	1	786	0
Full Capture Devices	Area Treated by Full Trash Capture Devices (Acres)	Quantity and Type of Full Trash Capture Devices		Area Treated by <u>Full Capture Devices</u>	22	1	35	0
	57	This TMA has: 1 Connector Pipe Screen/Filter; 1 Hydrodynamic Separator.						
Actions other than Full Capture Devices	Summary Description of Other Actions Implemented in the TMA Since MRP Adoption			Area <u>Not</u> Treated by Full Capture Devices	1	0	751	0
	<p><u>CITY ADOPT-A-SPOT EFFORTS</u> (Jurisdiction-wide): The City organizes and supports over 7,000 individual clean-up events per year. These include both city-wide events such as Creek-to-Bay Day and Earth Day and individual citizens volunteering to adopt City of storm drains, parks, streets, and creek/shoreline areas. See the Jurisdiction-Wide Measures for a full discussion of this trash reduction measure.</p> <p><u>JURISDICTION-WIDE ACTIVITIES</u>: The City's jurisdiction-wide activities include Adopt-A-Drain, facility trash inspections, containment management, street-sweeping, homeless encampment abatement, public education and outreach, and product bans (EPS ban and Bag ban).</p>			Area after Accounting for Other Actions (based on assessment results)	1	0	751	0
	Assessment Methods for Control Measures Other than Full Capture Devices							
	<p><u>CITY ADOPT-A-SPOT EFFORTS</u>: The City has recorded the "active" sites by asking volunteers to document the number of volunteers and hours spent on each "adopted" site. These volunteer hours are recorded and used to estimate total volume of trash removed through volunteer efforts. See Attachment C.10.12 and discussion of the assessment results in the Jurisdiction-Wide Activities (Part A).</p> <p><u>VISUAL TRASH ASSESSMENTS</u>: There were visual trash assessments at 4 locations in this TMA and 14 individual facilities. Results of the facility inspections (restaurants, grocery stores, auto repair and miscellaneous sites) are summarized in the Jurisdiction-wide section. See Attachment C.10.13 for TMA visual assessment summary maps for the 4 site locations. Maps summarizing the location and results of facility inspections are found in Attachment C.10.5.</p> <p><u>JURISDICTION-WIDE ACTIVITIES</u>: See Jurisdiction-Wide Control Measures for a description of the assessment methods for control measure(s) including: Adopt-A-Drain, facility trash inspections, containment management, street-sweeping, homeless encampment abatement, public education and outreach, and product bans (EPS ban and Bag ban).</p>

Estimated % Trash Reduction in this TMA		29%			

Permittee Name: City of Oakland

C.10.d ► PART B - Trash Control Measure Implementation and Assessment (TMA Specific Actions)								
TMA ID	TMA Area (Acres)	Dominant Sources	Dominant Types	Area (Acres) in Each Trash Generation Category				
					VH	H	M	L
7 – Lake Merritt Watershed	1,330	Trash generated by high density housing, arterials and commercial districts.	Food and beverage packaging and cigarette butts. Miscellaneous debris.	Baseline Generation Areas (2009)	297	88	890	55
Full Capture Devices	Area Treated by Full Trash Capture Devices (Acres)	Quantity and Type of Full Trash Capture Devices		Area Treated by Full Capture Devices	98	4	130	4
	236	This TMA has: 3 Connector Pipe Screens/Filters; 5 Hydrodynamic Separators; 1 Gross Solids Removal Device; 2 LID Facilities; and 3 Trash Booms.						
Actions other than Full Capture Devices	Summary Description of Other Actions Implemented in the TMA Since MRP Adoption			Area <u>Not</u> Treated by Full Capture Devices	199	84	760	51
	<p><u>UPTOWN &amp; GRAND LAKE BUSINESS IMPROVEMENT DISTRICT (BID)</u>: This TMA is served by the Uptown Business Improvement District and the Grand Lake BID. These BIDs hire staff for a minimum of 20 hours/week to clean up the streets and sidewalks. (Note: For this TMA The BID boundaries are larger than the commercial district boundaries so some trash reduction is noted in this TMA).</p> <p><u>ILLEGAL DUMPING ABATEMENT</u> (Jurisdiction-wide): The City responds to requests for removal of illegal dumping city-wide – including this TMA. The volume of illegally dumped materials removed has increased by over 66% since the volumes were first tracked in 2009. This control measure is implemented City-wide, but City is only proposing trash reductions for from this control measure in TMA#5, TMA #11 and TMA #12.</p> <p><u>HOMELESS ENCAMPMENT ABATEMENT</u> (Jurisdiction-wide): The open space in this area has attracted a number of homeless encampments. City staff has abated over five homeless encampments in this fiscal year just in the area immediately surrounding Lake Merritt. No specific trash reduction amount has been estimated for this control measure.</p> <p><u>CITY ADOPT-A-SPOT EFFORTS</u> (Jurisdiction-wide): The City organizes and supports over 7,000 individual clean-up events per year. These include both city-wide events such as Creek-to-Bay Day and Earth Day and individual citizens volunteering to adopt City of storm drains, parks, streets, and creek/shoreline areas. See the Jurisdiction-Wide Measures for a full discussion of this trash reduction measure.</p> <p><u>PARK LITTER CONTAINER MANAGEMENT (Implemented 2013)</u>: No quantitative estimate taken for this effort. Due to the channel widening and creation of a new amphitheater and bike path around the Lake, Park usage had increased dramatically and there was a growing potential for insufficient trash containers and wind-blown trash entering the lake. Initially, the City re-directed a weekend gardener to provide 12-hour /day trash removal on Saturdays and Sundays. City staff conducted an assessment of litter containers and overflow in the Lake Merritt Park. As a longer term solution, City added an additional KOCB litter can pick-up on Saturdays and another franchise hauler litter can pick-up on Saturday afternoon and Sunday morning. In addition, City staff added 4 new trash cans to the area.</p>			Area <u>after Accounting for Other Actions</u> (based on assessment results)	199	84	760	51

Permittee Name: City of Oakland

<p><u>LAKE MERRITT CLEAN-UP:</u> In addition to City-Wide creek clean-ups, since 2002 the City has funded the Lake Merritt Institute, which has a full-time staff person who organizes (at a minimum) weekly clean-ups of all the trash in the Lake. Volunteers pick up litter along the shoreline and use long nets to scoop up trash found in the Lake and captured in the booms. In FY 2014-2015 the volunteers removed a total of 19,500 pounds of trash. No specific trash reduction amount has been estimated for this control measure.</p>					
<p><u>JURISDICTION-WIDE ACTIVITIES:</u> The City’s jurisdiction-wide activities also include Adopt-A-Drain, facility trash inspections, containment management, street-sweeping, public education and outreach, and product bans (EPS ban and Bag ban).</p>					
<p><b>Assessment Methods for Control Measures Other than Full Capture Devices</b></p>					
<p><u>BUSINESS IMPROVEMENT DISTRICT (BID) EFFORTS:</u> Assessment is conducted visually by BID staff before and after litter removal. City staff has also received information from the BIDs describing the volume of trash they typically remove from the area. Other activities such as installation of more trash containers in their area (i.e. Big Belly Solar Containers) and serving as public “ambassadors” for litter removal are also noted.</p>					
<p><u>ILLEGAL DUMPING ABATEMENT:</u> No assessment for illegal dumping abatement in this TMA. Although this control measure is a City-wide activity, reduction is only estimated for TMAs #5, #11 and #12.</p>					
<p><u>HOMELESS ENCAMPMENT ABATEMENT:</u> See Jurisdiction-Wide Control Measures for a description of the assessment methods for Homeless Encampment Abatement control measure.</p>					
<p><u>CITY ADOPT-A-SPOT EFFORTS:</u> The City has recorded the “active” sites by asking volunteers to document the number of volunteers and hours spent on each “adopted” site. These volunteer hours are recorded and used to estimate total volume of trash removed through volunteer efforts. See Attachment C.10.12 and discussion of the assessment results in the Jurisdiction-Wide Activities (Part A).</p>					
<p><u>PARK LITTER CONTAINER MANAGEMENT:</u> No specific trash reduction amount has been estimated for this control measure. Options for assessment include additional cubic yards of trash removed pre- and post- adding litter service. Another assessment method is number of trash cans provided for public use. Another assessment method is visual assessment of the Park on busy weekends.</p>					
<p><u>LAKE MERRITT CLEAN-UP:</u> In this TMA, there is a full-time staff member hired to staff and organize regular clean-ups (minimum of once per week) in Lake Merritt. Data on amount of litter removed from the Lake has been collected and tabulated from 2002 –present. This weight of litter removal is tracked alongside rainfall amounts. No specific trash reduction amount has been estimated for this control measure.</p>					
<p><u>VISUAL TRASH ASSESSMENTS:</u> There were visual trash assessments at 6 locations in this TMA and 25 individual facilities. Results of the facility inspections (restaurants, grocery stores, auto repair and miscellaneous sites) are summarized in the Jurisdiction-wide section. See Attachment C.10.13 for TMA visual assessment summary maps for the 6 site locations. Maps summarizing the location and results of facility inspections are found in Attachment C.10.5.</p>					
<p><u>JURISDICTION-WIDE ACTIVITIES:</u> See Jurisdiction-Wide Control Measures for a description of the assessment methods for control measure(s) including: Adopt-A-Drain, facility trash inspections, containment management, street-sweeping, public education and outreach, and product bans (EPS ban and Bag ban).</p>					

Permittee Name: City of Oakland

Summary of Assessment Results					
<p><u>BUSINESS IMPROVEMENT DISTRICT (BID) EFFORTS:</u> Reduced trash volume by one whole level (i.e. from a “very high” level pre-BID to a “high” level post BID).</p> <p><u>ILLEGAL DUMPING ABATEMENT:</u> No reduction has been estimated for illegal dumping abatement in this TMA. Although this control measure is a City-wide activity, reduction is only estimated for TMAs #5, #11 and #12.</p> <p><u>HOMELESS ENCAMPMENT ABATEMENT:</u> No reduction has been taken for homeless encampment abatement.</p> <p><u>CITY ADOPT-A-SPOT EFFORTS:</u> See Attachment C.10.12 and discussion of the assessment results in the Jurisdiction-Wide Activities (Part A).</p> <p><u>PARK LITTER CONTAINER MANAGEMENT:</u> City is not calculating a trash reduction amount for this effort.</p> <p><u>LAKE MERRITT CLEAN-UP:</u> No specific trash reduction amount has been estimated for this control measure.</p> <p><u>VISUAL TRASH ASSESSMENTS:</u> Maps summarizing the location of TMA visual assessments are found in Attachment C.10.13.</p> <p><u>JURISDICTION-WIDE ACTIVITIES:</u> See Jurisdiction-Wide Control Measures for a description of the assessment results for control measure(s) including: Adopt-A-Drain, facility trash inspections, containment management, street-sweeping, public education and outreach, and product bans (EPS ban and Bag ban).</p>

	<p><u>STREET SWEEPING:</u> City sweeps this TMA with extremely high frequency. Specifically, these areas are swept three times per week or more and parking restrictions are in place and strictly enforced during sweeping events. See Attachment C.10.3 for sweeping frequency in this TMA. The City has not taken a specific trash reduction amount for this control measure. Pending results of the <i>Tracking California Trash Study</i>, future trash reduction estimates will be modified to include the estimated reduction due to street sweeping at this frequency.</p> <p><u>BUSINESS IMPROVEMENT DISTRICTS (BIDs) EFFORTS:</u> Downtown Oakland has a very active BID that has two full time staff removing litter 5 days per week and in FY 2013-2014 increased the trash container capacity by installing 12 new "Big Belly's" in this TMA. Certain portions of this TMA overlap with BID boundaries. See Attachment C.10.11 for a map showing the five specific BIDs whose litter removal activities have been included in this trash reduction estimate.</p> <p><u>CITY ADOPT-A-SPOT EFFORTS (Jurisdiction-wide):</u> The City organizes and supports over 7,000 individual clean-up events per year. These include both city-wide events such as Creek-to-Bay Day and Earth Day and individual citizens volunteering to adopt City of storm drains, parks, streets, and creek/shoreline areas. See the Jurisdiction-Wide Measures for a full discussion of this trash reduction measure.</p> <p><u>JURISDICTION-WIDE ACTIVITIES:</u> The City's jurisdiction-wide activities include Adopt-A-Drain, facility trash inspections, containment management, street-sweeping, homeless encampment abatement, public education and outreach, and product bans (EPS ban and Bag ban).</p>			Area after Accounting for Other Actions (based on assessment results)	110	176	0	0
	Assessment Methods for Control Measures Other than Full Capture Devices							
	<p><u>STREET SWEEPING:</u> Assessment method includes visual assessment before and after street sweeping. See discussion on assessment methods for Jurisdiction-wide control measures. No reduction has been taken for street sweeping</p>							

Permittee Name: City of Oakland

<p><u>BUSINESS IMPROVEMENT DISTRICT (BID) EFFORTS:</u> Assessment is conducted visually by BID staff before and after litter removal. City staff has also received information from the BIDs describing the volume of trash they typically remove from the area. Other activities such as installation of more trash containers in their area (i.e. Big Belly Solar Containers) and serving as public “ambassadors” for litter removal are also noted.</p> <p><u>CITY ADOPT-A-SPOT EFFORTS:</u> The City has recorded the “active” sites by asking volunteers to document the number of volunteers and hours spent on each “adopted” site. These volunteer hours are recorded and used to estimate total volume of trash removed through volunteer efforts. See Attachment C.10.12 and discussion of the assessment results in the Jurisdiction-Wide Activities (Part A).</p> <p><u>VISUAL TRASH ASSESSMENTS:</u> There were visual trash assessments at 2 locations in this TMA and 39 individual facilities. Results of the facility inspections (restaurants, grocery stores, auto repair and miscellaneous sites) are summarized in the Jurisdiction-wide section. See Attachment C.10.13 for TMA visual assessment summary maps for the 2 site locations. Maps summarizing the location and results of facility inspections are found in Attachment C.10.5.</p> <p><u>JURISDICTION-WIDE ACTIVITIES:</u> See Jurisdiction-Wide Control Measures for a description of the assessment methods for control measure(s) including: Adopt-A-Drain, facility trash inspections, containment management, street-sweeping, homeless encampment abatement, public education and outreach, and product bans (EPS ban and Bag ban).</p>					
<b>Summary of Assessment Results</b>					
<p><u>STREET SWEEPING:</u> No reduction has been taken for street sweeping, pending the results from Tracking California’s Trash study.</p>					
<p><u>BUSINESS IMPROVEMENT DISTRICT (BID) EFFORTS:</u> Reduced trash volume by one whole level (i.e. from a “very high” level pre-BID to a “high” level post BID).</p>

TMA ID	TMA Area (Acres)	Dominant Sources	Dominant Types		Area (Acres) in Each Trash Generation Category			
					VH	H	M	L
11 – East Oakland (1)	1,416	This TMA has predominantly industrial land uses. This area has high litter from BART and railway lines and the adjacent freeway. This TMA has a high incidence of illegal dumping.	Food and beverage packaging and cigarette butts. Illegally dumped materials such as construction materials, clothing, and miscellaneous debris.	Baseline Generation Areas (2009)	53	179	1143	40
Full Capture Devices	Area Treated by Full Trash Capture Devices (Acres)	Quantity and Type of Full Trash Capture Devices		Area Treated by Full Capture Devices	18	84	36	19
	157	This TMA is partially treated by devices within neighboring TMAs.						
Actions other than Full Capture Devices	Summary Description of Other Actions Implemented in the TMA Since MRP Adoption			Area Not Treated by Full Capture Devices	35	95	1107	22
	<p><u>ILLEGAL DUMPING ABATEMENT:</u>                      Illegal dumping has been identified as a high source of trash generation in Oakland. Though dumping occurs City-wide, it is concentrated in TMA 5, TMA 11 and TMA 12. See Attachment C.10.14 with a “heat map” showing which of the areas in Oakland have the largest removal of illegally dumped materials.</p> <p>Keep Oakland Clean and Beautiful (KOCB) staff responds to citizen calls of trash and illegal dumping. The program operates six-days /week with 12 crews operating City-wide with the following equipment: two mattress trucks, one tire truck, five pickup trucks, one overhead loader and three garbage trucks on a full-time basis. Materials are picked up and taken to the Davis Street Landfill.</p> <p>Starting in 2009, every call and clean-up activity for illegal dumping is tracked through the City’s data tracking system, Cityworks. In 2009, the City established a performance standard that 85% of its illegal dumping requests will be completed within three working days.</p> <p>In FY 2012-2013, the City increased the resources devoted to illegal dumping removal and added an overhead loader, two mini-packers, 2 new full-time staff to litter abatement and 5 new full-time staff to the illegal dumping removal.</p> <p>Per the summary chart below, the volume of material removed and the number of work orders issued for illegal dumping abatement has steadily increased.</p>							

Permittee Name: City of Oakland

	2010	2011	2012	2013	2014
% of Sites Resolved Within 3 days	91%	96%	86%	75%	90%
# of Illegal Dumping Work Orders	12,319	12,354	15,692	17,346	17,848
Volume of Material Removed (cy)	22,783	25,002	36,169	37,648	34,106

Number of work orders issued for illegal dumping has increased over 66% since data tracking began in 2009. Total number of work orders issued for illegal dumping abatement has increased over 144% since data tracking began in 2009.

Enforcement Initiative:

Starting in Spring of 2013, the City of Oakland launched an illegal dumping enforcement initiative. See Attachment C.10.15 for detailed information. This effort is multi-pronged and has created a more effective mechanism for holding illegal dumpers accountable. The initiative includes: creation of a multi-departmental task force, modification of the City ordinance: institution of administrative fines for illegal dumping incidents, and creation of "sting operations" and establishment of a rewards program for encouraging reporting of illegal dumping. TMA #11 is one of the areas targeted for Illegal Dumping Removal and the illegal dumping enforcement initiative.

In FY 2013-2014 the City issued 71 citations and collected \$17,160 in fines. This fiscal year the City has issued 72 citations for illegal dumping and collected \$23,459.25 in fines.

In September 2015, the City Council appropriated funds to increase awareness and launched a reward program to encourage community members to provide info on illegal dumping, See Attachment C.10.16 for sample of Media used to publicize reward program.

Physical Deterrence:

Oakland's Keep Oakland Clean and Beautiful (KOCB) has implemented structural controls to help reduce illegal dumping.

In 2009, KOCB identified 83 "high priority" illegal dumping sites and in 2010 the City launched a pilot video program that placed deterrence devices (live cameras and dummy cameras) at 46 of those locations.

In addition, the City has installed physical barriers (logs, boulders, fences) at known dump sites to discourage dumping. In FY 2013-2014, physical barriers were installed at 3 sites (Golflinks Rd and Glenly, 105th and Edes, 32nd St and Hannah Avenue) and staff has noted a decline in dumping at those sites. The City continues to evaluate options for use of physical deterrence methods.

CITY ADOPT-A-SPOT EFFORTS (Jurisdiction-wide): The City organizes and supports over 7,000 individual clean-up events per year. These include both city-wide events such as Creek-to-Bay Day and Earth Day and individual citizens volunteering to adopt City of storm drains, parks, streets, and creek/shoreline areas. See the Jurisdiction-Wide Measures for a full discussion of this trash reduction measure.

JURISDICTION-WIDE ACTIVITIES: The City's jurisdiction-wide activities include Adopt-A-Drain, facility trash inspections, containment management, street-sweeping, homeless encampment abatement, public education and outreach, and product bans (EPS ban and Bag ban).

Permittee Name: City of Oakland

Assessment Methods for Control Measures Other than Full Capture Devices						
<p><u>ILLEGAL DUMPING ABATEMENT</u>: City tracked volume of trash removed from City streets and number of calls received from public. Through tracking locations of each illegal dumping pickup, the City generated a “heat map” showing which of the areas in Oakland have the largest removal of illegally dumped materials. This map, shown in Attachment C.10.14 indicates that TMA #5, TMA #11 and TMA #12 have the highest incidence of calls requesting illegal dumping abatement. City uses visual assessment to determine how much of litter on streets in these TMAs is generated from illegal dumping – which is subsequently resolved within designated response time.</p> <p><u>CITY ADOPT-A-SPOT EFFORTS</u> (Jurisdiction-wide): The City has recorded the “active” sites by asking volunteers to document the number of volunteers and hours spent on each “adopted” site. These volunteer hours are recorded and used to estimate total volume of trash removed through volunteer efforts. See Attachment C.10.12 and discussion of the assessment results in the Jurisdiction-Wide Activities (Part A).</p> <p><u>VISUAL TRASH ASSESSMENTS</u>: There were visual trash assessments at 3 locations in this TMA and 2 individual facilities. Results of the facility inspections (restaurants, grocery stores, auto repair and miscellaneous sites) are summarized in the Jurisdiction-wide section. See Attachment C.10.13 for TMA visual assessment summary maps for the 3 site locations. Maps summarizing the location and results of facility inspections are found in Attachment C.10.5.</p> <p><u>JURISDICTION-WIDE ACTIVITIES</u>: See Jurisdiction-Wide Control Measures for a description of the assessment methods for control measure(s) including: Adopt-A-Drain, facility trash inspections, containment management, street-sweeping, homeless encampment abatement, public education and outreach, and product bans (EPS ban and Bag ban).</p>						
Summary of Assessment Results						
<p><u>ILLEGAL DUMPING ABATEMENT</u>: Volume of trash collected through illegal dumping program has had a NET increase of 66% since MRP adoption. City has removed a total of 34,106 cubic yards of material from City streets and right of way in FY 2014-2015 – much of it concentrated in TMA 11. Through visual assessment, the City estimates that 50% of litter in the “hot spots” within TMA #11 is illegally dumped material that is subsequently removed through its illegal dumping abatement program.</p> <p><u>CITY ADOPT-A-SPOT EFFORTS</u>: See Attachment C.10.12 and discussion of the assessment results in the Jurisdiction-Wide Activities (Part A).</p> <p><u>VISUAL TRASH ASSESSMENTS</u>: Maps summarizing the location of TMA visual assessments are found in Attachment C.10.13. Maps summarizing the location and results of facility inspections are found in Attachment C.10.5.</p> <p><u>JURISDICTION-WIDE ACTIVITIES</u>: See Jurisdiction-Wide Control Measures for a description of the assessment results for control measure(s) including: Adopt-A-Drain, facility trash inspections, containment management, street-sweeping, homeless encampment abatement, public education and outreach, and product bans (EPS ban and Bag ban).</p>

<b>Estimated % Trash Reduction in this TMA</b>					0%			

Permittee Name: City of Oakland**C.10.d ► PART C – Estimated Overall Trash Load Reduction****Discussion of Trash Reduction Estimate (including Receiving Water Cleanups):**

The percent reduction calculated for this trash reduction is an estimate. These estimates have variability due to calculation of the baseline or trash generation rate, variability in assessment data due to temporal information of the qualitative assessments of Very High, High, Medium and Low, and variability in the generation rate. Also, in areas where raw data showing volume of litter removed is not available or not consistent with other data, City has used surrogate information to estimate trash reduction. Finally, this estimate does not include percentage trash reductions for certain control measures including: homeless encampment abatement, trash container management, Adopt-A-Drain, street sweeping, facility inspections, and public education and outreach. These control measures certainly have had some trash reduction benefits which are not quantified in this estimate.

For a discussion of the variability in the bag ban reduction estimates and expanded polystyrene foam reduction estimates see the ACCWP 2013-2014 Annual Report.

Variability in Generation Rate & Baseline Rate

To get a percent reduction, Oakland had to start with a baseline amount of trash. This baseline, or trash generation rate, has used assumptions (described in the long term trash plan) to calculate an actual volume (gallons per acre) of trash generated. The variability in the trash generation rate can be expected. Some factors that make this trash generation estimate higher or lower include:

- 1) Other trash sources (including direct deposit from homeless encampments, windblown) have not been calculated or included
- 2) Each trash generation category has a range. The City's reduction estimates use the mid-point of the range

Variability in Temporal Information

- 1) See discussion in ACCWP Annual Report on Polystyrene Ban and Single Use Plastic Bag Ban.
- 2) Illegal dumping is a large source of trash and is not a consistent source.
- 3) Visual assessments are conducted at one point in time and may not always capture the typical condition of the area.

Surrogate Information

- 1) A portion of Oakland's estimated trash reduction comes from the on-land and shoreline clean-ups of its citizens volunteering to "adopt – a spot." Tracking all of the volunteers and the amount of litter they are removing has not been feasible. The City has used surrogate information from City-wide clean-up events over the last 5 years to determine how much litter, on average, a volunteer will remove in one hour. This average gallon per hour removal is applied to the number of volunteer hours reported to the City. This average gallon removed per hour is a very conservative estimate and it is likely that it underestimates the amount of trash removed. Since there is no reason or incentive to falsely report their hours and reporting their hours requires active participation, it is safe to assume that the estimate of citizen volunteer hours is likely a reasonable representation of the volunteer hours spent.
- 2) A portion of the City's trash reduction estimates comes from Business Improvement Districts' trash removal efforts. In a number of the areas, the BID has recorded the amount of litter removed. However, those actual volume estimates are not in proportion to the volume estimates in the trash generation rate model. Therefore, the City used visual assessments and communications from BID staff on what level of reduction their clean-up efforts are providing in a given area.
- 3) A portion of the City's trash reduction estimates comes from illegal dumping abatement. The City records the actual volume of illegal dumping removed. However, those actual volume estimates are not in proportion to the volume estimates in the trash generation rate model. Instead, the City identified the key areas where our illegal dumping abatement is concentrated and determined that approximately 50% of the material in those concentrated areas is illegally dumped materials which are regularly abated. Visual assessments would not provide an accurate indicator of illegal dumping trash reduction because assessments fail to document the temporal nature and variations in dumping and removing the materials.

<b>C.10.d ► PART C – Estimated Overall Trash Load Reduction</b>	
Estimated % Trash Reduction due to Jurisdictional-wide Actions (as Reported in C.10.d – Part A- <b>EPS Ban</b> )	4%
Estimated % Trash Reduction due to Jurisdictional-wide Actions (as Reported in C.10.d – Part A- <b>Bag Ban</b> )	4%
Estimated % Trash Reduction due to Jurisdictional-wide Actions (as Reported in C.10.d – Part A- <b>On-land Clean-ups</b> )	8%
Estimated % Trash Reduction due to Jurisdictional-wide Actions (as Reported in C.10.d – Part A- <b>Container Management</b> )	Not Quantified
Estimated % Trash Reduction due to Jurisdictional-wide Actions (as Reported in C.10.d – Part A- <b>Adopt-A-Drain</b> )	Not Quantified

<b>Business Improvement Districts</b>	5.6%
<b>Illegal Dumping Abatement</b>	5.9%
<b>Booms (1/4 Full Trash Capture)</b>	1.5%
<b>Sub Total for Above Actions</b>	37.3%
Estimated % Trash Reduction due to Receiving Water Cleanups (All TMAs)	10%
<b>Total Estimated % Trash Reduction FY 14-15</b>	47.3%

Permittee Name: City of Oakland

Section 11 - Provision C.11 Mercury Controls

**C.11.a.i ► Mercury Recycling Efforts**

List below or attach lists of efforts to promote, facilitate, and/or participate in collection and recycling of mercury containing devices and equipment at the consumer level (e.g., thermometers, thermostats, switches, bulbs).

See Provision C.11 Mercury Controls section of the Alameda Countywide Clean Water Program (ACCWP) FY 2014-2015 ACCWP Annual Report for a summary of countywide mercury recycling efforts.

**C.11.a.ii ► Mercury Collection**

Provide an estimate of the mass of mercury collected through these efforts, or provide a reference to a report containing this estimate.

Please refer to the Provision C.11 Mercury Controls section of the ACCWP FY 2014-2015 Annual Report for an estimate of the mass of mercury collected through collection and recycling efforts in the Countywide Program area.

- C.11.b ► Monitor Methylmercury**
- C.11.c ► Pilot Projects to Investigate and Abate Mercury Sources in Drainages**
- C.11.d ► Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices**
- C.11.e ► Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit**
- C.11.f ► Diversion of Dry Weather and First Flush Flows to POTWs**
- C.11.g ► Monitor Stormwater Mercury Pollutant Loads and Loads Reduced**
- C.11.h ► Fate and Transport Study of Mercury In Urban Runoff**
- C.11.i ► Development of a Risk Reduction Program Implemented Throughout the Region**
- C.11.j ► Develop Allocation Sharing Scheme with Caltrans**

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary  
 A summary of ACCWP and regional accomplishments for these sub-provisions are included within Provision C.11 Mercury Controls section of the ACCWP FY 2014-2015 Annual Report, and the Integrated Monitoring Report.

Section 12 - Provision C.12 PCBs Controls

**C.12.a.ii,iii ▶ Ongoing Training**

(For FY 10-11 Annual Report and Each Annual Report Thereafter) List below or attach description of ongoing training development and inspections for PCB identification, including documentation and referral to appropriate regulatory agencies (e.g. county health departments, Department of Toxic Substances Control, California Department of Public Health, and the Water Board) as necessary.

*Description:*

See Provision C.12 PCB Controls section of the Alameda County Clean Water Program (ACCWP) FY 2014-2015 ACCWP Annual Report for a summary of training conducted by the Program.

On March 14, 2015, ACCWP provided training to Oakland City stormwater staff and fire inspectors and stormwater inspectors on detecting sites with high risk of PCB. See Attachment C.12.1 for training materials.

- C.12.b ▶ Conduct Pilot Projects to Evaluate Managing PCB-Containing Materials and Wastes during Building Demolition and Renovation Activities**
- C.12.c ▶ Pilot Projects to Investigate and Abate On-land Locations with Elevated PCB Concentrations**
- C.12.d ▶ Conduct Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices**
- C.12.e ▶ Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit**
- C.12.f ▶ Diversion of Dry Weather and First Flush Flows to POTWs**
- C.12.g ▶ Monitor Stormwater PCB Pollutant Loads and Loads Reduced**
- C.12.h ▶ Fate and Transport Study of PCBs In Urban Runoff**
- C.12.i ▶ Development of a Risk Reduction Program Implemented Throughout the Region**

Permittee Name: City of Oakland

## Summary

**C.12.c ► Pilot Projects to Investigate and Abate On-land Locations with Elevated PCB Concentrations**

A summary of ACCWP and regional accomplishments for these sub-provisions are included within the Provision C.12 PCB Controls section of the ACCWP FY 2014-2015 Annual Report, and the March 2014 Integrated Monitoring Report. Oakland has also participated in other PCB reduction efforts which are discussed below.

The Ettie Street Pump Station Watershed (ESPSW) was identified as a former industrial area with potentially elevated PCB levels. In 2006 and 2007, the City of Oakland conducted a study in the ESPSW to identify PCB sources as part of a California State Water Resource Control Board (SWRCB) Proposition 13 Grant, and conducted additional work to evaluate the effectiveness of PCB removal from impervious surfaces by power/pressure washing at the request of San Francisco Bay Regional Water Quality Control Board (RWQCB), Toxics Division. The sampling data collected in the ESPSW indicated that 27% of samples exceeded 1 ppm (mg PCBs/kg sediment), with PCB concentrations in the range of 1-10 ppm categorized as "High". These studies are discussed in the 2005-2006 Kleinfelder Report, and are available on the City's website [<http://www2.oaklandnet.com/oakca1/groups/pwa/documents/report/oak026316.pdf>].

In 2010, in coordination with the Bay Area Stormwater Management Agencies Association (BASMAA) and four Bay Area municipalities (Oakland, Richmond, San Carlos, and San Jose), Oakland began its participation in Clean Watersheds for a Clean Bay (CW4CB); a project to help implement the Total Maximum Daily Load (TMDL) for PCBs. As part of this effort, in FY 2011-2012, Oakland initiated activities to further characterize PCB levels in the ESPSW. These activities included: desktop review of existing data on industrial sites and PCB concentrations, field inspections, and supplementary monitoring. In 2012, Oakland completed inspection of 18 sites and sampled 29 locations (in storm drain inlets and the public Right-of-Way areas adjacent to potential source locations). In February 2013, Geosyntec compiled and analyzed the sample results. A few sites had total PCB concentrations of 1ppm or greater, and thus fall in the "High" category. These 13 highest PCB concentrations were located around 3 facilities. These results are used to identify further sampling locations and led to the referral of the following sites listed below.

*REFERRALS (Detailed referral information on these properties is included in Attachment C.12.2)*

1. 2868 Hannah Street (APN #007-0589-028 and 007-0589-029)  
Oakland, CA 94608  
  
2847 Peralta Street (APN #007-0589-024)  
Oakland, CA 94608
2. 3438 Helen Street (APN #007-0609-026-02)  
Oakland, CA 94608
3. 2601 Peralta Street (APN #007-0586-002)  
Oakland, CA 94607

Permittee Name: City of Oakland

2730 Peralta Street (APN #005-0443-001-01)  
Oakland, CA 94607

2800 Peralta Street (APN #005-0460-006-02)  
Oakland, CA 94608

2711 Union Street (APN #005-0444-003-01)  
Oakland, CA 94607

2641 Union Street (APN #05-0444-04-01)  
Oakland, CA 94607

Oakland, CA 94607

2628 Poplar Street (APN #005-0444-016 and 005-0444-011-02)  
Oakland, CA 94607

Cross-Agency Coordination

The City has been coordinating with the United States Environmental Protection Agency (US EPA) and RWQCB to share information on cleanups, thresholds and sediment samples collected by San Francisco Estuary Institute (SFEI). As an outcome of these discussions, US EPA has identified the San Leandro Bay watershed as a pilot initiative to leverage additional loading reductions and increase resources for sediment sampling.

Subsequently, the City of Oakland identified the San Leandro Bay watershed as a “target” watershed, similar to the ESWPW for implementation of its PCB reduction strategy. See Attachment C.12.3 for a map showing historic industrial parcels in San Leandro Bay watershed.

**C.12.d ► Conduct Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices**

See Provision C.12 PCB Controls section of the Alameda Countywide Clean Water Program (ACCWP) FY 2014-2015 ACCWP Annual Report for a description of building demolition pilots conducted by the Program.

**C.12.e ► Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit**

The CW4CB effort also included installation of pilot stormwater retrofit projects to reduce PCBs. In FY 2012-2013, Oakland completed the design of six stormwater treatment tree well units that are intended to remove PCBs from stormwater by trapping and treating the polluted stormwater runoff and sediments in the tree well soil media. In addition, Oakland completed installation of a continuous deflective separation (CDS) unit that will capture polluted sediment as a by-product of slowing runoff to capture and remove trash. Installation of the tree well units was completed in February 2014.

Permittee Name: City of Oakland**C.12.g ► Monitor Stormwater PCB Pollutant Loads and Loads Reduced**

In the FY 2014-2015 rainy season, both the tree well retrofits and CDS unit were monitored for their effectiveness in removing PCBs. This information will be used in the implementation of future PCB reduction efforts.

See Provision C.12 PCB Controls section of the Alameda Countywide Clean Water Program (ACCWP) FY 2014-2015 ACCWP Annual Report for a description of monitoring stormwater PCB loads and loads reduced conducted by the Program.

**PCB Reduction Strategy: Next Steps**

In partnership with the Alameda County Clean Water Program, City of Oakland developed a protocol for identifying “potential high opportunity” (or “high likelihood) mercury/PCB management areas. See Attachment C.12.4 for property screening criteria. These “potential high opportunity” areas were identified by screening old industrial parcels that were unpaved and/or appeared to have heavy equipment, trucks on-site or other property uses consistent with PCB impacted properties. These sites were identified for focused implementation including on-site inspection and referral for sediment sampling<sup>85</sup>.

In the ESPSW, all of the old industrial parcels found next to parcels with sampling locations greater than 1 mg/kg were identified. These parcels, approximately 38 acres, were identified as potential high opportunity.

Core Swath<sup>86</sup> screening was completed in August 2014 and identified 23 parcels in the ESPSW and 21 parcels in the San Leandro Bay watershed, see Attachment C.12.5. In March 2015, the City contracted an environmental consulting firm, AMEC Foster Wheeler, to conduct field investigations of 45 sites and made recommendations for soil sampling locations. City staff and AMS provided field training and a field inspection sheet on how to identify sites for sampling (see Attachment C.12.1). Field investigations were completed in April 2015 and 26 sites were recommended for sampling. Limited access and/or insufficient sediment prevented sampling at eight (8) sites.

Additionally, the City of Oakland performed a file review of the City’s existing brownfields reports in an effort to synthesize data on properties previously sampled for PCBs. The City’s goal for this project was to identify the “High Priority” sites where PCBs have been detected in shallow soils, and to centralize and summarize sampling data. The file review was conducted by a private environmental consulting firm, Northgate Environmental Management (Northgate). Starting in March 2015, Northgate reviewed approximately 1,300 reports from the City of Oakland, which represents approximately 90% of the reports to be reviewed. Of these reports, 21 contained some form of PCB soil sampling data. Reports containing PCB data included Phase I & II Environmental Site Assessments, Soil Investigation Reports, and Remedial Action Plans from the years 2000 through 2011. Phase I Environmental Assessments were reviewed for summaries of previous soil sampling results. Phase II Environmental Site Assessments were reviewed for soil sampling analytical laboratory results. An additional 27 reports indicated the potential presence of PCBs in the soil at the property, but did not include sampling data. Reports indicating the potential presence of PCBs were generally Phase I Environmental Site Assessments that referenced the potential for PCB-containing light ballasts and caulk at a property. Information on properties noted with potential presence of PCBs and/or sampling data showing presence of PCBs will be incorporated into the screening results for “potential high opportunity.” The City of Oakland will use this information to help inform decision making on the sampling of City-owned brownfield sites for the presence of PCBs.

<sup>85</sup> Envirostor database and EPA datasets were reviewed to exclude known PCB-contaminated parcels from the “high opportunity” areas.

<sup>86</sup> Note: Railroad-owned parcels were excluded from the City’s “high-opportunity” parcels because they are non-jurisdictional and City has limited authority to inspect and remediate such sites.

Permittee Name: City of Oakland

Section 13 - Provision C.13 Copper Controls

**C.13.a.iii.(2) ▶ Training, Permitting and Enforcement Activities**

(FY 2011-2012 Annual Report and each Annual Report thereafter) Provide summaries of activities implemented to manage waste generated from cleaning and treating of copper architectural features, including copper roofs, during construction and post-construction including:

- Development of BMPs on how to manage the water during and post construction
- Requiring the use of appropriate BMPs when issuing building permits
- Educating installers and operators on appropriate BMPs
- Enforcement actions taken against noncompliance

The City continues to implement standard conditions of approval concerning architectural copper. The condition of approval is applied to projects involving architectural copper and contains Best Management Practice (BMP) information for protecting water quality during construction and post-construction.

The City has also posted informational flyers containing BMP information for the use of architectural copper in the City's Permit Center.

**C.13.d.iii ▶ Industrial Sources Copper Reduction Results**

Based upon inspection activities conducted under Provision C.4, highlight copper reduction results achieved among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed.

Summary

The City has incorporated the use of the Bay Area Stormwater Management Agencies Association (BASMAA) power-point training module titled *Inspecting Industrial / Commercial Facilities for Pollutants of Concern (POCs) Copper (Cu), Mercury (Hg), and Polychlorinated Biphenyls (PCBs)* into its inspection training tools. Inspectors review the material on an annual basis as a refresher and to ensure that they have a full understanding of environmental regulations. When conducting inspection of business facilities with a known and/or potential source of copper such as metal finishers, plating facilities, and auto dismantlers, the City inspector will apply the information and material to their inspection to assist in identifying sources of copper and any stormwater related issues. BMPs are provided to business facility owner/operator at the time of inspection.

**Permittee Name: City of Oakland**

**Section 14 - Provision C.14 PBDE, Legacy Pesticides and Selenium Controls**

Note: There are no reporting requirements in the FY 14-15 Annual Report for Section C.14.

Permittee Name: City of Oakland

**Section 15 -Provision C.15 Exempted and Conditionally Exempted Discharges**

**C.15.b.iii.(1), C.15.b.iii.(2) ► Planned and Unplanned Discharges of Potable Water**

Is your agency a water purveyor?  Yes  No

If **No**, skip to C.15.b.vi.(2):

If **Yes**, Complete the attached reporting tables or attach your own table with the same information. Provide any clarifying comments below.

**C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering**

Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:

- Promote conservation programs
- Promote outreach for less toxic pest control and landscape management
- Promote use of drought tolerant and native vegetation
- Promote outreach messages to encourage appropriate watering/irrigation practices
- Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.

Summary:

**A summary of the Countywide Program’s effort to promote the use of less-toxic pest management and the use of drought tolerant and native vegetation is included within Provision C.7 Public Information and Outreach section of the Alameda Countywide Clean Water Program (ACCWP) FY 2014-2015 ACCWP Annual Report.**

In April 2006, the City of Oakland passed an amendment to City Ordinance Chapter 15.35 Green Building Requirements for City Building Projects to add Civic Bay-Friendly Landscaping Guidelines for all City of Oakland, Redevelopment Agency and Public / Private Partnership Projects which include Landscaping to promote the measures listed above.

The Civic Bay-Friendly Landscaping ordinance promotes healthy soils, uses drought-tolerant plants, conserves water and energy, enhances wildlife habitat, reduces waste, and prevents pesticide-related pollution. The Civic Bay-Friendly Landscaping Ordinance requires that landscaping projects undertaken by the City, Redevelopment Agency or Public-Private Partnerships with a value of \$100,000 or more and a size of 10,000 square feet or more meet or exceed a minimum number of Bay-Friendly Landscaping requirements. In order to comply with the Ordinance, a project must score at least 60 points out of the 219 possible points on the Bay Friendly Scorecard and must include, to the extent applicable, nine (9) required practices (five of which are current City practices):

- Mulch (current City practice)
- Amend the soil with compost before planting (current City practice)

Permittee Name: City of Oakland

- Reduce and recycle landscape construction waste (current City practice)
- No species requiring shearing, such as formal hedges
- Do not plant invasive species (current City practice)
- Grow drought tolerant, California native, Mediterranean or climate adapted plants (current City practice)
- Minimize the lawn
- Specify weather-based irrigation controllers (existing EBMUD requirement for new water meters)
- No spray heads for areas less than eight (8) feet wide (existing EBMUD requirement new water meters)

In addition to the Bay Friendly Landscaping Ordinance, the City of Oakland Illicit Discharge Inspectors treat cases of ongoing, large volume landscape irrigation runoff as illicit discharges. Complaint, inspection, and enforcement of over irrigation runoff are handled in the same manner as any illicit discharges, and handled under the Enforcement Response Plan (ERP) standards.

C.15.b.iii.(1) ► Planned Discharges of the Potable Water System										
Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Duration of Discharge (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L)	pH (standard units)	Discharge Turbidity <sup>87</sup> (NTU)	Implemented BMPs & Corrective Actions
Not applicable										

<sup>87</sup>Monitor the receiving water for turbidity if necessary and feasible. Include data in this column if available.

C.15.b.iii.(2) ► Unplanned Discharges of the Potable Water System <sup>88</sup>														
Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Discharge Duration (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L) <sup>89</sup>	pH (standard units) <sup>52</sup>	Discharge Turbidity (Visual) <sup>52</sup> ,	Implemented BMPs & Corrective Actions	Time of discharge discovery	Regulatory Agency Notification Time <sup>90</sup>	Inspector arrival time	Responding crew arrival time
Not applicable														

<sup>88</sup>This table contains all of the unplanned discharges that occurred in this FY.

<sup>89</sup>Monitoring data is only required for 10% of the unplanned discharges. If you monitored more than 10% of your unplanned discharges, report all of the data collected.

<sup>90</sup>. Notification to Water Board staff is required for unplanned discharges where the chlorine residual is >0.05 mg/L and total volume is ≥ 50,000 gallons. Notification to State Office of Emergency Services is required after becoming aware of aquatic impacts as a result of unplanned discharge or when the discharge might endanger or compromise public health and safety.

OAKLAND CITY COUNCIL

59482

RESOLUTION No. \_\_\_\_\_ C.M.S.

INTRODUCED BY COUNCILMAN \_\_\_\_\_

TAL

RESOLUTION ADOPTING POLICIES REGARDING USE OF  
CHEMICAL PESTICIDES BY CITY DEPARTMENTS TO  
CONTROL UNWANTED PLANT GROWTH, FUNGI AND INSECTS

\* \* \* \* \*

WHEREAS, the City Council established a Committee of citizens and City staff to study the use and effects of pesticides to control the pest population; and

WHEREAS, the Committee has completed its study of the issues and has developed a series of policies regulating the use of pesticides to control unwanted plant growth, fungi and insects; now therefore, be it

RESOLVED: that City departments, shall, to the fullest extent possible, adopt and implement Integrated Pest Management (IPM) techniques and methods as standard operating procedure to approach pest problems, and employ a combination of control strategies, placing major reliance on those with the least wanted impacts; and be it

FURTHER RESOLVED: that City departments shall consider pest maintenance techniques and use of resistant vegetation to reduce pesticide and other maintenance techniques in the process of planning future parks and replacing vegetation in existing facilities; and be it

FURTHER RESOLVED: that the use of chemical pesticides shall be minimized as much as possible and shall be considered only as a last resort to more environmentally sound alternatives such as cultural and manual pest controls; that the amount and types of chemical pesticides stored and used shall be kept to a minimum; that departments shall develop, maintain and update a list of approved chemicals to be made available to the public; that under no circumstance shall any chemical pesticide be applied in amounts other than those for which it is registered and approved; and be it

FURTHER RESOLVED: that City staff shall keep detailed records of all chemical applications administered by City staff or contractors engaged by the City with such records available for public inspection and reviewed periodically by staff to ensure compliance with relevant rules and regulations; that City departments which employ the use of chemicals shall maintain records of pest-related complaints; and be it

FURTHER RESOLVED: that all City employees engaged in the application of chemical pesticides shall be trained and certified, and provided with adequate supervision and proper safety equipment; and be it

FURTHER RESOLVED: that prior posting of all pesticide applications shall be provided to the public in the form of thirty days advance notice for regular seasonal spraying programs and same day notification for minor or unscheduled applications where notice shall remain for a reasonable period after completion so that the public will be aware of a chemical application in the area; and be it

FURTHER RESOLVED: that community participation shall be sought for the purpose of developing alternatives to chemical pesticides and that City departments will hold public meetings at the community's request to develop options to deal with the pest population and weed problems by means other than chemical pesticides; and be it

FURTHER RESOLVED: that public agencies in Oakland shall be requested to cooperate by adhering to these policies; and be it

FURTHER RESOLVED: that the Committee to study pesticides shall review techniques applied by departments and their contractors in City owned structures for development of a series of recommendations relating to the matter.

## OAKLAND CITY COUNCIL

RESOLUTION NO. 73968 C. M. S.

REVISED

INTRODUCED BY COUNCILMEMBER \_\_\_\_\_

RESOLUTION ADOPTING INTEGRATED PEST MANAGEMENT  
POLICIES FOR THE CITY OF OAKLAND

WHEREAS, the City recognizes that population levels of certain plants, insects, plant pathogens, vertebrates, and other pests may create a nuisance or threaten the public health and safety, and therefore need to be controlled; and

WHEREAS, the City recognizes that the use of pesticides can present a potential hazard to the citizens of Oakland, City staff and the environment, now therefore be it

RESOLVED: That City departments shall, to the fullest extent possible, adopt and implement Integrated Pest Management (IPM) techniques and methods as standard operating procedures to manage pest problems; and be it

FURTHER RESOLVED: That, effective January 1, 1998, pesticides shall not be used in or on City owned property or facilities, except as specifically exempted by this resolution; and be it

FURTHER RESOLVED: That the only exemptions to the ban on pesticides established herein are as follows:

1. In those instances where the use of pesticides is required to preserve and/or protect human health and safety;
2. The use of swimming pool chemicals, disinfectants, and other antimicrobials;
3. The use of pesticidal soaps, insect growth regulators, microbials, botanicals, synthetic pyrethroids, horticultural oils, and insecticidal bait stations;
4. At municipal golf courses (signage shall be provided warning golfers of the pesticides used, the location, and date of application);
5. At municipal putting and lawn bowling greens (with signage as per 4. above);
6. At the Morcom Rose Garden (with signage as per 4. above);
7. For weed control in the construction of new landscaping and ballfields (with signage as per 4. above);
8. In sports fields, to control gophers, moles, and ground squirrels;
9. In the Oakland Museum of California, to protect museum artifacts, artworks, and collections;

- 10. Around fire hydrants in selected areas where weed growth threatens to obscure them;
- 11. On public streets and rights-of-way maintained by the Public Works Agency; and be it

FURTHER RESOLVED: That exemption 1 above shall only apply to situations that conform to guidelines established by the Alameda County Health Agency, and that herbicide usage is not exempted by exemption 6 above; and be it

FURTHER RESOLVED: That when the use of any pesticide is determined to be necessary, the least hazardous effective available pesticide will be used; and be it

FURTHER RESOLVED: That category 1 pesticides shall not be used on any City property except for the use of aluminum phosphide on sports fields for vertebrate control; and be it

FURTHER RESOLVED: That only pesticides that are approved and registered with the Environmental Protection Agency and by the State of California will be used; and be it

FURTHER RESOLVED: That if contractors are used to apply pesticides, they must be licensed by the State of California as Pest Control Operators; and be it

FURTHER RESOLVED: That public notification of pesticide use be done through signage of areas being treated, marker dyes in sprays, and public education programs; and be it

FURTHER RESOLVED: That City employees are not to bring pesticides from home for use on City property. This includes pesticides that are packaged for home use; and be it

FURTHER RESOLVED: That each City agency have a person designated to be responsible for coordinating pest control issues; and be it

FURTHER RESOLVED: That the Citizens' IPM Advisory Committee shall continue to advise the City Council on pest control practices.

RESOLUTION No. 76254 C. M. S.

INTRODUCED BY COUNCILMEMBER \_\_\_\_\_

*MAF*

## RESOLUTION AUTHORIZING A LIMITED EXEMPTION TO THE INTEGRATED PEST MANAGEMENT POLICY TO USE HERBICIDES ON LANDSCAPED STREET MEDIANS

WHEREAS, in 1997 City Council approved the implementation of a comprehensive Integrated Pest Management (IPM) policy and passed Resolution No. 73968 C.M.S. that prohibited the use of pesticides on City property except as specifically exempted; and

WHEREAS, the Office of Parks and Recreation maintains landscaping in parks, open space, and landscaped street medians; and

WHEREAS, landscaped street medians are typically designed as long and narrow landscaped areas with minimal public use; and

WHEREAS, landscaped street medians are potentially dangerous places for employees performing landscape maintenance work due to erratic and speeding drivers; and

WHEREAS, the closure of certain traffic lanes in order to allow City employees to perform landscape maintenance safely and efficiently causes traffic delays and congestion along major streets; and

WHEREAS, the disadvantages of using gasoline powered string mowers to cut down weeds on street medians outweighs the advantages; and

WHEREAS, the manual removal of weeds is a time consuming and costly method of controlling weed growth that diverts staff resources away from park maintenance activities that are a direct service to the public; now therefore be it

RESOLVED: That the Oakland City Council hereby grants a limited exemption to the Integrated Pest Management policy by allowing limited herbicide use on landscaped street medians to control weeds and undesirable plants; and be it

FURTHER RESOLVED: That the Office of the City Attorney has approved this resolution as to form and legality, and a copy will be on file in the Office of the City Clerk.

I hereby certify that the foregoing is a full, true and correct copy of a Resolution passed by the City Council of the City of Oakland on JAN 30 2001

CEDA FLOYD  
City Clerk and Clerk of the Council

**Re: Formal Warning to Comply with Chapter 8.07, Title 8 of the Oakland Municipal Code:  
Polystyrene Foam Food Service Ware**

Dear Name:

This is to inform you that this office has received complaints of the following violation of the Polystyrene Foam Food Service Ware Ordinance, Chapter 8.07 of Title 8 of the Oakland Municipal Code, at your business: Business Name located at Business Address

1. That your business serves prepared food on polystyrene foam food service ware.

The City reserves the right to inspect your business to determine whether you are in compliance with the terms of the above cited regulations. After Date, you must ensure that prepared foods are not served on polystyrene foam food service ware at Business Name.

To facilitate your compliance with the ordinance, please find enclosed a copy of the brochure that was sent to food vendors in July 2007. It contains additional information about the ordinance requirements, which you may find helpful. If your food service ware vendor is unaware of substitute products, you will find many helpful resources, including a Distributors List and a list of Bio-Based Products, at the City's Public Works Agency website, [www.oaklandgreenware.com](http://www.oaklandgreenware.com).

Thank you for your cooperation in helping to make our City a healthier place to do business. If you have any questions about this matter, you may contact the Recycling Hotline at (510) 238-SAVE (7283) for more information.

Sincerely,

Becky Dowdakin  
Solid Waste & Recycling Program Supervisor

**Proposition 84 Study Summary**

## *Tracking California's Trash*

The *Tracking California's Trash Study* is being conducted by the Bay Area Stormwater Management Agency Association (BASMAA) through funding by Proposition 84. Project outputs include the development of rigorous and repeatable trash monitoring methods, trash reduction strategies and development of a web-based portal that disseminates related information and recommendations to the public. Results of the study are expected in December 2016.

The objective of the *Tracking California's Trash* study is threefold:

- 1) Developing Trash Trends Monitoring Methods to determine how much trash in receiving waters. This includes methods to monitor trash transported on the surface, in the water column and as bed load in the receiving water. Study will look at water bodies in San Francisco Bay Region and Los Angeles Region. Study will consider:
  - a. Receiving Water Trash Flux Monitoring Methods
  - b. Stormwater Conveyance System Monitoring Methods
- 2) Evaluating the Effectiveness and Costs of Trash Control Measures. This study will quantitatively measure trash removed pre- and post- street sweeping events including evaluation of different street sweeping frequencies in areas with varied trash generation rates. Study will also evaluate trash removed pre- and post-sweeping in combination with auto retractable screens. Study will also evaluate the cost-effectiveness of such measures.
- 3) Developing a Web-based Portal to Disseminate Related Information.

More information is available on the BASMAA website at <http://www.basmaa.org/>

Mr. Jones  
ABC Facility  
0000 San Leandro St.  
Oakland CA 94621

RE: Courtesy Notification of Stormwater Discharge

Dear Mr. Jones:

Litter left on private lots and City streets eventually washes into storm drains and creeks where it discharges directly into the Oakland Estuary and San Francisco Bay. Littered areas are a source of plastics and other materials that contribute to litter pollution in local creeks and waterways.

Your property/business was inspected on April 15, 2015 to assess compliance with stormwater management requirements. During this compliance review, our inspectors observed and documented an excess of litter on your property. The attached handout shows four levels of trash. To comply with City stormwater requirements (O.M.C. 13.16), your property must be maintained litter-free (Category A) to ensure that there are no illicit discharges of material into the storm drains and waterways.

This is a courtesy letter to allow you the opportunity to improve the maintenance of your property to remove litter and other materials that could cause an illicit stormwater discharge. Our inspectors will be revisiting your facility to determine if the necessary steps have been taken to meet stormwater requirements. We appreciate your attention to this issue and hope that you will take steps to prevent litter pollution entering our creeks, the Oakland Estuary, and the San Francisco Bay. If you have already taken steps to control litter on your property, please accept our thanks. No further action is needed on your part.

If you have any questions or concerns regarding stormwater violations in Oakland, please contact Craig Pon at 510-238-6544 or [cpon@oaklandnet.com](mailto:cpon@oaklandnet.com). For specific questions about litter control and water quality, please contact Rebecca Tuden at (510) 238-6266 or [rtuden@oaklandnet.com](mailto:rtuden@oaklandnet.com).

Sincerely,

Lesley Estes  
Watershed Program Manager

**Sample Waste Management Letter – Container Overage**

WM of Northern California  
172 98th Ave  
Oakland, CA, 94603-1004

<\*Billing Name\*>  
<\*Billing Address\*>  
<\*Billing City\*> , <\*Billing State\*> <\*Billing Zip\*>

<\*Calendar Date\*> Account: <\*Account\*> Incident: <\*Reference Number\*>

Dear <\*Billing Name\*> :

During our most recent service call to your location on <\*Incident Date\*> , we noticed your waste container(s) were overfilled and overflowing. The enclosed photo shows you what we encountered.

As you can see from the photo, overfilling problems continue to occur at <\*Customer Company\*> . As a result, a fee of <\*Overage Charge\*> will appear on your next Waste Management invoice.

A Waste Management representative will contact you to discuss modifying your collection service program to reflect your actual volumes and avoid these charges in the future. Upgrading your service will not only save your company money, but will help avoid problems caused by overfilling, such as litter, vector problems and general unsightliness. Please contact Customer Service at <\*Rep Phone Number\*> with any questions or concerns.

Cordially,

**ATTACHMENT C.10 (8)**

**City of Oakland**

**Courtesy Notification of Inadequate Garbage Service**

{DATE}

**SUBJECT: Courtesy Notification of Inadequate Garbage Service**

Dear Property Owner /Business Owner/ Resident,

Runoff pollution from City streets and neighborhoods washes into storm drains and creeks where it discharges directly into the Oakland Estuary and San Francisco Bay. The City of Oakland, alongside other Bay Area municipalities, is required to reduce the amount of trash pollution entering our creeks and waterways. Overfilled and overflowing trash containers are a major source of plastics and other trash that contribute to litter pollution in local creeks and waterways.

During the servicing of the waste receptacle at this property in the last 12 months, the City's waste hauler, Waste Management of Alameda County, observed and documented an overfilled or overflowing waste receptacle. Written notice of this overage was provided to the account holder and the account was invoiced for the additional volume collected. Continued overages may make you subject to code enforcement action for blight and inadequate service (Oakland Municipal Codes 8.24, 8.28 and 15.08.230).

This is a courtesy letter to allow you the opportunity to modify your waste collection service to help avoid problems in the future and reduce the potential to cause litter pollution. We appreciate your attention to this issue and hope that you will take steps to prevent litter pollution entering our creeks, the Oakland Estuary, and the San Francisco Bay. If you have already taken steps to adjust your service level, please accept our thanks. No further action is needed on your part.

If you have any questions or concerns regarding stormwater pollution and/or water quality, in Oakland, please contact Rebecca Tuden at (510) 238-6266 or [rtuden@oaklandnet.com](mailto:rtuden@oaklandnet.com). For questions regarding your collection service, please contact Waste Management of Alameda County at (510) 613-8710.

More information on watershed and stormwater management is available at [oaklandcreeks.org](http://oaklandcreeks.org). Information on the city's recycling program is available at <http://www.OaklandRecycles.com/Biz>.

**ReThink Disposable Program Materials**

**2014-2015**

## **Summary of Oakland Outreach**

Clean Water Fund's (CWF) auditors conducted outreach in a handful of Oakland business commercial districts that have a concentration of food businesses with take-out disposable food and beverage packaging. CWF developed various program materials for recognizing businesses and engaging customers to minimize disposable food and beverage packaging. These materials are included as Appendix A. In order for a business to be considered a ReThink Disposable participant, they must implement the five standard minimum practices and select at minimum four additional source reduction Best Management Practices (BMPs). Please refer to the back side of the *Business Agreement Form* attached to this email to see the BMPs. Additionally, CWF completed its first institutional cafeteria foodware transition project at a high school in Oakland, and the case study is attached.

## **Business Outreach and Engagement Highlights**

**Outreach** – Observed and identified 186 businesses candidates

**Met with-** 106 businesses and gave them program materials

**Interested-** 44 businesses

**Signed up-** 18 Restaurants

**Total Oakland Restaurants in process or completed=** 15

## **Businesses that Completed with Data (3)**

**Café 15-** 597 15th St. Oakland CA

### **BMPs Implemented:**

- Replaced compostable plastic cup with a reusable tumbler
- Made lids available only for to-go orders
- Made straws available by request only
- Replaced sugar packets with bulk dispenser
- Offered and advertised a BYO cup incentive

### **Results:**

- Annual Cost Savings: \$870.68
- Waste Prevented: 311 lbs.

**Crossburgers-** 300 Frank H Ogawa Plaza Suite 150, Oakland CA

### **BMPs Implemented:**

- Disposable Food Trays for french fries were eliminated for on-site diners and fries are now served directly on the customer's tray.
- Napkins offered in a one-at-a-time dispenser rather than stacked at the counter.
- All disposable cups for soda and water were replaced with reusable glasses.

### **Results:**

- Annual Cost Savings: \$555.64
- Waste Prevented: 685 lbs.

**Communité Table** – 4171 MacArthur Blvd, Oakland, CA

### **BMPs Implemented:**

- Replaced brown sugar packets with bulk sugar
- Made straws available upon request only
- Replaced wooden stirrers with steel spoons

### **Results:**

- Annual Cost Savings: \$86.82
- Waste Prevented: 266 lbs.

## **Businesses that Completed with No Data (1)**

**Café 475-** 475 14th Street, Oakland CA

### **BMPs Implemented:**

- Install a one-at-a-time napkin dispenser.
- Utilize bulk containers for ketchup and mustard.
- Reusable coffee cups made available at the self service coffee station for dine-in customers.
- Reusable tumblers replaced disposable cups for water and soda for dine in customers.
- Offered and advertise a BYO cup incentive.

## **Model Businesses (1)**

**The New Parkway-** 474 24<sup>th</sup> Street, Oakland CA

CWF selected to feature the New Parkway theatre as a “Model Business” because they do not use any single use disposable foodware in their operations which is unique for a movie theatre. We will use this business as an example to other businesses that face challenges to implementing reusables.

### **BMPs Implemented:**

- Eliminated plastic straws and only reusable straws are available to customers who request them
- All reusable foodware, only bulk dispensers and cloth napkins used for on-site dining.

## **Businesses that are in Process (10)**

**Rotisserie Deli** (2 locations)- 200 Frank Ogawa Plz, and 361 19th St, Oakland

- Provide Reusable to-go boxes for customers to purchase.
- Offer and advertise a discount for a reusable to-go Box.
- Implement a one-at-a-time napkin dispenser.

**Liba Falafel-** 380 17<sup>th</sup> Street

- Provide unwrapped straws in a dispenser.
- Discontinue serving lids on drinks, make lids self service.
- Replace disposable salad bowl, and chips bowl with a reusable alternative.
- Minimize to-go packaging on chips to-go.

**Bakery El Sol-** 3340 E12th Street #5

- Offer reusable coffee mugs for on-site dining.
- Provide cream in a bulk dispenser.
- Offer and advertise a “bring your own cup” incentive.
- Minimize packaging by serving dine-in customers on a reusable platter.
- Offer reusable utensils and platters for customers to pick out bakery items.

**Bhugay’s Sushi To-Go-** 1200 Clay St. #150

- Replace disposable udon bowl and miso soup bowl with a reusable alternative for on-site dining.
- Provide reusable soup spoons for on-site diners.
- Implement bulk soy sauce for on-site dining.
- Implement a one-at-a-time napkin dispenser

**Big G Burger-** 333 17th Street

- Implement a new self service station for all condiments and to- go cutlery.
- Implement an “ask first” policy for to-go cutlery and condiments.

**Cactus Taqueria-** 5642 College Ave

- Replace disposable salsa cups and side cups with reusable ramekins for on-site diners.

- Replace disposable cold cups with reusable tumblers for on-site diners.

**Taiwan Bento-** 412 22<sup>nd</sup> Street, Oakland CA

- Replace disposable drink cups with a reusable mug for on-site dining.
- Implement a one-at-a-time napkin dispenser.
- Reorganize self service station.
- Eliminate the disposable lid on the Bento box for on-site diners.
- Replace disposable bento boxes with a reusable alternative.

**Café Talavera-** 130 Frank Ogawa Plaza, Oakland CA

- Implement a one-at-a-time napkin dispenser.
- Replace disposable 12 oz and 16 oz cups with a reusable tumbler for on-site diners.
- Replace disposable salsa cups with reusable ramekins for on-site diners, and an ask first policy for to-go salsa.

**Tia Maria-** 1221 Broadway Suite 45, Oakland CA

- Replace paper plates with a reusable basket for on-site diners.
- Provide unwrapped straws in a dispenser.
- Eliminate the chip bag for on-site diners, serve chips directly on the plate.

Appendix A: ReThink Disposable Materials

Image 1: BYO Cup Advertisement and Incentive

Image 2: Napkin Dispenser Sign

Image 3: Take Only What You Need Sign for Self Service Station Sides A and B

Image 4: Refuse Straw Sign

Image 5: *ReThink Disposable* Window Decal for Participating Businesses

Image 6: *ReThink Disposable* Business Recognition Poster

The poster features the 'ReThink Disposable' logo and tagline at the top. Below it, the text reads: 'The Sacred Wheel is a ReThink Disposable participating business.' To the left, there are images of reusable items: a silver thermos, a green tote bag, a white coffee cup, a white plate with silverware, and a white napkin dispenser. To the right, a list of practices is provided:

1. Replaced disposable tasting spoons, cups, bowls, cutlery, and condiment cups with reusable dishware for on-site dining.
2. Offer napkins in a self-serve dispenser.
3. Straws are only available upon request.
4. For to-go orders, we ask customers if they need disposable items like utensils and napkins.

Below the list are four circular icons with diagonal lines through them, representing prohibited items: disposable cutlery, disposable cups, disposable napkins, and disposable straws. At the bottom, the website 'www.rethinkdisposable.org' is displayed.

**www.rethinkdisposable.org**

ReThink Disposable is a project of Clean Water Fund in coordination with City of Cupertino Department of Public Works, City of Oakland Department of Public Works, City of Sunnyvale Environmental Services Department, County of San Mateo Department of Public Works, San Francisco Department of the Environment, San Jose Department of Environmental Services, South San Francisco Department of Public Works, and StopWaste (Alameda County).

Support for ReThink Disposable is provided by: US EPA, San Francisco Bay Water Quality Improvement Fund, StopWaste (Alameda County), Lisa and Douglas Goldman Fund, California Coastal Commission Whale Tail Grant, Santa Clara Valley Water District, and Klean Kanteen.

**2014 Environmental Stewardship Highlights and Numbers**

**(Adopt a Drain Program Details)**

**2014-2015**

## Environmental Stewardship Team 2014 Highlights and Numbers

The Stewardship Team has done some impressive work supporting volunteers and community groups to clean, green, and beautify Oakland in 2014. Our city is a safer, healthier, more vibrant, and beautiful place; and our communities are more engaged, connected, and rooted to each other and Oakland through this transformative work.

We've compiled some year-end numbers to demonstrate the magnitude of our work. In some cases these numbers may underestimate the actual efforts on-the-ground.

<b>2014 Stewardship Program Numbers</b>	
Approximate (Jan-Dec 2014) # of cleanup/beautification events (excluding drains)	5,355
Approximate Adopt a Spot and one-time community cleanup events	2,686
Approximate Adopt a Creek events (excluding Lake Merritt Institute clean-ups)	377
Approximate Adopt a Park events	1,943
# of Adopt a Spot partner organizations	168
# of Adopt a Drain Adopters (to date)	548
# of Adopt of Spot Adopters (to date)	248
# of Adopt a Park Adopters (to date)	80
# of Adopt a Creek Adopters (to date)	29
New sites adopted in 2014	392*
Adopt a Spot growth rate	61.5%**
Approximate Total # of Volunteers Hours (excluding Adopt a Drain hours)	67,903
Creek to Bay Day sites	34
Creek to Bay Day volunteers	1,231
Earth Day sites	90
Earth Day volunteers	2,625
# of new mosaic installations on litter containers and in parks	5
# of youth trained by Team Oakland	110
# of youth completing Team Oakland season	87

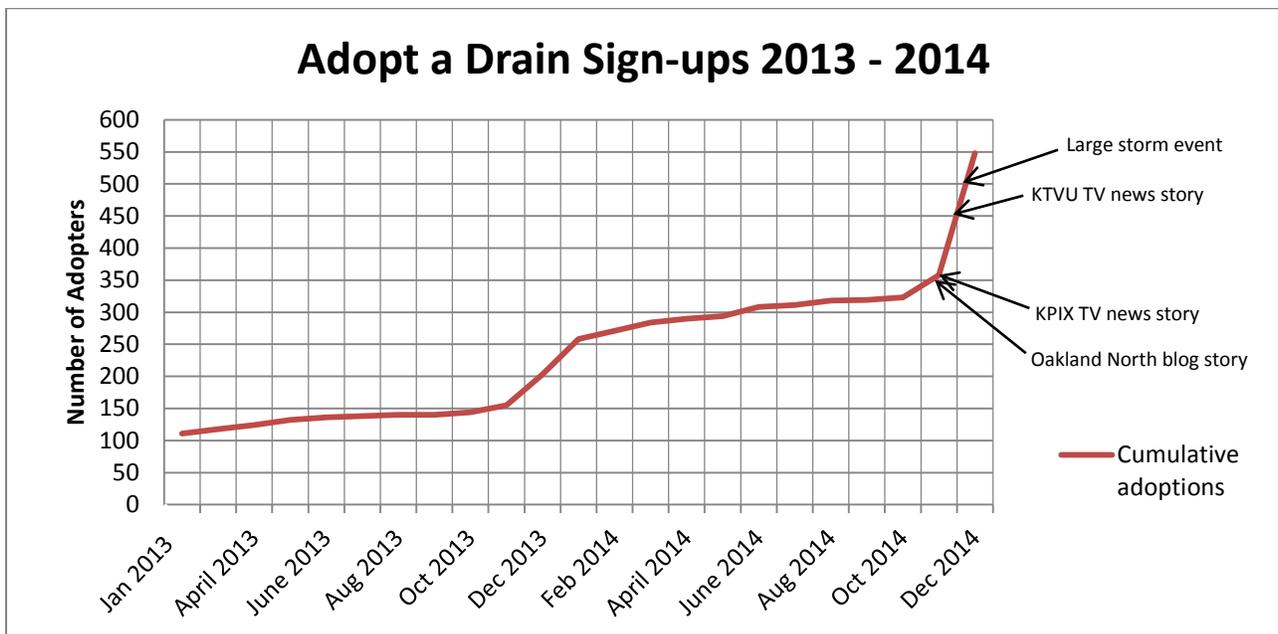

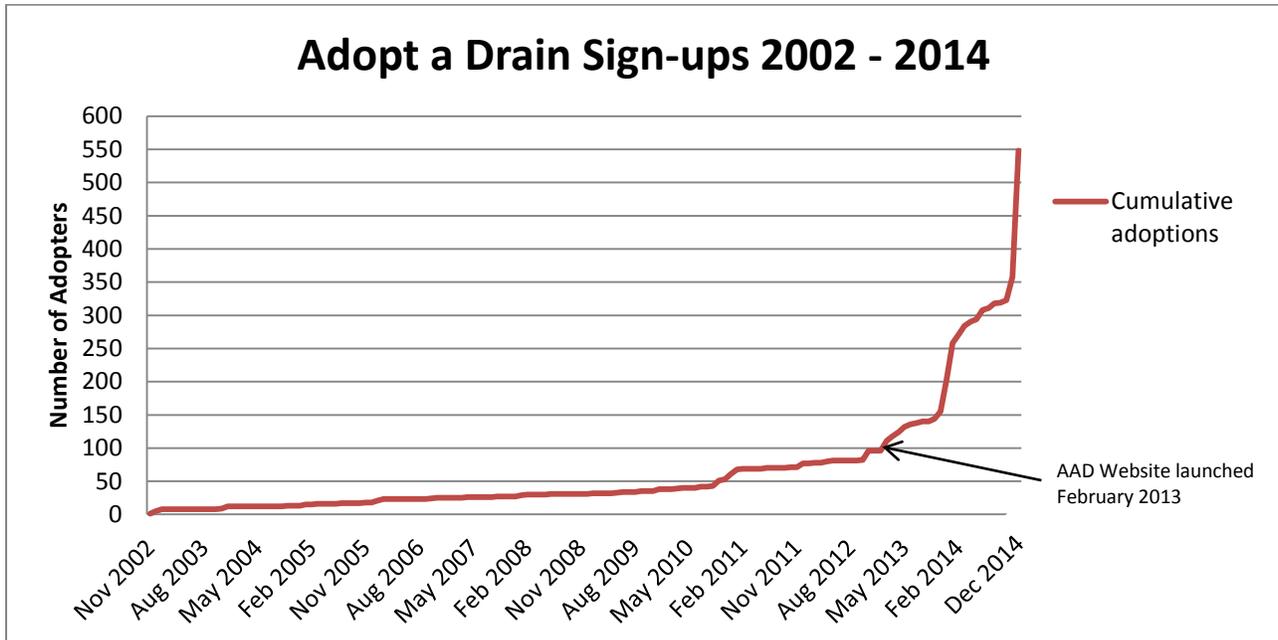

\*This includes 350 new storm drain adopters, 14 parks and 28 spots.

\*\*This includes 110% growth rate for Adopt A Drain, and 13% growth rate for all other Adopt A Spot programs.

<b>Lake Merritt Institute Volunteer Numbers</b>			#'s below are components of cumulative #'s		
pounds of trash removed	# of bags filled	cubic yards of trash removed	# of cleanups	# of volunteers	volunteer hours
20,020	1,066	128	238	1,324	2,295.5

## Adopt a Drain

Registration in the [Adopt a Drain](#) program has more than doubled in 2014 with 350 new adopters (110% growth rate). In December alone, 190 people adopted storm drains. 548 volunteers are registered as of January 1, 2015, and over half have adopted multiple drains bringing the total number of adopted storm drains to 787. Adopt a Drain is approaching 10% adoption rate of the City's more than 10,000 storm drains.

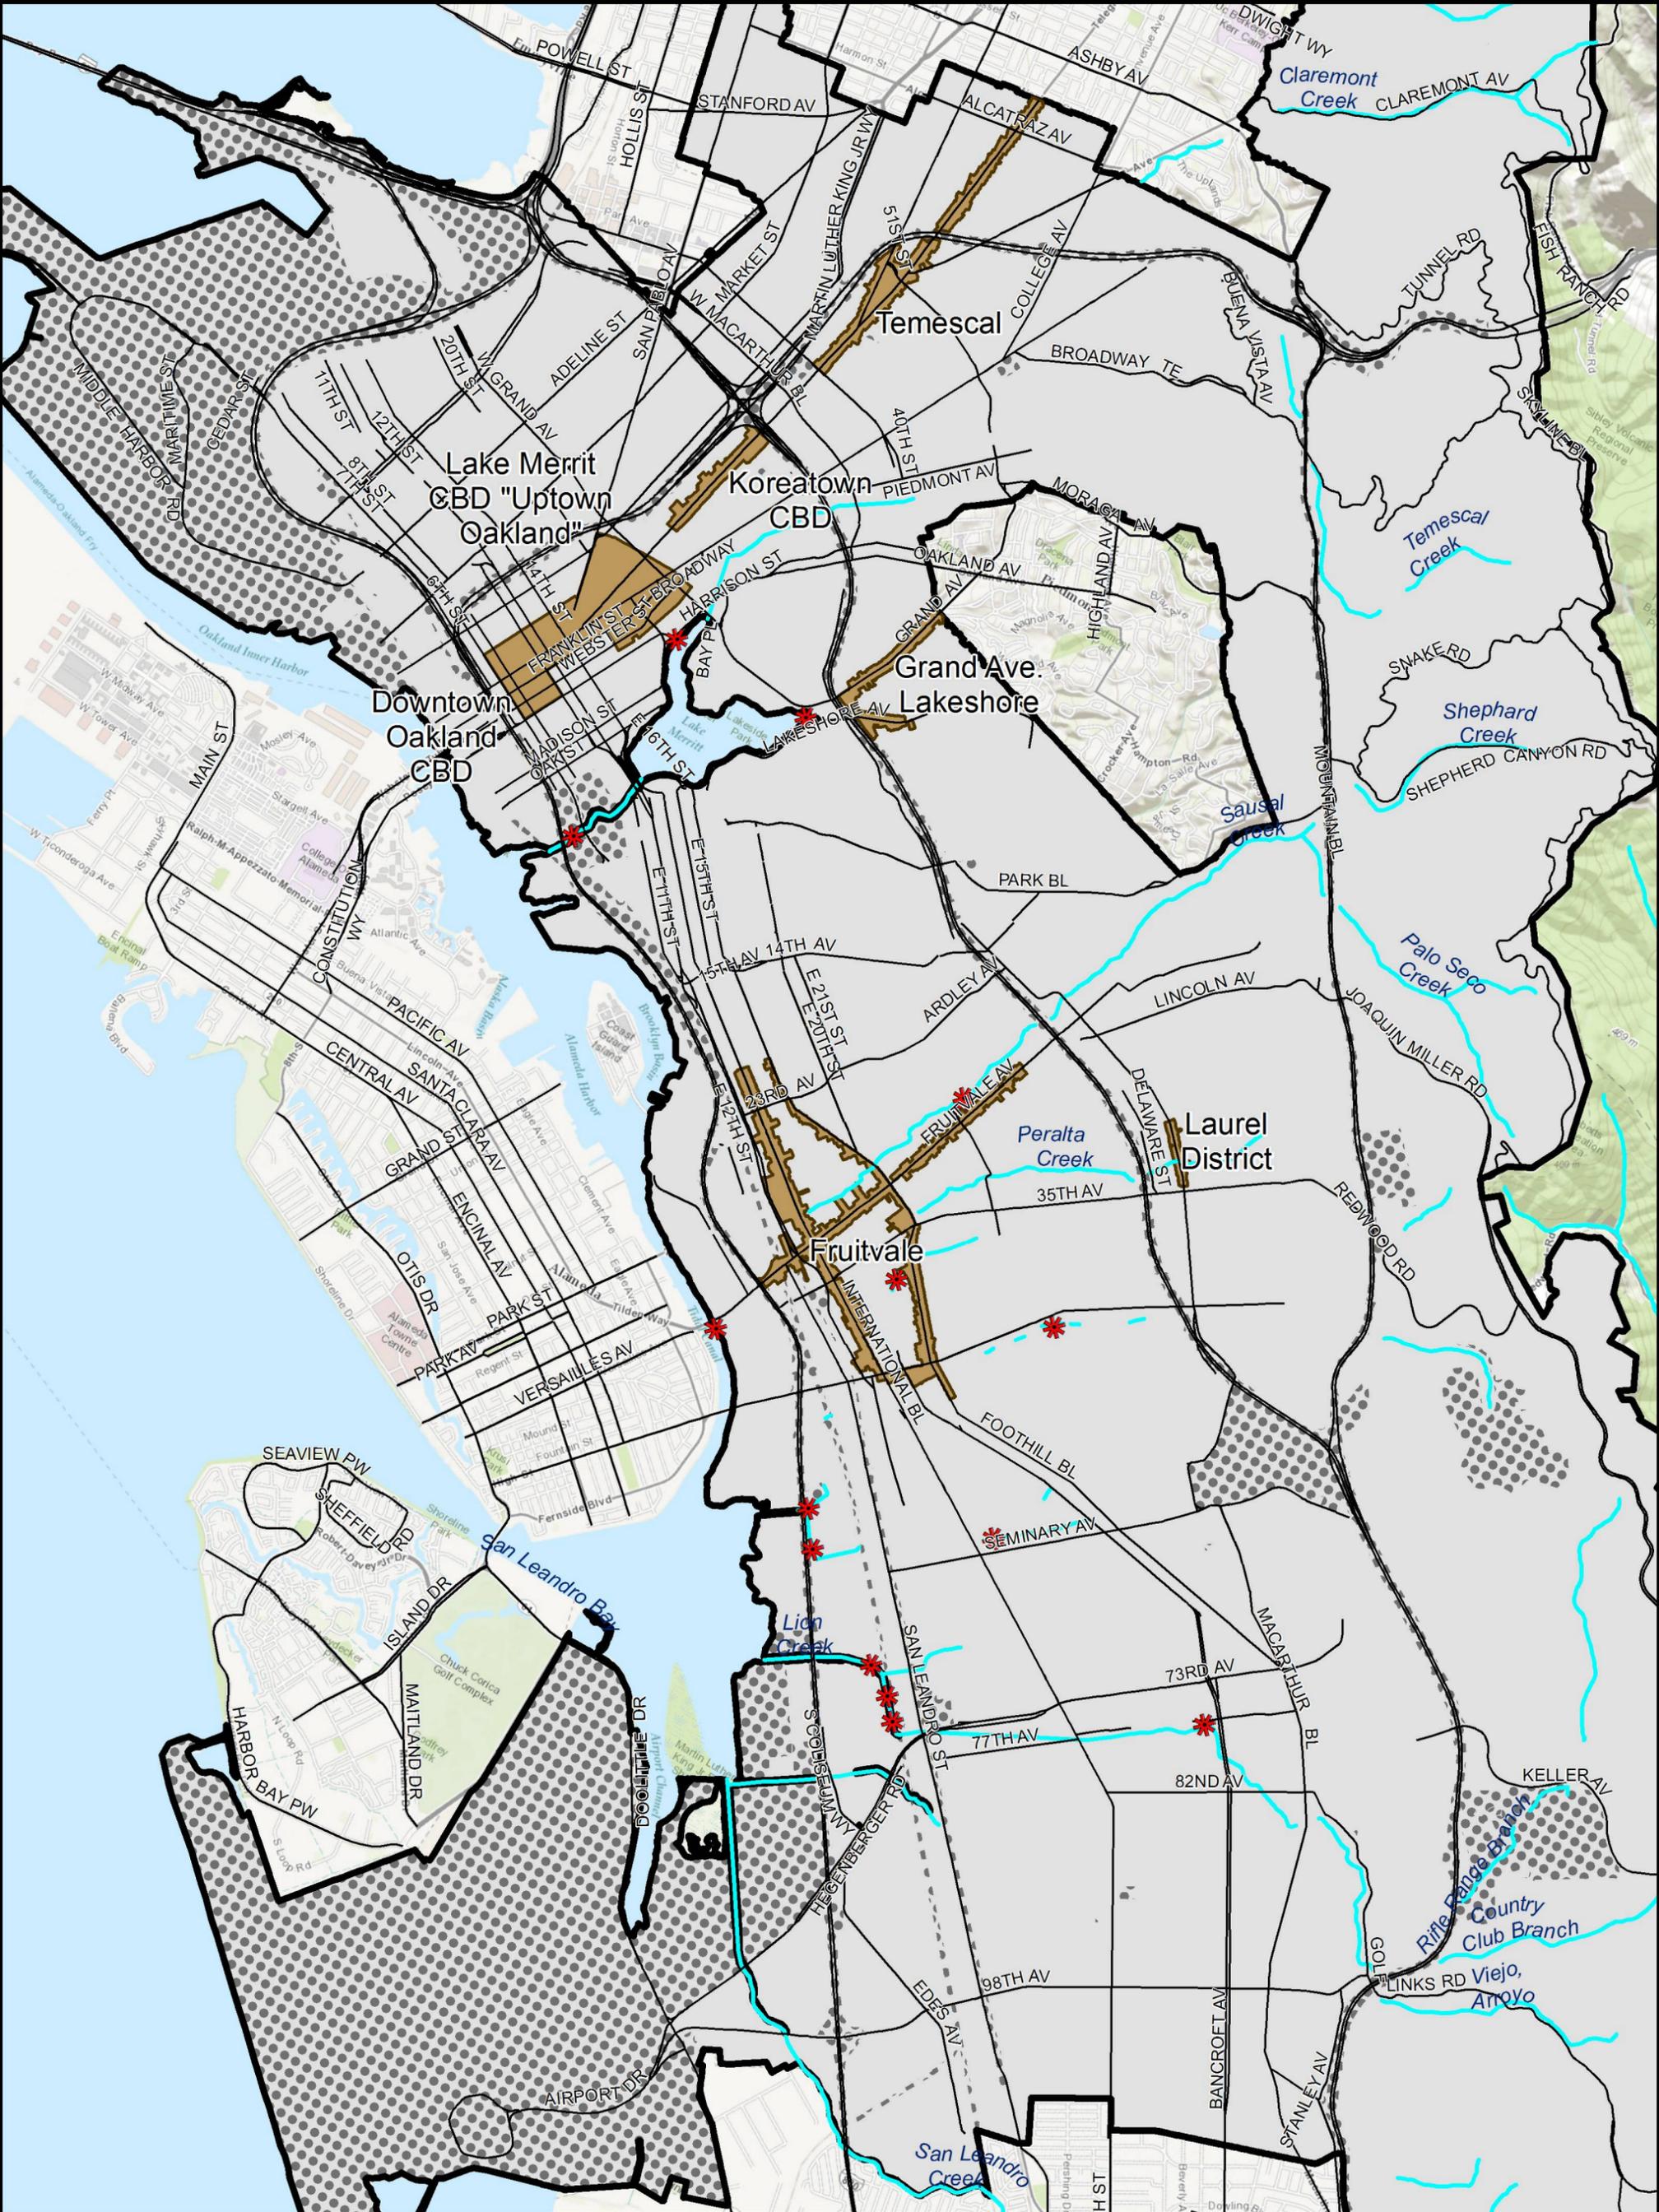

The [Adopt a Drain](#) program has been receiving interest from other municipalities looking to Oakland as a model. Staff has received calls from nearby cities like Alameda, Los Altos, Redwood City, as well as Fort Worth, Texas, and [Burlington, Vermont](#) which launched a program in 2014 based on Oakland's.

<http://www.oaklandcityattorney.org/>

## **Oakland cracks down on illegal dumping**

### **City Attorney, Public Works Agency and City Administrator launch enforcement effort against individuals responsible for widespread neighborhood blight**

OAKLAND, CA – With help from a growing number of concerned citizens, the City of Oakland is going after individuals who are responsible for one of the worst sources of civic blight in Oakland: illegal dumping.

The Illegal Dumping Enforcement Action initiative – a joint effort by Oakland City Attorney Barbara Parker, the Public Works Agency and the City Administrator's Office – uses photos, videos and other evidence from members of the public to track down illegal dumpers and make them pay for disrespecting Oakland's residents, businesses and taxpayers.

Dumping old mattresses, furniture, construction debris, garbage and other items on sidewalks, in parks and under freeways is a major source of blight in neighborhoods across Oakland.

"Oaklanders have had enough of this disrespect of our beautiful city; we will not be a dumping ground," City Attorney Barbara Parker said. "Illegal dumping is more than just unsightly. It also has a chilling effect on the quality of life in our neighborhoods, and creates an environment of blight and lawlessness that can encourage more serious crime and violence. Making Oakland a cleaner city will make our city safer."

Parker also thanked members of the public for making enforcement actions possible by submitting evidence of violations, especially photos showing the license plate numbers of vehicles involved in dumping. The City Attorney's Office is using license plate numbers to track down the owners of those vehicles. Many of the individuals cited by the City live outside of Oakland, meaning they drive to Oakland to dump their garbage here.

An increasing number of Oakland citizens, many using camera phones, are taking photos and videos of illegal dumping incidents and reporting violators to the Public Works Agency using the Agency's [on line service request page](#) or the [SeeClickFix mobile application](#) for Oakland. SeeClickFix is an online and mobile tool that allows residents to report and track non-emergency problems such as graffiti, illegal dumping and potholes.

The Neighborhood Law Corps – the community law unit in the City Attorney's Office – is reviewing evidence and developing cases. So far about a dozen people have been cited by the City Administrator's Office, and more reports come in every day.

“These enforcement actions and fines will be far reaching as the word hits the street,” said Acting Director of Public Works Brooke A. Levin. “Our residents and businesses are fed up with dumping. Oakland Public Works is pleased to be in partnership with the City Attorney’s Office to address the critical need to take legal action against illegal dumping.”

The City is charging illegal dumpers up to \$1,000 a day for every day the blight continues, plus other fees and costs. The average citation is in the range of \$3,000 to \$4,000. In a recent case, an individual was cited for \$6,000 for two incidents of illegal dumping in East Oakland. A resident submitted photos of the incidents from a home security camera, and took a close up photo of the license plate, which was used to track down the owner.

The City Attorney will bring an ordinance to the City Council in September to (1) increase penalties for illegal dumping, (2) make illegal dumping a misdemeanor crime under City law (it is currently an infraction under the Oakland Municipal Code, but a crime under state law) and (3) allow some violators to perform community service by cleaning up illegal dumping instead of paying fines.

In recent years the City has focused on cleaning up illegal dumping, but has lacked resources to cite illegal dumpers. With the increase in online reporting of incidents, including photographic and video evidence submitted by the public, the City is now able to identify and pursue enforcement actions against individuals and companies responsible for illegal dumping in Oakland.

**How to report illegal dumping in Oakland:**

**Dumping in progress:**

**(510) 777-3333**

Oakland Police non-emergency line:

**Tips for submitting evidence:**

- Photos of vehicle license plates are ideal. If a photo is not available, write down the license plate number.
- Include time, date and location.
- Include your contact info – the City must contact you to verify evidence.
- More information is always better – photos of company names or logos on vehicles involved in dumping may be helpful.

- Avoid confrontation when documenting illegal dumping incidents.

**Work Plan for Alameda Countywide Clean Water Program**

**PCB Sediment & Trash Field Surveys**

**2014-2015**

# Work Plan

ALAMEDA COUNTYWIDE CLEAN WATER PROGRAM

PCB SEDIMENT & TRASH FIELD SURVEYS

REVISED DRAFT

**March 5, 2015**

## 1.0 Introduction

The Contra Costa Clean Water Program (CCCWP) and the Alameda Countywide Clean Water Program (ACCWP) permittees are in the process of identifying potential source properties for PCBs release to municipal storm drain systems by conducting PCB source identification studies. These studies include the refinement of draft source area maps and a preliminary source property database by using multiple lines of evidence (e.g., institutional knowledge, records review, windshield surveys, facility inspections, and sampling results). This component of the studies is conducting windshield surveys of parcels that have been previously identified as “High Likelihood” or Potential High-Opportunity areas (PHOA) for future PCB control measures.

Previous work by ACCWP, CCCWP and other Bay Area stormwater programs have shown that High Opportunity Areas occur mainly within old industrial land uses with known PCB sources or where PCBs were used or recycled. High Opportunity Areas generally have relatively high concentrations of PCBs in street dirt, sediment removed from the MS4, or in stormwater runoff. Within Contra Costa County, the Parr Watershed and the Harbor Watershed in the City of Richmond, which together make up the Santa Fe Channel Watershed, were identified in a previous program as pilot High Opportunity watersheds. Within Alameda County, the Ettie Street Pump Station Watershed was identified as a pilot High Opportunity watershed. The lessons learned from earlier screening exercises in these pilot watersheds are now being applied to other portions of Alameda, Contra Costa and other counties as part of a process to identify additional Potential High Opportunity areas through surveys at the parcel level.

### 1.1 Application and Objectives

This work plan is intended as a guidance document for performance of field surveys by representative of CCCWP and ACCWP member agencies, i.e. representatives of various cities within the counties. It is intended that all survey participants (staff from the counties, cities and consultants/contractors) conform to the guidelines of this work plan for comparability of results.

The objectives of the PCB field surveys are to:

1. Field-verify that parcels designated as PHOA should remain on the list or be reclassified.
2. Observe if nearby parcels may have been missed and need to be added to the PHOA list
3. Collect observational data for input into the project property database
4. Determine feasibility of sediment sample collection; identify optimal location for sample collection
5. Prioritize sites for sampling and analysis

Guidance for sediment PCB sample collection and analysis will be forthcoming in a sampling and analysis plan.

## 2.0 Methods for Windshield Survey

PHOAs are generally old industrial, military, electrical and railroad properties with known PCB sources. Sometimes these properties have been redeveloped and are no longer considered a potential source property. Railroads will not be surveyed for this study.

The types of activities currently occurring, the presence of erodible/mobile sediment, and the condition of the pavement can be indicators of the potential for sediment-bound pollutants to be transported to the storm drain. For example, sites with debris piles or exposed soils, or that are in general disorder, in combination with the type of business currently or historically present on the property, are indicators of potential pollutant sources.

Summary of steps to follow to conduct a windshield survey of the selected Potential High Opportunity parcels/areas:

1. Survey Planning –
  - a. Using the property database that has been screened through the virtual reconnaissance stage, select PHOA parcels that are in close proximity to each other (i.e. parcels should be batched together on a spatial basis prior to beginning the field effort).  
Transportation routes should be mapped out in advance, and traffic patterns should be taken into account to avoid commute-hour congestion.
  - b. Determine if any access permissions or safety precautions exist associated with your parcels.
2. Conducting the Survey –
  - a. Drive to your targeted location and find a safe place to park.
  - b. Don necessary safety gear (Section 4) and survey the parcel from the public right-of-way.
  - c. Complete a PCB Source Property Windshield Survey Field Log (pages 5 and 6 of this plan) for each parcel visited. Be as thorough as possible in completion of the field log form.
3. Post-Survey Tasks-
  - a. Enter field data into property database (see section 3).
  - b. Scan field logs and store associated photos into electronic files designated by assessor's parcel number (APN).

## 3.0 Property Database

A property database has been developed that identifies each PHOA by the APN and street address. This information appears in columns A, E and F of the database. The field survey is meant to complete, or confirm, information in columns Y through AD. Information collected during the field survey will be transferred to the database. This information will populate the following columns of the database:

Y - Evidence of Heavy or Electrical Equipment Outdoors?

- Z – Evidence of Sediment Transport Offsite?
- AA - Evidence of Outdoor Hazardous Waste Storage (Tanks, Drums, Scrap Materials)?
- AB - General Cleanliness of Property?
- AC - Notes/Comments on Physical Survey
- AD - Additional Information (e.g., confirmation of High Likelihood Source ranking)

All editing and input of information should occur in the municipality-specific tab of the database in the columns with blue highlighted headings (Columns M through AF).

## 4.0 Safety and Field Preparation

Field staff must abide by their affiliation's health and safety plans, as well as federal, state and local ordinances. All field staff are highly recommended to don the following personal protective equipment while performing field surveys:

- High-visibility ANSI 3 safety vest
- High-visibility hard hat
- Safety boots
- Eye protection

Errant vehicles are the primary safety hazard when working in the vicinity of an active roadway. Be sure to stop and/or park your vehicle in a designated parking location or in a safe area away from the flow of traffic. Minimize the risk of errant vehicles by keeping an eye on the traffic and by giving moving vehicles a wide berth.

Additional hazards may include muggers and other criminals. Minimize your exposure to these hazards by locking your vehicle and by being aware of the actions of those around you.

Field gear needed:

- Clipboard
- Copy of database information for selected sites (especially historical use information)
- Field log sheets
- Maps
- Camera
- GPS
- Municipal contact phone numbers

### 4.1 Field Log Sheets

The field crews will complete a field data log sheet (following pages) for each PHOA visited. In addition to providing information for populating the database, the data sheets may provide somewhat more detailed information that can be accessed as needed during the sampling phase of work.

## PCB REFERRAL SITE INFORMATION

The purpose of this form is to provide the Department of Toxic Substances Control and the Regional Water Quality Control Board with sufficient information to require site owner/operators to conduct follow-up investigations and/or PCB cleanup actions. Please use additional pages, as necessary, to complete your responses.

Referring Agency:	City of Oakland
Staff Contact Name:	Rebecca Tuden
Phone:	510-238-6266
Email Address:	RTuden@oaklandnet.com
Date of Referral:	9/15/2015

**1. Name of Site:**

“Former” Giampolini Facility

**2. Address City County ZIP:**

2868 Hannah Street and 2847 Peralta Street, Oakland, CA 94608

**3. APN(s):**

7-589-28, 7-589-29, and 7-589-24

**4. Provide a Site Location Map and a Site Diagram Showing Significant Features:**

See the attached Figures in the Appendix.

**5. Current Owner:**

Parcel 7-589-24:

Name:	2868 Hannah Street LLC & Precision Lofts LLC
Address, City, County & Zip Code:	401 Roland Way, #220 Oakland, CA 94621
Phone:	Unknown
E-mail Address:	Unknown

Parcel 7-589-28:

Name:	City Slicker Farms
Address, City, County & Zip Code:	1625 16th Street Oakland, CA 94607
Phone:	510-763-4241
E-mail Address:	info@cityslickerfarms.org

Parcel 7-589-29:

Name:	Emerald Fund, Inc.
Address, City, County & Zip Code:	532 Folsom Street, Suite 400, San Francisco, CA 94105
Phone:	415-777-2914
E-mail Address:	info@emeraldfund.com

## PCB REFERRAL SITE INFORMATION

### **6. Background: Current Business Operations**

Name: None  
Type: The “Former” Giampolini Facility is currently an open lot with exposed dirt and weedy vegetation.  
Period of Operation: N/A

### **7. Background: Previous Business Operations (if known):**

Per EnviroStor Site History: “This irregularly-shaped property is bordered by Hannah Street on the west; Peralta Street to the south and Helen Street to the east. Residential and industrial properties border the site to the north. A paint facility was present on the south half of the Site from at least 1939 until the mid-1960s. The paint factory included a varnish kitchen operation. During this time period, the covered storage building on the northwest side of the site was occupied by a reinforcing steel (rebar) bending and storage facility. Foreign Auto Wreckers operated an automobile dismantling business at the Site from the 1980s until 2000.”

### **8. Summarize any available information that may indicate hazardous substances, pollutants, or contaminants OTHER than PCBs have been associated with the site.**

Per the EnviroStor Regulatory Profile: Lead, methane, petroleum, polynuclear aromatic hydrocarbons (PAHs), volatile organic compounds (8260BVOCs).

### **9. Describe the known and suspected sources of PCBs at the site.**

#### **Referral History**

The “Former” Giampolini Facility (Giampolini) is being referred as part of the Clean Water for Clean Bay (CW4CB) Task 3 effort to identify on-land sources of polychlorinated biphenyls (PCBs) in five pilot watersheds, including the Ettie Street Pump Station Watershed (ESPSW) in West Oakland, California.

Giampolini was previously identified as a potential PCB-source property during the City of Oakland’s 2004-2007 PCB Abatement Grant Project. Giampolini was sampled both on-site and in the public right-of-way (ROW) on Hannah Street. Hannah Street was then abated by power-washing in the public ROW and resampled (See attached Figure 1). Additionally in 2006, the Department of Toxic Substances Control (DTSC) led on-site remediation efforts. As part of the DTSC remediation project, demolition, excavation, and grading to direct all stormwater runoff towards the center of the property occurred. Giampolini was then sampled on-site to assess the efficacy of the remediation efforts (See Table 1 below for sampling results).

During the 2012-2013 CW4CB Task 3 effort, Giampolini was inspected and resampled in the public ROW (See Table 1 below and Figure 1). Despite the DTSC remediation efforts in 2006, during the 2012 inspections, inspectors observed substantial sediment

## PCB REFERRAL SITE INFORMATION

accumulating along the southeastern border of the property and in the public catch basin at the southern end of the property.

This sediment drift may be attributed to wind dispersion, runoff, or tracking from trespassers. A description of the facility, monitoring results, and CW4CB Task 3 referral are below.

### **Facility Description**

Currently, Giampolini is completely fenced in with grading inward to retain storm water on-site. A large depression is now located near the center of the property.

### **2012 Site Inspections**

As part of 2012-2013 CW4CB Task 3 efforts, CW4CB project managers, City of Oakland staff, Alameda Countywide Clean Water Program (ACCWP) staff, and Geosyntec Consultants developed a rationale for site inspections, drafted a list of potential sites to inspect, and conducted the site inspections. Giampolini was identified for a site inspection because it met priority risk criteria, which included two previous very high PCB concentrations (17.725 mg/kg at ETT 56S on Giampolini private property and 11.6 mg/kg at ETT 58 in the public ROW) that were considered high priorities and two samples that were considered medium priorities (See Table 1 below and the attached Inspection Form and Photo Log in the Appendix).

An inspection of the Giampolini property was conducted on June 7, 2012, by two City of Oakland staff and three Geosyntec Consultant staff. During the inspection, inspectors identified additional priority risk criteria including: poor roadway conditions (i.e. many cracks and potholes - needs repaving); heavy sediment accumulation on the public ROW; sediment accumulation in storm drain; and illegal dumping areas. Therefore, Giampolini was included for resampling at the same three public ROW sample locations due to previous high PCB concentrations, to evaluate the long-term effectiveness of the power-wash study in 2006, and to evaluate the efficacy of the DTSC remediation efforts in 2006.

**10. Has sampling or other investigation been conducted in the vicinity of the property?**

Yes  No

**Specify. For samples collected in the public right-of-way, show the nexus to the subject property as clearly as possible.**

### **2004-2007 PCB Abatement Grant Project:**

Giampolini was previously sampled for PCBs during the City of Oakland's 2004-2007 PCB Abatement Grant Program in the ESPSW. Sampling results from the 2004-2007

## PCB REFERRAL SITE INFORMATION

studies are shown in Table 1 below (Kleinfelder, 2006 and 2007; Treadwell&Rollo, 2006). Three sampling points (ETT 56, ETT 57, and ETT 58) were taken in the public ROW along Hannah Street and two composited samples (ETT 56S and ETT 56N) were taken on Giampolini private property. Two samples had PCB concentrations greater than 10 mg/kg (17.725 mg/kg at ETT 56S and 11.116 mg/kg at ETT 58). Two samples also had concentrations between 1-10 mg/kg (See Table 1 below).

As a result of the high PCB concentrations, Hannah Street was chosen as one of two sites to be abated via power-washing, which was conducted between May 15-24, 2006. Hannah Street was power-washed between 28<sup>th</sup> Street and the 32<sup>nd</sup> Street. The storm drains were first plugged and excess trash and sediments were removed. Water was sprayed at pressures ranging from 3,000 pounds per square inch (psi) to 6,000 psi. Wash water and sediment were then vacuumed into a self-contained vacuum with a capacity of 3,000 gallons. Two post-abatement samples in the public ROW were collected and had PCB concentrations of 0.392 mg/kg at ETT 56 and 0.653 mg/kg at ETT 58 (See Table 1 below).

Additionally in 2006, DTSC led on-site remediation efforts that included demolition, excavation, and grading to retain stormwater on-site. Private property samples were taken at the same locations and composited to be equivalent to ETT56S and ETT56N. The sample SS-29-33 is equivalent to ETT56S and is a composite of 5 single samples (SS-29, 30, 31, 32, 33) in the southern half of Giampolini (See Figures 1 and 2). SS-29-33 had a post-remediation PCB concentration of 1.7 mg/kg. The sample SS-25-28 is equivalent to ETT56N and is a composite of 4 single samples (SS-25, 26, 27, 28) in the northern half of Giampolini (See Figures 1 and 2). SS-25-28 had a post-remediation PCB concentration of 0.039 mg/kg.

### **2012-2013 CW4CB Task 3 Sediment Sampling:**

On November 12, 2012, samples were collected from three locations in the public ROW on the west side of Giampolini along Hannah Street. ETT 56 had a PCB sample concentration of 0.388 mg/kg. ETT 57 did not have enough sediment to collect a sediment sample. So two samples were collected at one location (ETT58) along the northern boundary of the property and had PCB concentrations of 1.22 mg/kg and 1.32 mg/kg; the average PCB concentration is 1.27 mg/kg. Those samples were located in an area where high levels of sediment were observed in the public ROW during the site inspection on June 7, 2012.

## PCB REFERRAL SITE INFORMATION

**Table 1: Sampling Results around Giampolini**

Site ID	Sampling Location Description	PCB Concentration (mg/kg) 2004-2007 Abatement Grant Program	PCB Concentration (mg/kg) 2012-2013 CW4CB Task 3
ETT 56	<u>Public ROW:</u> On both sides of driveway, sidewalk, and curb/gutter along Hannah Street along Giampolini.	Pre-abatement: 2.383 (Kleinfelder 2006); Post-abatement: 0.392 (Kleinfelder 2007)	0.388
ETT 57	<u>Public ROW:</u> Sidewalk, curb/gutter along Hannah Street near southern portion of Giampolini.	Pre-abatement: 1.292	Not sampled due to lack of sediment
ETT58	<u>Public ROW:</u> Both sides of driveway, sidewalk, and curb/gutter along Hannah Street at entrance to vacant lot between Precision Casting and Giampolini.	Pre-abatement: 11.116 (Kleinfelder 2006); Post-abatement: 0.653 (Kleinfelder 2007)	1.27 <sup>1</sup>
ETT56S (SS-29-33)	<u>Private Property:</u> Composite of 5 single samples in southern half (SS-29, 30, 31, 32, 33)	Pre-remediation: 17.725 (Kleinfelder 2006); Post-remediation: 1.7 (Treadwell&Rollo 2006)	Not sampled due to access
ETT56N (SS-25-28)	<u>Private Property:</u> Composite of 4 single samples in northern half (SS-25, 26, 27, 28)	Pre-remediation: 0.793 (Kleinfelder 2006); Post-remediation: 0.039 (Treadwell&Rollo 2006)	Not sampled due to access

**Notes:**

<sup>1</sup> Duplicate analysis was performed, so the sample results were averaged.

**PCB REFERRAL SITE INFORMATION**

**11. Is the site subject to the general industrial stormwater permit?** Yes  No   
**If yes, describe the findings of recent and past stormwater inspections conducted on the site, especially in regards to potential PCB sources.**  
 Giampolini currently does not have coverage under the Industrial General Permit.

**12. Is there currently a potential for exposure of the community or workers to hazardous substances, pollutants, or contaminants at the site?**  
 Yes  No  Unknown  **If Yes, explain:**

**13. Are any Federal, State or Local regulatory agencies currently involved with the site?**  
 Yes  No

**14. If yes, provide as much of the information below as known.**

<u>Agency Involvement Contact Name Phone</u>			
<u>Agency</u>	<u>Involvement</u>	<u>Contact Name</u>	<u>Phone Number</u>
DTSC	Voluntary Cleanup	Tom Price	510-540-3811

**15. Provide any other pertinent site information not covered above:**  
**Attach Site Location Map, Site Diagram, and any pertinent sampling & analyses data**

EnviroStor Property ID: 01750038.

Giampolini was remediated and no further action is deemed required per DTSC as of April 15, 2014. The adjacent parcel, 7-589-24, may not have been remediated as part of the cleanup (See ETT58 sample result in Table 1 above).

See Figure 1 for sampling locations and site location.

DATE: 06 / 07 / 2012

MAP NUMBER/ID: ETT 56, ETT 57, ETT 58, ETT56S, ETT56N, SS-25-28 (SS-25,26,27,28), SS-29-33 (SS-29,30,31,32,33)

PHOTO ID.#: \_\_\_\_\_

SITE INFORMATION	
<b>NAME OF CURRENT BUSINESS:</b> Former Giampolini Facility	<b>TYPE OF BUSINESS:</b> (Closed - Vacant Lot)
<b>NAME OF OWNER:</b>	<b>COVERED UNDER GENERAL INDUSTRIAL PERMIT?</b> No
<b>ADDRESS (include cross street, if possible):</b> 2838 Hannah St. Oakland CA 94608 (cross street 28th St., 34th St., and Peralta St.)	
<b>NAME AND TITLE OF OFF-SITE CONTACT:</b>	<b>CONTACT INFORMATION:</b> ADDRESS PH EMAIL
<b>NAME AND TITLE OF ON-SITE CONTACT (if different from above):</b>	<b>CONTACT INFORMATION:</b> ADDRESS PH EMAIL
<p><b>DESCRIPTION OF SITE (include areas of principal interest and apparent level of housekeeping). ALSO ATTACH A SKETCH OF THE SITE ON A SEPARATE PIECE OF PAPER (include potential sources and pathways to storm drain inlets and on-site and ROW sampling locations).</b></p> <p>The site is completely fenced in with grading to contain storm water on site. A large depression is now located near the center of the property (possibly from site abatement soil removal).</p>	
TYPE OF POTENTIAL PCB SOURCE (consider current and past use; check all that apply and describe in space given below)	
Electrical applications/utilities (transformers, capacitors, appliances, televisions, fluorescent light ballasts, motors, etc.)	N
Hydraulic fluids (lifts, die-casting machinery, etc.)	Y
Plasticizers (sealants, caulk, PVC, polyurethanes, polycarbonates, etc.)	N
Evidence of outdoor hazardous material/waste storage areas (tanks, drums, scrap materials, e-waste) If so, can they be identified?	N
Recycling/scrap yards (auto dismantlers)	Y
Outdoor burning or combustion	N
Manufacturing industries with heat transfer systems (e.g., chemicals, high-tech, asphalt, metal products, etc.)	Y
Building demolition, renovation or window replacement site/recycler	Y
Gas compressors/stations/pipelines	N
Miscellaneous (rail road lines/yards, coatings, printing inks, pesticides, stressed vegetation, etc.)	Y
<p>The Former Giampolini Facility is currently an open lot with exposed dirt and weedy vegetation. There are no current operations at the property. Per EnviroStor Site History: "A paint facility was present on the south half of the Site from at least 1939 until the mid-1960s. The paint factory included a varnish kitchen operation. During this time period, the covered storage building on the northwest side of the site was occupied by a reinforcing steel (rebar) bending and storage facility. Foreign Auto Wreckers operated an automobile dismantling business at the Site from the 1980s until 2000."</p>	

# Facilities Inspection Form

<b>POTENTIAL FOR SEDIMENT EROSION FROM SITE/AREA TO OCCUR (check all that apply, describe in space given and include in attached sketch)</b>	
Property contains open area(s)/driveway(s)/parking lot(s) not paved, partially paved or in poor condition (circle which	Y
Vehicle activity to/from site on unpaved areas	N
Does the property border streets without curbs, berms or other containment?	Y
Vacant or undeveloped lot	Y
If waste (construction/hazardous materials/etc.) is generated on-site, is it kept in a dumpster or other container? If so, describe condition, if it is covered, and if located by a storm drain inlet or unpaved area.	N
<b>STORMWATER INFRASTRUCTURE AND HYDROLOGY (if any of the below apply to this site, include in attached sketch)</b>	
Are stormwater treatment practices present? If so, describe.	N
Are private storm drains or inlets located at the facility? If so, describe.	N
Has storm drain infrastructure identified in GIS been located on property? Any infrastructure not previously identified?	N
Is there sediment accumulation at edges of property, curbs, catch basins, or elsewhere? If so, describe.	Y
There is a large amount of sediment accumulated in the public right of way. The precise source is uncertain. This sediment accumulation may be attributed to wind dispersion, runoff, or tracking from trespassers.	
<b>QUESTIONS FOR OWNER/CONTACT (include dates when possible)</b>	
1. What type of business(es) did the previous tenant(s)/owner(s) have, and when did they exist? Giampolini did Masonry Restoration, Painting, and drywall and metal framing.	
2. Are PCBs in use now or have they been in the past on this facility? Have there been any spills or leaks? If so, when? It is presently unclear what materials they used or what they stored onsite.	
3. Have there been any building fires in the past? Major exterior renovation or window replacement? If so, when? Unknown	
4. Does the facility have a power substation onsite? In the past? If so, when? Unknown	
5. What type of business was on the neighboring properties (if applicable)? Precision Casting was located to the north. That facility is no longer in operation. The site is now occupied by squatters.	
6. How are the ground surfaces maintained (hosed, swept)? How is the material disposed of afterwards? The property is not maintained or landscaped.	
7. Are vehicles used on-site? If so, what type, and is there potential for dirt to be transferred off-site? There is no access onto the property; thus no vehicle use on-site.

 Phone: 510-238-6266  
 Email Address: RTuden@oaklandnet.com  
 Date of Referral: 9/15/2015

**1. Name of Site:**

Asbestos Management Group of California, Inc. (AMG)

**2. Address City County ZIP:**

3438 Helen Street, Oakland, CA 94608

**3. APN(s):**

7-609-26-2

**4. Provide a Site Location Map and a Site Diagram Showing Significant Features:**

See attached Figure 1.

**5. Current Owner:**

Name: Brent Bates, JMB Management LLC  
 Address, City, County & Zip Code: 3438 Helen Street, Oakland, CA 94608  
 Phone: 510-654-8441  
 E-mail Address: corporate@amgofca.com

**6. Background: Current Business Operations**

Name: AMG  
 Type: AMG is an environmental contracting firm that specializes in the demolition of properties/buildings and the removal of asbestos, lead, mold, soil and other hazardous materials. Additionally, AMG provides non-hazardous demolition and water extraction services.

Period of Operation: 1989 - present

**7. Background: Previous Business Operations (if known):**

Per EnviroStor Site History: "The site consists of two buildings and a trailer at the end of Helen Street in a residential area. JMB Management LLC has owned the property from 2000 to present. Asbestos Management Group (AMG) operates at the property. AMG is an environmental contracting firm that specializes in the removal of asbestos, lead, mold, soil and other hazardous materials." Also called ACM Asbestos Abatement.

## PCB REFERRAL SITE INFORMATION

### **8. Summarize any available information that may indicate hazardous substances, pollutants, or contaminants OTHER than PCBs have been associated with the site.**

Asbestos, lead, metals, hydraulic fluid, and oil and grease (See the Inspection Report in the Appendix).

### **9. Describe the known and suspected sources of PCBs at the site.**

#### **Referral History**

Asbestos Management Group of California, Inc. (AMG) is being referred as part of the Clean Water for Clean Bay (CW4CB) Task 3 effort to identify on-land sources of polychlorinated biphenyls (PCBs) in five pilot watersheds, including the Ettie Street Pump Station Watershed (ESPSW) in West Oakland, California.

AMG was previously identified as a potential PCB-source property during the City of Oakland's 2004-2007 PCB Abatement Grant Project. AMG was sampled both on-site and in the public right-of-way (ROW) in front of AMG, and then abated by power-washing in the public ROW and resampled. It was then inspected and sampled during the 2012-2013 CW4CB Task 3 effort (See Table 1 below and attached Figure 1). A description of the facility, monitoring results, and referral are below.

#### **Facility Description**

AMG provides general construction services (abatement services) to remove hazardous materials (lead, asbestos, PCBs) from buildings that will be or have been demolished. AMG conducts both interior demolition and exterior demolition. AMG removes caulk and tiles (containing asbestos and PCBs) using hand tools, contains it in plastic, and stores it in an enclosed container onsite.

AMG packs bins of hazardous waste, drops the bins off at the site, stores them onsite for approximately 3 days, and then hauls them to the appropriate landfill or recycling center. Asbestos is stored in 6 mil plastic bags that are stored in covered dumpsters. PCBs and other hazardous liquids are stored in sealed drums on cement pads outside. AMG drains freon from refrigerators and then recycles the freon. Other general waste is stored in open top dumpsters on the site.

All runoff exits the site out of the two driveways at the property entrance near public ROW sampling locations ETT 66 and ETT 63 (See Figure 1). The site is cleaned periodically by power washing the yard and spraying the runoff into the public ROW.

## PCB REFERRAL SITE INFORMATION

### **2012 Site Inspections**

As part of the 2012-2013 CW4CB Task 3 effort, CW4CB project managers, City of Oakland staff, Alameda Countywide Clean Water Program (ACCWP) staff, and Geosyntec Consultants developed a rational for site inspections, drafted a list of potential sites to inspect, and conducted the site inspections. AMG was identified for a site inspection because it met priority risk criteria, which included two previously high PCB monitoring results (31.3 mg/kg at ETT 66 in the public ROW and 10.618 mg/kg at ETT 63-64-65 on AMG private property) that were considered high priorities and two samples that were considered medium priorities (See Table 1 below).

A complete on-site inspection of the AMG facilities was conducted on May 30, 2012, by two City of Oakland staff and three Geosyntec Consultant staff. Inspectors noted that there was hazardous waste stored onsite. There were motors, generators, boilers, and appliances stockpiled on the pavement with no enclosure. There was what appears to be an old electrical transformer or some other type of electrical equipment housing stored onsite temporarily. There were stains on the pavement from vehicle fluid, as well as significant quantities of sediment. Fluorescent lights were stored outside in cardboard boxes, leaning against a wall in the yard. There were metal drums that contained mastic (floor tile with asbestos), dry wall, and other hazardous materials. There were containers of biocides and paint cans (open and sealed) stockpiled outside in the yard. In the open garbage containers, there was unrecyclable garbage like carpet, dry wall, and wood. Sediment, oil, and grease covered portions of the site (See the attached Inspection Form and Photo Log in the Appendix).

The site appeared to have walls around three sides of the property. There were no perimeter control BMPs in place to capture sediment or other contaminants that may flow offsite. The yard was periodically steam cleaned and all of the wastewater was allowed to flow to the public ROW.

During the inspection, inspectors identified additional priority risk criteria including: vehicle tracking; poor roadway conditions (i.e., many cracks and potholes - needs repaving); heavy sediment observed on-site; heavy sediment accumulation in the public ROW; heavy sediment accumulation in the storm drain; and an illegal dumping area. Therefore, AMG was included for resampling at the same three public ROW sample locations due to previous high PCB concentrations and to evaluate the long-term effectiveness of the power-wash study in 2006.

## PCB REFERRAL SITE INFORMATION

**10. Has sampling or other investigation been conducted in the vicinity of the property?**

Yes  No

**Specify. For samples collected in the public right-of-way, show the nexus to the subject property as clearly as possible.**

**2004-2007 PCB Abatement Grant Project:**

AMG has been previously sampled for PCBs during the City of Oakland's 2004-2007 PCB Abatement Grant Program in the ESPSW. Sampling results from the 2004-2007 studies are shown in Table 1 below (Kleinfelder, 2006 and 2007). Three sampling points (ETT 66, ETT 64-65, and ETT 63) were taken in the public ROW adjacent to driveways in front of AMG and along Helen Street and one sampling point was taken on AMG private property. Two samples had PCB concentrations greater than 10 mg/kg (31.328 mg/kg at ETT 66 and 10.618 mg/kg at ETT 63-64-65). The remaining two samples had concentrations between 1-10 mg/kg (See Table 1 below).

As a result of the high PCB concentrations, Helen Street was chosen as one of two sites to be abated via power-washing, which was conducted between May 15-24, 2006. Helen Street was power-washed between 34<sup>th</sup> street and the Highway 580 overpass (See Figure 1). The storm drains were first plugged and excess trash and sediments were removed. Water was sprayed at pressures ranging from 3,000 pounds per square inch (psi) to 6,000 psi. Wash water and sediment were then vacuumed into a self-contained vacuum with a capacity of 3,000 gallons. Two post-abatement samples were collected and had PCB concentrations of 7.714 mg/kg at ETT 66 and 4.281 mg/kg at ETT 64-65 (See Table 1 below).

**2012-2013 CW4CB Task 3 Sediment Sampling:**

On September 28, 2012, one sample was collected from the catch basin in front of the AMG facility entrance, with a total PCB concentration of 3.37 mg/kg (ETT66). The two additional public ROW locations (ETT 64-65 and ETT 63) did not have enough sediment to conduct collect sediment samples. The sampled catch basin is where high levels of sediment accumulation and visible signs of vehicle tracking had been observed during site inspection conducted on May 30, 2012.

**PCB REFERRAL SITE INFORMATION**

**Table 1 –Sampling Results Around AMG**

Site ID	Sampling Location Description	PCB Concentration (mg/kg) 2004-2007 Abatement Grant Program	PCB Concentration (mg/kg) 2012-2013 CW4CB Task 3
ETT 66	<u>Public ROW:</u> In drop inlet; on Helen St; North of AMG driveway	Pre-abatement: 31.328 (Kleinfelder 2006); Post-abatement: 7.714 (Kleinfelder 2007)	3.37 <sup>1</sup>
ETT 64-65	<u>Public ROW:</u> On both sides of driveway, sidewalk, and curb bordering northern portion of AMG (See Plate 3, Kleinfelder, 2007); Along Helen Street	Pre-abatement: 7.348 (Kleinfelder 2006); Post-abatement: 4.281 (Kleinfelder 2007)	Not sampled due to lack of sediment
ETT 63	<u>Public ROW:</u> Sidewalk, curb, and gutter along southern portion of AMG	Pre-abatement: 1.508 (Kleinfelder 2006)	Not sampled due to lack of sediment
ETT 63-64-65	<u>On Private Property</u>	Pre-abatement: 10.618 (Kleinfelder 2006)	Not sampled due to access issues

**Notes:**

1 Dilutions occurred, so the undiluted sample result was used.

**11. Is the site subject to the general industrial stormwater permit?** Yes  No

**If yes, describe the findings of recent and past stormwater inspections conducted on the site, especially in regards to potential PCB sources.**

AMG currently does not have coverage under Industrial General Permit. The City notified the San Francisco Bay regional water Quality Control Board in the Municipal Regional Permit 2012-2013 Annual Report that AMG be covered under the Industrial General Permit.

**PCB REFERRAL SITE INFORMATION**

**12. Is there currently a potential for exposure of the community or workers to hazardous substances, pollutants, or contaminants at the site?**

Yes  No  Unknown  **If Yes, explain:**

AMG provides abatement services to remove hazardous materials (lead, asbestos, PCBs) from buildings that will be or have been demolished. There is a potential for exposure.

**13. Are any Federal, State or Local regulatory agencies currently involved with the site?**

Yes  No

**14. If yes, provide as much of the information below as known.**

**Agency Involvement Contact Name Phone**

<u><b>Agency</b></u>	<u><b>Involvement</b></u>	<u><b>Contact Name</b></u>	<u><b>Phone Number</b></u>
N/A			

**15. Provide any other pertinent site information not covered above:**

**Attach Site Location Map, Site Diagram, and any pertinent sampling & analyses data**

See Figure 1 for sampling locations, site location, and drainage.

# PCB REFERRAL SITE INFORMATION

## APPENDIX

# Facilities Inspection Form

<b>POTENTIAL FOR SEDIMENT EROSION FROM SITE/AREA TO OCCUR (check all that apply, describe in space given and include in attached sketch)</b>	
Property contains open area(s)/driveway(s)/parking lot(s) not paved, partially paved or in <b>poor condition</b> (circle which	Y
Vehicle activity to/from site on unpaved areas	Y
Does the property border streets without curbs, berms or other containment?	Y
Vacant or undeveloped lot	N
If waste (construction/hazardous materials/etc.) is generated on-site, is it kept in a dumpster or other container? If so, describe condition, if it is covered, and if located by a storm drain inlet or unpaved area.	Y
<p>There is hazardous waste stored onsite. AMG removes caulk and tiles (containing asbestos and PCBs) using hand tools, contains it in plastic, and stores it in an enclosed container onsite. There are motors, generators, boilers, and appliances stockpiled on the pavement in no enclosure. There is what appears to be an old transformer housing or some other type of electrical equipment housing stored onsite temporarily. There are stains on the pavement from vehicle fluid, as well as significant quantities of sediment. Fluorescent light ballasts are stored in cardboard boxes, leaning against a wall in the yard. AMG drains freon from refrigerators, then recycle the freon. There are metal drums that contain mastic (floor tile with asbestos), dry wall, and other hazardous materials. There are containers of biocides and paint cans (open and sealed) stockpiled outside in the yard. In the open garbage containers, there are unrecyclable garbage like carpet, dry wall, and wood.</p>	
<b>STORMWATER INFRASTRUCTURE AND HYDROLOGY (if any of the below apply to this site, include in attached sketch)</b>	
Are stormwater treatment practices present? If so, describe.	N
Are private storm drains or inlets located at the facility? If so, describe.	N
Has storm drain infrastructure identified in GIS been located on property? Any infrastructure not previously identified?	N
Is there sediment accumulation at edges of property, curbs, catch basins, or elsewhere? If so, describe.	Y
<p>The entire site is paved but there are cracks in the pavement and accumulated sediment on the pavement. On the northern boundary, the site borders a vacant grassy lot under the 580 freeway. There is fencing and an asphalt berm that slopes down towards the site, so stormwater would flow onto the site. There is accumulated dirt along the fence line, which would be mobilized during a rain event and flow onto the site. On the southern boundary, the site borders a vegetated lot with no curbing for perimeter control. There is no perimeter control along the western boundary so stormwater flows offsite down the driveway and to the nearby catch basin (ETT 66: 31.328 mg PCB/kg sediment; Kleinfelder 2006). There are no storm drains onsite. AMG replaces the filter fabric in the offsite catch basin every 2 weeks. It often backs up during rain events. There is no perimeter control so sediment-laden stormwater can flow offsite.</p>	
<b>QUESTIONS FOR OWNER/CONTACT (include dates when possible)</b>	
<b>1. What type of business(es) did the previous tenant(s)/owner(s) have, and when did they exist?</b>	
The past tenants were metal manufacturers. They operated onsite 6-7 years ago.	
<b>2. Are PCBs in use now or have they been in the past on this facility? Have there been any spills or leaks? If so, when?</b>	
Some times PCBs are stored onsite, but not very often.	
<b>3. Have there been any building fires in the past? Major exterior renovation or window replacement? If so, when?</b>	
There have been no past fires in the last 6-7 ears.	
<b>4. Does the facility have a power substation onsite? In the past? If so, when?</b>	
AMG does not have a power substation onsite, but it is currently storing a transformer, which arrived a few days before.	
<b>5. What type of business was on the neighboring properties (if applicable)?</b>	
The site borders the 580 freeway to the north and a vacant lot to the south. Helen Street is to the west.	
<b>6. How are the ground surfaces maintained (hosed, swept)? How is the material disposed of afterwards?</b>	
The site is power washed by the employees and discharged to the offsite catch basin.	
<b>7. Are vehicles used on-site? If so, what type, and is there potential for dirt to be transferred off-site?</b>	
Trucks come to and from building demo sites. There were 2 Bobcats onsite. They also have a backhoe that is stored on site occasionally. There is potential of offsite tracking. There were no BMPs installed to prevent tracking.

## PCB REFERRAL SITE INFORMATION

### **6. Background: Current Business Operations**

Name: CASS  
Type: Scrap metal recycling facility  
Period of Operation: Since 1969

### **7. Background: Previous Business Operations (if known):**

Per EnviroStor Site History: “Review of Sanborn Maps dated 1912-1951 indicated Oakland Scavenger Co. occupying the property at 2601 Peralta. Oakland Scavenger Co. picked up and disposed of municipal waste from residents and businesses in Alameda County. The property at 2601 was used as a truck storage and staging area for Oakland Scavengers garbage trucks.”

### **8. Summarize any available information that may indicate hazardous substances, pollutants, or contaminants OTHER than PCBs have been associated with the site.**

Lead, other metals, ethylbenzene, toluene, xylenes, hydraulic fluid, and oil and grease (See the Inspection Report in the Appendix and EnviroStor Regulatory Profile).

### **9. Describe the known and suspected sources of PCBs at the site.**

#### **Referral History**

Custom Alloy Scrap Sales (CASS) is being referred as part of the Clean Water for Clean Bay (CW4CB) Task 3 effort to identify on-land sources of polychlorinated biphenyls (PCBs) in five pilot watersheds, including the Ettie Street Pump Station Watershed (ESPSW) in West Oakland, California.

CASS was previously identified as a potential PCB-source property and sampled during the City of Oakland’s 2004-2007 PCB Abatement Grant Project and then inspected and sampled during the 2012-2013 CW4CB Task 3 effort (See attached Figure 1). A description of the facility, monitoring results, and referral are below.

#### **Facility Description**

CASS is a large scrap metal recycling facility operating on four adjacent city blocks. The central facility is the main receiving and sorting area where individuals and small wholesalers deliver metal scrap loads. The eastern facility is where aluminum is taken to be melted down to ingots. The western facility is where large scrap is cut down to manageable sizes and bailed scrap is stored. The northern facility is their parking, machine shop, and community work space (See attached Figure 2).

CASS purchases scrap metal from the public including electronics (TVs, CRT, etc.), batteries, ballasts, mercury switches, refrigerators, motors, capacitors, and transistors. CASS requires that car parts are drained, but often the parts contain fluids. Excess fluid is drained and stored in secured barrels. A waste motor oil disposal service is provided to

## PCB REFERRAL SITE INFORMATION

customers to reduce illegal dumping. CASS has many large vehicles that use hydraulic fluids. There are old rail lines in the right of way on Poplar and a few tracks on-site. There is a regular illegal dumping location at the corner of 26th and Peralta Streets (southeast corner).

The facility is located among numerous industrial businesses that could also be potential PCB sources in the ESPS Watershed. Since receiving a Notice of Violation by the San Francisco Bay Regional Water Quality Control Board (2007) and a citizen action lawsuit in 2009, CASS implemented site controls in the attempt to reduce contaminant runoff from their facility. BMPs include roofing over two of the four facilities, daily street sweeping, regular metal collection from the public right-of-way using a large magnet, and stormwater treatment facilities on the two uncovered facilities that discharge to the storm drains.

### **2012 Site Inspections**

As part of the 2012-2013 CW4CB Task 3 effort, CW4CB project managers, City of Oakland staff, Alameda Countywide Clean Water Program (ACCWP) staff, and Geosyntec Consultants developed a rationale for site inspections, drafted a list of potential sites to inspect, and conducted the site inspections. CASS was identified for a site inspection because it met priority risk criteria including a previous sample (14.333 mg/kg at ETT 84b) considered a high priority, and 3 remaining samples considered medium priorities (See Figure 1 and Table 1 below).

A complete on-site inspection of the CASS facilities was conducted on June 14, 2012, by two City of Oakland staff and two Geosyntec Consultant staff. Inspectors noted that the majority of the CASS facilities are fully paved, but some areas, especially the western facility, have cracks or holes in the pavement and the pavement in the back portion of the western facility is severely deteriorating. Vehicles traveling through this facility could track sediment to the public ROW; however, they have to cross a large paved area where sediment may fall out before reaching the street. Most exits have signs of tracking. The western facility is adjacent on its west end by a vacant lot, which is Campbell Street (no vehicle access). There is also a small unpaved parking lot adjacent to the eastern facility. Inspectors also noted that there are many areas in the public ROW that have moderate to heavy sediment in the gutter and in the drop inlets (See the attached Inspection Form and Photo Log in the Appendix).

During the inspection, inspectors identified additional priority risk criteria including: vehicle tracking; poor roadway conditions (i.e. many cracks and potholes, needs repaving); heavy sediment observed on-site; heavy sediment accumulation on the public right-of-way; heavy sediment accumulation in storm drain; and an illegal dumping area. Therefore, CASS was included for resampling at the same four sample locations and 3 new locations were added for greater characterization of the area.

## PCB REFERRAL SITE INFORMATION

**10. Has sampling or other investigation been conducted in the vicinity of the property?**

Yes  No

**Specify. For samples collected in the public right-of-way, show the nexus to the subject property as clearly as possible.**

**2004-2007 PCB Abatement Grant Project:**

CASS had been previously sampled for PCBs during the City of Oakland's 2004-2007 PCB Abatement Grant Program in the ESPSW. Sampling results from the 2004-2007 studies are shown in Table 1 below (Kleinfelder, 2006). Four samples (Site IDs ETT 84, ETT84b, ETT 84c, and ETT85) were taken in the public right-of-way (ROW) adjacent to driveways in front of various CASS facilities. Four additional samples (Site IDs ETT 84, ETT84b, ETT 84c, and ETT85) were taken on CASS private property in the CASS driveways. One private property sample had a PCB concentration greater than 10 mg/kg (14.733 mg/kg at ETT 84b). Five samples had PCB concentrations between 1-10 mg/kg and two samples had PCB concentrations below 1 mg/kg (See Table 1 below).

**2012-2013 CW4CB Task 3 Sediment Sampling:**

On September 28, 2012, samples were collected at six locations surrounding the four CASS facilities. One additional CASS location did not have enough sediment to collect sediment samples. Sample results from five of the six locations were greater than 1 mg/kg. Total PCB concentrations ranged from 0.557 mg/kg to 5.7 mg/kg. The highest sample concentration was collected from a drop inlet outside of the entrance to the CASS East Facility entrance (Sample ID ETT84f), where high levels of sediment accumulation and visible signs of vehicle tracking had been observed during site inspections conducted in the summer of 2012.

**11. Is the site subject to the general industrial stormwater permit? Yes  No**

**If yes, describe the findings of recent and past stormwater inspections conducted on the site, especially in regards to potential PCB sources.**

Industrial General Permit (IGP) WDID No. 2 01I007363. See No. 9 above for more information.

**12. Is there currently a potential for exposure of the community or workers to hazardous substances, pollutants, or contaminants at the site?**

Yes  No  Unknown  **If Yes, explain:**

**13. Are any Federal, State or Local regulatory agencies currently involved with the site?**

Yes  No

## PCB REFERRAL SITE INFORMATION

**Table 1 –Sampling Results around the CASS Facilities**

Site ID	Sampling Location Description	PCB Concentration (mg/kg) 2004-2007 Abatement Grant Program	PCB Concentration (mg/kg) 2012-2013 CW4CB Task 3
ETT84	<u>Public ROW:</u> Both sides of driveway and sidewalk and curb/gutter along Peralta St. between 26th and 28th.	0.903	1.4
ETT 84b	<u>Public ROW:</u> On both sides of the main driveway and on the sidewalk and curb/gutter along Union St.	2.221	0.557
ETT 84c	<u>Public ROW:</u> Both sides of driveway, sidewalk and curb/gutter along on Peralta St. between 28th and 30th.	0.597	Not sampled due to lack of sediment
ETT 84d (new)	<u>Public ROW:</u> Both sides of driveway and sidewalk and curb/gutter along Poplar St. where there is evidence of vehicle tracking.	N/A	1.67
ETT 84f (new)	<u>Public ROW:</u> Drop inlet by SW corner of Poplar St and 28th.	N/A	5.7
ETT 85	<u>Public ROW:</u> Both sides of driveway and sidewalk and curb/gutter along Poplar St between 26th and 28th.	3.736	1.85

SITE INFORMATION	
<b>NAME OF CURRENT BUSINESS:</b> Custom Alloy Scrap Sales (CASS)	<b>TYPE OF BUSINESS:</b> Scrap Metal Recycler
<b>NAME OF OWNER:</b>	<b>COVERED UNDER GENERAL INDUSTRIAL PERMIT? Yes</b>
<b>ADDRESS (include cross street, if possible):</b> 2601 Peralta St. (West); 2711 Peralta St. (East); 2730 Peralta St. (West); 2812 Peralta St. (North)	
<b>NAME AND TITLE OF OFF-SITE CONTACT:</b> Lester Feldman (AMEC Consultant)	<b>CONTACT INFORMATION:</b> ADDRESS PH 510 663-4240                      EMAIL
<b>NAME AND TITLE OF ON-SITE CONTACT (if different from above):</b> Donovan Mitchell (Maintenance Manager) and Ray Rodriguez (Production Director)	<b>CONTACT INFORMATION:</b> ADDRESS 2730 Peralta St.  donovan@customalloy.com and rayr@customalloy.com  PH 510 893-6476                      EMAIL
<b>DESCRIPTION OF SITE (include areas of principal interest and apparent level of housekeeping). ALSO ATTACH A SKETCH OF THE SITE ON A SEPARATE PIECE OF PAPER (include potential sources and pathways to storm drain inlets and on-site and ROW sampling locations).</b> CASS alloy is a large scrap recycler with facilities on 4 adjacent city blocks. The central facility is the main receiving and sorting area where individuals and small wholesalers deliver scrap loads. The Eastern Facility is where aluminum is taken to be melted down to ingots. The Western Facility is where large scrap is cut down to manageable sizes and bailed scrap is stored. The Northern Facility is their parking, machine shop, and community work space. All facilities are fully paved, but some areas, especially the western facility, have cracks or holes in the pavement where sediment is working its way to the surface; pavement in the back portion of the western facility is severely deteriorating. The Central and Western facilities are both open to rainfall and have 3 phase water treatment facilities before they discharge to the storm drain (treatment is for sediment and metals and consists of sedimentation and various media filters). The Northern and Eastern facilities were re-roofed 4 or 5 years ago and are almost completely protected from rain. Runoff from uncovered areas of the eastern facility (and Poplar Street?) is treated and reused onsite for the furnace.	
<b>TYPE OF POTENTIAL PCB SOURCE (consider current and past use; check all that apply and describe in space given below)</b>	
Electrical applications/utilities (transformers, capacitors, appliances, televisions, fluorescent light ballasts, motors, etc.)	Y
Hydraulic fluids (lifts, die-casting machinery, etc.)	Y
Plasticizers (sealants, caulk, PVC, polyurethanes, polycarbonates, etc.)	Y
Evidence of outdoor hazardous material/waste storage areas (tanks, drums, scrap materials, e-waste) If so, can they be identified?	Y
Recycling/scrap yards (auto dismantlers)	Y
Outdoor burning or combustion	N
Manufacturing industries with heat transfer systems (e.g., chemicals, high-tech, asphalt, metal products, etc.)	Y
Building demolition, renovation or window replacement site/recycler	Y
Gas compressors/stations/pipelines	N
Miscellaneous (rail road lines/yards, coatings, printing inks, pesticides, stressed vegetation, etc.)	Y

Occasionally people sell them electronics (TVs, CRT, etc.), batteries, ballasts, mercury switches, refrigerator motors, capacitors, and other components. They use sealers on it that CASS tries to remove. CASS requires that car parts are drained but often the parts contain fluids. Excess fluid is drained and stored in secured barrels. A waste motor oil disposal service is provided to customers to reduce illegal dumping. CASS has many large vehicles that use hydraulic fluids. There are old rail lines in the right of way (on Poplar) and a few tracks on site. There is a regular illegal dumping location at the corner of 26th and Peralta Streets (southeast corner).

**POTENTIAL FOR SEDIMENT EROSION FROM SITE/AREA TO OCCUR (check all that apply, describe in space given and include in attached sketch)**

Property contains open area(s)/driveway(s)/parking lot(s) not paved, partially paved or in <u>poor condition (circle)</u> which applies)	Y
Vehicle activity to/from site on unpaved areas	Y
Does the property border streets without curbs, berms or other containment?	Y
Vacant or undeveloped lot	Y
If waste (construction/hazardous materials/etc.) is generated on-site, is it kept in a dumpster or other container? If so, describe condition, if it is covered, and if located by a storm drain inlet or unpaved area.	Y

99% of the facilities are paved. The western area's paving is severely damaged and has lots of exposed sediment. Vehicles traveling through this facility could track sediment to the ROW; however, they have to cross a large paved area where most sediment will likely fall out before reaching the street. All facilities are bermed, curbed or covered. Most exits have signs of tracking. The western facility is boarded on its west end by a vacant lot which is Campbell Street (no vehicle access). There is a small unpaved parking lot adjacent to the eastern facility, but it is highly unlikely that there is any transport of sediment from CASS to that lot. All generated waste is bailed, kept in dumpsters, or drums. The eastern side of Union Street does not have curbs (on the other side of the street from CASS).

**STORMWATER INFRASTRUCTURE AND HYDROLOGY (if any of the below apply to this site, include in attached sketch)**

Are stormwater treatment practices present? If so, describe.	Y
Are private storm drains or inlets located at the facility? If so, describe.	Y
Has storm drain infrastructure identified in GIS been located on property? Any infrastructure not previously identified?	N
Is there sediment accumulation at edges of property, curbs, catch basins, or elsewhere? If so, describe.	Y

Each of the facilities have trenches at the main exits and have curbs lining the remainder of the perimeter. The Central and Western facilities drain to a filtration system comprised of a Clara gravity retention pond/oil and grease, a Retenu Sediment Settler, and finally a filtration system with oyster shells, GAC, Silica, and Sand Filters of different coarseness. Sediment waste is extracted annually by a vector truck and manifested. There are many areas in the public right of way that have moderate to heavy sediment in the gutter and apparently in the inlets.

**QUESTIONS FOR OWNER/CONTACT (include dates when possible)**

1. What type of business(es) did the previous tenant(s)/owner(s) have, and when did they exist? CASS moved into the 4 facilities between 1974 and 1989. The sites have been used by many different companies. Here are a few: Oakland Scavenger (Trash), Associated Metals, Pioneer Saw Dust.
2. Are PCBs in use now or have they been in the past on this facility? Have there been any spills or leaks? If so, when? PCBs are stored in their Universal Waste Area in the Central Facility. There have not been any spills. Historical use of the property suggests use of PCBs.
3. Have there been any building fires in the past? Major exterior renovation or window replacement? If so, when? Before CASS yes there have been fires. Roof has been replaced, not the windows.
4. Does the facility have a power substation onsite? In the past? If so, when? No.
5. What type of business was on the neighboring properties (if applicable)? MANY: A cement plant (now closed), Cypress auto wreckers, Giampolini (vacant lot now), woolworth paint co., west coast soup co., a refrigeration company, many metal companies. This information is provided in the SWPPP.
6. How are the ground surfaces maintained (hosed, swept)? How is the material disposed of afterwards? They sweep the yard daily with a mechanical sweeper and push a magnet around the perimeter of the facility many times each day. Sweeper solids are disposed as municipal waste unless the material contains oil in which case it is manifested.
7. Are vehicles used on-site? If so, what type, and is there potential for dirt to be transferred off-site? Yes. Forklifts, excavators, Wheel loaders, private and large roll off trucks.

## Photographic Record

Project: CW4CB Task 3

Project Number: WW1414

Site Name: Custom Alloy Scrap Sales (CASS)

Site Location: Oakland, CA

Photograph 1

Date: 6/14/2012

Observations:

View:

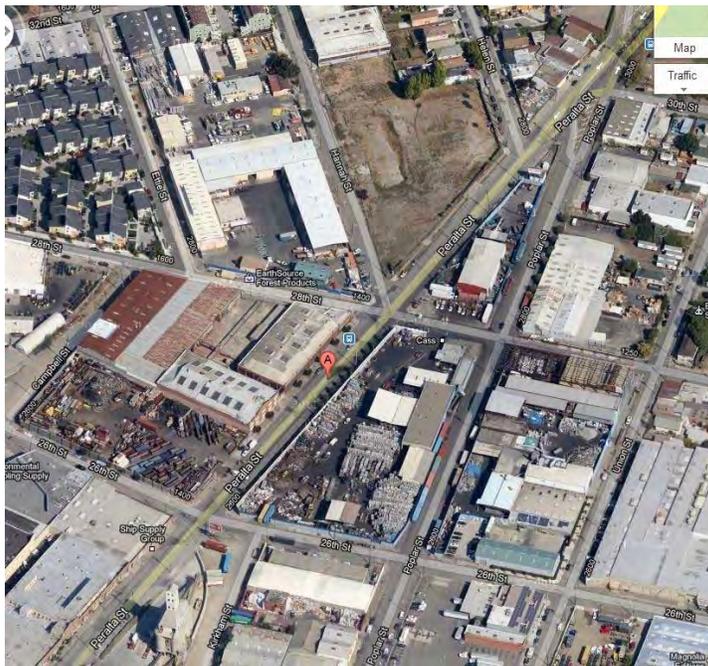

Plan view of Custom Alloy Scrap Sales (CASS).

Photo shows:

The four CASS facilities.

Aerial Photo Source:

Google Maps, 2012

Photograph 2

Date: 6/14/2012

Observations:

View:

Street view facing south.

Photo shows:

The entrance to the Central CASS facility along 28<sup>th</sup> Street. Independent scrap metal sellers line up along 28<sup>th</sup> St and Peralta St.

## Photographic Record

Project: CW4CB Task 3

Project Number: WW1414

Site Name: CASS

Site Location: Oakland, CA

Photograph 3

Date: 6/14/2012

Observations:

View:  
Facing west in the West Facility.

Photo shows:  
Heavy machinery tearing and sorting large scrap metal. Note the significant amount of exposed dirt due to heavy machinery disintegration of paved areas in the west facility.

Photograph 4

Date: 6/14/2012

Observations:

View:  
Street view facing south between the Central and East Facilities.

Photo shows:  
Poor road conditions along Poplar Street.

## Photographic Record

Project: CW4CB Task 3

Project Number: WW1414

Site Name: CASS

Site Location: Oakland, CA

Photograph 5

Date: 6/14/2012

Observations:

View:  
Facing east in the east facility.

Photo shows:  
The small roofless area along the East Facility. Most of this area slopes inward allowing stormwater to be captured onsite. A small ridge in the paved area sends some of the runoff to the street under the blue fence.

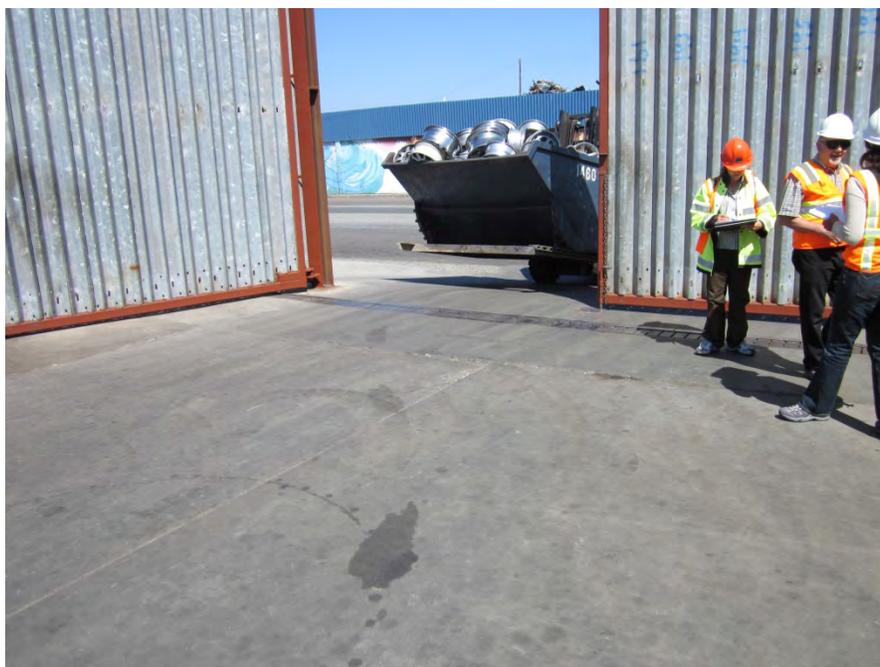

Photograph 6

Date: 6/14/2012

Observations:

View:  
Facing East to Peralta Street.

Photo shows:  
A front loader hauling car rims into the west facility.

## Legend

### Pollutant Source Areas

- Transportation/Shipping
- Metals Recycling
- Recycling Drums
- Automotive Recycling
- General Waste Recycling
- Metals Manufacturing
- Cremation Facility
- Self Reported PCB Source
- ◆ Additional PCB Site (Envirostor)
- Pump Station

### Sampling Site PCB Concentration (mg/kg)

- ▲ < 0.1 (1-25th Percentile)
- ▲ 0.1 - 0.3 (25-50th Percentile)
- ▲ 0.3 - 1.0 (50-75th Percentile)
- ▲ >1 (75-99th Percentile)

▭ Municipal Boundary

### Land Use

- ▭ Potential High Opportunity
- ▭ Railroad Property
- ▭ Old Electrical Property

There are 1339 Potential High Opportunity parcels outlined in red.

**BASMAA Monitoring/POCs Committee  
PCB Source Property Screening Criteria**

**BASMAA Monitoring / POCs Committee  
PCB Source Property Screening Criteria**

*The purpose of this document is to describe the criteria that the MRP Permittees are using for preliminary screening of potential PCB source properties (identified as “Old Industrial” land use and other significant historical land uses) into high, medium, or low likelihood to be a source of PCBs into the storm drain system. See flow chart for additional PCB implementation planning steps.*

**Starting Place:**

- Assume that all parcels listed in the database are Moderate Likelihood Sources unless there is a reason to change it.
- If a parcel is borderline between Moderate Likelihood and Low Likelihood, it is preferred to keep the Moderate designation.
- If a parcel is borderline between Moderate Likelihood and High Likelihood, it is preferred to keep the High designation.
- The High Likelihood Source parcels will be revisited and may be reassigned with future efforts, but parcels with Moderate and Low Likelihood designations are unlikely to be revisited.

**Change to High Likelihood Source if:**

- The parcel has significant unpaved areas.
- The parcel has rail lines that have not been paved over.
- Site is dirty, poorly maintained, or the pavement is deteriorating.
- The parcel has a history of PCB related activities. These include Metals Manufacturing, Transportation/Shipping, Cement, Recycling (metals, auto, waste, drums), Cremation, Electrical, or Remediation Site (Envirostor, GeoTracker, EPA, or other database). Many of these are identified as ‘Source Points’ in the KMZ/GIS file.

The following factors may not be sufficient on their own, but combinations of these observations can lead to a High Likelihood Source designation:

- Presence of containers/trucks/debris/stockpiling/machinery/equipment (especially hydraulic equipment).
- Adjacent monitoring that indicates a PCB concentration  $\geq 0.5$  mg/kg.
- Proximity to remediation site (Envirostor, GeoTracker, EPA).

**Change to Low Likelihood Source if:**

- Site redeveloped after 1980 or is currently undergoing redevelopment.

The following factors may not be sufficient on their own, but when all or most of the following conditions are met, the site may be designated as Low Likelihood Source:

- Site including pavement and rooftop are exceptionally well maintained.
- No outdoor storage or operations are occurring on the site.
- No unpaved areas besides well-tended landscaping occur on the site.
- No indication of industrial activity on the site (e.g., clearly commercial or office building).

## PCB Source Property Screening Process

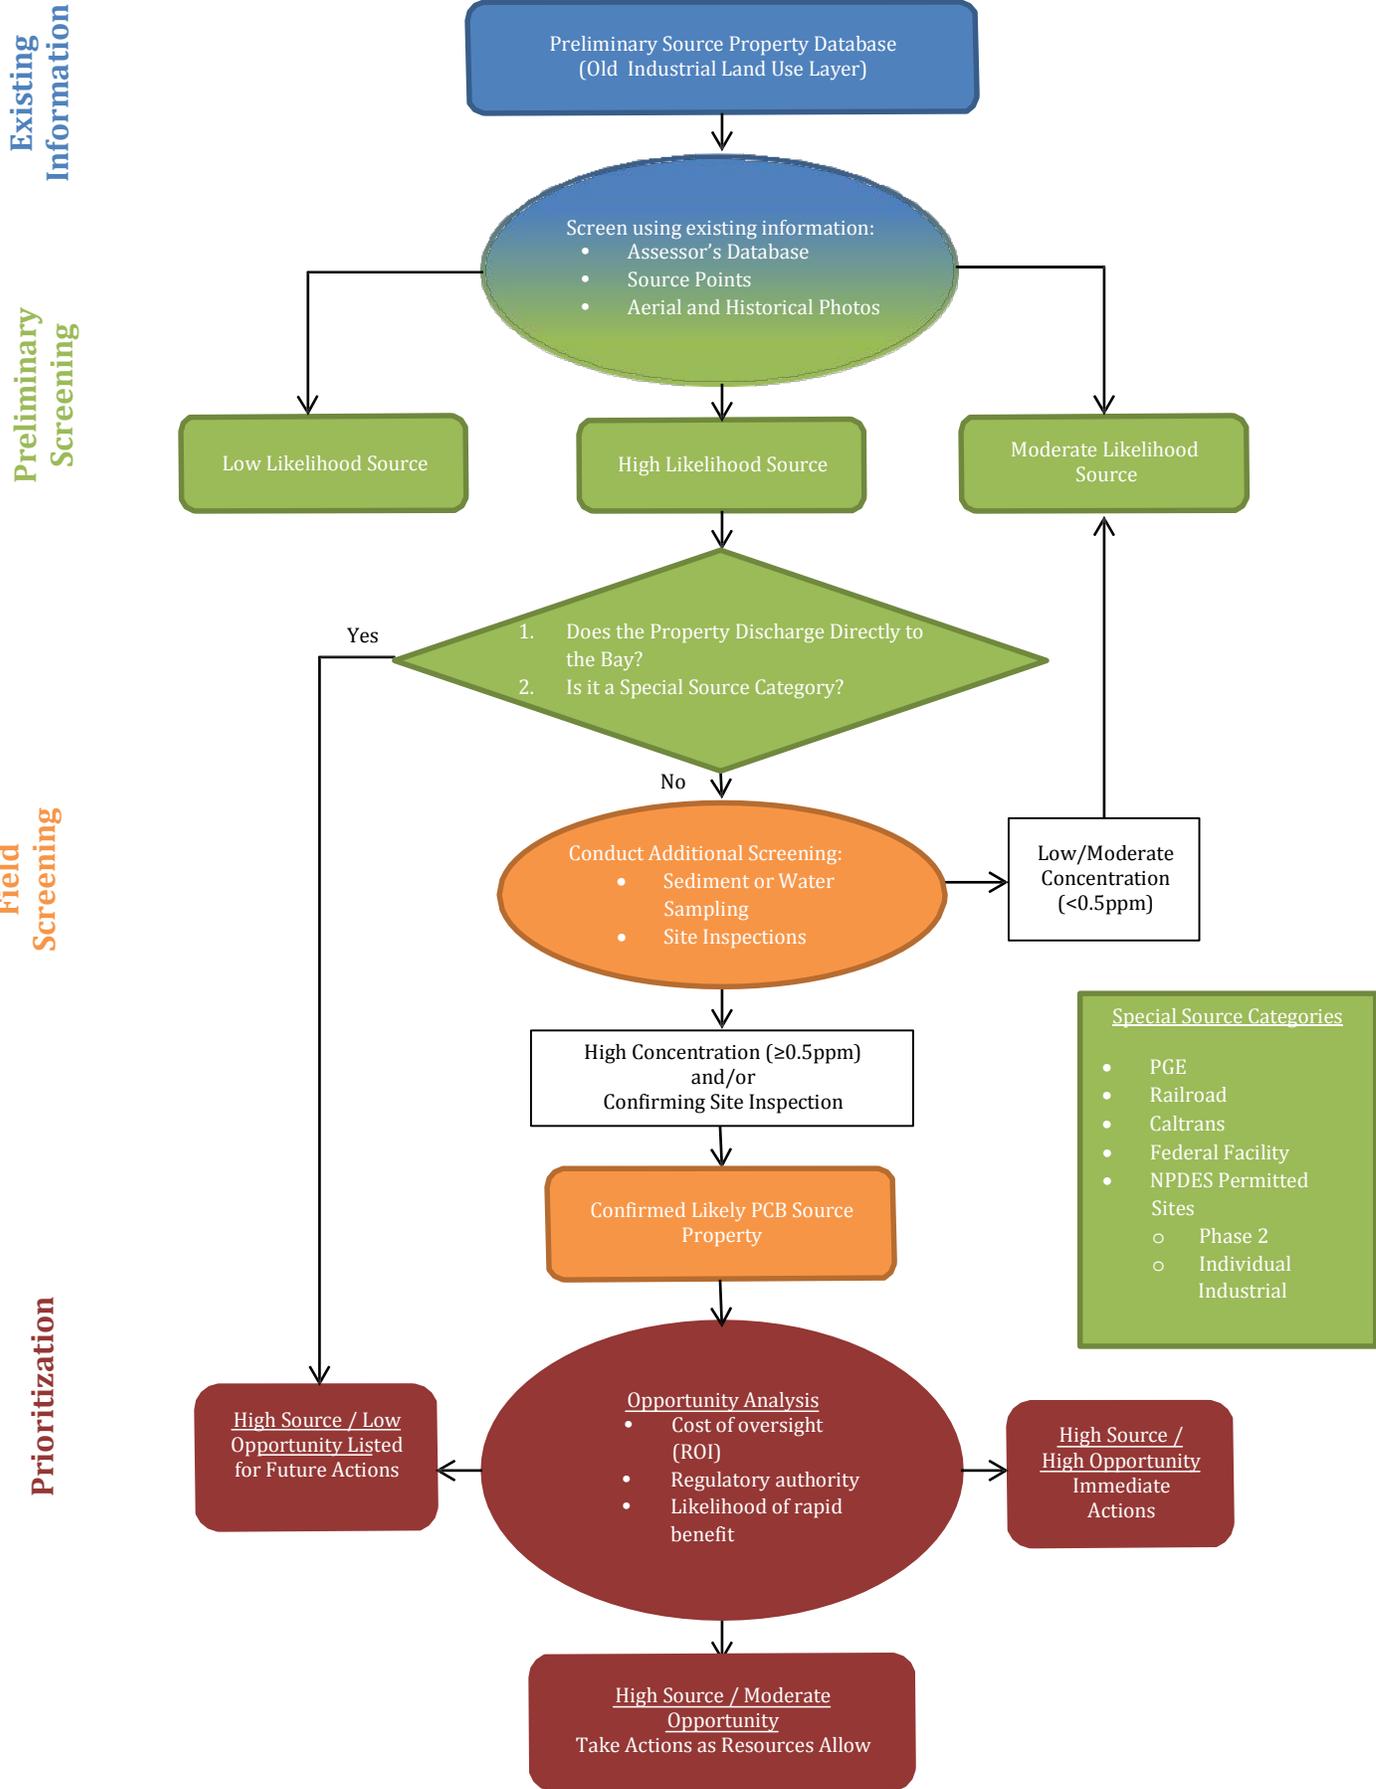

### List of Terminology:

1. High Likelihood Source - areas mainly within Old Industrial and other significant historical land use areas with suspected PCB sources that could be transported to the MS4.
2. High Opportunity Areas - These areas provide relatively high opportunity for cost-effective controls.
3. High Source Areas – areas with confirmed relatively high concentrations of PCBs in street dirt or sediment removed from the MS4 ( $\geq 0.5$  ppm) and/or in stormwater runoff.
4. Moderate Likelihood Source - old industrial areas that are not High Source Areas and have not been redeveloped and old urban land use areas (likely excluding residential, school, and university land uses).
5. Moderate Opportunity Areas - These are areas where additional PCB load reductions could be achieved as the urban landscape is potentially redeveloped and/or retrofitted with Green Infrastructure, providing the opportunity for integration of PCBs/mercury load reductions with other drivers and funding sources such as transportation projects.
6. Moderate Source Areas - areas with moderate concentrations of PCBs in street dirt or sediment removed from the MS4 ( $< 0.5$  ppm) and/or in stormwater runoff.
7. Low Likelihood Source - newly urbanized areas, redeveloped areas, open spaces, and parks where PCBs were unlikely to have been used, transported, or recycled.
8. Low/No Opportunity Areas – these areas provide low or no opportunity for cost-effective controls.
9. Low Source Area - PCB concentrations in street dirt, sediment removed from the MS4, or in stormwater runoff from these areas are near, at, or below analytical detection limits.
10. New Urban Land Use - urbanized areas that were developed after 1974.<sup>1</sup>
11. Old Industrial Land Use - land use areas that were industrialized between the late 1920's and the late 1970's, the timeframe when PCB and mercury production was the greatest in the U.S.
12. Old Urban Land Use – urbanized areas that were developed prior to 1974.<sup>1</sup>
13. Other Significant Historical Land Uses - PCB sources are generally associated with areas where equipment containing PCBs was transported or used and facilities that recycle PCBs or PCB-containing devices and equipment. These sources include current and historic metal, automotive, and hazardous waste recycling and transfer stations; electrical properties and power plants; and rail lines.

---

<sup>1</sup> 1974 is being used as a reasonable approximation of the date separating Old Urban and New Urban based on available GIS layers, although PCBs were generally available in building materials through 1977-1978.

**San Leandro Bay Watershed: Core Swath Area**

# San Leandro Bay Watershed: Core Swath Area

## Legend for ACCWP PCB source mapping

- Magenta shading = Old Industrial parcels, per EOA/Geosyntec analysis
- Circles show existing street and stormdrain sediment samples, PCB results
- Triangles show existing cleanup sites per USEPA kmz file
- Dotted Circles = potential sources inventory by SFEI and EOA
- Blue lines = boundaries of major watersheds per Oakland Museum maps
- Flow lines in red = engineered channels; tan = underground culverts

Yellow solid outline = “core swath” enclosing parcels to be prioritized for screening  
 Yellow dashed outline = “southern swath” of parcels tributary to Elmhurst Creek – need to clarify how much of the watershed to include and relative priority levels within it
