Brief Description of Project:

Project Description: The purpose of the Project is to improve traffic operations on I-10 in San Bernardino County, to reduce congestion, increase throughput, enhance trip reliability, and accommodate long-term congestion management of the corridor for the planning design year of 2045.

Project Activities: Project activities will permanently impact 0.414 acres (3,385 linear feet) and temporarily impact 6.268 acres (7,425 linear feet) of non-wetland waters of the U.S./State. The proposed drainage systems will extend the existing storm drains/cross culverts located in the freeway, cap existing inlets and place new inlets along the project corridor. Existing regional flood control facilities located within the project limit includes I-10 Channel, Etiwanda Creek, San Sevaine Channel and Rialto Channel.
